## **DISCUSSION**

For the year ended June 30, 2002, the City of Pasadena is required to implement GASB Statement No. 34. GASB 34 is a new accounting standard issued by the Governmental Accounting Standards Board (GASB) that dramatically changes the format of the

financial statements of local governments. Highlights of the reporting changes are as follows:

- A new section called Management's Discussion and Analysis that explains and puts into perspective the data contained in the financial statements.
- Two new government-wide financial statements were added providing information in summary form for the City of Pasadena as a whole: the Statement of Net Assets and the Statement of Activities.
- All assets (including infrastructure) and liabilities of the City have been reported in these two new government-wide financial statements.
- The accrual basis of accounting has been used (depreciation reported, etc.) in the government-wide financial statements.
- The State of Activities has been formatted in a way that highlights the degree to which the programs of the City are self-sustaining or require a draw from the general revenues of the City.
- The remainder of the basic financial statements are focused on the major funds of the City. The two major governmental funds account for approximately 70% of the governmental fund revenue of the City, while the four major enterprise funds account for nearly 97% of the enterprise fund revenues of the City.

#### **FISCAL IMPACT**

There is no fiscal impact as result of this report. Particular attention should be paid to the CAFR transmittal letter and Notes to the Financial Statements.
