Update on the

## Secondary Mathematics Intervention Program

Teachers were trained in Algebra and Pre-Algebra through AB466. Project leaders for the program have been selected. The district is applying for a mathematics & science grant to potentially support the professional development and cost of the proposed interventions. A tentative proposal was presented to the Board in February. A revised copy of the plan will come before the board in March for review. The elements will be prioritized to assist with budgeting of this much needed intervention.
