Re: Residential Refuse Collection Fee Increase

11/13/07

Dear Council,

Although the fee increase may be necessary for the increased dumping fees at Scholl Canyon landfill, I urge the council to reduce the increase of the Residential Refuse Collection Fee by insuring that only the older diesel powered trash vehicles that need replacing are actually replaced. To get rid of vehicles that still have a useful life just for the sake of change is wasteful. I certainly agree that as the useful life of these vehicles run out, they should be replaced with less polluting vehicles of alternative fuel technology.

I therefore urge the Council to reduce the rate increase to reflect the delayed replacement of vehicles that still have a useful life.

Sincerely,

George MacPherson

To Whom it May Concern;

I am protesting refuse increase. I pay too much now. Some other method should be sought to cover costs. I'm on a fixed income. Recycling is a joke. It costs extra for trucks to pick up little I have provided jobs for people all over town to fill out carts going through our containers. Some people have stopped recycling & just put it in the green cans. It needs to be adjusted. Eliminate the trucks mix everything then at central place recycle.

Sincerely,

Alma Stokes
