TRFF PROTECTION PLAN

TREE PROTECTION GUIDELINES

The accompanying landscape architect (Fai Huang, Dec 15, 2008) has conducted a field survey of the site and has identified trees to be protected during construction. The following are highlights of the report:

The site plan is the submitted site plan. The drawings will show an irregular shape that follows the contour of the tree's branches as seen from overhead. For purposes of the Root Protection Zone, the drawings will show the Root Protection Zone. All work conducted within the Root Protection Zone of a tree shall be limited to the removal of dead limbs, or removal of limbs unless an air-spade is utilized. Trunks in the Root Protection Zone should be protected with a root collar. Information regarding air-spades is available from City Staff.

Five-foot high protective chain-link fencing should be installed around the perimeter of the Root Protection Zone. Location of fencing is graphically defined on this plan.

TREE INVENTORY FOR: 229-247 S. MARENGO AVE., PASADENA, CA.

TREE #	SCIENTIFIC NAME	COMMON NAME	QUANTITY	HEIGHT (FT)	SPREAD (FT)	PROPOSED STATUS	PROTECTED	STREET TREE	SPERMATOPHYTES	NATIVE TREE
