Supervisor Barger spoke on the project and provided information on the County's plan to hire a consultant and work with South Coast Air Quality Management District (AQMD) to incorporate air monitors during the sediment removal project, and noted the formation of a community advisory board to work through impacts and issues that occur as a result of the work. Vice Mayor Kennedy requested that the County also continue to monitor soil samples for evidence of carcinogens in the Arroyo Seco. He expressed concerns with the oversight and transparency related to project, as well as the County's decision to use harmful herbicides, such as Roundup, that are glyphosate based as part of work to remove evasive plants.

In response, Mr. Pestrella stated that he would provide information on weed control efforts to the City Council.

Councilmember McAustin suggested that the County utilize electric vehicles whenever possible during the Devils Gate Dam Restoration project to minimize air and noise pollution.

Councilmembers Masuda and Gordo spoke on the need for City and Los Angeles County staff to test water samples within the Arroyo Seco to ensure the water table is safe.
