CAUTION: This email was delivered from the Internet. Do not click links or open attachments unless you know the content is safe.

City Council,

Thank you for considering the issue of the planned demolition of 980 S. Los Robles Ave. I understand that the relevant loophole in our preservation ordinance is an ongoing concern for many residents, potentially impacting many historically significant properties around our City. However, I want to highlight this specific address because, according to the last Historic Preservation Commission hearing, it is urgent due to the pending expiration of the 180-day delay that was voted on in June. That leaves just 4-5 weeks for you to TAKE ACTION before the new owners have the right to demolish this well-preserved 1916 home (deemed eligible for Landmark status) to rubble, per the current zoning code. Like so many fellow neighbors, I hope this does not happen.

Here is a brief description of the home:

980 S. Los Robles Avenue is a historically significant Colonial Revival bungalow by architect Raymond M. Hobbs, built in 1916. Hobbs worked for Cyril Bennett's office during the pre-WWI years when the City of Pasadena was undergoing its main early development. Several houses similar to this design were built in 1914-15 by Bennett's office, most likely with Hobbs' drafting and design input. These include 1036 N. Chester Ave., 1029 N. Hill Ave., and 950 N. Los Robles Ave. (now altered). His design of the 'eyebrow' dormers and Tuscan columns were his signature look. Only a few of his houses remain.

The porte-cochère is another character-defining feature of this 4-bedroom, 2-bathroom home. The interior has its original hardwood floors throughout, solid mahogany doors, original curved windows and built-ins throughout. It was owned by the same family for the past 50 years.

I support City staff's identification of the need to strengthen our historic preservation ordinance. I appreciate that they are bringing the urgency of the situation to the attention of City Council on November 18th, and like many fellow residents, I applaud their intention to ensure there is no demolition of historically significant homes without full CEQA review, including an EIR. I hope this and other houses can be saved.

Thank you.

CAUTION: This email was delivered from the Internet. Do not click links or open attachments unless you know the content is safe.

Dear Mayor and City Council Members:

I support the proposed temporary moratorium on the demolition and alteration of historic properties so that the Planning staff can review current city ordinances and recommend changes.

I urge you to vote for the proposed moratorium in order to develop better protections for our historic homes and neighborhoods.

Sincerely,
Edward Fisher

As a 30 year resident of Pasadena I urge you to consider the ramifications of this current issue under consideration. One of the huge treasures of this City is its historic and vulnerable treasure of structures which are irreplaceable - both craftsman style, and mid century. Once gone they will be lost forever.

Tread carefully for the sake of Pasadena, it's history and it's future.

Mary Lewis
1860 Braemar Rd.
Pasadena
