I work in a high risk environment as a hairstylist, in Pasadena. In an often crowded salon, in close proximity to people. I can't afford to call off work, but am very concerned for my health. The salon owner is refusing to shut its doors. My friend who works at a salon in LA just closed its doors, because they're unable to practice social distancing, and the business is a non essential gathering. PLEASE help close salons during this pandemic. Our health and control of the virus depends on it.
