

412	Jeff Neff	90029	It is vitally important that native plants are allowed to grow without competition from invasive plants. It is for the health of the Arroyo and the neighborhood that the non-natives be removed.
413	Paulena	91411	
414	Stacie Meyer	90065	I support the rehabilitation of habitat in the lower Arroyo Seco . To protect the character with only native plants and trees . This is critical to a longer term need for preserving native habitat not just in Southern California.
415	Ani Singh	91711	
416	Juliana Woodhead	91103	Having grown up in Pasadena, I have deep affinity for the Arroyo Seco and would love to see it restored by removing non-native plants and replacing them with native plants.
417	Jackie L.	90037	I stand with the Arroyo Seco Foundation (ASF) in removing invasive and non-native plant species from this project. As non-indigenous people who have settled in this land and now reckon with the effects of climate change brought on by our ecologically illiterate actions we must turn to our Native American peers who have generations of knowledge about how this land must be cared for. To keep non-native trees and plants would be to further exert our harmful, colonialist practice on this community and their home. In the spirit of what this project is meant to achieve, I call on you to decolonize your actions and prioritize the indigenous perspective, which inherently puts biodiversity first.
418	Michele Lacher	91011	This initiative will help preserve the beauty and charm of the natural areas in Pasadena. Additionally, it's the right thing to do for the environment. It also provides a good opportunity to educate others about our natural vegetation.

420	Valerie Antillon	91101	Please protect the natural character of the Lower Arroyo and replace the inappropriate, non-native trees.
421	Jenny Steinbeck	91020	
422	Armen Kerasimian	91208	Please spread this wonderful idea to neighboring cities.
423	Noel Rhodes	90042	I support the effort to enhance the Arroyo Seco by planting native plants to replace non-native plants.
424	Hannah	91601	
425	Marcelle Heimdal	91361	This restoration work is critical to the region, especially with the negative effects of climate change and reduction of native habitat. These restored areas are a great benefit to the community in providing more drought and fire resistant spaces, as well as adding beauty and enriching people's lives.
426	Traci Larson	90065	As an LA County resident living near an even lower section of the Arroyo Seco riverbed, I benefit greatly from the work being proposed here. Please help the wildlife in my backyard by proceeding with this native habitat restoration project.
427	Rachel Whitt	92674	I grew up in Pasadena and lived by the Arroyo Seco. I do habitat restoration in Orange County where I now live. This is a wonderful plan.
428	Milutin Marich	91107	I am very familiar with this particular area - casting pond, archery area. and jogging path and support the restoration.
429	Lauren	90026	
430	Cade Stewart	91791	The importance of supporting native plant life and the habitats they foster should be underscored at this time more than ever when considering the role nonnative and

invasive plants hold in altering water and fire regimes. Such plants can outcompete native plants for resources and dry out the surrounding area, while making the area more susceptible to fires and doing nothing for the local fauna. The removal and restoration of the area they occupied is of immense benefit to California's wildlife and biodiversity, even moreso important as such are constantly under attack from botched proposals, climate change, and unsustainable housing and industrial developments

431	Peter Braun	91105-1447	Please allow the non-native trees to be removed.
432	Brian Queen	91106	This is a critical time for the City of Pasadena to work toward restoring native habitats, particularly in the Lower Arroyo Seco and other sensitive natural environments. Given the flammability of some of the introduced species such as Australian Gum Trees, among others, this is an appropriate and beneficial way to adapt to the devastating effects of climate change in our area.
433	Gina DiMassa	91001	Native trees have a benefit to our local biodiversity. Non native trees are not only much less beneficial, they are a problem. These non native trees cost tax dollars to control invasiveness, become falling dangers, are a more flammable fire hazard, promote non native insects and birds that compete with native ones. These lessons we have learned, and I applaud measures to be more the way California evolved to be. Nature is always teaching us.
434	Timothy Neufeld	91105	
435	Karen Suarez	91016	
436	Mary Brooks	90026	
437	WILLIAM KUEHN	91105	Please remove the non native trees and plants. We want to leave the Lower Arroyo a more vibrant environment with good balance of nature for our succeeding generations. A

well funded and conceived program of insuring the survival of the new native plants is in place.

I support the project to plant native plants and trees along the Arroyo Seco for a more sustainable and natural environment.

I support this petition. Native plants are vital for the area to maintain balance and to keep the area sustainable for years to come.

Planting native species and removing invasive nonnative species is key to helping our land become resilient in the face of climate change and destruction. This is a necessary and vital project for Pasadena.

Please support the native species restoration project in the lower arroyo -- we use this area for recreation weekly and enjoy the space, however the habitat is severely damaged and could benefit the community to be greatly upgraded. Furthermore, habitat destruction via non-native species is epidemic to our mediterranean climate and any efforts to restore species diversity is important.

We need to Go Native!

The Arroyo Seco is a wonderful place to visit. Restoring a native habitat would be a very positive step in maintaining a sustainable environment to support the local wildlife.

438 David Cline 91042

440 Kirby Cline 91042

441 Paloma Avila 91001

442 Dee Sharon 90041

443 Dee Sharon 90041

444 Anne Mello 91107-3038

445 Andrea Davis 91106

446 Marsha D. Fowler 91001

447 Perren Carrillo 90019

448 Rex A Mayreis 91001

449	Eric Flanagan	91106	This is sorely needed! Also need a bike path that connects all the way to the LA river
450	Jonathan Reed Brown	91016	As a certified arborist, Chinese elms are an invasive species and do nothing for the native habitat. The non native plants in this area should be removed and the city should move ahead with the restoration project. I am the great grandson of Joshua Reed Giddings, a founding pioneer of Pasadena and Altadena. I would like to see this great area restored to it's natural state.
451	Kjersti McDonald	66713	
452	Blaine Cavena	91105	
453	Patricia Brown	91016	I am in support of this restoration project. My husband's family has lived in this area since the 1870's, and I know they would love to see this area restored to it's original natural beauty.
454	Amy Nettleton	91030	I am a landscape architect and use the Lower Arroyo Seco regularly. I fully support this effort to restore a more natural plant community and habitat to the area.
455	Marjorie Hunt	90042	In this time of climate change and fires, it is more important than ever that we promote out natural ecosystem and bring back plants that are well adapted to this area. Please support this project and support native plants.
456	Barbara Readick	91195	
457	Noel Rhodes	90042	I support the effort to enhance the Arroyo Seco by planting native plants to replace non-native plants.
458	Steve Messer	90041	
459	John Latta	91106	Ibsuopoty

460	Debby Brown	91016	I, along with my family, am in support of this restoration project. We have been hiking in the Monrovia/Sierra Madre/Pasadena area since me and my siblings were young, and all five of us stand with the restoration project.
461	Jay	9177p	Goodluck <3
462	Pat Wolff	911040GBac5	I think California native plants should be planted more often to support the native birds and insects. Too msny people have no appreciation for our own natural plants!
463	Fred Schwarzenbach	91105	
464	Eve	91001	
465	Holly Nava	90042	Fully support this project to revitalize the Lower Arroyo and add to the biodiversity of the area!
466	Benjamin Brown	91016	My name is Benjamin Brown. I hold multiple horticultural certificates and degrees, a bachelors degree in environmental biology, and a master's degree in regenerative studies from California Polytechnic University, Pomona. It is imperative that these non-native, invasive trees be removed, and that we move ahead with this restoration project. Unfortunately I was made aware of this petition very close to the deadline to sign, so I don't have time to leave the comments I would have preferred to give. If desired, I can be reached for further comment at benjaminb@cpp.edu or via my cell phone at (626) 848-7760.
467	Roger Smith	91001	
468	leila c	91767	i support habitat restoration! returning to native ways of preserving the land is essential which the california fires have only proven

469	Jason Schoettlet	91105	We support the project, which promises restoration of a key Pasadena natural habitat and open space.
470	Ximena Gil	90031	I plead with the City of Pasadena to restore their sense of place by restoring native vegetation in order to better help wildlife, bring community together, and restore biodiversity
471	Tom Mills	91104	As a 30 year Pasadena resident, and home-owner, I join in to urge the City of Pasadena to support this important habitat restoration project. It will make our already beautiful and esteemed city more so.
472	Paul Yocum	91107	Looking forward to it!
473	Michael Hocom	91007	Restoring native habitat is absolutely the right thing to do.
474	Eric Matthew Brown	91016	Me and my uncle hike in the San Gabriel mountain range and he has told me a lot about the Arroyo. I think this habitat restoration project is a good thing, and I support it.
475	Bruce D Schwartz	90042	I support the City of Pasadena's plan to remove inappropriate, non-native trees from the Lower Arroyo Seco 100%.
476	Sarah Schoettler	91105	I strongly SUPPORT this initiative.
477	Doug Molitor	91722	I still hike in the canyons of my hometown, Altadena. It's time.
478	Stephen Wright	90012	I would like to voice my support for replacing invasive trees with native trees, plants and wildflowers indigenous to the Lower Arroyo Seco where the non-natives were removed. This is in an important issue to me!
479	Sharbel Avellan	90031	Habitat restoration is key to support the ecosystem
480	Margaret Arnold	90042	

481	Arnheim	91105	
482	Clifford Green	91107	
483	Nancy T	91803	
484	Annette Drey	91106	I believe in restoring the Arroyo to its native state. It would really enhance the area to those of us who use it regularly.
485	Alex Allen	92691	Please install native plants to reduce the impacts of development. Non-native plants do not support the habitat. We need native plants in order to have a healthy bird population, and so much more.
486	Annika H	91001	We support not just the removal of non-native trees and invasive plant species but of a restoration of native plants and habitat through the Lower Arroyo.
487	Keiko Miller	90065	It takes generations and lots of patience to re-wild previously altered areas by humans after their imagined ideals. If there is any way I can help as a senior citizen, please help involve me. We could be powerful in number! Sincerely, Keiko
488	Anita Sohus	91011	
489	Marilyn Koo	91104	It's so important for our local environment as well as global environment as a whole to keep indigenous plants in their proper environment! It benefits the animals, people, and resources that goes into the area. We are already in a climate crisis, we must retain and protect native environments wherever we can
490	Ron Manzke	91106	I am in full support of this project.
491	Jessica	91104	Restoring native landscape should be a top priority because they support our local ecology and general beauty

492	Blair Manzke	91106	of the area. This should be a top priority.
493	Rick Sill	91106	
494	Micayla	92322	
495	Robin Newquist	91105	Native plants please
496	Isabelle Gedigk	91501	
497	Isabella aleman	90806	
498	PJ Roden	90042	I believe it is appropriate to restore the Arroyo to its native habitat.
500	Jasminne Monique Morataya	91702	I don't understand what the resistance is to this proposal if the increase of native plant species and removal of invasive ones is a boost to biodiversity in the area. It also looks a lot nicer.
501	Elizabeth Kay Virata Davis	91765	I support the protection of the natural character of the Lower Arroyo.
502	John Smith	90042	We need as many locally native plants in the ground at Hahamongna as possible!
503	Jane Pojawa	92346	I lived for most of my life near the Arroyo Seco. It is one of the most accessible wildlife areas for LA County and I strongly advocate for its restoration so that it can be enjoyed for generations to come.
504	Sharon C Weisman	91214	There are plenty of Canary Island pines in private yards, including a couple 90-plus foot tall ones in our yard, no need to have them in a native habitat on public land.
505	Cornelia Minkey	91103	Chinese Elms are not suitable for the Lower Arroyo. Their branches need pruning regularly. Proposed restoration is

506	Rebecca Lieb	90031	long overdue. Revitalize and rewild our urban ecosystem!
507	Sashiko Yuen	21060	
508	Sashiko Yuen	21060	
509	Ronnie Siegel	91011	I am a landscape architect and believe we should be replacing non native plants with native species in the Arroyo.
510	FELICIA IRENE REINERT	90042	
511	Mitra Khayyam	90031	I support this project and planting native trees in Southern California.
512	Kathleen Craig	91768	
513	Aracely Garcia	91766	
514	Nial morgan	90038	
515	Cate River	91103	

516	Ruby	91001	Utilize your funds to create something worthwhile, like diverse ecosystems., make it so that in dozens of years from now people will look at Lower Arroyo and say "wow, someone really made an excellent plan here, someone really thought this through". Walking around neighborhoods of downtown Pasadena I see homes with lawns, and other homes with huge native trees and native gardens and I think the same thing when I see those years "wow, someone really valued native plants, someone had the forethought." The communities and homes with native plants trees and animald and birds is the kind of place I would invest in and want to be. Make this harmonious integrity show throughout the park also!
517	Anna Cook	91711	I support engaging in habitat restoration of the lower arroyo!
518			
519	Amy bernstein	90064	
520	Amy bernstein	90064	
521	Mary Hayden	91105	Pollinators will be attracted to the natives, ultimately increasing a diversity of animal and plant life. Natives are good for the environment!
522	Alexander Diaz	91103	
523	Laura Baetscher	91024	A diverse and healthy landscape of native flora will is far healthier for the land than non-natives, uses less water, and provides more shade for animals and humans that use the land. Additionally this project will support this community and the people that frequent it in our journey towards climate resilience!
524	Katherine	92881	

525	Christine Atkinson	90027	We are living in a time of extinction. Restoring the habitat that we can to support the ecosystem and the food change is incredibly important.
526	Elizabeth Tremante	91001-3843	After seeing the number of birds and animals (like toads) trying to leave the dig site, or trying to live in the dig site, it is imperative that we plant natives to create a balanced healthy ecosystem. We need to care for all the creatures in the wildlife corridor, and we have an amazing opportunity to create a special ecosystem that has seasonal water. It could be a jewel!
527	G. Casey	90044	I urge the immediate removal of Non-Native trees and plants. In their place I advocate for the planting of Native Plants that are appropriate for the lower Arroyo Seco environment.
528	robert nava	90042	I fully support this effort to restore the Lower Arroyo with native plant material.
529	Marian Coensgen	91001	Native trees provide much needed habitat for our native pollinators and other fauna in this urban setting.
530	James Schlenker	91104	
531	Chelsea T	90034	This would be immensely beneficial for our city.
532			
533		91001	
534		91343	Lets see restoration done right and responsibly :)
535		91801	I frequently run in the park and am a Native American descendent. My family is native to San Gabriel Valley
536		90049	

537	91103	
538	90606	
539	90018	All communities deserve the protection and betterment of public spaces in nature!
540	93001	
541	90065	
542	90034	Native plants are smart, sustainable and beautiful. Make the right choice and protect native California plants.
543	90042	I support this!
544	91205	Please support the natural habitat by removing non native plants and trees!
545	93436	
546	90745	Please consider restoring the lower arroyo seco with native and drought friendly plant species, as suggest by Indigenous community members .
547	90745	Please consider restoring the lower arroyo seco with native and drought friendly plant species, as suggest by Indigenous community members .
548	91011	
549	90745	Please consider restoring the lower arroyo seco with native and drought friendly plant species, as suggest by Indigenous community members .
550	90265	I am in support of the removal of invasive non-native invasive species to support local biodiversity conservation. LA falls in the California Floristic Province and internationally recognized biodiversity hotspot. We should

551	90745	be doing all we can to protect and restore our local, native biodiversity. Thank you! ~Candice
552	90805	Please consider restoring the lower arroyo seco with native and drought friendly plant species, as suggest by Indigenous community members .
553	90027	This is a wonderful project that will help dwindling populations of local wildlife and pollinators thrive.
554	91024	Now more than ever we need to restore our native plant community. We need native plants to support our local natives!! We also need to educate the people by showing thwm how it is done.
555	90042	
556	91206	We need to be doing more to help our planet. Nature is the best at it so let's plant these trees and plants to help!!
557	91001	The arroyo is such a gift to all who live nearby. I would love to see restoration in the form of removing non-native trees and plants and replacing them with native trees and plants that will create essential habitat for the many native wildlife species that do now, or have in the past, called the arroyo home.
558	90063	
559	90041	I strongly support habitat restoration. Please make this sustainable. For further questions, please feel free to contact me.
560		
561	90032	

562	91104		Native plants respect our ecosystem, which is suffering from the county's devastation in Hahamongna. This type of restoration gives us a chance in Pasadena to have breathable air for the future.
563	91402		
564	91401		
565	Ricardo De Los Angeles	90039	
566	Lauren Hamlett	91106	Prioritize restoration of native habitats.
567	Ashley	85259	Support native wildlife and please do not replace with non-native trees!
568	Sarah Villaseñor	91208	
569	Regan Hutson	91106	This is a worthwhile project and will help enhance the beauty of the area. Please expand on efforts to showcase native plants and restore habitat.
570			
571	Lindsey Dole	90004	
572	Mackenzie Hoffman		
573	Doris Vigil	80013	
574	Luis Marcial Chavira	91402	I sign this petition to support my local community and uplift restoration of accessible areas and that remove non native species and can reflect a better image of a natural California
575	Judith	91402	Please protect the Lower Arroyo environment and help restore its natural beauty and plants! This is beneficial not only to local nature but local people as well. Removal of native plants and lack of replacement has long term

negative effects such as native environmental extinction.

576	Kristina clinton	91104	I support the restoration!
577	Kelly Todd	91401	
578	Janette Chavez	90260	
579	Carolyn Kim	94114	
580	Tyler Spicer	91010

584	Rahul Sethi	90041	
585	Karin Gulbran	90029	
586	Rahul Sethi	90041	
587	Jessica Varlet	91104	Native plants are adapted to our ecosystem and environment; out of the 5 Mediterranean climates in the world, LA has the hottest. Native plants are best suited for our local fauna as they provide the best nutrients for them. Pasadena should encourage and promote the replacement of non-native trees and plants for native ones.
588	Sydney Distelhurst	90042	I fully support removing the invasive, non-native trees from Lower Arroyo to preserve its natural character and habitat.
589	Alejandro Lemus	90047	I am in full support of the restoration of the Lower Arroyo Seco region. Bringing back the native plants to this watershed is of utmost important to the resilience and conservation of this ecosystem.

590	Donald Wielenga	91001	Please think of native plants as essential to the native animals.
591			
592	Connie Ho	91103	The City of Pasadena needs to act now to preserve, beauty, and return this public green space to its native flora. We cannot let this opportunity pass without action from the City. This green space will not only be a refuge for people in the city, but also a landing rest space for butterflies and birds. We need the City of Pasadena to act now to make this park beautiful and more usable.
593	Deborah Dornisch	91761	Get those non-natives out of there!
594	Mark Roeder	90042	Native plants and trees support native and migrating species. Restore the arroyo with plants that thrive here.
595	Claire	91214	
596	Carolyn Kim	94114	
597	Brenda	91331	I sign this petition in support of the habitat restoration in the Lower Arroyo.
598	Jennifer Kim	91344	
599	James Faulkner	91104	I have been a trail runner for over 40 years! I run here nearly everyday!
600	Ben Galante	91030

621	Jenn Worley	91011	
622	Jenn Worley	91011	
623	Kyle Santelio	90803	I support the restoration of the natural character of the lower arroyo. In this time of severe climate change and habitat loss, small steps like this can and will make a difference.
624	Paul Everett	91801	Native plants have many benefits to our community and the ecology of our natural areas. I support this initiative.
625	Catherine O'Neal-Petterson	91001	I live near the Arroyo and want to make sure that it is planted with native plants that will be good for the wildlife and the area.
626	Catherine O'Neal-Petterson	91001	I live near the Arroyo and want to make sure that it is planted with native plants that will be good for the wildlife and the area.
627	Joanna Harrison	91104	
628	Marguerie Gregston	93101	
629	Marguerie Gregston	93101	
630	Margaret Gallagher	90039	I believe it is incredibly important to replace the non-native tree species in LAP with locally appropriate California native trees. I am a certified California Naturalist, and spent part my naturalist training in Lower Arroyo Park. I witnessed firsthand there and in many other places how native plant and tree species support a myriad of native wildlife - birds, bees, mammals, and more. There is a lot of research on this as well. All trees are not created equal, when it comes to their natural ranges. Non-native

trees can actually starve birds - they don't support the insect life that nesting birds need to feed their young. In addition, many of the non-native species found in LAP are invasive, and left on their own will continue to spread and choke out the native plants. Mexican fan palm, Chinese elm, common fig, golden wattle, pampas grass...they may be pretty to the untrained eye but in the big picture, they are not doing the wildlife or people who nature any favors. We are losing so much habitat all over the world, and must seize every opportunity that we have to increase habitat in order to preserve and protect the plants and animals that we have left. Removing the non-native trees in LAP and replacing them with native trees is a moment that won't come again. The City of Pasadena must seize this chance to stand as an ally to our natural world.

631 Michael angulo 91303

632

633

634 Lisa opsal 90042

I urge this proposal to pass as habitat loss with development has removed so many of these plants and the animals that contribute to California's biodiversity. It is essential we restore and create spaces of natural beauty that will also provide habitats, fresh air and are biologically appropriate for the weather challenges we face going into this new era.

635 Candice Meneghin 90265

I am in support of the removal of invasive non-native invasive species to support local biodiversity conservation. LA falls in the California Floristic Province and internationally recognized biodiversity hotspot. We should be doing all we can to protect and restore our local, native biodiversity. Thank you! ~Candice

636	Michael Dodge	90042	Let's bring back the butterflies, bees and, birds!

654	Ali Barar	91105	
655	Dylan	71104	
656	Joe Feinblatt	91104	We support the restoration of the lower Arroyo to native plantings. It is the native landscape that makes it a special place for Pasadena and the whole Los Angeles area.
657	Jessica sandoval	91001	
658	Noelle Toal	91201	Please take this opportunity to bring this portion of the beautiful Arroyo back to its native state. Creating an appropriate, native ecosystem will allow the area to be a valuable local resource for wildlife and create a more manageable and important natural habitat. I live locally and walk in this area frequently and would love to see it thus restored. Thank you.
659	Anthony Sweeney	91024	Strong supporter of going native when ever possible.
660	Mahealani	91105	
661	BRET POLLACK	90032	We, as a people, need to be more respectful of the native species and how fragile they are. We need to remove non-natives whenever possible.
662	Catleya Sherbow	91364	Heck yeah native plants
663	Elizabeth	90803	Please Please Please Restore! Honor the land!
664	Caitlin Keller	90042	
665	Grace Poole	91214	Non-native species threaten and displace local species!! The spread of non-native species is especially common on land scorched by wildfires, it's crucial to restore these habitats for the preservation of the local biome.

666	Kate	90036	
667	Julia Morez	91024	Please restore and preserve the natural, native character of the Arroyo.
668	Diana Felix	91402	
669	Nina Gevara		
670	Alvaro Ilizarbe	90042	This will bring much needed attention to areas that have been neglected for years. The area has so much potential.
671	Priscilla Bransby	91001	
672	B. Morgan Martin	90042	Please protect this invaluable space!
673	Courtney	97230	
674	Jonathan Shade	90806	Thanks for considering the enhancement of the already beautiful arroyo. California's native landscape is a part of what makes Pasadena such a special place.
675	Imelda Romero	90065	We must restore balance to the natural world. This is one step towards healing the land.
676	Jensen Talmo	91024	We need to be doing this all over Los Angeles and stop the sale of invasive plants at local nurseries.
677	ALLISON SWAN	91105	
678	Jody Donnelly	91104	
679			
680	GREGORY V HALL	91103-2038	
681	Tara Doroginsky	91342	
682	Joel maus		

683	Alice	91106	
684	Megan Miller	91762	Please protect our native habitats/lands and restore the Lower Arroyo Seco with the removal of non-native trees.
685	Kylee	32043	
686	Kylee	32043	
687	Rebecca Shields Moose	90019	
688	Gilmore Chung	91505	
689	nancy whalen	91001	the part that has been restored this dar is amazing! great hob.
691	Anita Martinez	90031	
692	Meggie Kelley	90006	
693	Christina	91105	Non-native, invasive plants have no place in the Lower Arroyo
694	BRITTANY	90026	Native Plants = Sustainable Future
695	Gevorg Danielyan	91351	
696	Priscilla Johnston	90065	Let's restore with natives!
697	Andrew Cameron	91104	The removal of non-native plants is a crucial step in restoring habitat and providing space for the native plants, insects, reptiles, amphibians, birds, and mammals that have inhabited this land for millennia. Please support the work of Hahamongna nursery who are experts in their field and accomplish their work with hearts full of compassion and hope for the future of Pasadena and our planet. Thank you.

698	Miranda G	97213	Native plants are more resilient and better suited to withstand drought and fire.
699	Maria Montoya	91206	
701	Jill polsby	91105	Would love to see the habitat restored. It's a mess right now
702	Marie Mingoia	90402	
703	Dick polsby	91105	Ther plan makes sense
704	Katy polsby	91105	Would love to see it cleaned up and looking natural again
705	Dan polsby	91105	I love walking down there and would like to see natural again!
706	Cheri uno	90065	Restoration is necessary to keep this area beautiful.
707			
708	Sarah Schoettler	91105	I strongly SUPPORT this initiative.
709	Klara Rodstrom	91030	The native landscape of the Lower Arroyo is beautiful, important, appropriate, and a habitat to many creatures. It must be protected and nurtured. I support any measures and increase its vitality.
710			
711			
712	Lourdes Fuentes	90041	As a student in Pasadena and a frequent visitor of this city, I urge those in positions of power to consider the need to restore the ecosystem with native plants. There is correlation between non-native plants and magnification of forest fires. Please take this into consideration especially in light of disastrous and difficult to control California fires.
