Section 106.4.4 is hereby added to read as follows:

106.4.4 Expiration

A. Duration of Initial Permit

Notwithstanding any other provision of this section entitled “Permits Issuance”, in residential zoning districts, all work for which a permit is required shall be completed within 18 months from the date of issuance of the permit. When work at a single site is authorized under multiple permits, the maximum duration as described above shall be determined by the issuance date of the earliest permit.

B. Initial Permit Extension

Should additional time be required, the permittee may apply for and request an extension of time to complete the work. The building official may extend the time to complete the work for a period not to exceed 180 days upon written request by the permittee showing good cause for such an extension of time. The building official may place conditions upon the granting of such an extension to protect the neighborhood.

C. Additional Permit Extension

If the work is still not completed after having been granted an extension by the building official, the permittee may apply for a second extension of time to complete the work for a period

of time not to exceed 180 days. Such application shall be subject to a fee as set forth in the City's fee schedule and shall be heard by a hearing officer in a noticed public hearing. The hearing officer may extend the time to complete the work for a period of time not to exceed 180 days upon written application by the permittee showing good cause for the extension. The hearing officer may place conditions on the extension to protect the neighborhood.

D. Required Acts When Permit Expires

When the maximum duration for the completion of the work has expired, the permittee shall do the following, even if the work is not completed:

1. Fill or secure all open excavations.
2. Secure and make weathertight all structures.
3. Remove all vehicles and heavy equipment associated with the work from the site an/or from adjacent streets and alleys.
4. Remove all portable sanitation facilities.
5. Cease all work at the site.

E. Permits After a Work Moratorium

Work at a site that has continued for the maximum duration may not continue or resume for a period of one year. At the end of this period, work may resume. However, a new permit must first be obtained at the full fee prescribed and a plan, detailing a schedule of construction phases that will ensure that the project will be completed in a period of 6 months or less, must be submitted concurrently with the permit application to the building official for approval. Upon approval of the plan by the building official, the permit will be issued and such permit will expire 6 months after the date of issuance. If the work has not been completed within 6 months of the

date of issuance of the permit, work may only continue upon application and payment of the appropriate fee for an extension. Such application will be considered by a hearing officer in a noticed public hearing and will only be granted upon a finding of special circumstances or conditions that make the completion of the work within the mandated time impractical. The decision of the hearing officer may be appealed to the Board of Zoning Appeals upon the payment of the prescribed fee.

F. Exception

Work that is limited exclusively to interior work may be extended in accordance with Section 106.4.4 provided that no construction related vehicles are parked on the street or alley, and that no construction material is stored in view of any adjacent property.
