\_\_\_\_\_  
\_\_\_\_\_

Chapter 8.62 Waste Management Plan for certain construction and demolition projects within the City of Pasadena requires a minimum of 50% diversion of C&D debris. Briefly state how materials will be sorted for recycling, reuse, or salvage on the project site:

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**Please read and initial next to each of the following:**

\*\* I understand that franchise haulers are required to provide job-specific diversion and disposal information. It will not be sufficient to submit a form or a letter that states "All waste hauled in the City of Pasadena is subject to 50% diversion." \_\_\_\_\_

\*\*I understand that the waste management plan agreed to herein will be monitored through regular site visits by a City recycling specialist to ensure compliance with the ordinance. The project applicant agrees to assist the City recycling specialist in having access to the site and support the actions needed to monitor the projects' compliance. \_\_\_\_\_

## Construction & Demolition Waste Management Plan Estimates

On the table below, please estimate quantities for each type of material to be recycled or landfilled. Recycled means materials will be recycled on or off site, reused, or salvaged. **Please note that the hauler you use must be a City Franchised Hauler. You will want to ensure that the hauler you choose hauls C&D debris to one (or more) of the six certified mixed debris recycling facilities listed in the table below.**
