

APPENDIX A

STREET CLASSIFICATIONS

Federal funding for street reconstruction and resurfacing programs can be used only on principal arterials, minor arterials, and collector streets. This Appendix indicates streets where such funding can be used as part of ongoing City street improvement programs.

The California State Department of Transportation (Caltrans) has the primary responsibility for determining anticipated functional usage, and initially developing and periodically updating the statewide highway functional classification. Changes in functional classification must comply with the requirements described in the Highway Functional Classification - Concepts, Criteria and Procedures manual published by the Federal Highway Administration (FHWA).

Each incorporated city is responsible for initiating requests to change the functional classification of city streets. City staff provide the necessary justification for the proposed classification change. The changes should be consistent with approved FHWA guidelines.
