

Pasadena Water & Power (PWP) is bringing you the information below to help you make informed choices about the energy you buy. California State Law requires all Energy Providers to make the following label available to their customers.

2007 ANNUAL POWER CONTENT LABEL		
ENERGY RESOURCES	Projected 2007 PWP POWER MIX	Actual 2007 PWP POWER MIX
Eligible Renewable	9%	8%
• Biomass & waste	6%	5%
• Geothermal	2%	1%
• Small hydroelectric	<1%	<1%
• Solar	<1%	0%
• Wind	<1%	1%
Coal	67%	65%
Large Hydroelectric	6%	7%
Natural Gas	12%	15%
Nuclear	6%	5%
Other	0%	0%
<u>TOTAL</u>	100%	100%

During each quarter of 2007, PWP published a Power Content Label (PCL) showing the projected fuel source mix for our power supply for that quarter. The power mix can vary from one quarter to the next depending on local demand as well as market prices. The information provided on the PCL is a comparison of the projected PWP power mix for calendar year 2007 versus the actual PWP power mix for calendar year 2007.

For more information regarding the PCL or other questions about PWP's energy resources, please call the PWP AnswerLine at (626) 744-6970 or visit us online at www.PWPweb.com.
