PART E. DISTRICT DIAGRAM	35

INTRODUCTION

The City of Pasadena (“City”) is proposing to acquire undeveloped properties known as Annandale Canyon Estates (“Open Space”) for the purpose of preserving it as open space. Annandale Canyon Estates was originally planned to be subdivided into single family residential properties for the construction of custom homes. However, surrounding neighbors have expressed the desire to preserve the area as open space. To that end, the City has been in negotiation with the developer to acquire the property for the preservation of open space.

To fund the cost of acquisition of the Open Space, the City proposes to use a combination of funding sources including the formation of the City of Pasadena Annandale Canyon Open Space Benefit Assessment District (“District”), a grant from the Santa Monica Mountains Conservancy, State and County funds, City funds and other funding sources. The District will be utilized to fund the property owners’ portion of the land acquisition through the issuance of bonds, a loan from the City, or a combination of the two that will be repaid over a period not to exceed 30 years through annual assessments. If the District is not approved by the property owners, the City will not have sufficient funds to acquire the site.

If the District is approved and the Open Space is purchased, the City will fund the maintenance of the Open Space on an ongoing basis.

This report constitutes the Engineer’s Report for the District. The City Council pursuant to the provisions of Chapter 4.95 of Title 4 of the City’s Municipal Code (“Code”), the “Landscaping and Lighting Act of 1972”, being Division 15, Part 2 of the Streets and Highways Code of the State of California, beginning with Section 22500 (the “1972 Act”), Article XIIIID of the Constitution of the State of California (“Article XIIIID”), and the Proposition 218 Omnibus Implementation Act (Government Code Section 53750 and following) (the “Implementation Act”) (the Code, 1972 Act, Article XIIIID and the Implementation Act are referred to collectively as the “Assessment Law”) proposes to initiate proceedings for the formation of the District, and to levy and collect assessments installments against lots and parcels within the District beginning the fiscal year commencing July 1, 2009 and ending June 30, 2039. It is determined that the estimated cost of the proposed improvements is greater than can be conveniently raised from a single annual assessment and that funds will be raised by an assessment levied and collected in installments over a period not to exceed 30 years. The City will pay for a portion of the Open Space acquisition costs through a City loan in connection with the issuance of bonds pursuant to the Code and Section 22662.5 of the 1972 Act and under the Improvement Bond Act of 1915 (Division 10 commencing with Section 8500).

This Engineer’s Report (“Report”), which describes the District boundaries and special benefits of the District to the property owners located within the District, includes the following sections:

Introduction – Provide background information on the proposed District and introduction to the Report.

Part A. Plans and Specifications – Contains a general description of the project.

Part B. Estimate of Cost – Identifies the cost of the project including land acquisition costs, soft costs, bond issuance costs and other incidental costs and expenses.

Part C. Method of Apportionment – Describes the basis in which costs have been apportioned to lots and parcels within the District, in proportion to the special benefit received by each lot and parcel.

Part D. Assessment Roll – The assessment roll identifies the maximum assessment installment to be levied to each lot or parcel within the District.

Part E. Assessment Diagram – Displays a diagram of the District showing the exterior boundaries of the District and the Zones of benefit.

Each lot or parcel within the District is assessed proportionately for only the cost of the project that is determined to be a special benefit. For this report, each lot or parcel to be assessed, refers to an individual property assigned its own Assessment Parcel Number by the Los Angeles' County Assessor's Office as shown on the last equalized roll of the assessor.

Based on the requirements of Assessment Law, a property owner protest ballot procedure is required in order to form the District and to levy assessments. Following the City Council Intent meeting which starts the formation process, ballots will be mailed to each property owner located within the boundaries of the District so they can indicate whether they are in favor or opposed to the District and the maximum assessments as described in this Report. Assessment Law requires a minimum 45 days between the time ballots are mailed and date that the public hearing is held.

Following consideration of all public comments, written protests, and tabulation of the property owner protest ballots after the conclusion of the Public Hearing, the City Council will confirm the Report as submitted or amended. If there is not a majority protest and the ballot procedure is successful, the City Council may order the levy and collection of assessments commencing fiscal year 2009/2010. The unpaid assessment installments approved will be submitted to the Los Angeles County Auditor/Controller and included on the property tax roll for each parcel receiving a special benefit.

If the District is approved, the City will continue with its best effort to acquire the Open Space for preservation. If the City is unable to acquire the Open Space, the assessments will not be collected. No proceeds from the bonds or the assessments will be used for operation and maintenance of the Open Space, the City intends to fund the ongoing maintenance and operation from other City sources.

PART A. PLANS AND SPECIFICATIONS

1. General Description of Improvements

The proposed territory within the District consists of all lots, parcels and subdivisions of land as shown on the Boundary Map designated as “City of Pasadena Annandale Canyon Open Space Benefit Assessment District Assessment Diagram/Boundary Map” contained within Part E of this Report. All the parcels within the District are zoned as single family residential.

The improvements proposed to be funded by the District are the acquisition of open space lands (“Improvements”) defined by the Code and the 1972 Act (Section 22525 (g)) and ongoing administration costs of the District. If the District passes, the City intends to finance a portion of the acquisition costs through a City loan in connection with the issuance of bonded indebtedness secured by unpaid assessment installments. These Improvements provide special benefit to the parcels within the boundaries as defined in the Method of Apportionment contained within Part C of this Report.

PART B. ESTIMATE OF COSTS

1. Description of Budget Items

The following is a description of items shown on the Budget in Section B.2.

Land Acquisition – Includes the total estimated cost to acquire the approximately 20.6 acres of Open Space less any grants or other funding sources, including but not limited to the Santa Monica Mountains Conservancy, the State, Los Angeles County and the City.

Financing Costs – Includes the estimated expenses in connection with the sale and issuance of the bonds and/or a City loan.

2. Budget

It is estimated that the acquisition of the Open Space will cost approximately \$7,000,000. This cost was then divided between general and special benefits before the assessments were determined. (Please see Part C. Method of Apportionment for further discussion of benefit). Below is the budget table.

Land Acquisition	
Land Acquisition Cost	\$6,500,000 ¹
Escrow Closing and District formation costs	\$500,000 ²
Subtotal	\$7,000,000
Special Benefit (parcel outside City)	(\$3,335) ³
General Benefit (parcels inside City)	(\$1,749,166) ³
Special Benefit Funded from Other Sources	(\$3,883,409) ³
Total Assessment District Contribution	\$1,364,090

The Assessment Law requires that a special fund be set up for the revenues and expenditures of the District. Funds raised by the assessments shall be used only for authorized purposes. The City may advance funds, if needed, in order to ensure cash flow or timing of acquisition and will be reimbursed for any such advances upon receipt of assessments and/or bond proceeds.

PART C. METHOD OF APPORTIONMENT

1. General

The Implementation Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements, which include the acquisition of open space.

The Code and Streets and Highways Code Section 22573 require that assessments be levied according to benefit rather than the assessed value.

“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”

In addition, Article XIIIID and the Implementation Act require that a parcel's assessment may not exceed the reasonable cost for the proportional special benefit

¹ The City is in negotiations with the landowner and based on appraisals and other information available to the City the City has entered into a Purchase and Sale Agreement for the purchase price of \$6,500,000.

² Includes estimated district formation and bond issuance costs of \$500,000.

³ Amounts include funding of Special Benefit of parcels outside the City, General Benefit to parcels within the District and grants from the Santa Monica Mountains Conservancy, the State, Los Angeles County and the City.

conferred to that parcel. Article XIIIID and the Implementation Act further provides that only special benefits are assessable and the City must separate the general benefits from the special benefits. They also require that publicly owned properties which specifically benefit from the improvements be assessed.

Area of Benefit and General Benefit

The boundary of the District may only include those parcels which receive a special benefit. Parcels within the District will be assessed for those improvements that provide a special benefit to the properties. Article XIIIID of the California Constitution defines special benefit as:

"A particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute 'special benefit'."

While the general benefits extend to parcels both inside and outside the District boundaries (i.e. positive impacts on air and water quality, protection of irreplaceable open space and wildlife corridors), parcels that are located within a close proximity to the Open Space receive certain special benefits over and above those received by the public at large. The National Recreation and Park Association standards are used to define the service area for many types of parks. Due to the nature of the Open Space we have equated the service area to a $\frac{1}{2}$ mile radius. This radius is a combination of a neighborhood park which has a service area of a $\frac{1}{4}$ mile to $\frac{1}{2}$ mile radius and a community park which has a service area of $\frac{1}{2}$ mile to three miles. This standard is also consistent with the City's goals as set forth in the Recreation & Parks Master Plan. Property within the $\frac{1}{2}$ mile radius is therefore considered to receive a special benefit.

Additionally, due to the significant traffic impacts created during the prolonged construction period if the project is not preserved as Open Space, properties that traverse San Rafael Avenue, Patrician Way and Glen Oaks Boulevard are also within the special benefit area of the District including those properties that are outside of the $\frac{1}{2}$ mile radius discussed above.

Once it is determined which parcels receive special benefit, an analysis was conducted to determine those parcels which cannot be legally assessed and to identify funds which will contribute to cost of the Open Space. When a $\frac{1}{2}$ mile radius is drawn from the open space area, the area encompasses approximately 1,255 acres. There are 392 acres included within the 1,255 acres or approximately 31% which are located outside of the City's jurisdiction and therefore cannot be considered for the District. Regardless, of the 392 acres that are outside of the City, 391 acres would be considered exempt due to current use of the property as well as underlying land use since they provide a similar benefit as the open space. This leaves roughly 0.05% of the Open Space cost benefiting properties outside of the City that cannot be assessed by the City and will be funded from sources other than assessments.

In addition to identifying parcels not included in the District which receive special benefit and are to be funded from other sources, an analysis was conducted to determine the proportional impact of general benefits to the public at large versus the

special benefits to be received by parcels within the District. Since the Open Space will not be restricted solely for the use of parcels located within the boundaries of the District other members of the public will have access to the Open Space and therefore receive benefit from the recreational opportunities the Open Space provides. This number is difficult to quantify; however, approximately 75% of non-consumptive wildlife recreation (i.e. bird watching, nature photography) is done around the home according to Park, Recreation & Leisure Facilities Site Planning Guidelines by George E. Fogg, FASLA, and therefore we estimate that 75% of the costs of the improvements represent special benefit to the properties within the District. The remaining 25% of the costs of the improvements representing general benefits must be funded from sources other than the assessments.

Despite the analyses and conclusions described above, the City surveyed the property owners based on specific assessment levels and determined the property owner would not support the level of assessment necessary to fund the entire special benefit received; therefore the District is only estimated to provide [19.2%] of the necessary funding to acquire the Open Space. The remaining [80.8%] of the acquisition cost is being funded by other sources. These contributions greatly exceeds the amounts attributable to general benefit discussed above or the contributions required for parcels which receive special benefit but are not included in the District.

Exempt Parcels

It should be noted that because the assessment will span a thirty-year period, each parcel's assessment was calculated based upon the parcel's highest and best use given the current land use and configuration. Certain parcels have been exempted from the assessment. These parcels include areas of streets (either public or private), public easements and rights-of-way. Also exempted are utility rights of way, common areas such as homeowner association property, landlocked parcels or small parcels deemed to be unbuildable due to size. In addition, parks, greenbelts, open space and golf courses have been exempted as they are considered to provide similar benefits to the Open Space.

2. Special Benefit Analysis

The proposed project's benefits and assessment within the District have been reviewed, identified and allocated based on special benefit pursuant to the provisions of Article XIID, the Implementation Act, the Code, and the Streets and Highways Code Section 22573.

The parcels located within the District have been determined to receive a special benefit from the preservation of the Open Space. There are several special benefits of having open spaces in the vicinity of residential areas. The three primary special benefits include:

- Positive impacts on capacity of roads, and road safety
- Enhanced recreation opportunities and expanded access to Open Space
- Preservation of canyon views and scenery resulting in particular increased property value due to proximity to open space

The following categories are the types of special benefit to property within the District.

1. Positive impacts on capacity of roads, and road safety

Access to the Open Space is primarily served by San Rafael Avenue, Patrician Way and Glen Oaks Boulevard. These roads are small and winding, preventing adequate access by large trucks.

Should the development of the Open Space move forward with construction of single family custom homes, properties on these roads would be significantly impacted by construction traffic during the long construction period, estimated to be three to five years. According to the Recirculated Partial Draft of Environmental Impact Report for the Annandale Canyon Estates, Dated November 1, 2005 ("Recirculated EIR") Section 3.14.6 states that if the project is developed, "Expansion of infrastructure could result in inadequate emergency access during construction." Property damage to City streets, curbs, gutters, private driveways, landscaping, street lights and other private property may occur due to the heavy construction equipment and large trucks traveling to and from the development.

Section 3.14.7 of the Recirculated EIR also indicates that Infrastructure construction could result in road closures that would deny access to residences for a significant period of time. While emergency access would be allowed, local traffic would be significantly impacted.

While mitigation measures would be implemented to reduce the impacts of construction, there will still be impacts and inconvenience to properties located within the area.

Maintaining the Annandale Canyon Estates property as open space would significantly reduce the construction traffic impacts. Therefore properties which have primary access from by San Rafael Avenue, Patrician Way and Glen Oaks Boulevard receive a special benefit from the preservation of the Open Space.

2. Enhanced recreational opportunities and expanded access to Open Space

Properties specially benefit from the enhanced recreational opportunities provided by the Improvements. These include enhanced open spaces, areas for recreational activities and higher levels of maintenance than would be provided in absence of the preservation of the Open Space.

The Draft Environmental Impact Report dated August 7, 2005 (“DEIR”) indicates in Section 3.11.2 that “The topography and undeveloped nature of the project site present opportunities for unregulated passive recreational uses, such as hiking and mountain biking.” Therefore, properties located within a ½ mile radius of the open space receive special benefit due to the enhanced recreational opportunities.

3. Preservation of canyon views and scenery

The proposed District will provide a portion of the funding necessary to preserve the Open Space. Absent of the District, the Annandale Canyon Estates will be developed into housing which would result in a reduction in public resources and diminished environmental benefits.

According to the DEIR, Table ES, “Visual impacts associated with the proposed project, in combination with other alterations to visual resources throughout the region, would result in the degradation of community-wide visual resources”... “the diminishing visual resources would result from increasing development intensity (and general reduction in the aesthetic value of natural resources) and the degradation of primary ridgelines.”

According to Section B.2 of the Recirculated EIR, the construction of the development could result in the loss of native scrub, oak trees and western sycamore trees and have a substantial adverse effect on riparian habitat and coastal sage scrub. The oak trees are protected by the City’s Tree Ordinance and the riparian habitat and coastal sage scrub are identified as sensitive natural communities by the California Department of Fish and Game.

The Open Space provides other special benefits such as protection of scenic views and protection of wildlife and vegetation habitats. Left undeveloped, they allow natural functions such as flood control, purification of air and water, decomposition and recycling of wastes, and generation and renewal of fertile soils. They also serve as buffers. Therefore homes that are closest to the Open Space receive a special benefit from the preservation of the Open Space.

3. Assessment Methodology

To establish the special benefit to the individual parcels within the District a formula that spreads the costs of the Improvements based on the special benefit must be established. The improvements have been reviewed and a formula has been established to apportion the acquisition costs based on benefit.

Zones of Benefit

To fairly distribute the acquisition cost among the parcels, the District was divided into four zones based on; 1.) The proximity of parcels in location to the Open Space; and 2.) The roads used to access the assessed property. Properties located the closest to the improvements will receive a greater special benefit as compared to those parcels the farthest away. Additionally, parcels that use Patrician Way, Glen Oaks Boulevard. or San Rafael Avenue to access their property will see the biggest impact if the Open Space is developed; therefore they receive a greater benefit than parcels that can be accessed from other roadways.

In order to calculate the assessment, each parcel is assessed according to the following Zone locations and Equivalent Benefit Unit (“EBUs”) which are described in more detail below.

Zone 1 Properties – This Zone is defined as properties located within approximately 1/10th of a mile radius of the proposed Open Space and on the west side of the ridge that bisects the District. Parcels located in Zone 1 use the EBU of one (1).

Zone 2 Properties – This Zone is defined as properties located within approximately a ½ mile a radius of the proposed Open Space and that also traverse Patrician Way, San Rafael or Glen Oaks Boulevard to access their property. Parcels located in Zone 2 use the EBU of .70.

Zone 3 Properties – This Zone is defined as properties located outside approximately a ½ mile a radius of the proposed Open Space however they traverse Patrician Way, San Rafael or Glen Oaks Boulevard to access their property. Parcels located in Zone 3 use the EBU of .50.

Zone 4 Properties – This Zone is defined as properties located within approximately a ½ mile a radius of the proposed Open Space and are on the east side of the ridge that bisects the District or properties which have secondary access via San Rafael Avenue or Glen Oaks Boulevard. Parcels located in Zone 3 use the EBU of .20.

Equivalent Benefit Units

Each parcel of land is assigned an EBU in proportion to the estimated special benefit the parcel receives relative to other parcels within the District. The EBU method of apportioning benefit is typically seen as the most appropriate and equitable assessment methodology for districts formed under the 1972 Act, as the benefit to each parcel from the improvements are apportioned as a function of the proximity to the Open Space and the traffic impact that would be experienced if the project were developed. Each parcel's total EBU was determined by adding up each the EBU attributed to each special benefit received. Road safety and capacity was determined to be of primary benefit, followed by protection of scenery and view and enhanced recreational opportunity. The table below shows the calculation of each parcel's EBU.

Benefit	Zone 1	Zone 2	Zone 3	Zone 4
Enhanced Recreational Opportunity	0.20	0.20	N/A	0.20
Road Safety and Capacity	0.50	0.50	0.50	N/A
Protection of Scenery and Views	0.30	N/A	N/A	N/A
Total EBU Per Parcel	1.00	0.70	0.50	0.20

Each parcel's assessment was calculated based upon the parcel's highest and best use given the current land use and configuration because the assessment will span a thirty-year period.

Exempt Parcels

Certain parcels have been exempted from the assessment either because they receive no special benefits or because they contribute benefits similar to open space which exceed any special benefits they may receive. These parcels include areas of streets (either public or private), public easements and rights-of-way. Also exempted are utility rights of way, common areas such as homeowner association property, landlocked parcels or small parcels deemed to be unbuildable due to size. In addition, parks, greenbelts, open space and golf courses have been exempted as they are considered to provide similar benefits to the Open Space.

4. Assessment Duration

The District Assessment installments are proposed to exist for a maximum of thirty (30) years, with installments beginning in fiscal year 2009/2010 and ending with fiscal year 2038/2039 or sooner if the bond term and/or City loan is less than 30 years. The assessment installments will not increase over the rates set forth in this Engineer's Report. The unpaid assessment installments shall constitute a lien on the parcels on which they are made.

PART D. ASSESSMENT ROLL

The assessment roll is a listing of the proposed maximum total assessment, including the proposed annual assessment installments for the Fiscal Years commencing 2009/2010 and ending 2038/39 apportioned to each lot or parcel based on the amount of special benefit attribute to the parcel, as shown on the Los Angeles County last equalized roll of the assessor and reflective of the Assessor's Parcel Map(s) associated with the equalized roll. A listing of parcels proposed to be assessed within this District, along with the proposed maximum assessment and proposed maximum annual assessment amounts, are shown on the following table.

Annandale Canyon Open Space Benefit Assessment District

PART E. DISTRICT DIAGRAM

The District is located west of Linda Vista Avenue and east of the City limits, the Ventura Freeway effectively acts as the southern Boundary and Afton Street as the northern boundary. The District will consist of approximately six hundred and forty-two (642) assessable parcels. The parcels within the District consist of all lots, parcels depicted within the boundaries of the District. The District assessment diagram/boundary map reflecting the exterior boundaries of the District and the Zones of benefit has been submitted to the City Clerk. A reduced copy of the assessment diagram/boundary map is attached.
