**PUBLIC HEARING: CALL FOR REVIEW OF A DECISION BY DESIGN COMMISSION - CONCEPT DESIGN REVIEW, 680 EAST COLORADO BOULEVARD - IDS PLAYHOUSE PLAZA**  
**Recommendation:**

- (a) Find that this project was subject to an environmental review in the Environmental Impact Report, Statement of Overriding Considerations, and Mitigation Monitoring and Reporting Program adopted by the City Council on November 16, 2009, and that there are no changed circumstances or new information which would trigger further environmental review;
- (b) Find that the concept-level design is consistent with the Purposes of Design Review set forth in Section 17.61.030 of the Zoning Code, as well as the following design guidelines adopted by the Council: Citywide Design Principles in the Land-use Element of the General Plan and the Central District Design Guidelines and specific plan;
- (c) Grant concept design approval with the conditions set forth in Attachment A of the agenda report;
- (d) Direct that an advisory 50% review and final design review be conducted by the Design Commission; and
- (e) Request the applicant to study the third-story balcony

along Colorado Boulevard to insure it is an occupiable and active feature of the building (engaged with the internal circulation).

The Mayor opened the public hearing.

The City Clerk reported 26 copies of the notice of public hearing were posted on May 20, 2010; 99 copies of the notice were mailed on May 20, 2010; and 1 letter in support of the concept design/project and 26 letters in opposition to the concept design/project were received.

Councilmember Madison returned at 8:30 p.m.

Mark Odell, Senior Planner, reviewed the agenda report as part of a PowerPoint presentation.

The City Attorney outlined the procedures for the Council to follow during the concept design review and approval process, and responded to questions.

John Poindexter, Planning Manager, noted that the findings that the concept design is consistent with the Central District Specific Plan and Pasadena Playhouse Sub-District Design Guidelines are set out in Attachment C of the agenda report; and responded to questions regarding the design review process.

Theresa Fuentes, Assistant City Attorney, discussed mitigation measures as they relate to the design review process, and clarified that the Council had previously certified that there were no mitigation measures required to address less than significant aesthetic impacts of the project.

Jeff Cronin, Principal Planner, responded to questions regarding the design review process.

Discussion followed on the design review process and the role of the City Council when acting as the Design Commission in this instance of concept design review; an option to remand the concept-level design review back to the Design Commission; components of concept-level design review, the 50% review, and the final design review; and the relationship between the land-use entitlements that have been granted and the design review process.

The City Attorney advised that Council, acting in place of the Design Commission, was bound to follow the Zoning Code's prohibition on requiring changes to previously granted land use approvals through the design review process.

Julianna Delgado, Design Commission Chair, discussed the Commission's work in considering the proposed concept design(s) for the project; expressed the Commission's opposition to the staff recommendation; asked Council to return the project to the Commission, with the caveat that a subcommittee be formed to meet with the applicant's architect over the next month to resolve the outstanding design issues so that concept design review can be granted; and responded to questions.

Chris Peck, Design Commissioner, discussed some of the issues that arose during the Commission's deliberations on the proposed concept design(s), and expressed support for the Design Commission Chair's suggestion that this be returned to the Commission for further work at the subcommittee level.

It was moved by Councilmember McAustin, seconded by Vice Mayor Gordo, to close the public hearing. (Motion unanimously carried) (Absent: Councilmember Tornek)

The City Attorney affirmed that it would not be appropriate to reconsider the land entitlements that have been granted for this project by the City Council on November 16, 2009, and responded to questions.

Discussion followed on the option to return the concept design to the Design Commission for further work at the subcommittee level.

Councilmember Holden suggested the Design Commission form a subcommittee to work with the applicant and staff to explore an alternative design that would redistribute the mass and scale of the project (consistent with the project approved by Council in November 2009), and considering options such as building over the parking area, connecting the Arcade to the Pasadena Playhouse, exploring removal of the tower, and addressing massing along Colorado Boulevard, which can then be compared to the proposed design, with the matter to return to Council in 30 days.

It was moved by Councilmember Haderlein, seconded by Vice Mayor Gordo, to open the public hearing. (Motion unanimously carried) (Absent: Councilmember Tornek)

In response to Councilmember Haderlein's questions, Julianna Delgado, Design Commission Chair, explained the actions that resulted in the lack of a decision by the Commission on the design concept, and discussed the option for a Commission subcommittee to work with the applicant on the design.

It was moved by Councilmember Haderlein, seconded by Councilmember McAustin, to close the public hearing. (Motion unanimously carried) (Absent: Councilmember Tornek)

Councilmember McAustin suggested the Design Commission work with the applicant at the subcommittee level on an informal basis, perhaps without staff, to develop a design solution within 30 days, that conforms to the letter and spirit of the Playhouse District and Central District Design Guidelines, the citywide design principles, and the historical context of this area, and with the understanding that superior design solutions may necessitate alternatives to the mass and scale of the building.

Councilmember Haderlein expressed support for the City Council making the decision on the design concept, within the parameters set out in the Council action of November 2009.

The Mayor stated his opinion that the Council action in November 2009 incorporated discretionary review by the Design Commission as a measure to ensure that the aesthetic impacts of the project remained less than significant in consideration of the Playhouse District Design Guidelines, and that further work by the Design Commission and Developer could achieve a more compatible project that is supported by the community.

## MOTION

Following discussion, it was moved by Councilmember Holden, seconded by Councilmember McAustin, to have a subcommittee of the Design Commission work with the applicant and staff to explore alternative designs that would redistribute the mass and scale of the project, within the parameters of the project approved by the City Council on November 16, 2009; and offer options for the issues listed above, with the alternative design to be presented to Council for approval in 30 days.

Vice Mayor Gordo expressed concerns regarding the implications of Council making a decision on concept design approval, when this decision would be better made at the Design Commission level; and suggested the matter be remanded to the Design Commission for a subcommittee to work with the applicant on a design that would achieve concept design approval by the Design Commission and work its way through the approval process. He also suggested the Design Commission explore the design issues raised by

Councilmember Holden, as well as addressing the matching of the project courtyard with the Pasadena Playhouse courtyard, enlivening El Molino Avenue, and conceptualizing the building as a series of buildings. He noted that if this cannot be achieved within 30-45 days, the Design Commission and staff must provide a clear report for Council on the outstanding issues, if it is necessary for the matter to return to Council for a decision on concept design.

Discussion continued on whether the Design Commission or City Council should retain jurisdiction over concept design approval for the project.

The City Manager noted that if a consensus has been achieved at the end of 30 days, this matter could be referred to the Design Commission for their approval; and that if a consensus is not reached in 30 days, the matter would then return to Council.

SECOND OF MOTION  
WITHDRAWN

Councilmember McAustin stated that, after considering Council's discussion, she supported Vice Mayor Gordo's approach to remand the project back to the Design Commission for concept design approval, and withdrew her second of Councilmember Holden's motion. (Motion failed, due to lack of a second)

MOTION

Following additional discussion, it was moved by Vice Mayor Gordo, seconded by Councilmember Madison, to remand the above referenced project back to the Design Commission for a decision on concept design review, and within the parameters of the approvals granted by the City Council on November 16, 2009. The Design Commission shall appoint an ad-hoc subcommittee to work with the Developer and staff to explore design alternatives aimed at completing the concept design review process and shall arrive at its decision in no more than 45 days (preferably 30 days). In the event that the Design Commission and Developer are unable to agree on a design alternative, then a statement shall be provided to the City Council identifying issues determined to be agreeable to both the Commission and Developer. Additionally, both the Design Commission and Developer shall provide separate written statements to the Council identifying the reason(s) each side could not agree on the remaining issue(s) of the design alternative. (Motion carried, with Councilmembers Haderlein, Holden objecting) (Absent: Councilmember Tornek)

Vice Mayor Gordo returned at 12:16 a.m.

Councilmember Madison stated his concerns regarding the level of need for this additional signage.
