Subject: Re: Proposed Rate Increase

This is just wrong! My distribution charge is equal to my usage now! I was charged \$123 for \$95 worth of electricity. What the heck has the city been doing with all of its money. Why don't they sell the Shakey's property on Walnut St! The city has money tied up in property they had no business being involved in. All we keep doing is bailing out the incompetent city managers!! How much money do the mayor think we all have??? Every other year we get an increase! The power lines behind my house have never been updated or changed for over 50 years. Define in detail these "Distribution Charges" please. When I call the DWP, no one has an answer for me! The cost of water and power for Pasadena has gone through the roof! What happened to all the water shed projects. We let all of our rain water run off straight to the ocean. How DUMB is that!!!! We need a new Mayor with a new direction and plan for Pasadena besides making his buddies rich!
