17.37.010 - Purpose of Chapter

This Chapter lists the land uses that may be allowed within the zoning districts established by the Lincoln Avenue Specific Plan (LASP), determines the type of land use permit/approval required for each use, and provides basic standards for site layout and building size.

17.37.020 - Purposes of LASP Zoning Districts

The purpose of the LASP zoning districts is to implement the Lincoln Avenue Specific Plan by repurposing the Lincoln Avenue corridor from an industrial and limited commercial area into a vibrant neighborhood-oriented district, with new housing options and a complement of local-serving retail and service businesses, office spaces and community uses, all tied together with public improvements that create a vibrant and enjoyable pedestrian environment, and to:

- A. Create a neighborhood “main street” that will serve as the focal point for the neighborhoods surrounding Lincoln Avenue.
- B. Preserve and enhance existing residential areas.
- C. Provide new opportunities for all types of housing along the corridor.
- D. Facilitate opportunities for catalytic developments that provide desired neighborhood-oriented retail and service businesses, local employment opportunities, and a link to the community.
- E. Provide for the gradual phasing out of industrial uses that create conflicts with surrounding neighborhoods.
- F. Support design that contributes to the enhanced character of the City and Northwest Pasadena in particular.
- G. Enrich the pedestrian environment along Lincoln Avenue through well-designed and appropriately scaled projects and pleasing streetscapes.

- H. Invite pedestrian activity through a cohesive and improved streetscape corridor.
- I. Encourage investment, maintenance, and pride in the Lincoln Avenue Specific Plan Area.
- J. Enhance public safety.

17.37.030 - Applicability

The standards of the LASP zoning districts apply to proposed development and new land uses in the following areas, as shown on the Zoning Map.

- A. **LASP-RM-16.**
- B. **LASP-CL.**
- C. **LASP-CG-1.**
- D. **LASP-CG-2.**
- E. **LASP-PS.**

17.37.070 - LASP Additional Development Standards

A. Building Placement

1. **Building placement in LASP-CG-1 and LASP-CG-2 districts.** Buildings shall be located so that the front facade adjoins a minimum of 75 percent of a lot's front setback line. See Figure 3-18.
2. **Building placement in all other LASP districts.** Buildings shall be located so that the front facade adjoins a minimum of 50 percent of a lot's front lot line.

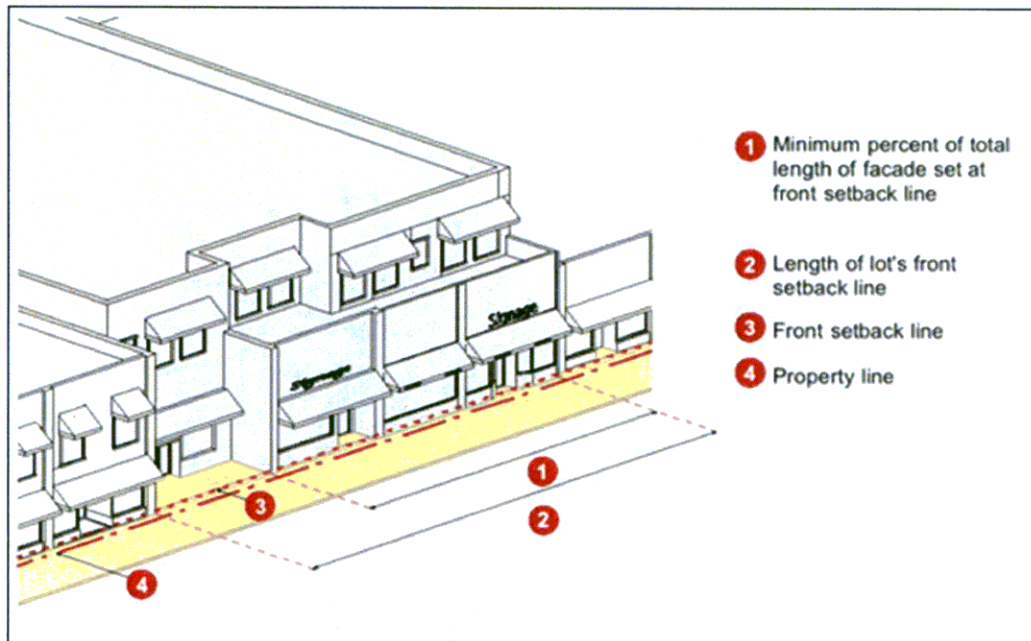

Figure 3-18 - Building placement

3. **Modifications.** The Review Authority may grant exceptions for:
 - a. A driveway that is necessary because the lot is an interior lot and no alley, or easement can provide access to required parking at the rear of the site.
 - b. The initial phases of a multi-phased building project that will occupy the entire frontage upon completion.
 - c. A project proposed with a pedestrians-only plaza occupying a portion of the street frontage.
 - d. A pedestrian corridor.
 - e. Double frontage or double-frontage corner lots or sites. The Review Authority shall determine which frontage is the primary frontage and which is the secondary frontage based on the character of the street frontages. A parking lot can face the street on the secondary frontage.

B. Building Design.

1. **Windows and openings facing streets.** Street-facing facades of buildings shall incorporate windows and openings providing light to adjacent spaces, rooms, and uses. See Figure 3-19. Windows and openings facing streets shall constitute a minimum of the following percentage of street-facing building facades:
 - a. Fifty percent at commercial ground floor uses.
 - b. Thirty percent at commercial upper floor uses.
 - c. Twenty percent at residential ground floor uses.
 - d. Twenty percent at residential upper floor uses.

Figure 3-19 - Openings facing streets

2. **Primary entrance.** For parcels fronting Lincoln Avenue, at least one primary entrance to a ground floor use shall face Lincoln Avenue.
3. **Entrance frequency.** At street frontages, ground-related entrances shall occur at least once every 150 feet, as measured along the front property line. Ground-related entrances include entrances to ground-floor uses, residential units, clusters of residential units, lobbies, or private courtyards. See Figure 3-20.

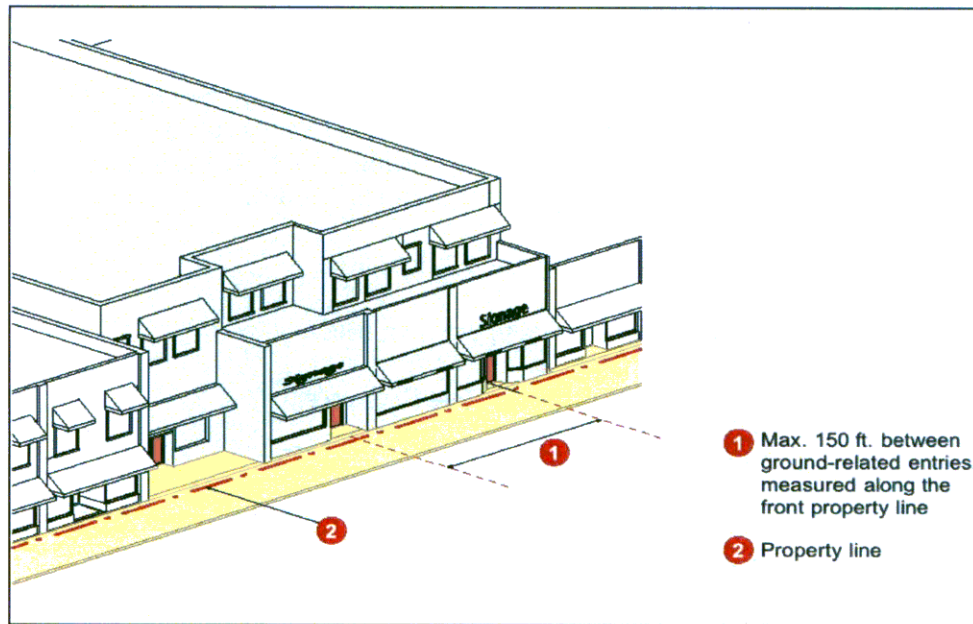

Figure 3-20 - Entrance frequency

4. **Façade plane modulation.** The wall plane of street-facing façades shall be modulated a minimum of 18 inches perpendicular to the plane at least once every 60 feet, as measured along the property line. See Figure 3-21.

Figure 3-21 - Façade plane modulation

C. Ground Floor Design

1. **Elevation of first floor.**

- a. **Non-residential uses.** The first habitable floor shall be located no more than two feet above or below the existing grade at any point along a street lot line. See Figure 3-22.

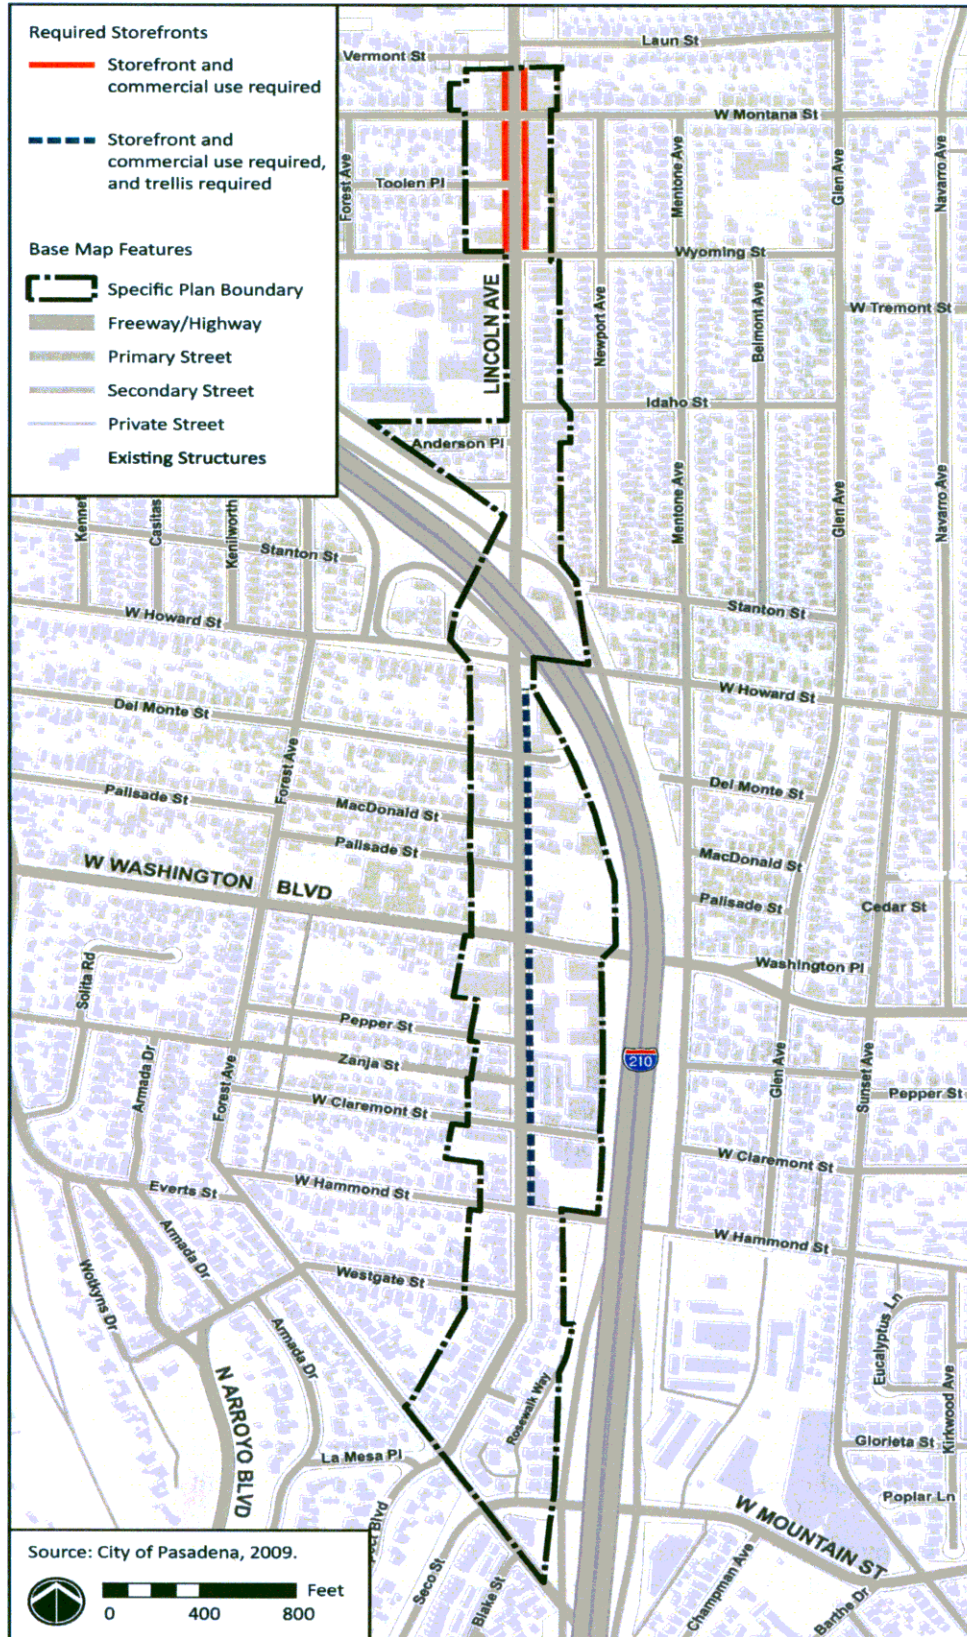

Figure 3-22 - First floor elevation

- b. **Residential Uses.** The first habitable floor of a residential-only building shall be located no more than four feet above existing grade and no more than two feet below existing grade along a street lot line. At least 50 percent of all dwelling units at the first floor shall be located a minimum of 24 inches above the existing grade.
2. **Minimum ground floor height.** The minimum height of non-residential ground floor spaces shall be 15 feet. The minimum height of residential and work/live ground floor spaces shall be 10 feet. This height shall be measured from the floor of the first story to the floor of the second story. If there is no second story, the height shall be measured to the top of roof.
3. **Storefronts and commercial uses required at ground floors.** Storefronts and usable commercial space shall be located along the ground floor street frontages of buildings and have a minimum useable depth of 40 feet along 60 percent of the length of the building frontage and in no case be less than 20 feet in depth. See Figure 3-23. On a corner lot where storefronts and commercial uses are required, storefronts and commercial spaces shall turn and wrap around the corner for a minimum length of 20 feet. Where storefronts and useable commercial space are not required, storefronts and commercial uses at the ground floor shall have a minimum depth of 20 feet.
4. **Glazing at ground floors.** Use of mirrored and reflective glazing materials and glass is prohibited. At the ground floor of buildings where the use is commercial, use of

Figure 3-23 - Required storefront and trellis location

clear glass is required. After installation, clear glass windows at the ground floor of commercial uses shall not later be treated so as to become opaque or to be blocked so as to prevent visibility of the ground floor interior from the sidewalk.

5. **Security elements and decorative grillwork at ground floors.** Upward rolling, side folding, or moveable security grills and elements shall not be installed at the exterior side of ground floor and street-facing storefronts, windows, openings, entries, and facades. At the interior side of ground floor and street-facing storefronts, windows, openings, entries and facades, upward rolling, side folding, or moveable security grills and elements are allowed and should be designed to be integral to the architecture of the building and opening. Such devices should utilize dedicated interior side pockets and ceiling cavities such that the grill and all mechanisms associated with the security element are not visible from the adjacent public right-of-way and sidewalk and regardless of installation method shall be at least 80 percent open to perpendicular view. See Figure 3-24. Fixed decorative grillwork and railings are allowed at the ground floor and shall be at least 80 percent open to perpendicular view.

Figure 3-24 - Security elements

- D. **Trellis required.** A trellis shall be located along the Lincoln Avenue property line as shown in Figure 3-23. Alternatively an arcade may be located along the Lincoln Avenue property line. Trellises and arcades shall meet the following requirements.
 1. **Design.** The trellis or arcade shall be designed as a continuous pedestrian walkway, open to the public, adjoining storefronts, commercial uses, or open space. See Figure 3-25.
 2. **Placement.** The trellis or arcade shall be designed so that its street-facing façade occupies a minimum of 75 percent of the front property line.

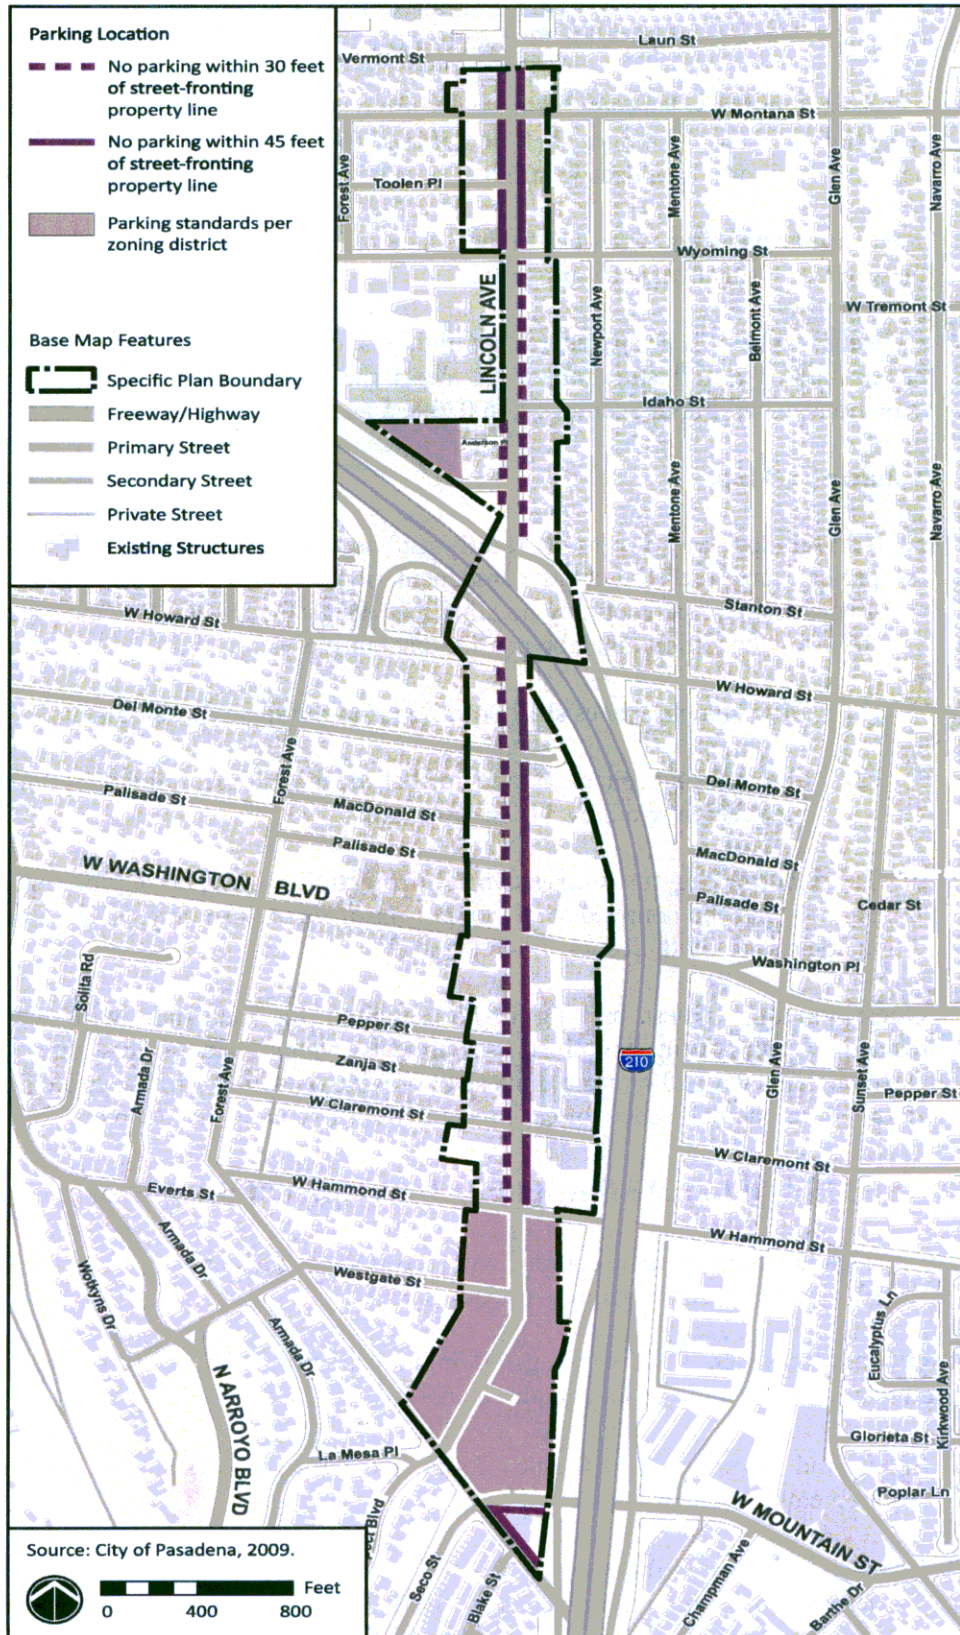

Figure 3-25 - Trellis design requirements

3. **Minimum depth.** The trellis or arcade shall have a minimum overall depth of 12 feet and a minimum clear interior depth of 10 feet measured perpendicular to the front property line.
 4. **Height to width proportion.** Where trellises or arcades are utilized, the overall proportion of the building bays of these elements should be approximately square and have a maximum ratio of 1.5 feet of height for each one foot of length.
 5. **Clear height.** Where trellises or arcades are utilized, openings, coverings including structural members and ceilings, and other overhead elements shall have a minimum clear height of 12 feet.
- E. Building entrances.** Commercial uses abutting a Lincoln Avenue setback line shall provide at least one street-facing entrance which shall serve as the primary entrance to the business. Interior space shall be arranged to orient toward that entrance as the primary entrance, and signage or other means shall be used to direct persons toward that entrance. Street-facing entrances shall be unlocked and accessible to the public during business hours.
- F. Parking Standards and Driveways.** Parking shall meet the requirements of Chapter 17.46 (Parking and loading) and the following additional requirements.
1. **Parking location.** No parking shall be allowed in the areas shown in Figure 3-26 except that parking in the rear 60 percent of a lot shall be permitted. Partially subterranean and fully subterranean parking may extend to street lot lines.
 2. **Parking abutting an RS zones.** No above-grade, surface, subterranean or partially subterranean parking shall be located within five feet of a property line abutting an RS zone.

Figure 3-26 - Lincoln Avenue parking location

3. **Driveway frequency.** For parcels less than 200 feet in length, only one vehicular access point may be permitted. For all other lot frontages, a maximum of one vehicular access point for each 200 feet of street frontage is permitted.
4. **Landscape buffers.** Parking that is visible from streets and sidewalks or located along rear, side, or interior lot lines shall be buffered from the street, sidewalk, or lot line by a minimum five-foot landscape buffer.
5. **Tuck-under parking.** Openings to tuck-under parking spaces shall not be visible from the street or from an adjacent property.
