Dear Pasadena elected representatives,

I have lived and worked in and around Pasadena for my entire 57 years. My early years were spent at my fathers office in the Citizens Bank building. I have watched old town Pasadena being torn down or remodeled for my entire life. Needless to say, the "improvements", for the most part, have not been improvements.

This Pasadena YWCA building is an important building and should be restored to its original glory, not hacked to pieces. It should serve as a community service center for and by women as it was originally intended. I know this could be funded because I know the citizens of Pasadena would support it. This is the kind of thing that makes Pasadena great. What makes Pasadena **not** great is destroying it's purpose and the beauty of its original design and the design of the entire civic center.

I urge you to support the restoration of this building and to keep the outlining trees, sidewalks and park space as is, and as it was originally designed. Toss this hotel plan to the wind and begin the work of restoring this beautiful building to serve the community of Pasadena. This is what the people want and remember, you work for us.
