

**CORRESPONDENCE  
FROM  
02/05/2018  
CITY COUNCIL MEETING**

01/29/18

To whom it may concerns

On February 27th 2017 we presented a plan to Pasadena City Hall, at the plan checking department, for a garage conversion. The garage is situated at 323 W. Montana St., Pasadena CA 91103 and the plan was drawn by the owner, Francois Duboucheron. We paid a \$728.00 fees for plan check and \$200.00 to Alternative Energy Systems for a Certificate of Compliance.

Alon Friedman, an architect friend of the family, was told by the inspector of the checking Department, who worked on the plan, that we really needed an architect to progress in the project. So Mr. Friedman made the plans. his bill was \$3,872.40.

The big surprise has been the money we would had to pay for the permit: \$19,663.59. We could not afford this amount so we stopped the project. The permit application will be cancelled February 27th 18.

We thought that, for a small studio, the price of the permit was prohibiting and if we have been told about it we would not have started the process. We were in the spirit of the State's new legislation regarding affordably housing and, being on fixed incomes, we thought that it would have been may be difficult but not impossible for us to do the studio if the fees of the city have been reasonable

Item 13

Submitted by Joken Strack on behalf of  
Francois Duboucheron

**Answer** Standard thicknesses of insulated glass range from 11 mm to 33 mm. Custom glass thickness is also available.

**Question** What is meant by Low E Glass?

**Answer** Low E glass was Introduced in 1979; the "E" stands for Emissivity. Low E glass blocks infrared and UV light by using a thin metallic coating on or in the glass. Ultraviolet light rays are harmful to the skin as well as furniture, etc. using low E glass helps you to protect your home's interior from UV light.

**Question** Will your professionals help in installation?

**Answer** We can provide our customers with complete assistance over the telephone. Onsite installation is not available from Fab Glass and Mirror.

**Question** Can I get wholesale rates for bulk orders?

**Answer** Yes, we please visit the link below for wholesale pricing information.  
<https://www.fabglassandmirror.com/special-pricing>  
(<https://www.fabglassandmirror.com/special-pricing>)

**Question** Is Safe Shipping Guaranteed?

**Answer** Yes, we guarantee safe shipping. You don't need to worry about damage or breakage. However, in the case of damage or breakage, a claim must be filed within 24 hours of receiving the order. If a breakage claim is made after this timeframe, the request will be denied. Please visit the following link to learn more about delivery and shipping:  
<https://www.fabglassandmirror.com/over-size-delivery>  
(<https://www.fabglassandmirror.com/over-size-delivery>)

RE: Recommended Amendments to Staff Recommendations for Accessory Dwelling Units (Agenda Item #13)

I commend the staff and Council on diligently working through the neighborhood concerns while adhering to the spirit of the State legislation on Accessory Dwelling Units! I would recommend the following amendments to the staff recommendations in order to preserve the true character of "accessory" units and allow for more stable affordable housing stock.

1. **Cap Maximum ADU Size at Lesser of 50% or 800 SF for All Property Sizes** – Many full-size single-family homes in the City are 1,200 SF or less (including mine!), so anything above 800 SF is no longer "accessory". Please keep the maximum ADU size on any lot size to the lesser or 50% of the primary dwelling unit or 800 SF.
2. **Support Option #2 for ADU Affordability to Waive Residential Impact Fee** – An 800 SF unit priced at 120% of LA County median income would yield a monthly rent of \$1,600, which is still high. I support staff recommendation on affordability #2 that allows for a landlord affordability agreement.
3. **Landlord Agreement Should Exceed 7 Years for Continuity** – To ensure continuity for low income renters in ADUs and prevent them from being displaced due to change in ownership, the landlord affordability agreement should last the entire time the landlord owns the property. Upon change of ownership if the new owner does not preserve the affordability, residential impact fees should be assessed retroactively on the ADU.

Thanks again for your hard work!

Felicia Williams  
Council District 2

Re: Item #13 on the City Council agenda for Monday, Feb. 5, 2018

Dear Honorable Mayor and City Council Members,

On behalf of San Gabriel Valley Habitat for Humanity and regarding tonight's agenda item #13, we respectfully request that all fees for affordable units be lowered to affordable rates. Research shows that lower fees can help make ADUs more affordable and help homeowners stay in their homes. See: <https://accessorydwellings.org/2014/08/07/do-adus-provide-affordable-housing/>

We also want to thank the Mayor and City council for considering ways to lower the fees for ADUs. We strongly support the staff recommendation to lower the fees to affordable levels in exchange for Section 8 or income-qualified tenants for seven years. This is a much better solution than affordable housing covenants, which are problematic. We also support the staff recommendation to increase the unit size on larger properties.

As stated in the first paragraph of this e-mail, we ask that the fees for ADUs be lowered across the board in all cases. We feel that the current fee of \$25,000 to \$31,000 for one 600 s.f. ADU is "unreasonable, excessive and burdensome" (to use the language of the state law). When you add the City's requirements of architectural plans and additional regulatory requirements, units become extremely expensive to build, and rents must be set at levels out of reach for our community in order to obtain a return on the investment. **Therefore, it makes sense to ask that all fees be lowered to affordable rates.** Research shows that lower fees can help make ADUs more affordable and help homeowners stay in their homes. See: <https://accessorydwellings.org/2014/08/07/do-adus-provide-affordable-housing/>

Our City is facing a severe housing crisis, with over half of its residents unable to afford rents, which now average over \$2,100 for a one-bedroom apartment. ADUs tend to rent below average market rate when fees are not excessive. Please allow private homeowners to help alleviate our housing shortage—which is pushing up prices and driving moderate and lower income people out of our City).

Please vote in a way that will support our city's approved housing vision:

"All Pasadena residents have an equal right to live in decent, safe and affordable housing in a suitable living environment for the long-term well-being and stability of themselves, their families, their neighborhoods, and their community. The housing vision for Pasadena is to maintain a socially and economically diverse community of homeowners and renters who are afforded this right"

Warm Regards,

David R. Whitehead  
388 E. Mountain Street  
Pasadena, CA 91004

CITY CLERK

February 5, 2018

Mayor Tornek and City Council  
City Hall, City of Pasadena  
100 N. Garfield Avenue, Room S228  
Pasadena, CA 91109-7215

Good morning Mayor Tornek and Council Members:

I wish to, respectfully, proposed the following with regard to:

**1. ADU Size Limitations - An Alternative Maximum ADU Size regulation:**

"Parcels meeting the proposed minimum parcel size of 7,200 square feet (or which are zoned for multiple housing units [RM-zoned]) with a primary dwelling of less than 1,200 square feet in size, will be limited to a maximum ADU size of 600 square feet. For parcels with an existing primary dwelling of 1,200 square feet or greater, the maximum ADU size be the lesser of 800 square feet or 50% of the size of the primary dwelling."

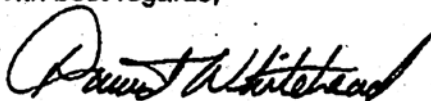

In other words, the 50% maximum size limitation would not go into effect until existing dwelling size reaches 1200 square feet.

My reason for proposing this alternative is simple and practical: A homeowner of an existing small house of, say, 800 square feet, being limited to constructing a 400 square foot (20' x 20') ADU provides little or no incentive to that homeowner to construct such an ADU. A 400 square foot ADU is *extremely* small – barely larger than a one-car garage - and would limit it to being a small studio apartment. However, at 600 square feet, a one bedroom – or possibly two-bedroom - unit could be built to provide a more comfortable dwelling.

**2. Residential Impact Fees:** Please consider creating a "middle ground" of Impact Fees for new ADUs – some fees that are not as expensive as the existing standard Residential Impact Fees, but not entirely eliminated as they would be under the proposed "covenant"/non-recorded landlord agreement concept. A reasonable "middle ground" should not be so expensive as to dissuade the construction of new ADUs, but also not disinsentivize landlords/homeowners from using some new ADUs for affordable housing. Perhaps fees based on square footage, such as \$5 - \$7 per sq. foot.

Thank you for your time and attention in considering these two suggestions.

With best regards,

David Whitehead  
Pasadena homeowner/resident

### Linda Vista-Annandale Association

Mayor Tornek and Councilmembers  
c/o Mark Jomsky, City Clerk

Re: Council Meeting 2/5/2018; Agenda Item 13; ADUs -- Size and Fees

Mayor Tornek and Councilmembers:

The Linda Vista-Annandale Association (LVAA) has the following comments on this Agenda item.

1. Maximum Unit Size. In our view, the proposed new rules on maximum unit size will not work in much of non-hillside areas of West Pasadena, including District 7. The proposal, in effect, will give non-hillside owners/developers a 1,200 square foot new ADU as a matter of right. Most of the lots referred to in this part of the City are much larger than 10,000 square feet, and, most of the homes in this part of the City are so much larger that the 50% rule means nothing. For example, in the Linda Vista Annandale area, if a lot is approximately 15,000 square feet and the house is 4,000 square feet, in a non-hillside area, the ADU will be allowed at 1,200 square feet. This will be a very common new construction situation.

We think that you need to go back to the original proposal -- a sliding scale for larger lots. You could begin with 10,000 square foot lots at 800 square feet for the ADU, and then gradually increase the size of the lot to a common size in this part of the City -- we suggest 20,000 square feet -- to provide a 1,200 square foot ADU as a matter of right. Lots below 20,000 square feet, which is a common approximate lot size in this part of the City, but more than 10,000 square feet, should be allowed something above 800 but below 1,200, in order to preserve the underlying single-family character of non-hillside areas. An actual sliding scale also would reflect the fact that most homes in this part of the City are quite large and the 50% rule almost meaningless.

2. Development Impact Fees. In LVAA's view, the 7-year ADU affordability requirement to avoid nearly all of Development Impact Fees is simply too short. We suggest 15 years in order to ensure the supply of real affordable housing; and, truly and effectively avoid speculative ADU development.

Further, we oppose the proposed "cliff" ending rule for no payment of full Residential Impact Fees. As proposed, at the end of the 7 years, the owner/developer is "home free" -- no more Impact Fees required. The property then can be sold with a big increase in value since the ADU is now available for market rents. This idea completely ignores the enormous importance of Residential Impact Fees to provide open space and parks so needed in the City. We suggest that if the owner/developer abandons affordability after just 7 years, some percentage such as 50% of the original Residential Impact Fees, with a credit for what was paid, should be due and payable at that time, and, this obligation should run with the land.

Thank you for considering our comments.

Linda Vista-Annandale Association

Nina Chomsky, President

**Subject:** re: Urgent: opportunity to support affordable housing in Pasadena at this Monday's city council  
**Attachments:** Letter fot the city council for Monday 1-5-2018.docx

This Monday the City Council will vote on the fees to build an ADU-those cute tiny homes in our back yards. Right now the fees range from \$25,000 to \$31,000 for a 600 sf unit. This is excessive and needs to be lowered so that homeowners have an opportunity to address California's housing shortage, and have an extra income on their property.

Also on Monday we have a chance to support bringing more permanent supportive housing to Pasadena which ends homelessness for some of the 575 living on our streets (last year's count). This land use is being considered for the NE corner of Fair Oaks and Orange Grove.

Please carefully read the attached letter, then if you agree, please sign send to:  
[mjomsky@cityofpasadena.net](mailto:mjomsky@cityofpasadena.net) who will be sure

they are distributed to all the City Council members.

Additionally, you can make copies to distribute to your church and have folks sign them. I will have a stack of these available at my home if you wish to pick some up today and you can also bring me any signed letters you wish to have submitted by the end of Sunday and I will be sure they are submitted in a timely manner. Our address: 1628 N. Garfield Ave, Pasadena, CA 91104

I can't thank you enough for this act of love for our community and humanity to make housing more affordable and help end homelessness.

Sincerely, Jill

Re: Items #11 and #13 on the City Council agenda for Monday, Feb. 5, 2018

Dear Honorable Mayor and City Council Members,

First regarding item #13, I want to say "thank you" for considering ways to lower the fees for ADUs. I strongly support the staff recommendation to lower the fees to affordable levels in exchange for Section 8 or income-qualified tenants for seven years. This is a much better solution than affordable housing covenants, which are problematic. I also support the staff recommendation to increase the unit size on larger properties.

In addition to recommending the staff's proposal, I also ask that the fees for ADUs be lowered across the board in all cases. I feel that the current fee of \$25,000 to \$31,000 for one 600 s.f. ADU is "unreasonable, excessive and burdensome" (to use the language of the state law). When you add the City's requirements of architectural plans and additional regulatory requirements, units become extremely expensive to build, and rents must be set at levels out of reach for our community in order to obtain a return on the investment. **Therefore, it makes sense to ask that all fees be lowered to affordable rates.** Research shows that lower fees can help make ADUs more affordable and help homeowners stay in their homes. See: <https://accessorydwellings.org/2014/08/07/do-adus-provide-affordable-housing/>

Our City is facing a severe housing crisis, with over half of its residents unable to afford rents, which now average over \$2,100 for a one-bedroom apartment. ADUs tend to rent below average market rate when fees are not excessive. Please allow private homeowners to help alleviate our housing shortage—which is pushing up prices and driving moderate and lower income people out of our City).

In addition to our concern about the fees for ADUs I also care about the city-owned property on the NE corner of Fair Oaks and Orange Grove (item #11 on the agenda). This property provides us with the opportunity to create another beautiful permanent supportive housing (PSH) like Marv's place that has won recognition as the best PSH in all of Southern California. We have the funding, the land, and the need is there, so it makes the most sense to use this property to move those who are living on our streets, especially seniors, into housing. This is the compassionate and right thing to do. It would again put our city on the map as a model to other cities, like beautiful Marv's place has pictured below-and recognized at the best PSH in all of Southern California.

Please vote in a way that will support our city's approved housing vision:

"All Pasadena residents have an equal right to live in decent, safe and affordable housing in a suitable living environment for the long-term well-being and stability of themselves, their families, their neighborhoods, and their community. The housing vision for Pasadena is to maintain a socially and economically diverse community of homeowners and renters who are afforded this right"

Thank you!

Therefore, it makes sense to ask that all fees be lowered to affordable rates. Research shows that lower fees can help make ADUs more affordable and help homeowners stay in their homes. See: <https://accessorydwelling.org/2014/08/07/30-adus-provide-affordable-housing/>

Our City is facing a severe housing crisis, with over half of its residents unable to afford rents, which now average over \$2,100 for a one-bedroom apartment. ADUs tend to rent below average market rate when fees are not excessive. Please allow private homeowners to help alleviate our housing shortage—which is pushing up prices and driving moderate and lower income people out of our City.

In addition to our concern about the fees for ADUs we also care about the city-owned property on the NE corner of Fair Oaks and Orange Grove (item #11 on the agenda). This property provides us with the opportunity to create another beautiful permanent supportive housing (PSH) like Marv's place that has won recognition as the best PSH in all of Southern California. We have the funding, the land, and the need there, so it makes the most sense to use this property to move those who are living on our streets, especially seniors, into housing. This is the compassionate and right thing to do. It would again put our city on the map as a model to other cities—like beautiful Marv's place as pictured below—and recognized as the best PSH in all of Southern California.

Please vote in a way that will support our city's approved housing vision:

"All Pasadena residents have an equal right to live in decent, safe and affordable housing in a suitable living environment for the long-term well-being and stability of themselves, their families, their neighborhoods, and their community. The housing vision for Pasadena is to maintain a socially and economically diverse community of homeowners and renters who are afforded this right."

Re: Items #11 and #13 on the City Council agenda for Monday, Feb. 5, 2018

Dear Honorable Mayor and City Council Members,

First regarding item #13, we want to say "thank you" for considering ways to lower the fees for ADUs. We strongly support the staff recommendation to lower the fees to affordable levels in exchange for Section 8 or income-qualified tenants for seven years. This is a much better solution than affordable housing covenants, which are problematic. We also support the staff recommendation to increase the unit size on larger properties.

In addition to recommending the staff's proposal, we also ask that the fees for ADUs be lowered across the board in all cases. We feel that the current fee of \$25,000 to \$31,000 for one 600 s.f. ADU is "unreasonable, excessive and burdensome" (to use the language of the state law). When you add the City's requirements of architectural plans and additional regulatory requirements, units become extremely expensive to build, and rents must be set at levels out of reach for our community in order to obtain a return on the investment. Therefore, it makes sense to ask that all fees be lowered to affordable rates. Research shows that lower fees can help make ADUs more affordable and help homeowners stay in their homes. See: <https://accessorydwellings.org/2014/08/07/do-adus-provide-affordable-housing/>

Good morning. My name is Joan Feser, Vincentian from the Society of St. Vincent de Paul, Assumption of the Blessed Virgin Mary conference in Pasadena, I am attaching my signed letter to encourage your support vote. We ask for your help to bring more permanent supportive housing to Pasadena and to help end homelessness. As Vincentians, we can assist with many physical and monetary needs, but the one area of great struggle is finding housing. Please vote in favor of ending homelessness in Pasadena,  
Thank you!

This is a much better solution than affordable housing covenants, which are problematic. We also support the staff recommendation to increase the unit size on larger properties.

In addition to recommending the staff's proposal, we also ask that the fees for ADUs be lowered across the board in all cases. We feel that the current fee of \$25,000 to \$31,000 for one 600 sq. ft ADU is "unreasonable, excessive and burdensome" (to use the language of the state law). When you add the City's requirements of architectural plans and additional regulatory requirements, units become extremely expensive to build, and rents must be set at levels out of reach for our community in order to obtain a return on the investment. **Therefore, it makes sense to ask that all fees be lowered to affordable rates.** Research shows that lower fees can help make ADUs more affordable and help homeowners stay in their homes. See: <https://accessorydwellings.org/2014/08/07/do-adus-provide-affordable-housing/>

Our City is facing a severe housing crisis, with over half of its residents unable to afford rents, which now average over \$2,100 for a one-bedroom apartment. ADUs tend to rent below average market rate when fees are not excessive. Please allow private homeowners to help alleviate our housing shortage—which is pushing up prices and driving moderate and lower income people out of our City).

In addition to our concern about the fees for ADUs we also care about the city-owned property on the NE corner of Fair Oaks and Orange Grove (item #11 on the agenda). This property provides us with the opportunity to create another beautiful permanent supportive housing (PSH) like Marv's place that has won recognition as the best PSH in all of Southern California. We have the funding, the land, and the need it there, so it makes the most sense to use this property to move those who are living on our streets, especially seniors, into housing. This is the compassionate and right thing to do. It would again put our city on the map as a model to other cities, like beautiful Marv's place has pictured below—and recognized at the best PSH in all of Southern California.

Please vote in a way that will support our city's approved housing vision:

"All Pasadena residents have an equal right to live in decent, safe and affordable housing in a suitable living environment for the long-term well-being and stability of themselves, their families, their neighborhoods, and their community. The housing vision for Pasadena is to maintain a socially and economically diverse community of homeowners and renters who are afforded this right"

Thank you!

Re: Items #11 and #13 on the City Council agenda for Monday, Feb. 5, 2018

Dear Honorable Mayor and City Council Members,

First regarding item #13, we want to say "thank you" for considering ways to lower the fees for ADUs. We strongly support the staff recommendation to lower the fees to affordable levels in exchange for Section 8 or income-qualified tenants for seven years. This is a much better solution than affordable housing covenants, which are problematic. We also support the staff recommendation to increase the unit size on larger properties.

In addition to recommending the staff's proposal, we also ask that the fees for ADUs be lowered across the board in all cases. We feel that the current fee of \$25,000 to \$31,000 for one 600 sq. ft ADU is "unreasonable, excessive and burdensome" (to use the language of the state law). When you add the City's requirements of architectural plans and additional regulatory requirements, units become extremely expensive to build, and rents must be set at levels out of reach for our community in order to obtain a return on the investment. **Therefore, it makes sense to ask that all fees be lowered to affordable rates.** Research shows that lower fees can help make ADUs more affordable and help homeowners stay in their homes. In addition to recommending the staff's proposal, we also ask that the fees for ADUs be lowered across the board in all cases. We feel that the current fee of \$25,000 to \$31,000 for one 600 s.f. ADU is "unreasonable, excessive and burdensome" (to use the language of the state law). When you add the City's requirements of architectural plans and additional regulatory requirements, units become extremely expensive to build, and rents must be set at levels out of reach for our community in order to obtain a return on the investment. Therefore, it makes sense to ask that all fees be lowered to affordable rates. Research shows that lower fees can help make ADUs more affordable and help homeowners stay in their homes. See: <https://accessorydwellings.org/2014/08/07/do-adus-provide-affordable-housing/>

Our City is facing a severe housing crisis, with over half of its residents unable to afford rents, which now average over \$2,100 for a one-bedroom apartment. ADUs tend to rent below average market rate when fees are not excessive. Please allow private homeowners to help alleviate our housing shortage—which is pushing up prices and driving moderate and lower income people out of our City).

In addition to our concern about the fees for ADUs we also care about the city-owned property on the NE corner of Fair Oaks and Orange Grove (item #11 on the agenda). This property provides us with the opportunity to create another beautiful permanent supportive housing (PSH) like Marv's place that has won recognition as the best PSH in all of Southern California. We have the funding, the land, and the need it there, so it makes the most sense to use this property to move those who are living on our streets, especially seniors, into housing. This is the compassionate and right thing to do. It would again put our city on the map as a model to other cities, like beautiful Marv's place has pictured below and recognized at the best PSH in all of Southern California.

Please vote in a way that will support our city's approved housing vision:

"All Pasadena residents have an equal right to live in decent, safe and affordable housing in a suitable living environment for the long-term well-being and stability of themselves, their families, their neighborhoods, and their community. The housing vision for Pasadena is to maintain a socially and economically diverse community of homeowners and renters who are afforded this right"

Re: Items #11 and #13 on the City Council agenda for Monday, Feb. 5, 2018

Dear Honorable Mayor and City Council Members,

First regarding item #13, we want to say "thank you" for considering ways to lower the fees for ADUs. We strongly support the staff recommendation to lower the fees to affordable levels in exchange for Section 8 or income-qualified tenants for seven years. This is a much better solution than affordable housing covenants, which are problematic. We also support the staff recommendation to increase the unit size on larger properties.

In addition to recommending the staff's proposal, we also ask that the fees for ADUs be lowered across the board in all cases. We feel that the current fee of \$25,000 to \$31,000 for one 600 s.f. ADU is "unreasonable, excessive and burdensome" (to use the language of the state law). This is a much better solution than affordable housing covenants, which are problematic. We also support the staff recommendation to increase the unit size on larger properties.

In addition to recommending the staff's proposal, we also ask that the fees for ADUs be lowered across the board in all cases. We feel that the current fee of \$25,000 to \$31,000 for one 600 s.f. ADU is "unreasonable, excessive and burdensome" (to use the language of the state law). When you add the City's requirements of architectural plans and additional regulatory requirements, units become extremely expensive to build, and rents must be set at levels out of reach for our community in order to obtain a return on the investment. Therefore, it makes sense to ask that all fees be lowered to affordable rates. Research shows that lower fees can help make ADUs more affordable and help homeowners stay in their homes. See: <https://accessorydwellings.org/2014/08/07/do-adus-provide-affordable-housing/>

Our City is facing a severe housing crisis, with over half of its residents unable to afford rents, which now average over \$2,100 for a one-bedroom apartment. ADUs tend to rent below average market rate when fees are not excessive. Please allow private homeowners to help alleviate our housing shortage—which is pushing up prices and driving moderate and lower income people out of our City).

In addition to our concern about the fees for ADUs we also care about the city-owned property on the NE corner of Fair Oaks and Orange Grove (item #11 on the agenda). This property provides us with the opportunity to create another beautiful permanent supportive housing (PSH) like Marv's place that has won recognition as the best PSH in all of Southern California. We have the funding, the land, and the need it there, so it makes the most sense to use this property to move those who are living on our streets, especially seniors, into housing. This is the compassionate and right thing to do. It would again put our city on the map as a model to other cities, like beautiful Marv's place has pictured below and recognized at the best PSH in all of Southern California.

Please vote in a way that will support our city's approved housing vision:

"All Pasadena residents have an equal right to live in decent, safe and affordable housing in a suitable living environment for the long-term well-being and stability of themselves, their families, their neighborhoods, and their community. The housing vision for Pasadena is to maintain a socially and economically diverse community of homeowners and renters who are afforded this right"

Re: Items #11 and #13 on the City Council agenda for Monday, Feb. 5, 2018

Dear Honorable Mayor and City Council Members,

First regarding item #13, we want to say "thank you" for considering ways to lower the fees for ADUs. We strongly support the staff recommendation to lower the fees to affordable levels in exchange for Section 8 or income-qualified tenants for seven years. This is a much better solution than affordable housing covenants, which are problematic. We also support the staff recommendation to increase the unit size on larger properties.

In addition to recommending the staff's proposal, we also ask that the fees for ADUs be lowered across the board in all cases. We feel that the current fee of \$25,000 to \$31,000 for one 600 s.f. ADU is "unreasonable, excessive and burdensome" (to use the language of the state law). When you add the City's requirements of architectural plans and additional regulatory requirements, units become extremely expensive to build, and rents must be set at levels out of reach for our community in order to obtain a return on the investment. Therefore, it makes sense to ask that all fees be lowered to affordable rates. Research shows that lower fees can help make ADUs more affordable and help homeowners stay in their homes. See: <https://accessorydwelling.org/2014/08/07/do-adus-provide-affordable-housing/>

Our City is facing a severe housing crisis, with over half of its residents unable to afford rents, which now average over \$2,100 for a one-bedroom apartment. ADUs tend to rent below average market rate when fees are not excessive. Please allow private homeowners to help alleviate our housing shortage—which is pushing up prices and driving moderate and lower income people out of our City).

In addition to our concern about the fees for ADUs we also care about the city-owned property on the NE corner of Fair Oaks and Orange Grove (item #11 on the agenda). This property provides us with the opportunity to create another beautiful permanent supportive housing (PSH) like Marv's place that has won recognition as the best PSH in all of Southern California. We have the funding, the land, and the need it there, so it makes the most sense to use this property to move those who are living on our streets, especially seniors, into housing. This is the compassionate and right thing to do. It would again put our city on the map as a model to other cities, like beautiful Marv's place has pictured below-and recognized at the best PSH in all of Southern California.

Please vote in a way that will support our city's approved housing vision:

"All Pasadena residents have an equal right to live in decent, safe and affordable housing in a suitable living environment for the long-term well-being and stability of themselves, their families, their neighborhoods, and their community. The housing vision for Pasadena is to maintain a socially and economically diverse community of homeowners and renters who are afforded this right"

Thank you!

Re: Items #11 and #13 on the City Council agenda for Monday, Feb. 5, 2018

Dear Honorable Mayor and City Council Members,

First regarding item #13, we want to say "thank you" for considering ways to lower the fees for ADUs. We strongly support the staff recommendation to lower the fees to affordable levels in exchange for Section 8 or income-qualified tenants for seven years. This is a much better solution than affordable housing covenants, which are problematic. We also support the staff recommendation to increase the unit size on larger properties.

In addition to recommending the staff's proposal, we also ask that the fees for ADUs be lowered across the board in all cases. We feel that the current fee of \$25,000 to \$31,000 for one 600 s.f. ADU is "unreasonable, excessive and burdensome" (to use the language of the state law). When you add the City's requirements of architectural plans and additional regulatory requirements, units become extremely expensive to build, and rents must be set at levels out of reach for our community in order to obtain a return on the investment. Therefore, it makes sense to ask that all fees be lowered to affordable rates. Research shows that lower fees can help make ADUs more affordable and help homeowners stay in their homes. See: <https://accessorydwellings.org/2014/08/07/do-adus-provide-affordable-housing/>

Our City is facing a severe housing crisis, with over half of its residents unable to afford rents, which now average over \$2,100 for a one-bedroom apartment. ADUs tend to rent below average market rate when fees are not excessive. Please allow private homeowners to help alleviate our housing shortage—which is pushing up prices and driving moderate and lower income people out of our City).

In addition to our concern about the fees for ADUs we also care about the city-owned property on the NE corner of Fair Oaks and Orange Grove (item #11 on the agenda). This property provides us with the opportunity to create another beautiful permanent supportive housing (PSH) like Marv's place that has won recognition as the best PSH in all of Southern California. Re: Items #11 and #13 on the City Council agenda for Monday, Feb. 5, 2018

Dear Honorable Mayor and City Council Members,

First regarding item #13, we want to say "thank you" for considering ways to lower the fees for ADUs. We strongly support the staff recommendation to lower the fees to affordable levels in exchange for Section 8 or income-qualified tenants for seven years. This is a much better solution than affordable housing covenants, which are problematic. We also support the staff recommendation to increase the unit size on larger properties.

In addition to recommending the staff's proposal, we also ask that the fees for ADUs be lowered across the board in all cases. We feel that the current fee of \$25,000 to \$31,000 for one 600 s.f. ADU is "unreasonable, excessive and burdensome" (to use the language of the state law). When you add the City's requirements of architectural plans and additional regulatory requirements, units become extremely expensive to build, and rents must be set at levels out of reach for our community in order to obtain a return on the investment. **Therefore, it makes sense to ask that all fees be lowered to affordable rates.** Research shows that lower fees can help make ADUs more affordable and help homeowners stay in their homes. See: <https://accessorydwellings.org/2014/08/07/do-adus-provide-affordable-housing/>

Our City is facing a severe housing crisis, with over half of its residents unable to afford rents, which now average over \$2,100 for a one-bedroom apartment. ADUs tend to rent below average market rate when fees are not excessive. Please allow private homeowners to help alleviate our housing shortage—which is pushing up prices and driving moderate and lower income people out of our City).

In addition to our concern about the fees for ADUs we also care about the city-owned property on the NE corner of Fair Oaks and Orange Grove (item #11 on the agenda). This property provides us with the opportunity to create another beautiful permanent supportive housing (PSH) like Marv's place that has won recognition as the best PSH in all of Southern California. We have the funding, the land, and the need it there, so it makes the most sense to use this property to move those who are living on our streets, especially seniors, into housing. This is the compassionate and right thing to do. It would again put our city on the map as a model to other cities, like beautiful Marv's place has pictured below-and recognized at the best PSH in all of Southern California.

Please vote in a way that will support our city's approved housing vision:

"All Pasadena residents have an equal right to live in decent, safe and affordable housing in a suitable living environment for the long-term well-being and stability of themselves, their families, their neighborhoods, and their community. The housing vision for Pasadena is to maintain a socially and economically diverse community of homeowners and renters who are afforded this right"

Thank you!

ADU is "unreasonable, excessive and burdensome" (to use the language of the state law). When you add the City's requirements of architectural plans and additional regulatory requirements, units become extremely expensive to build, and rents must be set at levels out of reach for our community in order to obtain a return on the investment. **Therefore, it makes sense to ask that all fees be lowered to affordable rates.** Research shows that lower fees can help make ADUs more affordable and help homeowners stay in their homes. See: <https://accessorydwellings.org/2014/08/07/do-adus-provide-affordable-housing/>

Our City is facing a severe housing crisis, with over half of its residents unable to afford rents, which now average over \$2,100 for a one-bedroom apartment. ADUs tend to rent below average market rate when fees are not excessive. Please allow private homeowners to help alleviate our housing shortage—which is pushing up prices and driving moderate and lower income people out of our City).

In addition to our concern about the fees for ADUs we also care about the city-owned property on the NE corner of Fair Oaks and Orange Grove (item #11 on the agenda). This property provides us with the opportunity to create another beautiful permanent supportive housing (PSH) like Marv's place that has won recognition as the best PSH in all of Southern California. We have the funding, the land, and the need it there, so it makes the most sense to use this property to move those who are living on our streets, especially seniors, into housing. This is the compassionate and right thing to do. It would again put our city on the map as a model to other cities, like beautiful Marv's place has pictured below-and recognized at the best PSH in all of Southern California.

Please vote in a way that will support our city's approved housing vision:

"All Pasadena residents have an equal right to live in decent, safe and affordable housing in a suitable living environment for the long-term well-being and stability of themselves, their families, their neighborhoods, and their community. The housing vision for Pasadena is to maintain a socially and economically diverse community of homeowners and renters who are afforded this right"

Thank you!

Re: Items #11 and #13 on the City Council agenda for Monday, Feb. 5, 2018

Dear Honorable Mayor and City Council Members,

First regarding item #13, we want to say "thank you" for considering ways to lower the fees for ADUs. We strongly support the staff recommendation to lower the fees to affordable levels in exchange for Section 8 or income-qualified tenants for seven years. This is a much better solution than affordable housing covenants, which are problematic. We also support the staff recommendation to increase the unit size on larger properties.

In addition to recommending the staff's proposal, we also ask that the fees for ADUs be lowered across the board in all cases. We feel that the current fee of \$25,000 to \$31,000 for one 600 s.f. ADU is "unreasonable, excessive and burdensome" (to use the language of the state law). When you add the City's requirements of architectural plans and additional regulatory requirements, units become extremely expensive to build, and rents must be set at levels out of reach for our community in order to obtain a return on the investment. Therefore, it makes sense to ask that all fees be lowered to affordable rates. Research shows that lower fees can help make ADUs more affordable and help homeowners stay in their homes. ADU is "unreasonable, excessive and burdensome" (to use the language of the state law). When you add the City's requirements of architectural plans and additional regulatory requirements, units become extremely expensive to build, and rents must be set at levels out of reach for our community in order to obtain a return on the investment. Therefore, it makes sense to ask that all fees be lowered to affordable rates. Research shows that lower fees can help make ADUs more affordable and help homeowners stay in their homes. See: <https://accessorydwellings.org/2014/08/07/do-adus-provide-affordable-housing/>

Our City is facing a severe housing crisis, with over half of its residents unable to afford rents, which now average over \$2,100 for a one-bedroom apartment. ADUs tend to rent below average market rate when fees are not excessive. Please allow private homeowners to help alleviate our housing shortage—which is pushing up prices and driving moderate and lower income people out of our City).

In addition to our concern about the fees for ADUs we also care about the city-owned property on the NE corner of Fair Oaks and Orange Grove (item #11 on the agenda). This property provides us with the opportunity to create another beautiful permanent supportive housing (PSH) like Marv's place that has won recognition as the best PSH in all of Southern California. We have the funding, the land, and the need it there, so it makes the most sense to use this property to move those who are living on our streets, especially seniors, into housing. This is the compassionate and right thing to do. It would again put our city on the map as a model to other cities, like beautiful Marv's place has pictured below—and recognized at the best PSH in all of Southern California.

Please vote in a way that will support our city's approved housing vision:

"All Pasadena residents have an equal right to live in decent, safe and affordable housing in a suitable living environment for the long-term well-being and stability of themselves, their families, their neighborhoods, and their community. The housing vision for Pasadena is to maintain a socially and economically diverse community of homeowners and renters who are afforded this right"

Thank you!

Re: Items #11 and #13 on the City Council agenda for Monday, Feb. 5, 2018

Dear Honorable Mayor and City Council Members,

First regarding item #13, we want to say "thank you" for considering ways to lower the fees for ADUs. We strongly support the staff recommendation to lower the fees to affordable levels in exchange for Section 8 or income-qualified tenants for seven years. This is a much better solution than affordable housing covenants, which are problematic. We also support the staff recommendation to increase the unit size on larger properties.

In addition to recommending the staff's proposal, we also ask that the fees for ADUs be lowered across the board in all cases. We feel that the current fee of \$25,000 to \$31,000 for one 600 s.f. ADU is "unreasonable, excessive and burdensome" (to use the language of the state law). When you add the City's requirements of architectural plans and additional regulatory requirements, units become extremely expensive to build, and rents must be set at levels out of reach for our community in order to obtain a return on the investment. **Therefore, it makes sense to ask that all fees be lowered to affordable rates.** Research shows that lower fees can help make ADUs more affordable and help homeowners stay in their homes. See: <https://accessorydwellings.org/2014/08/07/do-adus-provide-affordable-housing/>

Our City is facing a severe housing crisis, with over half of its residents unable to afford rents, which now average over \$2,100 for a one-bedroom apartment. In addition to our concern about the fees for ADUs we also care about the city-owned property on the NE corner of Fair Oaks and Orange Grove (item #11 on the agenda). This property provides us with the opportunity to create another beautiful permanent supportive housing (PSH) like Marv's place that has won recognition as the best PSH in all of Southern California. We have the funding, the land, and the need it there, so it makes the most sense to use this property to move those who are living on our streets, especially seniors, into housing. This is the compassionate and right thing to do. It would again put our city on the map as a model to other cities, like beautiful Marv's place has pictured below and recognized at the best PSH in all of Southern California.

Please vote in a way that will support our city's approved housing vision:

"All Pasadena residents have an equal right to live in decent, safe and affordable housing in a suitable living environment for the long-term well-being and stability of themselves, their families, their neighborhoods, and their community. The housing vision for Pasadena is to maintain a socially and economically diverse community of homeowners and renters who are afforded this right"

Thank you!

Re: Items #11 and #13 on the City Council agenda for Monday, Feb. 5, 2018

Dear Honorable Mayor and City Council Members,

First regarding item #13, we want to say "thank you" for considering ways to lower the fees for ADUs. We strongly support the staff recommendation to lower the fees to affordable levels in exchange for Section 8 or income-qualified tenants for seven years. This is a much better solution than affordable housing covenants, which are problematic. We also support the staff recommendation to increase the unit size on larger properties.

In addition to recommending the staff's proposal, we also ask that the fees for ADUs be lowered across the board in all cases. We feel that the current fee of \$25,000 to \$31,000 for one 600 s.f. ADU is "unreasonable, excessive and burdensome" (to use the language of the state law). When you add the City's requirements of architectural plans and additional regulatory requirements, units become extremely expensive to build, and rents must be set at levels out of reach for our community in order to obtain a return on the investment. Therefore, it makes sense to ask that all fees be lowered to affordable rates. Research shows that lower fees can help make ADUs more affordable and help homeowners stay in their homes. See: <https://accessorydwellings.org/2014/08/07/do-adus-provide-affordable-housing/>

Our City is facing a severe housing crisis, with over half of its residents unable to afford rents, which now average over \$2,100 for a one-bedroom apartment. ADUs tend to rent below average market rate when fees are not excessive. Please allow private homeowners to help alleviate our housing shortage—which is pushing up prices and driving moderate and lower income people out of our City).

In addition to our concern about the fees for ADUs we also care about the city-owned property on the NE corner of Fair Oaks and Orange Grove (item #11 on the agenda). This property provides us with the opportunity to create another beautiful permanent supportive housing (PSH) like Marv's place that has won recognition as the best PSH in all of Southern California. It would again put our city on the map as a model to other cities, like beautiful Mar's place has pictured below—and recognized at the best PSH in all of Southern California.

Please vote in a way that will support our city's approved housing vision:

"All Pasadena residents have an equal right to live in decent, safe and affordable housing in a suitable living environment for the long-term well-being and stability of themselves, their families, their neighborhoods, and their community. The housing vision for Pasadena is to maintain a socially and economically diverse community of homeowners and renters who are afforded this right"

Thank you!

Re: Items #11 and #13 on the City Council agenda for Monday, Feb. 5, 2018

Dear Honorable Mayor and City Council Members,

First regarding item #13, we want to say "thank you" for considering ways to lower the fees for ADUs. We strongly support the staff recommendation to lower the fees to affordable levels in exchange for Section 8 or income-qualified tenants for seven years. This is a much better solution than affordable housing covenants, which are problematic. We also support the staff recommendation to increase the unit size on larger properties.

In addition to recommending the staff's proposal, we also ask that the fees for ADUs be lowered across the board in all cases. We feel that the current fee of \$25,000 to \$31,000 for one 600 s.f. ADU is "unreasonable, excessive and burdensome" (to use the language of the state law). When you add the City's requirements of architectural plans and additional regulatory requirements, units become extremely expensive to build, and rents must be set at levels out of reach for our community in order to obtain a return on the investment. Therefore, it makes sense to ask that all fees be lowered to affordable rates. Research shows that lower fees can help make ADUs more affordable and help homeowners stay in their homes. See: <https://accessorydwellings.org/2014/08/07/do-adus-provide-affordable-housing/>

Our City is facing a severe housing crisis, with over half of its residents unable to afford rents, which now average over \$2,100 for a one-bedroom apartment. ADUs tend to rent below average market rate when fees are not excessive. Please allow private homeowners to help alleviate our housing shortage—which is pushing up prices and driving moderate and lower income people out of our City).

In addition to our concern about the fees for ADUs we also care about the city-owned property on the NE corner of Fair Oaks and Orange Grove (item #11 on the agenda). This property provides us with the opportunity to create another beautiful permanent supportive housing (PSH) like Marv's place that has won recognition as the best PSH in all of Southern California. We have the funding, the land, and the need it there, so it makes the most sense to use this property to move those who are living on our streets, especially seniors, into housing. This is the compassionate and right thing to do. It would again put our city on the map as a model to other cities, like beautiful Marv's place has pictured below—and recognized at the best PSH in all of Southern California.

Please vote in a way that will support our city's approved housing vision:
