RECOMMENDATIONS FROM OFFICERS AND DEPARTMENTS

AFFORDABLE HOUSING CONCESSION PERMIT NO. 11869 LOCATED AT 253 S. LOS ROBLES AVENUE

Recommendation: It is recommended that the City Council conduct a quasi-judicial appeal hearing and take the following action:

(1) Adopt the Environmental Determination that the proposed project is exempt from environmental review pursuant to the guidelines of the California Environmental Quality Act (Public Resources Code Section 21080(b)(9); Administrative Code, Title 14, Chapter 3, Section 15332, Class 32, In-Fill Development Projects) and that there are no features that distinguish this project from others in the exempt class. Therefore, there are no unusual circumstances; and

(2) Uphold the Board of Zoning Appeal's decision and approve Affordable Housing Concession Permit No. 11869.

David Reyes, Director of Planning and Community Development, Talyn Mirzakhanian, Principle Planner, and Mike Bagheri, Transportation Development Manager, presented a PowerPoint presentation on the item; with all responding to questions. Laura Cornejo, Director of Transportation, responded to questions related to the Transportation's presentation on the updated California Environmental Quality Act (CEQA) and non-CEQA thresholds and caps; and the evaluation of accumulate impacts. Kathe Head, Managing Principal with Keyser Marston Associates, Inc. (City consultant), responded to questions related to the proposed project, base-zoning, and information contained in the comparative financial analysis.

Councilmember Madison expressed concerns with developers utilizing density bonuses to avoid providing on-site affordable housing as part of their proposed projects; and spoke on the need to contact state legislators to provide equalizing legislation that provides some concessions and considerations to cities that have aggressive inclusionary housing ordinances.

Councilmember Wilson requested that staff provide information on the updated Regional Housing Needs Assessment (RHNA) data including the methodology, and benchmarks. He also expressed concerns with information contained in the CEQA and non-CEQA analysis, particularly regarding the methodology of the analysis, which lacks cumulative impacts and the range of mitigation measures.

Councilmember Gordo expressed concerns regarding the lack of measurements for cumulative impacts. He encouraged staff to investigate ways to better measure such impacts, and requested that staff consider utilizing this information to enact mitigation measures that would require developers to work with the City to help mitigate cumulative impacts. He also expressed concerns with the amount of additional square footage of the proposed revised project, specifically the increase from 60 to 75 feet in height. He requested that staff provide the draft RHNA formula to help determine the number of new units the City must build, with the formula serving as a basis for appeal or challenge, the timeline to appeal or challenge; and that a discussion on the RHNA formula and appeal process be agendized as soon as possible at a future City Council meeting.

The following individuals spoke in opposition to the staff recommendation and/or provided comments related to the proposed project:

Ken McCormick, Pasadena resident
Andrew Salimian, representing Pasadena Heritage
Nina Chomsky, Pasadena resident
John Latia, representing Madison Heights Neighborhood Association (MHNA)
Erika Foy, representing Livable Pasadena
Suzie Boyer, representing MHNA
Ryan Panzarello, Pasadena resident
Megan Foker, Livable Pasadena

Richard A. McDonald, representing the applicant, spoke in favor of the staff recommendation; clarified information related to the project; and responded to questions. Rob Tyler, Architect with Tyler + Kelly Architecture, responded to questions related to the sites massing diagram.

Vice Mayor Hampton expressed opposition to the inclusion of rental units as part of the proposed project. He suggested that it would be more beneficial to allow for units to be sold as affordable condominium units to promote affordable homeownership. He also expressed concerns that the proposed project is not in compliance with the City's General Plan and reiterated his request to consider updates to the General Plan as soon as possible. He concluded by stating he was unable to support the project.

Councilmember McAustin spoke on the impacts that the various state legislative actions have had on the City, which are designed to increase the housing stock, addressing state housing shortages and affordability issues. She stated that she believes the project should be approved due to state legislation and to ensure that the City is meeting the requirements of state mandates. Additionally, she stated, insofar as the state is adopting laws that strip the City of its fundamental rights to self-govern and maintain local control, the City should push back against the state legislation.

Councilmember Gordo expressed concerns that the proposed project provides few affordable housing units, and noted that the high density development is going to change the character of the surrounding area, which is also inconsistent with the General Plan. He expressed his desire for the City Council to consider rejoining the Council of Governments, as they are engaged with a joint powers of authority to bring more dollars for affordable housing to Pasadena; and in favor of working with other

municipalities to push back on state legislation. He asked staff to provide additional information on the in-fill exemption so that the City Council may have a better understanding of cumulative impacts, the appropriateness of applying the exemption, and agenda at a future City Council meeting for discussion. Lastly, he expressed concerns with the procedure that was followed on this proposed project and believes that staff is not operating within the City's established rules.

Councilmember Madison stated that he does not believe the process is procedurally flawed, but reiterated his concerns that Pasadena (with robust inclusionary zoning legislation in place) and other cities with few, if any, inclusionary zoning requirements are subject to the same density bonus legislation.

Mayor Tornek stated that he believes staff has responded to concerns and did a good job on this complicated project. He spoke on the need for the City Council to be mindful of the law, his preference that the City Council align with communities (i.e. Glendale, Burbank) who have made affordable housing efforts part of their General Plans; and spoke in favor of the staff recommendation.

Councilmember Wilson expressed concerns with the flaws on how traffic impacts are measured, and the proposed project's inconsistency with the City's General Plan. He stated that the City Council has to follow the law and the proposed project comports with the law; and for staff to amplify the City's efforts to address the critical policy issues related to state legislation, and transportation. He asked that staff work with the Design Commission to provide additional attentiveness to the project's site plan, specifically related to the tree preservation.

Councilmember Kennedy spoke in opposition to any proposed litigation against the state related to affordable housing, including legislation that provides developers with housing concessions; and stated the need for the City to abide by state legislation and rules. He also spoke on the need to agenda at a future City Council meeting issues related to the usurpation of local control and governance by the State of California; and stated his support for the staff recommendation.
