Dear Honorable Mayor and Councilmembers,

Our City deserves to have streets that are safe and livable for all users. In 2014, Pasadena set the standard for California by being the first to adopt VMT. Before this change, the most important thing about a street was how fast the cars on it could move. Now we can consider how close new housing is to jobs and retail. This allows us to design our streets for people, not only cars.

Please maintain VMT as our impact metric.

Sincerely,
Eric Sawyer

Dear Honorable Mayor and Councilmembers,

Our beautiful City of Pasadena deserves to have streets that are safe and livable for all users.

Please maintain VMT as our traffic impact metric.

Wishing you and yours a wonderful 2020,

Simon

One thing I love about Pasadena is the beautiful tree-lined streets that allow me to walk with my kid almost every day to the places that we want to go: the grocery store, the library, the park. Thank you for using metrics that take into account our travel, even when we walk!

Please maintain VMT as our impact metric.

Sincerely,

Virginia Andrews

In addition, it is common sense that by enabling our inner city to be more walkable and navigable by bikes, scooters etc. it alleviates car parking and car congestion overall, makes our city and air quality healthy over all.

Sincerely,

Richard Parsekian
