

## CITY OF PASADENA

### ARTICLE 12.5 STATUTORY EXEMPTION EVALUATION REPORT

#### Salvation Army Hope Center Development Project

1000 East Walnut Street, Pasadena, California 91106

July 9, 2020

---

This report documents the eligibility of the proposed Salvation Army Hope Center Project (Hope Center) for a Statutory Exemption from the California Environmental Quality Act (CEQA) pursuant to Article 12.5, Sections 15192 and 15194 of the CEQA Guidelines.

#### Project Description and Location

The Project Site consists of an approximately 0.61-acre parcel of land located at 1000 East Walnut Street in the City of Pasadena and identified by the Los Angeles County Assessor as Assessor Parcel Number (APN) 5738-003-031. The Project Site is located on the southwest corner of East Walnut Street and North Catalina Avenue in the City of Pasadena, California. The Project Site is accessible from East Walnut Street to the north and North Catalina Avenue to the east. See **Figures 1** and **2** for the Regional Location Map and the Project Location Map.

#### *Proposed Project*

The Proposed Project would demolish an existing, two-story office building constructed in 1964, and in its place construct a four-story mixed-use building on the southwest corner of the intersection of East Walnut Street and North Catalina Avenue at 1000 East Walnut Street (APN 5738-003-031). The first floor of the proposed structure would be operated by the Salvation Army, providing social services for the residents of the Proposed Project and for low/moderate-income people in the community. The second, third, and fourth floors of the proposed structure would include permanent supportive housing for single adults with incomes at or below 30 percent and 40 percent of area median income (40 units and 25 units, respectively), and who meet the U.S. Department of Housing and Urban Development's definition of homeless. A subset of units would be restricted to Veteran's Affairs (VA) service-eligible homeless veterans. In total, the Project would include 68 residential units (65 units of affordable housing and 3 live-in manager units). All of the units would be studios, except for one manager unit located on the fourth floor, which would include one bedroom. The Proposed Project would include 51,695 total gross square feet, with 7,549 square feet of social services spaces on the ground floor and 32,110 square feet of residential spaces on floors two, three, and four. The total building footprint would be 11,965 square feet. The Project would include 2,655 square feet of landscaping and a 15-space parking area for use by the first-floor, social services use. The parking area would have driveway access on the southeast side of the Project Site to North Catalina Avenue. Each residential floor would contain common areas and amenities for the tenants, such as a common room and yoga/exercise room on the second floor, a gym and two decks on the third floor, and a library and decks on the fourth floor. The proposed structure would be 55 feet high.

The proposed structure would be located on the northern portion of the site, such that the building would front East Walnut Street and North Catalina Avenue. As shown on **Figure 3**, the building would have two entrances in the centers of the north and east building elevations: one entrance

from East Walnut Street for clients of Salvation Army's proposed social services on the first floor, and one entrance from North Catalina Avenue for building residents. A 15-space surface parking lot, including a loading zone and bike racks, would be located on the south side of the Project Site, with an ingress and egress point onto North Catalina Avenue. The parking lot would be separated from the residential uses south of the Project Site by a 6-foot-wide landscape buffer and a 6-foot-tall concrete masonry unit (CMU) wall along the southern Project Site boundary. A 2-foot-tall CMU wall would run between the parking lot and North Catalina Avenue on the southeast side of the Project Site.

The Proposed Project would include contemporary architecture that would be consistent with other modern mixed-use buildings in Pasadena. As shown on **Figure 4**, the first floor, which would contain the social services center operated by the Salvation Army, would be distinguished from the upper three floors by differences in colors, window shapes, and patterns. It would also include a higher floor-to-floor dimension in the first floor, as compared with the upper three floors of residential use, to further distinguish the first floor and to add visual interest. Landscaped areas along the Project's northern and eastern street-facing frontages, including a small indented courtyard on the north side, would be landscaped with native plants.

The Project would include demolition of the Project Site's existing structure, a two-story office building built in 1964, as detailed below. Construction-related earthwork for the Project would include approximately 183 cubic yards (CY) of cut, 338 CY of fill, and 1,690 CY of overexcavation. The result would be an estimated 155 CY of soil import associated with Project construction.

#### *Existing Conditions*

As stated above, the Project Site is located at the southwest corner of the intersection of East Walnut Street and North Catalina Avenue, and is owned by the Salvation Army, a nonprofit California corporation. It is immediately adjacent to the Salvation Army Pasadena Tabernacle Corps Community Center and one-half block from the Salvation Army Pasadena Silvercrest Residence, a 75-unit affordable housing project for very low-income elderly people. The Project Site currently contains a two-story office building, constructed in 1964, which is presently occupied by commercial office tenants. The Salvation Army occupies space on the first floor of the building and provides social services to low/moderate-income residents in the community. This use would be maintained in the proposed building. The existing structure is 20 feet high and has a total building area of 20,295 square feet. Further, the Project Site contains a 50-space surface parking lot that is partially covered by the second-floor commercial units.

The Project Site is zoned Commercial General in the City's Zoning Code and is designated as Low Commercial in the City's General Plan. Commercial General zones allow a full range of retail and service businesses deemed suitable for location in Pasadena (including businesses that attract heavy vehicular traffic) and provide opportunities for certain limited manufacturing uses with impacts comparable to those of permitted retail and service uses to occupy space not in demand for retailing or services. Per Pasadena's development standards for Commercial General zones, structures are limited to a height of 45 feet and a maximum floor area ratio (FAR) of 0.8. Supportive housing is permitted in Commercial General zones provided that the supportive housing is located within a single-room occupancy facility. Additional detail regarding the Project Site's General Plan and zoning designation, and Project compliance with such designations, is provided in **Table 1**, below.

The Project Site is surrounded by multifamily residential uses to the south and to the east across East Walnut Street, a religious facility to the north across East Walnut Street, the Salvation Army

Pasadena Tabernacle Corps Community Center immediately to the west, and commercial office uses to the northwest across East Walnut Street and northeast across East Walnut Street and North Catalina Avenue.

### Affordable Housing Exemption

CEQA and the State CEQA Guidelines require the preparation of environmental documents to assess and report the environmental impacts of certain types of projects that could result in adverse effects on the environment. Pursuant to CEQA Article 12.5, Exemptions for Agricultural Housing, Affordable Housing, and Residential Infill Projects, the CEQA Guidelines (Sections 15191 to 15196) define types of projects that are found by the California state legislature to be specifically excluded from CEQA consideration and, therefore, exempt from the requirement for the preparation of environmental documents. These types of projects are exempt from CEQA, provided that the project meets all threshold criteria set forth in Section 15192 of the CEQA Guidelines, as well as criteria specific to the type of exemption sought by the project (Sections 15193 through 15196 of the CEQA Guidelines).

Among the list of exemptions under Article 12.5 of the CEQA Guidelines is the Affordable Housing Exemption, as defined in CEQA Guidelines Section 15194. The threshold criteria in Section 15192 of the CEQA Guidelines and additional criteria specific to the Affordable Housing Exemption are identified in **Table 1**, below, along with an analysis of the Proposed Project's compliance with each criteria. Of note, the Proposed Project meets Article 12.5's definition of "Residential" (Section 15191(I) of the CEQA Guidelines), as it consists of residential units and primarily neighborhood-serving good, services, or retail uses that do not exceed 15 percent of the total floor area of the project. The 7,549-square-foot nonresidential component of the Project would be used for social services and comprises 14.6 percent of the total Project floor area.

**Table 1: Threshold Criteria for Exemptions for Affordable Housing Projects, Pursuant to CEQA Guidelines Sections 15192 and 15194**

<b>Section 15192. Threshold Requirements for Exemptions for Agricultural Housing, Affordable Housing, and Residential Infill Projects</b>	
In order to qualify for an exemption set forth in Section 15193, 15194, or 15195 of the CEQA Guidelines, a housing project must meet all of the following threshold criteria:	
Threshold Criteria	Compliance Determination
<p><b>a:</b> The Project must be consistent with:</p> <ol style="list-style-type: none"> <li>1) Any applicable general plan, specific plan, or local coastal program, including any mitigation measures required by such plan or program, as that plan or program existed on the date that the application for the project pursuant to Section 65943 of the Government Code was deemed complete; and</li> <li>2) Any applicable zoning ordinance, as that zoning ordinance existed on the date that the application for the project pursuant to Section 65943 of the Government Code was deemed complete, unless the zoning of project property is inconsistent with the general plan because the project property has not been rezoned to conform to the general plan.</li> </ol>	<p>As discussed above, the Project proposes to demolish an existing two-story office building and replace it with a four-story mixed-use building with social services on the ground floor and permanent supportive housing (PSH) on floors two, three, and four. The PSH units would be single-room-occupancy (SRO) units. The social services use on the first floor of the Proposed Project would be classified by the Pasadena Zoning code as a "charitable institution." The Project Site has a General Plan designation of Low Commercial and a zoning designation of Commercial General.</p> <p>The Pasadena General Plan Land Use Element states that Low Commercial designations have a permissible floor area ratio (FAR) of up to 1:1. This means that the Project Site could accommodate a one-story structure over the entire buildable area of the Project Site, or a two-story structure over half of the buildable area of the Project Site. The Pasadena Zoning Code has specific development standards for projects within Commercial General zones, as discussed below.</p> <p>The Project Site is classified as Commercial General by the Pasadena Zoning Code (Section 17.24.040). While this zone typically does not</p>

	<p>permit residential uses, SRO facilities are principally permitted. Further, supportive housing is principally permitted within Commercial General zones, provided that the supportive housing is located within an SRO facility (Section 17.24.040, Table 2-5). Charitable institutions are conditionally permitted within Commercial General zones upon an approved Conditional Use Permit. Commercial General zones have a maximum allowable height of 45 feet and a FAR of 0.80.</p> <p>Section 17.50.300 of the Pasadena Zoning Code governs SRO facilities. Specifically, this section states that site area per unit standards do not apply to SRO facilities; SRO units shall be between 150 and 375 square feet in size; a minimum of 10 square feet of common area shall be provided for each unit (e.g., dining rooms, meeting rooms, and recreation rooms); an SRO management plan shall be "submitted to, reviewed, approved, and enforced by the Housing Administrator of the Housing and Development Department"; each unit shall be provided a kitchen sink with hot and cold water and garbage disposal; and each room shall have a private toilet in an enclosed compartment with a door. Further, Section 17.50.300 states that each SRO facility shall comply with all applicable commercial development standards for the zoning district in which it is located. Prior to issuance of a grading permit and through the City's plan check process, the applicant must demonstrate to City staff that the Project's design meets these design criteria for SRO facilities.</p> <p>Pasadena's Zoning Code provides density bonuses, waivers, and incentives, per Chapter 17.43, which establishes procedures to implement the State Density Bonus Law in Government Code Section 65915. To qualify for the 35 percent residential density bonus, a project must include 11 percent very low-income units or 20 percent low-income units. As an affordable housing project (with the exception of three resident manager units), the Proposed Project includes 100 percent extremely low-income, SRO units. Government Code Section 65915 states that if an affordable housing development is within one-half mile of a major transit stop, the city shall not impose any maximum controls on density.<sup>1</sup> For SRO facilities, the density of a facility is regulated by FAR, rather than number of units. While the Project Site has a maximum FAR of 0.8, per the underlying Commercial General zone, Government Code Section 65915 would allow the Project to be constructed with a FAR of 1.9, which it would achieve through construction of a four-story structure with a building footprint of 11,965 square feet on a lot totaling 27,095 square feet in size. In addition to this density bonus, the Project would also receive density bonus concessions relating to building height and parking requirements. The maximum building height in the Commercial General zone is 45 feet. Per Government Code Section 65915, projects located within one-half mile of a major transit stop shall receive a height increase of up to three additional stories, or 33 feet.<sup>2</sup> While the Commercial General zone has a maximum building height of 45 feet, the Project, a four-story building with a height of 55 feet, would be within density bonus concessions per Government Code Section 65915. The maximum height and proposed FAR would be confirmed by City staff during the City's plan check and design review processes.</p> <p>For affordable SRO facilities, the Zoning Code requires one parking space per four units, plus two parking spaces for the resident manager. With three resident manager units and 65 SRO units, the Project would normally require 23 parking spaces for the SRO units on floors two, three, and four. The parking requirements for the first floor, charitable institution use, would be specified by the Conditional Use Permit prepared for the Project (Section 17.46.040 Pasadena Municipal Code, Table 4-6). However, Chapter 4.3, Section 65915 of</p>
--	---

<sup>1</sup> California Government Code Title 7, Division 1, Chapter 4.3, Section 65915(f)(3)(D)(ii)

<sup>2</sup> California Government Code Title 7, Division 1, Chapter 4.3, Section 65915(d)(2)(D)

	<p>the California Government Code states that for projects with 100 percent affordable rental units and located within one-half mile of a major transit stop, a minimum vehicular parking requirement shall not be imposed.<sup>3</sup> The Project Site is situated within 1,200 feet of the Los Angeles Metro L (Gold) Line Lake Station, which is located at the intersection of Lake Avenue and Interstate-210. The Los Angeles Metro Lake Station light rail stop is considered a major transit stop per Section 21155 of the Public Resources Code. As such, the Project's 15 parking stalls (13 standard stalls and 2 Americans with Disabilities Act compliant stalls) would meet parking requirements.</p> <p>As stated above, the Proposed Project would include social services on the first floor of the proposed structure, operated by the Salvation Army, which would provide counseling and service referrals, collect and distribute emergency food and clothing assistance, and collect and distribute seasonal goods for needy children and families. The Project would also support General Plan policies and goals such as Land Use Element policy 2.7 – Civic and Community Services, by providing services that support Pasadena's residents, and Land Use Element policies 2.10 – Healthy Foods and 2.12 – Health and Wellness, by providing fresh produce and other nutritious foods within the facility's emergency food distribution program.</p> <p>Therefore, because the Project would provide social services as well as housing, thus meeting several General Plan policies, and because the Project would be consistent with the Project Site's General Plan land use and zoning designations, the Project is consistent with the General Plan and all applicable zoning ordinances.</p>
<p><b>b:</b> Community-level environmental review has been adopted or certified.</p>	<p>A "community-level environmental review" is defined by Section 15191 of the CEQA Guidelines as an EIR certified on any of the following: "a general plan; a revision or update to the general plan that includes at least the land use and circulation elements; an applicable community plan; an applicable specific plan; or a housing element of the general plan if the environmental impact report analyzed the environmental effects of the density of the proposed project."</p> <p>The most recent update of the Pasadena General Plan was adopted in 2015. Specifically, the Pasadena City Council adopted updated Land Use and Mobility Elements of the City's General Plan and certified the corresponding EIR on August 18, 2015.</p> <p>As such, a community-level environmental review that includes the Project Site has been adopted. Therefore, the Project is in compliance with this criterion.</p>
<p><b>c:</b> The project and other projects approved prior to the approval of the project can be adequately served by existing utilities, and the project applicant has paid, or has committed to pay, all applicable in-lieu or development fees.</p>	<p>The Project Site is currently served by electric, natural gas, trash, water, and wastewater services. The proposed community services (office) uses on the first floor of the proposed structure and the residential uses would require new service connections for electricity, water, wastewater, and natural gas services, which would be undertaken during the construction period and would occur within the Project Site.</p> <p><i>Water</i></p> <p>Potable water would be provided to the Project Site by the Pasadena Department of Water and Power (PWP). PWP's latest Urban Water Management Plan (UWMP) uses the Pasadena General Plan's planned growth and development in the City to anticipate future water consumption within the City.<sup>4</sup> As such, since the Project would be consistent with its underlying zoning and General Plan designation, and since the UWMP demonstrates adequate water supply for all</p>

<sup>3</sup> California Government Code Title 7, Division 1, Chapter 4.3, Section 65915(p)(4)

<sup>4</sup> City of Pasadena, Water and Power Department, 2015 Urban Water Management Plan, June 2016.

	<p>normal and dry year scenarios through the plan's horizon year (2040), the Project's water demand could be adequately served by PWP.</p> <p><i>Wastewater</i></p> <p>For wastewater services, the City of Pasadena operates and maintains its own sanitary sewer system, consisting of gravity pipelines that convey approximately 14 million gallons per day (gpd) of untreated wastewater to the Los Angeles County Sanitation Districts (Sanitation Districts) trunk sewer system.<sup>5</sup> The Project's wastewater would be conveyed through the sewer system to the Sanitation Districts' system of water reclamation plants (WRPs), including the Whittier Narrows WRP and the San Jose Creek WRP, which have treatment capacities of 15 million gpd and 100 million gpd, respectively.<sup>6</sup> These WRPs are located approximately 9 miles southeast of the Project Site. The Project, with 68 residential units and 7,549 square feet of social services space, would generate approximately 12,118 gpd of wastewater.<sup>7</sup> This total estimated wastewater volume would be offset by the wastewater generated by the existing offices on the Project Site, which would be removed as part of the Proposed Project. The Project's net increase in wastewater generation would be a small fraction of the Sanitation Districts' existing WRP capacity. Further, because the City's Public Works Department uses the City's General Plan to assist with long-term sewer infrastructure planning efforts, the Project's consistency with the General Plan and underlying zoning would ensure that the City's sewer infrastructure has sufficient capacity to serve the Proposed Project.</p> <p><i>Electricity</i></p> <p>Electricity service is provided to the Project Site by PWP, whose existing portfolio of resources includes renewable energy (38 percent), coal (31 percent), large hydroelectric (3 percent), natural gas (11 percent), nuclear (6 percent), and unspecified power sources provided by a combination of owned and contracted energy resources.<sup>8</sup> This mix of resources enhances electrical system resilience by not relying on a single transmission source. PWP's 2018 Power Integrated Resource Plan has a primary objective of system reliability and includes a resource procurement plan that states that "PWP is fully resourced for energy needs until 2025" and that PWP will "likely meet future energy needs through wind and solar resources, as well as a mix of shorter-term renewable contacts."<sup>9</sup> Therefore, PWP's long-term forecasts for electricity demand within its service area, which includes the Project Site, would account for Project-related electricity demand through PWP's demand forecast modeling. Further, the Project's electricity usage would be slightly offset by the demolition and removal of the existing two-story office building, which currently consumes electricity. In short, PWP's long-term planning would ensure that the City's</p>

<sup>7</sup> Los Angeles County Sanitation Districts, Will Serve, Table 1: Loadings for Each Class of Land Use, undated. To be conservative, 68 residential units and 7,549 square feet of office space were used in the following calculations of wastewater generation. Using the Sanitation Districts' loading factor of 156 gpd per unit, the residential component would have a wastewater generation of approximately 10,608 gpd (156\*68). Using the Sanitation Districts' loading factor of 200 gpd per 1,000 square feet of office space, the office component of the Project would result in wastewater generation of 1,510 gpd for the office space. In total, the Project would generate approximately 12,118 gpd of wastewater (10,608+1,510).

<sup>8</sup> City of Pasadena, Water and Power Department, 2018 Power Integrated Resource Plan, page 28, December 2018.

<sup>9</sup> City of Pasadena, Water and Power Department, 2018 Power Integrated Resource Plan, page 69, December 2018.

	<p>electrical grid would have adequate capacity to support the Proposed Project.</p> <p><i>Natural Gas</i></p> <p>Natural gas service is provided to the Project Site by Southern California Gas Company (SoCalGas), which is the principal distributor of natural gas in Southern California. SoCalGas projects that total natural gas demand will decline at an annual rate of 0.74 percent from 2018 to 2035 due to aggressive energy efficiency standards.<sup>10</sup> Further, SoCalGas is anticipated to meet a projected demand of 2,753 million cubic feet of natural gas per day in 2022 through a combination of withdrawals from underground storage facilities and flowing pipeline supplies. As such, because of SoCalGas's extremely large service area and natural gas supplies, in addition to decreasing natural gas demand, SoCalGas would have adequate capacity to support the Project.</p> <p><i>Solid Waste</i></p> <p>Regarding solid waste collection, the City of Pasadena does not collect solid waste from commercial units or multi-family residential units containing five or more units unless upon written request by the property owner. As such, trash collection services would be provided by the City or a private, commercial trash collection company approved by the City. According to CalRecycle's Solid Waste Information System facility database, one of the largest landfills in the Pasadena area is the Scholl Canyon Landfill (located at 3001 Scholl Canyon Road in Glendale) which has a total remaining capacity of 9,900,000 cubic yards.<sup>11</sup> As such, with multiple trash collectors and existing capacity at nearby landfills, there is adequate trash service capacity to serve the Project.</p> <p>Therefore, because the Project Site can adequately be served by existing utilities and the applicant has committed to pay all required in-lieu or development fees for the Project, the Project is in compliance with this criterion.</p>
<p><b>d:</b> The site of the project:</p> <ol style="list-style-type: none"> <li>1) Does not contain wetlands, as defined in Section 328.3 of Title 33 of the Code of Federal Regulations.</li> <li>2) Does not have any value as an ecological community upon which wild animals, birds, plants, fish, amphibians, and invertebrates depend for their conservation and protection.</li> <li>3) Does not harm any species protected by the federal Endangered Species Act of 1973 (16 U.S.C. Sec. 1531 et seq.) or by the Native Plant Protection Act (Chapter 10 (commencing with Section 1900) of Division 2 of the Fish and Game Code), the California Endangered Species Act (Chapter 1.5 (commencing with Section 2050) of Division 3 of the Fish and Game Code.</li> <li>4) Does not cause the destruction or removal of any species protected by a local ordinance in effect at the time the</li> </ol>	<p>Wetlands are defined by Section 328.3 of Title 33 of the Code of Federal Regulations as those "areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas."<sup>12</sup></p> <p>As stated in the Project Description of this report, the Project Site is currently developed with an existing two-story office building and surface parking lot and, thus, does not contain any wetlands or habitat that is of biological value. Apart from a courtyard in a center atrium in the office building, there is no landscaping on the Project Site. As such, the Project Site is entirely disturbed and does not provide any man-made or natural habitat. Further, the Project Site is located in a built-out urbanized area and is completely surrounded by development. The California Department of Fish and Wildlife's California Natural Diversity Database (CNDDDB) shows that there have been endangered, rare, or threatened species identified in the Pasadena Quadrangle, which includes the portion of the City of Pasadena that contains the Project Site.<sup>13</sup> However, the Project Site does not contain any critical habitat, as delineated by the US Fish and</p>

<sup>10</sup> California Gas and Electric Utilities, 2018 California Gas Report, 2018.

<sup>11</sup> CalRecycle, Solid Waste Information Systems Facility Detail: Scholl Canyon Landfill (19-AA-0012), <https://www2.calrecycle.ca.gov/swfacilities/Directory/19-AA-0012/>, accessed May 27, 2020.

<sup>12</sup> 33 Code of Federal Regulations 328.3(c).

<sup>13</sup> California Department of Fish and Wildlife, CNDDDB Quad Species List, Pasadena Quadrangle, accessed March 16, 2020.

<p>application for the project was deemed complete.</p>	<p>Wildlife Service, nor does it contain the habitat necessary to support any of the listed species in the CNDDDB. Further, the Project Site is not identified by the City of Pasadena as a biologically sensitive area, nor does it contain any wetland or riparian habitat as identified by the National Wetlands Inventory.<sup>14</sup></p> <p>Finally, while Pasadena does have a local ordinance protecting certain trees from removal or encroachment (City Trees and Tree Protection Ordinance, Chapter 8.52 of the City's Municipal Code), protected trees include "native and specimen trees located in the established front yard, required side yard, established corner yard, or required rear yard of ... all areas of all other zoning districts within the City" as well as landmark trees, public trees, and mature trees in all zones. There are three trees within the interior courtyard of the existing office building: two European white birch trees (with a diameter-at-breast-height (DBH) 6 inches and 6.5 inches) and one umbrella tree (DBH of 4.5 inches). Because these trees are located within an interior, private courtyard and because they are too small to be considered "mature" trees (defined by Section 8.52.020 as a DBH of 19 inches or greater), the Project Site does not have any trees protected by this ordinance. Further, there are no off-site trees that would be impacted by the demolition of the existing office building or construction of the Proposed Project, as the three Mexican fan palm (<i>Washingtonia robusta</i>) street trees located along North Catalina Avenue would be preserved in place.</p> <p>Therefore, because Project-related demolition and construction activities would take place on a site that has been disturbed by existing development and past construction activities, and because the Project Site is located within a fully urbanized environment that is surrounded by disturbed areas (such as a sidewalks, residential homes, commercial uses, religious institutions, overhead powerlines and streetlights, and major arterial streets), implementation of the Proposed Project would not result in loss of valuable habitat utilized by endangered, rare, or threatened species, nor would it harm threatened or endangered species protected by the federal or California Endangered Species Acts or local ordinance. As such, the Project is in compliance with this criterion.</p>
<p><b>e:</b> The site of the project is not included on any list of facilities and sites compiled pursuant to Section 65962.5 of the Government Code.</p>	<p>The Project Site is not included on the Cortese list, which is the list of sites compiled by the California Department of Toxic Substances Control (DTSC) under Government Code Section 65962.5. As such, the Project Site is not included on DTSC-compiled lists of: hazardous waste facilities subject to corrective action pursuant to Section 25187.5 of the Health and Safety Code; land designated as hazardous waste property or border zone property pursuant to Article 11; sites with information received regarding waste disposals on public land; all sites listed pursuant to Section 25356 of the Health and Safety Code; or all sites included in the Abandoned Site Assessment program.<sup>15</sup> Further, the Project Site is not listed on the DTSC EnviroStor database of hazardous waste clean-up sites or the State Water Resources Control Board's Geotracker database of contamination sites.<sup>16</sup> As such, the Proposed Project is in compliance with this criterion.</p>

<sup>14</sup> U.S. Fish and Wildlife Service, National Wetlands Inventory: Map of Wetlands in the Project Vicinity, map generated May 26, 2020.

<sup>15</sup> California DTSC, EnviroStor Database, Cortese List Hazardous Waste and Substances Site List, May 21, 2020; California SWRCB, GeoTracker Database, Cortese List Map of Active LUSTs near Project Site, May 21, 2020; California SWRCB, List of Site identified with waste constituents above hazardous waste levels outside the waste management unit, May 21, 2020; California SWRCB, List of active cease and desist orders and cleanup and abatement orders that do not concern discharges of wastes that are hazardous materials, May 21, 2020; California DTSC, Cortese List: Section 65962.5(a), May 21, 2020.

<sup>16</sup> California DTSC, EnviroStor Database, map generated June 25, 2020; SWRCB, GeoTracker Database, map generated June 25, 2020.

<p><b>f:</b> The site of the project is subject to a preliminary endangerment assessment prepared by a registered environmental assessor to determine the existence of any release of a hazardous substance on the site and to determine the potential for exposure of future occupants to significant health hazards from any nearby property or activity. In addition, the following steps have been taken in response to the results of this assessment.</p> <ol style="list-style-type: none"> <li>1) If a release of a hazardous substance is found to exist on the site, the release shall be removed, or any significant effects of the release shall be mitigated to a level of insignificance in compliance with state and federal requirements.</li> <li>2) If a potential for exposure to significant hazards from surrounding properties or activities is found to exist, the effects of the potential exposure shall be mitigated to a level of insignificance in compliance with state and federal requirements.</li> </ol>	<p>The analysis in this section is informed by a Phase I Environmental Site Assessment (ESA), Phase II ESA, and draft Corrective Action Plan prepared for the Proposed Project by ACC Environmental Consultants (ACC) dated November 17, 2019, May 8, 2020, and June 15, 2020, respectively. These resources are available as <b>Appendices A-C</b> of this report.</p> <p><i>Phase I and Phase II Environmental Site Assessments</i></p> <p>The Phase I ESA determined that the Project Site was first developed between 1910 and 1928 with seven single-family residential dwellings and two garages, located at 990 East Walnut Street and 185-191 North Catalina Avenue. The Project Site remained in this configuration until approximately 1931. By 1938, the Project Site was developed with three commercial buildings, which remained until the early 1960s. These commercial buildings housed automotive uses, such as service stations and garages, as well as a machine shop, electrical shop, metal fabricators, and a roofing storage business. By 1964, these commercial buildings had been demolished and the Project Site remained as vacant land until 1968 when the two-story office building that exists on the Project Site today was constructed. The Phase I ESA determined that based on the historical land uses of the Project Site, including various automobile and equipment repair facilities, metal fabricators, and machine shop, there is a potential for subsurface impacts by chemicals of concern. As such, a Phase II ESA was recommended.</p> <p>The Phase II ESA included soil and soil vapor sampling to analyze subsurface conditions and determine the level of contamination. ACC collected soil samples at 0.5 and 2 feet below ground surface at five locations on the Project Site, concentrated near the historic locations of the past automotive and fabrication uses on the north and northeast portion of the Project Site. ACC also collected 10 soil vapor samples from the five soil boring locations on the north and northeast portion of the Project Site.</p> <p>The soil and soil vapor samples were analyzed for potential constituents commonly found on sites with former automotive uses, such as petroleum hydrocarbons, volatile organic compounds (VOCs), and metals. The full list of constituents is available in the Phase II ESA, available as <b>Appendix B</b> of this report. The analytical results from soil testing were compared to Human Health Risk Levels (HHRLs) identified by the Los Angeles Regional Water Quality Control Board (RWQCB) for direct exposure at commercial properties, residential properties, and direct exposure to construction workers. In summary, the soil samples identified numerous contaminants, including total petroleum hydrocarbons (e.g., diesel fuel and motor oil) and VOCs like chlorobenzene; however, the concentrations of these contaminants are below the HHRLs identified by the RWQCB. That said, soil testing did find lead up to a concentration of 180 milligram per kilogram (mg/kg), which exceeds the corresponding HHRLs for residential properties and direct exposure to construction workers, which are 80 mg/kg and 160 mg/kg, respectively. Soil analytical results and corresponding HHRLs are summarized in Table 1-2 of the Phase II ESA.</p> <p>Soil vapor analytical results were compared to San Francisco RWQCB HHRLs for soil vapor intrusion risk at residential and commercial properties (as no such HHRLs have been identified by the Los Angeles RWQCB). Soil vapor analysis identified five constituents: benzene, ethylbenzene, chloroform, tetrachloroethylene (PCE), and bromodichloromethane. Benzene was detected up to a concentration of 27 micrograms per cubic meter (<math>\mu\text{g}/\text{m}^3</math>), which exceeds the corresponding HHRLs for vapor intrusion at residential and commercial properties of 3.2 and 14 <math>\mu\text{g}/\text{m}^3</math>, respectively. Ethylbenzene was detected up to a concentration of 130 <math>\mu\text{g}/\text{m}^3</math>.</p>
---	---

which exceeds the corresponding HHRL for vapor intrusion at residential properties of 37  $\mu\text{g}/\text{m}^3$ . Chloroform was detected in the deeper soil vapor samples up to a concentration of 55  $\mu\text{g}/\text{m}^3$ , which exceeds the corresponding HHRLs for vapor intrusion at residential and commercial properties of 4.1 and 18  $\mu\text{g}/\text{m}^3$ , respectively. PCE was detected in the deeper soil vapor samples up to a concentration of 29  $\mu\text{g}/\text{m}^3$ , which exceeds the corresponding HHRL for vapor intrusion at residential properties of 15  $\mu\text{g}/\text{m}^3$ . Bromodichloromethane was detected in the deeper soil vapor samples up to a concentration of 37  $\mu\text{g}/\text{m}^3$ , which exceeds the corresponding HHRLs for vapor intrusion at residential and commercial properties of 2.5 and 11  $\mu\text{g}/\text{m}^3$ , respectively. The entire list of soil vapor analytical results and corresponding HHRLs are summarized in Table 3 of the Phase II ESA.

In the Phase II ESA, ACC recommended the preparation of a corrective action plan (CAP) to ensure protection of site occupants, workers, and the community during and subsequent to redevelopment. Further, ACC recommended additional soil sampling to address waste characterization and worker exposure during earthwork. ACC also states in the Phase II ESA that pending additional sampling, a vapor mitigation system designed by a licensed engineer and incorporated into plans for new on-site buildings may be warranted. Requirements for additional soil sampling and remediation activities (such as a vapor mitigation system) are included in **Mitigation Measure MM-1**, below.

#### *Corrective Action Plan*

ACC prepared a draft CAP for the Proposed Project, available as **Appendix C** of this report, dated June 15, 2020. The purpose of the CAP is to present corrective actions to be implemented at the Project Site in conjunction with redevelopment activities in order to protect Site occupants subsequent to redevelopment and construction workers during redevelopment. Currently, the Project Site is not subject to regulatory oversight; however, ACC anticipates that regulatory oversight is warranted based on data currently available and the Proposed Project plans. This regulatory oversight would be conducted by the Los Angeles RWQCB. The CAP includes corrective action objectives (CAOs) for each of the potential chemicals of concern identified in the Phase II ESA (i.e., lead in the soil and the five soil vapor contaminants identified above). Each CAO specifies a contaminant of concern, the potential exposure routes and receptors, and the acceptable contaminant level to protect future residential and commercial occupants of the Project. The CAP also identifies corrective actions that, if implemented, would achieve each CAO. A summary of each CAO and associated corrective actions is provided below; however, more detail is provided in the CAP, available as **Appendix C** of this report.

For lead found in the soil at the Project Site, the CAOs are based on the California DTSC and Los Angeles RWQCB lead screening levels of 80 mg/kg for residential properties and the RWQCB lead screening level for construction workers of 160 mg/kg. ACC identified two potential corrective actions in the CAP to achieve the site-specific CAOs for lead-impacted soils: excavation/off-site disposal of impacted soil, and on-site capping and long-term management of impacted soils.

For soil vapor issues on the Project Site, the CAO is based on the San Francisco RWQCB's soil gas vapor intrusion HHRLs for residential land uses, which are consistent with California DTSC's vapor intrusion screening thresholds. ACC determined that a soil vapor mitigation system is necessary for the Proposed Project, such as a passive sub-slab depressurization system. Additional measures include chemical vapor barriers, floor sealants, and utility trench dams. Installation of the vapor mitigation system would mitigate the potential for

	<p>contaminated soil vapor from entering the building at concentrations exceeding established HHRLs.</p> <p>Further, to reduce the impacts of soil disturbance, the CAP identifies corrective action procedures to implement during Project-related earthmoving activities relating to worker health and safety; hazardous waste operations; soil disposal during exaction; dust control; soil stockpiling; importing fill material; groundwater and stormwater management; and unexpected conditions. These specific procedures are detailed in the CAP, available as <b>Appendix C</b>.</p> <p>As described in <b>Mitigation Measure MM-1</b>, below, the CAP must be reviewed and approved by the regulatory agency (the Los Angeles RWQCB in this case). Following approval, ACC will prepare a final Correction Action Implementation Plan (CAIP), which would provide a detailed approach to address each corrective action through procedures that would be incorporated into Project-related demolition and construction activities.</p> <p><i>Lead-Based Paint and Asbestos-Containing Materials</i></p> <p>The Project proposes to demolish the two-story office space that currently exists on the Project Site. Because this structure was constructed in 1964, the structure may contain lead-based paint and asbestos-containing materials. If the property in question is determined to contain asbestos-containing materials or lead-based paint during the demolition process, the development must adhere to state requirements for the removal, treatment, and disposal of asbestos-containing materials and lead-based paint. Specifically, if asbestos-containing materials are discovered prior to or during demolition of the existing office building, the construction contractors must abide by federal and state requirements detailed in 40 CFR Part 61, Cal OSHA rule 1529, and South Coast Air Quality Management District Rule 1403 when it comes to identification, removal, handling, and disposal of asbestos-containing materials. The contractor must also abide by requirements detailed in 24 CFR Part 35, Cal OSHA rule 1532.1, and 40 CFR Part 745 regarding evaluating, testing, and reducing lead-based paint hazards.</p> <p><b>Mitigation Measures</b></p> <p><b>MM-1: Regulatory Agency Oversight, Completion of Corrective Action Implementation Plan (CAIP), and Remediation Activities.</b></p> <p>The CAP prepared for the Project shall be reviewed and approved by the appropriate regulatory agency (the Los Angeles RWQCB or similar agency acceptable to the City of Pasadena), and implemented with the oversight of that agency. If no agency has regulatory authority over the site's cleanup, the applicant shall enter into the RWQCB's voluntary cleanup program, or a similarly agency's voluntary cleanup program acceptable to the City of Pasadena. The Los Angeles RWQCB's Site Cleanup Program (SCP) regulates and oversees the investigation and clean-up of pollution impaired sites. The RWQCB oversees the clean-up of sites where the use of the site or, in the case of the Proposed Project, redevelopment of the site is complicated by contamination. Specifically, the SCP oversees preliminary site assessment, soil and water investigation, proposal and selection of clean-up actions, implementation of clean-up actions, and monitoring to confirm short-and long-term effectiveness of the clean-up actions. During the City's plan check and design review processes, the applicant shall demonstrate that the appropriate regulatory agency (e.g., RWQCB) has reviewed and approved the CAP, finding that the proposed remediation activities would sufficiently address existing on-site contamination and reduce exposure of construction workers, residents, and other occupants of the site to below established RWQCB Human Health Risk Levels.</p>
--	---

	<p>Subsequent to site characterization and approval of the CAP by the regulatory agency, the applicant shall prepare a Correction Action Implementation Plan (CAIP), which shall provide a detailed approach to address each corrective action through procedures that would be incorporated into Project-related demolition and construction activities. These corrective actions addressing lead contamination and soil vapor intrusion issues on the Project Site are discussed below.</p> <p>As stated in the Phase II ESA prepared for this Project, ACC recommends additional sampling to address waste characterization and worker exposure during earthwork occur prior to disturbing soils. In accordance with ACC's recommendation, additional sampling shall take place in central and northern portion of the Project Site, in the vicinity of the three former commercial buildings that are potential sources of existing soil contamination. Specifically, additional sampling shall assess the vertical and lateral extent of volatile organic compound impacts to soil vapor, as well as lead impacts to shallow soil (less than 2 feet). Onsite fill material shall be characterized in accordance with California and Federal hazardous waste criteria in the event that soils are hauled off-site during earthwork or as part of corrective actions.</p> <p>Prior to redevelopment of the site, the Project shall include remediation activities to address lead-impacted soils, reducing lead concentrations in soils at the Project Site to levels beneath the screening levels established by DTSC and the RWQCB for residential properties (80 milligrams per kilogram) and construction worker exposure (160 milligrams per kilogram). Potential remediation activities shall be included in the CAIP, completed by the applicant prior to redevelopment activities and may include, but would not be limited to, soil excavation and offsite disposal or on-site capping and long-term management.</p> <p>Prior to redevelopment of the Project Site, the Project shall include remediation activities to address the risk of vapor intrusion of volatile organic compounds into indoor air. Remediation activities shall reduce soil vapor intrusion to levels beneath Soil Gas Vapor Intrusion Human Health Risk Levels, applied by the Regional Water Quality Control Board. Potential Remediation activities shall be included in the CAIP and shall be completed by the applicant prior to redevelopment of the site to the satisfaction of the oversight agency (e.g., RWQCB). These activities may include a soil vapor mitigation system, which could consist of an active vapor extraction system, a passive sub-slab depressurization system, and/or chemical vapor barriers and floor sealants. The vapor mitigation system shall alleviate the potential for contaminated soil vapor from entering the building at concentrations exceeding human health risk levels. The soil vapor mitigation system shall be designed and installed to the satisfaction of the regulatory oversight agency.</p>
<p><b>g:</b> The project does not have a significant effect on historical resources pursuant to Section 21084.1 of the Public Resources Code.</p>	<p>Section 21084.1 of the Public Resources Code states that:</p> <p><i>A project that may cause a substantial adverse change in the significance of an historical resource is a project that may have a significant effect on the environment. For purposes of this section, an historical resource is a resource listed in, or determined to be eligible for listing in, the California Register of Historical Resources. Historical resources included in a local register of historical resources, as defined in subdivision (k) of Section 5020.1, or deemed significant pursuant to criteria set forth in subdivision (g) of Section 5024.1, are presumed to be historically or culturally significant for purposes of this section, unless the preponderance of the evidence demonstrates that the resource is not historically or culturally significant. The fact that a resource is not listed in, or determined to be eligible for listing in, the California Register of Historical Resources, not included in a local register of historical resources, or not deemed significant pursuant to criteria set forth in</i></p>

	<p><i>subdivision (g) of Section 5024.1 shall not preclude a lead agency from determining whether the resource may be an historical resource for purposes of this section.</i></p> <p>The Project Site currently contains a two-story office building that was constructed in 1968. This existing structure is 20,296 square feet in size, 20 feet in height, and has 50 parking spaces located on the southern portion of the Site. The two-story vernacular commercial building has a rectilinear building form with a flat roof, stucco-cladding, soft-story construction with tuck-under parking, metal-framed glazing, solid panel doors, and single loaded open circulation corridors with square-tube metal balcony railings. There is no significant landscaping on the property and the building is in fair condition.</p> <p>The City of Pasadena's Historic Context Report for Cultural Resources of the Recent Past classifies small business office commercial buildings in the City, which the report describes as constructed in the 1950s and 1960s, one to two stories in height, an entrance lobby, and parking in the rear. The Context Report states that this property subtype is most commonly associated with the mid-century modern and vernacular modern architecture styles. These styles are characterized by geometric forms, smooth wall surfaces, and an absence of exterior decoration.<sup>17</sup> Further, the existing structure is in fair condition, and there are no associations of the building to people significant to the City, region, or state.<sup>18</sup> As such, the City of Pasadena Design and Historic Preservation Staff have evaluated the Project Site and have determined that there are no resources on the Site that are eligible for designation as a local historical resource or for listing on the California Register of Historical Resources or National Register of Historic Places. Therefore, the Project would not cause a substantial adverse change in the significance of a historical resource.</p>
<p><b>h:</b> The project site is not subject to wildland fire hazard, as determined by the Department of Forestry and Fire Protection, unless the applicable general plan or zoning ordinance contains provisions to mitigate the risk of a wildland fire hazard.</p>	<p>According to the California Department of Forestry and Fire Protection, the Project Site is not within a very high fire hazard severity zone. The portions of Pasadena that are designated as very high fire hazard zones include areas west of the Arroyo Seco, the eastern slopes of the Arroyo Seco, the upper reaches of both the Arroyo Seco and Eaton Canyon, and Hastings Ranch and Kinneloa Mesa areas in the northeast portion of the City. As such, the Project Site is over 2 miles east of the very high fire hazard severity zone along the Arroyo Seco, and as such would not be subject to wildland fire hazards. Therefore, the Project is in compliance with this criterion.</p>
<p><b>i:</b> The project site does not have an unusually high risk of fire or explosion from materials stored or used on nearby properties.</p>	<p>The Proposed Project is surrounded by urban development including a Salvation Army property to the west, residential development to the south and east, office uses to the northeast, the Trinity Evangelical Lutheran Church to the north, and office space and high-density residential to the northwest (the Lake @ Walnut residential development). These properties do not store large volumes of highly flammable or explosive materials, and as such, do not pose an unusual fire threat to the Project Site. Therefore, the Project is in compliance with this criterion.</p>
<p><b>j:</b> The project site does not present a risk of a public health exposure at a level that would exceed the standards established by any state or federal agency.</p>	<p>As identified above in Section 15192(f), the analytical results from soil and soil vapor testing were compared to existing HHRLs identified by the RWQCB and California DTSC for direct exposure at commercial properties, residential properties, and direct exposure to construction workers. The various actions prescribed by the CAP created for this Project, such as the installation of a passive sub-slab depressurization system, as well as installing chemical vapor barriers and utility trench dams and using floor sealants in construction of the Project, would maintain existing contamination at levels below HHRLs established by DTSC and the RWQCB. Further, the applicant will demonstrate to the</p>

<sup>17</sup> City of Pasadena, Cultural Resources of the Recent Past: Historic Context Report, October 2007.

<sup>18</sup> City of Pasadena, California Department of Parks and Recreation Primary Record Form 523, June 16, 2020.

	<p>City that the CAP prepared for the Project has been approved by the Los Angeles RWQCB, or similar agency acceptable to the City of Pasadena, as discussed in <b>Mitigation Measure MM-1</b>. The City would then ensure that the oversight agency is overseeing clean-up of the site and the corrective actions identified in the CAIP through the plan check and design review process. Therefore, with the implementation of the CAP, the Project Site would not pose a risk of a public health exposure greater than the HHRLs established by the DTSC and RWQCB and the Project is in compliance with this criterion.</p>
<p><b>k:</b> Either the project site is not within a delineated earthquake fault zone or a seismic hazard zone, as determined pursuant to Section 2622 and 2696 of the Public Resources Code respectively, or the applicable general plan or zoning ordinance contains provisions to mitigate the risk of an earthquake or seismic hazard.</p>	<p>Fault rupture is caused by the actual breakage of the ground surface overlying a fault as a result of seismic activity. This can range in offsets from less than 1 inch to up to 20 feet, depending on the fault and earthquake magnitude. Under the Alquist-Priolo Earthquake Fault Zone Act, the California State Geologist identifies areas in the state that are at risk from surface fault rupture. The main purpose of the act is to prevent construction of buildings used for human occupancy where traces of active faults are evident on the Earth's surface. Active faults are those that have moved at least once in the last 11,000 years and are considered capable of generating earthquakes in the future. These zones are known as Alquist-Priolo Earthquake Fault Zones. Impacts resulting from fault rupture generally occur within the immediate vicinity overlying the fault. The zones vary in width, but average about one-quarter mile across.</p> <p>According to the Safety Element of the City's General Plan, the San Andreas fault is an active fault that controls seismic hazard in Southern California. This fault is located approximately 21 miles north of Pasadena and is identified by the Safety Element as having the highest probability of causing an earthquake.<sup>19</sup> In the immediate area, other faults include the Sierra Madre fault, which extends across the City's northern boundary; the Raymond fault, which extends into the City's southern and eastern boundaries; and the Eagle Rock fault, which extends across the southwestern portion of the City. Maps created per the Alquist-Priolo Earthquake Fault Zoning Act show only one fault zone in or adjacent to the City, the Raymond (Hill) Fault. This fault is located primarily south of City limits, approximately 2 miles south of the Project Site.<sup>20</sup></p> <p>Therefore, the Project Site is not located within a delineated earthquake fault zone or a seismic hazard zone. The Project is in compliance with this criterion.</p>
<p><b>l:</b> Either the project site does not present a landslide hazard, flood plain, flood way, or restriction zone, or the applicable general plan or zoning ordinance contains provisions to mitigate the risk of a landslide or flood.</p>	<p>According to the California Department of Conservation's Earthquake Zones of Required Investigation map, the Project Site is approximately 1.9 miles east of the nearest landslide hard zone, which is located near Brookside Park on the west side of the City.<sup>21</sup> As such, this landslide area would not pose a risk to future occupants of the Project Site.</p> <p>The Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) for the area containing the Project Site (FIRM 06037C1375F) shows that the Project Site is located within Zone X, meaning that the Project Site is located in an Area of Minimal Flood Hazard and is therefore outside the 100-year and 500-year floodplains. The Project Site does not present a landslide hazard, nor is the Project Site located within a floodplain, flood way, or restriction zone. Therefore, the Project is in compliance with this criterion.</p>
<p><b>m:</b> The project site is not located on developed open space.</p>	<p>According to Section 15191 of the CEQA Guidelines, "developed open space" includes land meeting all of the following criteria: land that is publicly owned, or financed in whole or in part by public funds;</p>

<sup>19</sup> City of Pasadena, General Plan Safety Element, August 2002.

<sup>20</sup> California Department of Conservation, Earthquake Zones of Required Investigation, map generated May 27, 2020.

<sup>21</sup> California Department of Conservation, Earthquake Zones of Required Investigation, map generated May 27, 2020

	generally open to, and available for use by, the public; and predominantly lacking in structural development other than structures associated with open spaces, including, but not limited to, playgrounds, swimming pools, ball fields, enclosed child play areas, and picnic facilities. As stated in the Project Description of this report, the Project Site is currently developed with a two-story office building, which is zoned Commercial General by the Pasadena Zoning Code. As such, the Project Site is not located on developed open space and the Project is in compliance with this criterion.
<b>n:</b> The project site is not located within the boundaries of a state conservancy.	There are no adopted habitat conservation or natural community conservation plans established for the City of Pasadena. There are also no approved local, regional, or state habitat conservation plans within which the Project would be located. The Project Site is privately owned. As such, the Project Site is not included within the boundaries of a state conservancy and the Project is in compliance with this criterion.
<b>o:</b> The project has not been divided into smaller projects to qualify for one or more of the exemptions set forth in sections 15193 to 15195.	The Proposed Project, which would include demolition of an existing two-story office building and construction of a mixed-use, four-story building with ground-floor office space and 68 units of permanent supportive housing, has not been divided into smaller projects in order to qualify for the Affordable Housing Exemption (Section 15194 of the CEQA Guidelines). The Project represents the whole of the proposed action and, therefore, the Project is in compliance with this criterion.
<b>Section 15194. Affordable Housing Exemption</b>	
CEQA does not apply to any development project that meets the following criteria:	
<b>Threshold Criteria</b>	<b>Compliance Determination</b>
<b>a:</b> The project meets the threshold criteria set forth in section 15192.	As shown above, the Project would meet the threshold criteria set forth in Section 15192.
<b>b:</b> The project meets the following size criteria: the project site is not more than five acres in area.	As stated in the Project Description of this report, the Project Site consists of APN 5738-003-031, located at 1000 East Walnut Street, which is approximately 0.61 acres in size. As such, the Project Site is not more than 5 acres in area and, therefore, is in compliance with this criterion.
<b>c:</b> The project meets both of the following requirements regarding location: 1) The project meets one of the following location requirements relating to population density: A) The project site is located within an urbanized area or within a census-defined place with a population density of at least 5,000 persons per square mile. B) If the project consists of 50 or fewer units, the project site is located within an incorporated city with a population density of at least 2,500 persons per square mile and a total population of at least 25,000 persons. C) The project is located within either an incorporated city or a census defined place with a population density of at least 1,000 persons per square mile and there is no	According to the United States Census, in 2010, Pasadena had a population of 137,122 and a land area of 22.97 square miles, resulting in a population density of 5,969 persons per square mile. <sup>22</sup> The population in Pasadena has increased since the 2010 Census was undertaken, with the California Department of Finance estimating Pasadena's 2020 population to be 144,842. As a result, the estimated population density of Pasadena in 2020 is 6,306 persons per square mile. Therefore, the Project meets the population density requirement outlined in Section 15194(c)(1) of the CEQA Guidelines.  Regarding the site-specific location requirements detailed in Section 15194(c)(2), the Project Site is currently developed with a two-story office building and a surface parking lot. The Project Site is surrounded on all sides by urban development. As such, the Project has been previously developed for "qualified urban uses," which is defined by Section 15191 of the CEQA Guidelines as "any residential, commercial, public institutional, transit or transportation passenger facility, or retail use, or any combination of those uses." Therefore, the Project meets the site-specific location requirements outlined in Section 15194(c)(2) of the CEQA Guidelines.

<sup>22</sup> U.S. Census Bureau, QuickFacts: Pasadena City, California, <https://www.census.gov/quickfacts/pasadenacitycalifornia>, accessed May 27, 2020.

<p>reasonable possibility that the project would have a significant effect on the environment or the residents of the project due to unusual circumstances or due to the related or cumulative impacts of reasonably foreseeable projects in the vicinity of the project.</p> <p>2) The project meets one of the following site-specific location requirements:</p> <p>A) The project site has been previously developed for qualified urban uses; or</p> <p>B) The parcels immediately adjacent to the project site are developed with qualified urban uses.</p> <p>C) The project site has not been developed for urban uses and all of the following conditions are met:</p> <ol style="list-style-type: none"> <li>1. No parcel within the site has been created within 10 years prior to the proposed development of the site.</li> <li>2. At least 75 percent of the perimeter of the site adjoins parcels that are developed with qualified urban uses.</li> <li>3. The existing remaining 25 percent of the perimeter of the site adjoins parcels that have previously been developed for qualified urban uses.</li> </ol>	
<p><b>d:</b> The project meets both of the following requirements regarding provision of affordable housing.</p> <ol style="list-style-type: none"> <li>1) The project consists of the construction, conversion, or use of residential housing consisting of 100 or fewer units that are affordable to low-income households.</li> <li>2) The developer of the project provides sufficient legal commitments to the appropriate local agency to ensure the continued availability and use of the housing units for lower income households for a period of at least 30 years, at monthly housing costs deemed to be "affordable rent" for lower income, very low income, and extremely low income households, as determined pursuant to Section 50053 of the Health and Safety Code.</li> </ol>	<p>As stated in the Project Description, the Project would consist of construction of a total of 65 SRO affordable housing units, as well as three live-in manager units. The SRO units would be permanent supportive housing for single adults with incomes at or below 30 percent and 40 percent of area median income (40 units and 25 units, respectively), and who meet the U.S. Department of Housing and Urban Development's definition of homeless. A subset of units would be restricted to VA service-eligible homeless veterans.</p> <p>Regarding legal commitments to ensure continued availability of the affordable housing units, Section 17.43.100 of the Pasadena Zoning Code states that for affordable housing projects that receive a density bonus, waiver, or other concession, a covenant or other document satisfactory to the City Attorney shall be recorded before issuance of a building permit. This covenant ensures that the low and very low-income density bonus units are at all times rented or sold to, and remain affordable at, the applicable income level for at least 30 years. As such, the Project is in compliance with this criterion.</p>

## Conclusion

As described in **Table 1**, above, the Project meets all threshold criteria set forth in Section 15192 of the CEQA Guidelines, as well as threshold criteria specific to the affordable housing exemption (Section 15194 of the CEQA Guidelines). Therefore, the Proposed Project is exempt from CEQA pursuant to Section 15194 of the State CEQA Guidelines – Affordable Housing Exemption.

**APPENDIX A:**  
**PHASE I ENVIRONMENTAL SITE ASSESSMENT**

November 7, 2019

Major Osei Stewart  
The Salvation Army  
180 East Ocean Boulevard, Suite 500  
Long Beach, California 90802

**RE: Phase I Environmental Site Assessment Report  
1000 East Walnut Street, Pasadena, California 91106  
Project Number: 1382-126.01**

ACC has performed a Phase I Environmental Site Assessment (ESA) in general conformance with the scope and limitations of ASTM practice E1527-13 and the All Appropriate Inquiry Final Rule 40 CFR Part 312 for the property identified as 1000 East Walnut Street, Pasadena, California 91106 (Subject Property). This Phase I ESA was requested by The Salvation Army (Client). This purpose of this Phase I ESA was to assess the Subject Property for Recognized Environmental Conditions as defined by ASTM standard E 1527-13.

This Phase I ESA has identified evidence of a Recognized Environmental Condition, as discussed in the Executive Summary and the report narrative.

Thank you for choosing ACC to perform this Phase I ESA. If you have any questions regarding this report please contact (213) 353-1240 x 505 or [kjohnston@accenv.com](mailto:kjohnston@accenv.com).

Sincerely,

A handwritten signature in black ink, appearing to read 'Kyle Johnston', is written over a light blue horizontal line.

Kyle Johnston  
Staff Geologist

## **EXECUTIVE SUMMARY**

On behalf of The Salvation Army (Client), ACC Environmental Consultants, Inc. (ACC) performed a Phase I ESA in general conformance with the scope and limitations of ASTM practice E1527-13 and the All Appropriate Inquiry Final Rule 40 CFR Part 312 for the property identified as 1000 East Walnut Street, Pasadena, California 91106 (Subject Property). Exceptions to, or deletions from, this practice are described in Section 1.4.

The earliest record reviewed during this assessment was an 1894 historical topographic map depicting the Subject Property as undeveloped land. At this time, East Walnut Street was not developed and the Subject Property was associated with North Catalina Avenue to the east.

Between 1910 and 1928, the Subject Property was developed with seven single-family residential dwellings and two associated garages (990 E Walnut Street and 185-191 N Catalina Avenue). The Subject Property remained in the same configuration until at least 1931.

By 1938 the Subject Property was developed with three commercial buildings to the north and northeast (1000, 1002, and 1010 E Walnut Street). The Subject Property remained in the same configuration until at least 1952. Historical occupants include Rob Lee auto trimmer (1942), Frank Rogers Garage & Service Station Equipment (1950), roofing storage (1950), Pasa Metal Fabricators (1950), machine shop (1950 to 1952), repair shop (1950 to 1952), auto repair (1952), Custom Wood Products (1956), Steven's Auto Repair (1956 to 1957), Westerlind Products (1956 to 1961), Jim Owens Auto Electric Shop (1960), and Jim Owens Auto Repair (1961).

By 1964, all structures on the Subject Property were demolished and the property became vacant land.

By 1968, the Subject Property was developed with the existing two-story commercial office building (1000 E Walnut Street).

Historical occupants include various professional office tenants including insurance agencies, law offices, investment groups, and counseling centers.

This assessment has revealed evidence of a Recognized Environmental Condition (REC) at the Subject Property:

**REC:** Based on the historical land use of the northeastern portion of the Subject Property as various automobile and equipment repair facilities, metal fabricators, and machine shop for approximately 20 years, there is a potential for subsurface impacts by chemicals-of-concern. Vapor intrusion concerns cannot be ruled out at this time and subsurface assessment is warranted.

## **1.0 INTRODUCTION**

On behalf of The Salvation Army (Client), ACC Environmental Consultants, Inc. (ACC) performed a Phase I Environmental Site Assessment (ESA) of the property identified as 1000 East Walnut Street, Pasadena, California 91106 (Subject Property).

### **1.1 Purpose**

This purpose of this Phase I ESA was to assess the Subject Property for recognized environmental conditions (RECs), which are defined by ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

### **1.2 Scope of Services**

ACC conducted the following:

- A search of regulatory records and files for the Subject Property, neighboring properties, and nearby sites of environmental concern to assess whether any adverse environmental conditions have impacted, or has the potential to impact the Subject Property.
- A review of historical sources including historical aerial photographs, historical topographic maps, historic city directories and historical fire insurance maps.
- A review of physical setting sources including the USGS 7.5 minute topographic maps, as well as geology, hydrogeology, and soil maps of the Subject Site and vicinity, as deemed appropriate.
- A review of the current title report for the Subject Property (if provided by the Client), and copies of all previous environmental site investigations performed at the property (if applicable and available).
- A site reconnaissance to visually assess the potential for RECs in connection with the Subject Property.
- Interviews of regulatory agencies and available persons familiar with the Subject Property.

### **1.3 Limitations**

A Phase I ESA cannot wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this Phase I ESA is intended to reduce uncertainty regarding the potential for RECs in connection with the Subject Property within reasonable limitations of time and cost. There is a point at which the cost of information obtained or the time frame required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of real estate transactions.

Conducting a Phase I ESA alone does not provide a landowner with CERCLA liability protection. Landowners who want to qualify as bona fide prospective purchasers or contiguous property owner must comply with all of the statutory requirements identified in CERCLA Section 107(r) and 107(q). Continuing obligations must be satisfied to maintain liability protection under CERCLA for innocent landowners, bona fide prospective purchasers, and contiguous property owners. Continuing obligations start on the date that a landowner acquires title to a property. The landowner must: 1) comply with land use restrictions and institutional controls; 2) take “reasonable” steps with respect to hazardous substances releases; 3) provide full cooperation, assistance and access to persons that are authorized to conduct response actions or natural resource restoration; 4) comply with information requests and administrative subpoenas; and 5) provide all legally required notices.

The site reconnaissance was limited to a visual observation of the Subject Property. ACC shall not be responsible for areas covered by parked vehicles, overgrown vegetation, and/or other obstacles (heavy furniture, trash bins, miscellaneous stored items, etc.) preventing access or visual observation at the time of the site reconnaissance. Per ASTM Standard Practice E1527-13 it is not necessary to look under floors, above ceilings or behind walls.

As is the case with any investigation of limited scope, site conditions may vary from those observed and witnessed on the date of the site reconnaissance. The possibility of the discovery of the presence of hazardous substances that are not anticipated and/or were neither witnessed nor identified on the date of the site reconnaissance cannot be completely eliminated. ACC cannot offer any form of warranty and/or guarantee that the Subject Property does not contain hazardous substances and/or conditions per the results of performing this Phase I ESA. Because regulatory criteria change over time, potential concentrations of contaminants presently considered not significant may in the future fall under more stringent regulatory standards that require remediation.

Based on ASTM standard E 2600-10 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*, the minimum search distance for potential vapor intrusion by a release of petroleum products is 528 feet (1/10 mile) and the minimum search distance for potential vapor intrusion by other chemicals is 1,760 feet (1/3 mile).

#### **1.4 Project-Specific Limitations and/or Deviations**

This assessment did not include any testing or sampling of materials, including soil, water, soil vapor, air or building materials. ACC did not evaluate the purchase price for the Subject Property.

#### **1.5 Significant Assumptions**

No significant assumptions were made during this Phase I ESA. ACC assumes that verbal and written information provided to ACC during this Phase I ESA process and included in this report is factual.

## **1.6 User Reliance**

This report may be relied upon by The Salvation Army, City of Pasadena, and County of Los Angeles. Reliance upon this report by additional parties is unauthorized unless expressed written consent is obtained from the Client and ACC.

## **2.0 SITE DESCRIPTION**

The Subject Property consists of an approximately 0.61 acre parcel of land identified by the Los Angeles County Assessor as Assessor Parcel Number (APN) 5738-003-031. The Subject Property is located on the southwest corner of East Walnut Street and North Catalina Avenue in the City of Pasadena, California. The Subject Property is accessible from East Walnut Street to the north and North Catalina Avenue to the east. The following addresses have been found to be associated with the Subject Property: 990, 1000, 1002, and 1010 East Walnut Street and 185, 189, and 191 North Catalina Avenue.

The Subject Property is currently developed with a two-story commercial office building. The Subject Property is currently owned by The Salvation Army and leased to various professional office tenants. The surrounding area is mixed residential and commercial.

Gas services are provided by Southern California Gas Co. Electricity, water, and sewer services are provided by Pasadena Water and Power.

## **3.0 USER PROVIDED INFORMATION**

ACC contacted the client via a user questionnaire with regard to environmental liens, activity and use limitations, specialized knowledge of environmental conditions, and commonly known or reasonably ascertainable information. The environmental questionnaire was completed by Ms. Stacey Estes on October 20, 2019. A copy of the questionnaire is available in Appendix A.

### **3.1 Title Report**

A Title Report was not provided to ACC.

### **3.2 Environmental Liens or Activity and Use Limitations (AULs)**

The User provided no information with regard to environmental liens or AULs in connection with the Subject Property.

### **3.3 Specialized Knowledge**

The Client is completing the Phase I ESA to satisfy lender requirements prior to planned redevelopment as affordable housing and social services.

### **3.4 Commonly Known or Reasonably Ascertainable Information**

Any commonly known or reasonably ascertainable information available to ACC has been incorporated into this report.

### **3.5 Valuation Reduction for Environmental Issues**

ACC did not evaluate the purchase price for the Subject Property.

### **3.6 Owner, Property Manager, and Occupant Information**

The current owner of the Subject Property is The Salvation Army.

### **3.7 Previous Environmental Reports**

No previous environmental reports were provided to ACC.

## **4.0 RECORDS REVIEW**

ACC contracted Environmental Data Resources, Inc. (EDR) to research available environmental records and historical data for the Subject Property based on ASTM Standard Practice E1527-13. A complete list of searched records and databases, as well as search distances, is attached as Appendix B. The search distances provided by EDR are in accordance with ASTM Standard Practice E1527-13 and AAI guidelines.

The database search by EDR revealed 44 mapped sites within a one-eighth mile radius of the Subject Property. The Subject Property and nearby properties of potential concern are discussed below.

### **4.1 Summary of EDR Records for Subject Property**

Site Name: Rondon SE Company

Site Address: 1000 East Walnut Street

Discussion: The Subject Property is listed on the EDR Hist Auto database. According to the database listing, Rondon SE Company operated a toys and hobby goods and supplies store from at least 1969 to at least 1970. Roadmasters operated a general automotive repair shop in at least 2001. Based on additional historical resources confirming that the Subject Property was developed with its present-day configuration at the time of these occupations, these listings are not expected to represent a significant environmental concern.

Site Name: Stevens Auto Repair

Site Address: 1010 East Walnut Street

Discussion: The Subject Property is listed on the EDR Hist Auto database. According to the database listing, Stevens Auto Repair operated an automobile repair facility on the Subject Property in at least 1956. Based on the Subject Property being occupied by an auto repair facility and lack of documentation with any information regarding the facility, this listing is expected to represent an environmental concern for the Subject Property.

Site Name: Burroughes BB

Site Address: 1002 East Walnut Street

Discussion: The Subject Property is listed on the EDR Hist Auto database. According to the database listing, Burroughes BB operated an automobile repair facility on the property in at least 1947. Rogers PL operated a service station equipment facility in at least 1947. Jim Owens Auto Electric operated an automobile repair facility from at least 1951 to 1961. Based on the Subject Property being occupied by multiple auto repair and equipment facilities, and lack of documentation with any information regarding the facilities, these listings are expected to represent an environmental concern for the Subject Property.

#### **4.2 Adjacent and Nearby Properties of Potential Concern**

Site Name: McBean S Mobil Service

Site Address: 955 East Walnut Street

Discussion: The northwest adjoining property (hydrologically up-gradient) of the Subject Property is listed on the EDR Hist Auto database. According to the database listing, Frank Hutton, Granger CR, Bagnard LP, Crown Radiator Shop, McBeans Mobil Service, and Georges Muffler Service operated an auto repair facility, gasoline service station, and radiator repair facility on the property from at least 1932 to at least 1965. Based on the lack of evidence of a documented release, depth to ground water (excess of 100 feet), and subsequent redevelopment of the property, this listing is not expected to represent a significant environmental concern to the Subject Property.

Site Name: Vetterli BG

Site Address: 1022 East Walnut Street

Discussion: The east adjoining property (hydrologically down-gradient) is listed on the EDR Hist Auto database. According to the database listing, Vetterli BG operated a gasoline service and oil station on the property in at least 1942. Based on the lack of evidence of a documented release, down-gradient location, and depth to groundwater, this listing is not expected to represent a significant environmental concern to the Subject Property.

Site Name: Washette Laundry

Site Address: 1040 East Walnut Street

Discussion: The east adjoining property (hydrologically down-gradient) is listed on the EDR Hist Cleaner database. According to the database listing, Washette Laundry and Holland Curtain Washette operated self-serve laundry facilities on the property from at least 1961 to at least 1976. Based on the facilities being utilized as self-serve laundry facilities and not dry-cleaning

operations and down-gradient location, this listing is not expected to represent a significant environmental concern to the Subject Property.

Site Name: Kathleen Lucas DDS

Site Address: 959 East Walnut Street

Discussion: The northwest adjoining property (hydrologically up-gradient) to the Subject Property is listed on the RCRA NonGen/NLR database. According to the database listing, Kathleen Lucas DDS was classified as a non-generator who does not currently generate hazardous waste in at least 2009. Based on the lack of evidence of a documented release, this listing is not expected to represent a significant environmental concern to the Subject Property.

Site Name: Foothill Pulmonary Critical Care

Site Address: 959 East Walnut Street

Discussion: The northwest adjoining property (hydrologically up-gradient) to the Subject Property is listed on the RCRA NonGen/NLR database. According to the database listing, Foothill Pulmonary Critical Care was classified as a non-generator who does not currently generate hazardous waste in at least 2018. Based on the lack of evidence of a documented release, this listing is not expected to represent a significant environmental concern to the Subject Property.

Site Name: Mak and Kleiger DDS

Site Address: 959 East Walnut Street

Discussion: The northwest adjoining property (hydrologically up-gradient) to the Subject Property is listed on the RCRA NonGen/NLR, CERS Haz Waste, CA Haznet, and CA CERS databases. According to the database listing, Mak and Kleiger DDS was classified as a non-generator who does not currently generate hazardous waste in at least 2006. Based on the lack of evidence of a documented release, this listing is not expected to represent a significant environmental concern to the Subject Property.

In our opinion, none of the other sites listed on the regulatory database report pose a significant threat to the Subject Property.

### **4.3 California Division of Oil & Gas Records**

The Division of Oil, Gas, and Geothermal Resources (DOGGR) Online Mapping System was reviewed for information pertaining to oil and gas exploration on or nearby the Subject Property. No oil wells were identified within 500 feet of the Subject Property.

### **4.4 Additional Environmental Record Sources**

In addition, ACC submitted file review request letters, emails and/or phone calls to the following agencies for the Subject Property:

#### *4.4.1. California EPA – Department of Toxic Substance Control (DTSC)*

A request was sent to DTSC on October 14, 2019. ACC received a response from DTSC on October 17, 2019. Records include:

A site tracking sheet submitted for Brefcon International Limited in April 1990 and stating that no information was available.

#### *4.4.2. California Regional Water Quality Control Board (CRWQCB)*

A request was sent to CRWQCB on October 14, 2019. ACC received a response from CRWQCB on October 22, 2019. No files were available for the Subject Property.

#### *4.4.3. Los Angeles County Department of Public Works (LACDPW)*

Records were reviewed at the Los Angeles County Department of Public Works on October 30, 2019. No records were available for the Subject Property.

#### *4.4.4. South Coast Air Quality Management District (SCAQMD)*

A request was sent to SCAQMD on October 14, 2019. ACC received a response from the SCAQMD on October 15, 2019. Records included a Facility Equipment List Report for Rule 1415 Plan Notification permits from 2000 to 2008.

#### *4.4.5. Pasadena Fire Department (PFD)*

A request was sent to PFD on October 14, 2019. ACC received a response from PFD on August November 1, 2019. No files were available for the Subject Property.

#### *4.4.6. Pasadena Building Department (PBD)*

ACC reviewed files from the Pasadena Building Department online records website on November 1, 2019. Files included:

A mechanical permit was issued in 1995 to replace a 30-ton condensing unit on roof.

Code Compliance Inspection Certificates for various office tenants were issued between 1995 and 2012.

A reroofing permit was issued in 2009.

A mechanical permit was issued in 2015 for the installation of a 5-ton dual system.

A building permit was issued in 2017 for the installation of four gates and fences.

## **4.5 Historical Use Information on the Property**

Information pertaining to historical uses of the Subject Property and adjoining properties was obtained from the following sources: aerial photographs, historical topographic maps, historical Sanborn Maps and city directories. These resources were obtained from Environmental Data

## Resources (EDR).

ACC reviewed historical aerial photographs dated 1928, 1938, 1948, 1952, 1964, 1970, 1977, 1981, 1989, 1994, 2002, 2005, 2009, 2012, and 2016. A copy of the Historical Aerial Photographs is provided in Appendix C.

ACC reviewed historical topographic maps dated 1894, 1896, 1900, 1928, 1940, 1953, 1966, 1972, 1988, 1994, 1995, and 2012. A copy of the Historical Topographic Maps is provided in Appendix D.

Historical Sanborn Maps (fire insurance maps) are detailed scaled drawings that show the location and use of building structures that have occupied a given area from as early as the late 1800s. These maps can provide information that is unavailable from other sources regarding the development and use of a given property. Historical Sanborn maps were available for 1903, 1910, 1931, 1950, 1952, and 1968 for the Subject Property. Historical Sanborn Maps are provided in Appendix E.

Historical city directories were provided by EDR Digital Archive and Haines Cross-Cross Directory. City Directory listings were available from 1920 to 2014. A copy of the Historical City Directories is provided in Appendix F.

### *4.5.1 Historical Use Information on the Subject Property and Adjacent Properties*

Pertinent observations from the historical resources in relation to the Subject Property and the immediately adjacent properties is as follows.

#### Subject Property

Circa 1894 to 1910	According to historical references reviewed, the Subject Property is undeveloped land. East Walnut Street has not been developed at this time and the Subject Property is associated with North Catalina Avenue to the east.
Circa 1928 to 1931	According to historical references reviewed, the Subject Property is developed with seven single-family residential dwellings and two associated garages.
Circa 1938 to 1952	According to historical references reviewed the Subject Property was developed with three commercial structures to the north and northeast including a machine shop, auto repair shop, and roofing storage. Historical occupants include: Pasa Metal Fabricators (1950), Westerlind Products (1956 to 1960), and Stevens Auto Repair (1956).
Circa 1964	According to historical references reviewed, all structures on the

Subject Property were demolished and the property became vacant land.

Circa 1968 to 2016

According to historical references reviewed, the Subject Property was developed with the existing two-story commercial office building. Historical occupants include various professional office tenants including insurance agencies, law offices, investment groups, and counseling centers.

Trinity Lutheran Church, 997 East Walnut Street, Adjoining Property to the North

Circa 1894 to 1903

According to historical references reviewed, the area to the north of the Subject Property was undeveloped land.

Circa 1910

According to historical references reviewed, the area to the north of the Subject Property was developed with a single-family residential dwelling. As East Walnut Street was not developed at this time, the parcel was directly adjoining to the Subject Property.

Circa 1928 to 2016

According to historical references reviewed, East Walnut Street was developed to the north and the area to the north of the Subject Property was developed with the existing church structure.

Multi-Family Residential Dwelling, 175 North Catalina Avenue, Adjacent Properties to the South

Circa 1894 to 1903

According to historical references reviewed, the area to the south of the Subject Property was undeveloped land.

Circa 1910 to 1948

According to historical references reviewed, the area to the south of the Subject Property was developed with a single-family residential dwelling along the east and associated garage.

Circa 1950 to 1952

According to historical references reviewed, a second single-family residential dwelling was developed along the west.

Circa 1964 to 2016

According to historical references reviewed, the eastern residential dwelling on the area to the south of the Subject Property was demolished and the existing multi-family residential dwelling was developed.

Scrubs LA and Multi-Family Residential Dwellings, 1040 East Walnut Street and 182-192 North Catalina Avenue, Adjoining Property to the East

- Circa 1894 to 1910 According to historical references reviewed, the area to the east of the Subject Property was undeveloped land.
- Circa 1931 to 1948 According to historical references reviewed, the area to the east of the Subject Property was developed with the existing seven single-family residential dwellings.
- Circa 1950 to 1964 According to historical references reviewed, the area to the east of the Subject Property was developed with a gas and oil station, existing commercial structure, and existing seven residential dwellings.
- Circa 1968 to 2016 According to the historical references reviewed, the gas and oil station was demolished and the area to the east of the Subject Property was developed with the existing commercial building and associated parking lot, and seven residential dwellings.

The Salvation Army Pasadena Tabernacle Corps, 960 East Walnut Street, Adjacent Property to the West

- Circa 1894 to 1903 According to historical references reviewed, the area to the west of the Subject Property was undeveloped land.
- Circa 1910 According to historical references reviewed, the area to the west of the Subject Property was developed with a single-family residential dwelling. The property was associated with North Mentor Avenue to the west.
- Circa 1928 to 1952 According to historical references reviewed, the area to the west of the Subject Property was developed with five single-family residential dwellings with associated auto garages and a beanery.
- Circa 1964 to 2016 According to historical references reviewed, all structures on the area to the west of the Subject Property were demolished and the area was developed with the existing commercial structure.

#### **4.6 Historical Summary for Subject Property**

The earliest record reviewed during this assessment was an 1894 historical topographic map depicting the Subject Property as undeveloped land. At this time, East Walnut Street was not developed and the Subject Property was associated with North Catalina Avenue to the east.

Between 1910 and 1928, the Subject Property was developed with seven single-family

residential dwellings and two associated garages (990 E Walnut Street and 185-191 N Catalina Avenue). The Subject Property remained in the same configuration until at least 1931.

By 1938 the Subject Property was developed with three commercial buildings to the north and northeast (1000, 1002, and 1010 E Walnut Street). The Subject Property remained in the same configuration until at least 1952. Historical occupants include Rob Lee auto trimmer (1942), Frank Rogers Garage & Service Station Equipment (1950), roofing storage (1950), Pasa Metal Fabricators (1950), machine shop (1950 to 1952), repair shop (1950 to 1952), auto repair (1952), Custom Wood Products (1956), Steven's Auto Repair (1956 to 1957), Westerlind Products (1956 to 1961), Jim Owens Auto Electric Shop (1960), and Jim Owens Auto Repair (1961).

By 1964, all structures on the Subject Property were demolished and the property became vacant land.

By 1968, the Subject Property was developed with the existing two-story commercial office building (1000 E Walnut Street).

Historical occupants include various professional office tenants including insurance agencies, law offices, investment groups, and counseling centers.

#### **4.7 Vapor Intrusion**

In accordance with ASTM E 2600, ACC assessed the Subject Property for a potential vapor intrusion condition (pVIC). A vapor intrusion condition is defined by ASTM E 2600 as “the presence or likely presence of any chemicals of concern in the indoor air environment of existing or planned structures on a property caused by the release of vapor from contaminated soil or groundwater on the property or within close proximity to the property, at a concentration that presents or may present an unacceptable health risk to occupants.”

Based on the Subject Property's historical land use, there is a potential for subsurface contamination and in ACC's opinion a potential vapor intrusion condition at the Subject Property cannot be ruled out at this time.

#### **4.8 Radon**

The Subject Property is located in an area designated in Radon Zone 2. Zone 2 is characterized as having predicted average indoor radon screening levels between 2 and 4 picocuries per liter of air (pCi/L) and is not considered significant based on US EPA radon screening levels.

### **5.0 PHYSICAL SETTINGS**

The Subject Property is approximately 832 feet above mean sea level according to the U.S. Geological Survey (USGS) Pasadena, CA 7.5 Minute Quadrangle topographic map (2012). The Subject Property slopes towards the southeast.

According to the Preliminary Investigation for Underground Storage Tank completed for the Kaiser Permanente site located approximately 3,640 feet west (393 Walnut Street) and dated February 25, 1986, alluvial soils underlying Pasadena consist of layered sand, gravel, and cobbles with interstitial silt and clay. Soils in the vicinity of the underground tank consisted of a mixture of brown silty sand and sand. Fine to coarse gravel and small cobbles occurred in scattered layers.

Based on the Quarterly Groundwater Monitoring Report dated April 15, 2008 for Arco site located approximately 3,350 feet west (445 East Walnut Street) depth to groundwater beneath the site is approximately 150 feet below ground surface (bgs). Based on topographic contour, groundwater is estimated to flow to the southeast. Conditions are anticipated to be similar at the Subject Property but may vary.

## **6.0 SITE RECONNAISSANCE**

On November 4, 2019, ACC representative Mr. Kyle Johnston conducted a site reconnaissance at the Subject Property. The site was accessed via gate code.

### **6.1 Methodology**

The Subject Property was viewed from all adjacent public thoroughfares and was observed to the extent not obstructed by bodies of water, adjacent buildings, and/or other obstacles such as overgrown vegetation. Accessible interior and exterior common areas were viewed. Special attention was given to hazardous materials storage/use areas and potential conduits to the subsurface such as drains and sumps.

### **6.2 General Site Setting**

The Subject Property is currently developed with a two-story commercial office building. The main entrance to the building is located along the north side. Paved parking and access ways are located along the southern and western portions of the Subject Property. The Subject Property is accessible from the East Walnut Street to the north and North Catalina Avenue to the east.

### **6.3 General description of Vicinity, Adjacent Properties and Observed Current/Past Usage**

The vicinity of the Subject Property consists of residential and commercial properties. The adjacent properties as viewed during the site reconnaissance are as follows:

- North - Walnut Street followed by Trinity Lutheran Church (997 East Walnut Street)
- South - Multi-Family Residential Dwelling (175 North Catalina Avenue)
- East - North Catalina Avenue followed by Scrubs LA (1040 East Walnut Street) and Residential Dwellings (182-188 North Catalina Avenue)

West - The Salvation Army Pasadena Tabernacle Corps (960 East Walnut Street)

#### **6.4 Summary of Site Visit Observations**

The Subject Property is currently occupied by various office tenants and The Salvation Army. The building is comprised of 71 office suites, storage rooms, restrooms, a conference room, and maintenance rooms.

An elevator is located in the north-center portion of the building. The elevator lift room was observed and no unusual staining or hazardous materials were observed around the hydraulic mechanism.

Storm drains and floor drains were observed throughout the building, courtyard, and parking area. No evidence of staining or hazardous materials storage was observed in the vicinity of the any of the drains.

The remaining portions of the Subject Property are developed with asphalt paved access ways and parking areas. Asphalt paved areas appeared to be in fair condition with no abnormal cracking or staining. Visual inspection of the paved parking areas did not reveal evidence of hazardous materials, stains or spills.

No evidence of underground/aboveground storage tanks/records, significant hazardous materials storage, or environmental violations associated with the Subject Property were observed during the site reconnaissance.

#### **7.0 INTERVIEWS**

##### **7.1 Interview with Owner/Site Manager or Representative**

Ms. Stacey Estes, consultant to The Salvation Army, completed the environmental questionnaire. Ms. Estes was unfamiliar with potential environmental concerns related to the Subject Property. Ms. Estes stated that the existing building will be demolished and the property will be redeveloped with affordable housing and a social services office.

##### **7.2 Interviews with Occupants**

No tenant interviews were completed at this time.

##### **7.3 Interviews with Local Government Officials**

See Section 4.2.

#### 7.4 Interviews with Others

No additional interviews were conducted at this time.

#### 8.0 FINDINGS & OPINIONS

ACC has performed a Phase I ESA in general conformance with the scope and limitations of ASTM practice E1527-13 and the All Appropriate Inquiry Final Rule 40 CFR Part 312 for the property identified as 1000 East Walnut Street, Pasadena, California 91106 (Subject Property). Exceptions to, or deletions from, this practice are described in Section 1.4. No significant data gaps were identified while conducting this Phase I ESA.

This assessment has revealed evidence of a Recognized Environmental Condition (REC) at the Subject Property:

**REC:** Based on the historical land use of the northeastern portion of the Subject Property as various automobile and equipment repair facilities, metal fabricators, and machine shop for approximately 20 years, there is a potential for subsurface impacts by chemicals-of-concern. Vapor intrusion concerns cannot be ruled out at this time and subsurface assessment is warranted.

#### 9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

The site reconnaissance and interviews were conducted by Mr. Kyle Johnston, who was also responsible for obtaining and reviewing historical use documentation, interpreting data, identifying RECs, HRECs, CRECs, BERs, and preparation of this Phase I ESA Report. All of the activities were performed in conjunction with and under the supervision or responsible charge of, Mr. Ian Sutherland, the environmental professional assigned to this project.

I certify that I possess sufficient education, training, and relevant experience necessary to conduct the investigative and interpretive activities presented in the paragraph above in accordance with the ASTM E1527-13 standard and possess the ability to identify issues relevant to RECs in connection with the Subject Property.

Prepared by: \_\_\_\_\_  
ACC Environmental Consultants, Inc.  
Kyle Johnston  
Staff Geologist

I declare that to the best of my professional knowledge and belief, I meet the definition of an

Environmental Professional as defined in §312.21 of 40 CFR Part 312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

**AAI QUESTIONNAIRE**

**PHASE I ENVIRONMENTAL SITE ASSESSMENT  
USER QUESTIONNAIRE**

Please answer the following questions to the extent possible and return via email to **kbunting@accenv.com** (or fax to 510.638.8404). Please provide a copy of the Title Report.

<b>Name:</b>	Stacey Estes
<b>Title:</b>	Consultant
<b>Phone Number:</b>	213-369-1998
<b>Email Address:</b>	staceylestes@aol.com
<b>Signature:</b>	
<b>Date:</b>	10/20/19
<b>How long have you have been associated with the property:</b> Completed questionnaire with individual associated with property for several years	
<b>Please list all complete current and known historical address(s) and Assessor's Parcel Number(s) for which this Phase I ESA is being performed (feel free to attach maps or other documentation showing property boundaries):</b>  1000 E. Walnut Street, Pasadena, CA 91106 APN: 5738-003-031	
<b>Please list the acreage of the parcel(s), square footage and age(s) of on-site structures and property zoning:</b>  26,680 sq ft parcel; existing two-story structure built 1964 (to be demolished) Zoning: CG - Low Density Commercial	
<b>Purpose for which Phase I ESA is being performed (if for a real estate transaction, please list type of transaction, sale, purchase, lease, etc.):</b>  To satisfy lender requirement	
<b>Please list all parties who will rely on the Phase I ESA:</b>  The Salvation Army, City of Pasadena, County of Los Angeles, additional TBD	
<b>Please provide the property owner or owner representative, including telephone number and/or email address (the owner will be identified in the Phase I ESA and may be interviewed by ACC as warranted and if available):</b>  Jody Davis, Business Administrator, Pasadena Tabernacle Corps, 616-773-4432; jody.davis@usw.salvationarmy.org	

<p><b>Please provide a site contact, including telephone number and/or email address for purposes of scheduling the site visit:</b></p> <p>Jody Davis, 626-773-4432; jody.davis@usw.salvationarmy.org</p>
<p><b>Please list the current tenant(s), current site use(s) and years of occupancy:</b></p> <p>Property owned by The Salvation Army; suites in existing structure leased to various commercial tenants. See attached list of business types</p>
<p><b>Please list former tenant(s), former site use(s) and years of occupancy:</b></p> <p>Unknown</p>
<p><b>How do you intend to use the property (if you plan to redevelop please discuss development plans and whether on-site soils will be disturbed/excavated):</b></p> <p>Demolition of existing bldg and redevelopment of property for affordable housing and social services. On-site soils will be disturbed.</p>
<p><b>Has there been any major renovations, additions or demolition at the property? If so, please provide year and basic information for the events:</b></p> <p>Minor renovation only.</p>
<p><b>Who provides gas, electric, water and sewer services?</b></p> <p>Gas: Southern California Gas Co; Electric/Water/Sewer: Pasadena Water and Power</p>
<p><b>Did a search of recorded land titles identify (or are you aware of) any environmental liens filed or recorded against the property under federal, tribal, state or local law? If yes, please explain.</b></p> <p>No. Please see Title Report.</p>
<p><b>Did a search of recorded land titles identify (or are you aware of) any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? If yes, please explain.</b></p> <p>No.</p>

**Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?**

No.

**Does the purchase price being paid for this property (if applicable) reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?**

Not applicable.

**Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases, for example:**

- (a) Do you know the past uses of the property? No
- (b) Do you know of specific chemicals that are present or once were present at the property? No
- (c) Do you know of spills or other chemical releases that have taken place at the property? No
- (d) Do you know of any environmental cleanups that have taken place at the property? No
- (e) Other?

**Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?**

Potentially asbestos or lead based paint due to age of structure

Are you aware of any of the following documents prepared for the property:			
	Yes	No	Date(s)
a. Environmental Site Assessment		X	
b. Subsurface Soil/Groundwater Investigations		X	
c. Environmental Permits		X	
d. Hazardous Materials/Waste Permits		X	
e. National Pollution Discharge Elimination System (NPDES) Permits		X	
f. UST/AST Registration Documents/Permits		X	
g. Underground Injection System Registration Documents/Permits		X	
h. MDSH Sheets		X

o. Geotechnical Studies		X	

Are you aware of any of the following items associated with the property?		
	Yes	No
a. Asbestos-containing materials or lead-based paint located at the subject property?		X
b. Hazardous materials/waste spills related to that have occurred on the subject property?		X
c. Litigation associated with the subject property with regards to violations of environmental law?		X
e. Are you aware of any Aboveground Storage Tanks (ASTs) or Underground Storage Tanks (USTs) located at the property? If yes, what are the contents and capacities:		X
f. Electrical transformers on the subject property?		X
g. Are you aware of any chemical/petroleum products being used or stored at the subject property? If yes, are MSDS available? ___ Yes ___ No		X
h. Are any of the past or current occupants hazardous waste generators?		X
i. Are there any pits, ponds or lagoons for waste treatment or disposal on the subject property?		X
j. Are there any wells (irrigation, groundwater or monitoring) at the subject property?		X
k. Are there any sumps, floor drains, or catch basins, oil-water separators, or acid neutralization systems on the subject property?		X
l. Are there any storm drains on the subject property?		X
m. Have there been any significant structural fires at the property?		X

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

## EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### **STANDARD ENVIRONMENTAL RECORDS**

#### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/24/2019 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
Not reported EPA ID:: CAL000050544	392 N LAKE AVE	NNW 1/8 - 1/4 (0.245 mi.)	Q104	198

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
RITE AID #6255 EPA ID:: CAR000212548	1038 E COLORADO BLVD	S 1/8 - 1/4 (0.247 mi.)	N110	212

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/24/2019 has revealed that there are 9 RCRA-SQG sites within approximately 0.25 miles of the target property.

### **State- and tribal - equivalent CERCLIS**

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 07/29/2019 has revealed that there are 5 CA ENVIROSTOR sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

### **State and tribal leaking storage tank lists**

CA LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA LUST list, as provided by EDR, has revealed that there are 5 CA LUST sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### ***State and tribal registered storage tank lists***

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 4 CA UST sites within approximately 0.25 miles of the target property.

### **Local Lists of Registered Storage Tanks**

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 10 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

### **Other Ascertainable Records**

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/24/2019 has revealed that there are 26 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CA HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSTATES]. This listing is no longer updated by the state agency.

A review of the CA HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 3 CA HIST CORTESE sites within approximately 0.5 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### **EDR Exclusive Records**

## EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 17 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 6 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

**FINDS:**

Registry ID: 110002642622

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002900745

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 08-08-2013  
Citation: HSC 6.7 25291 - California Health and Safety Code, Chapter 6.7, Section(s) 25291  
Violation Description: Failure to maintain under-dispenser containment, sumps, and/or other secondary containment in good condition and/or free of debris/liquid.  
Violation Notes: Returned to compliance on 08/08/2013.  
Violation Division: Pasadena Fire Department  
Violation Program: UST  
Violation Source: CERS

Site ID: 119972  
Site Name: GOLDEN STATE ENTERPRISES 257070  
Violation Date: 07-17-2019  
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)  
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.  
Violation Notes: Returned to compliance on 07/17/2019.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**FINDS:**

Registry ID: 110002720805

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

Violation Status: No violations found

FINDS:

Registry ID: 110002812626

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Name: Circle K Stores Inc. Site # 2709453

Violation Date: 04-19-2017

Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12

Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.

Violation Notes: Returned to compliance on 05/20/2017. OBSERVATION: This facility does not have a valid EPA ID number to manage hazardous waste. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an EPA ID number. CORRECTIVE ACTION: Immediately obtain an EPA ID number to manage hazardous waste and submit evidence to the CUPA by 5/19/2017.

Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)

Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.

Violation Notes: Returned to compliance on 10/18/2017. OBSERVATION: Copies of hazardous waste disposal records for last 3 years were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA by 5/19/2017.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/19/2019	Source: EPA
Date Data Arrived at EDR: 07/30/2019	Telephone: N/A
Date Made Active in Reports: 09/03/2019	Last EDR Contact: 10/02/2019
Number of Days to Update: 35	Next Scheduled EDR Contact: 01/13/2020
	Data Release Frequency: Quarterly

EPA Region 10  
Telephone 206-553-8665

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/19/2019	Source: EPA
Date Data Arrived at EDR: 07/30/2019	Telephone: N/A
Date Made Active in Reports: 09/03/2019	Last EDR Contact: 10/02/2019
Number of Days to Update: 35	Next Scheduled EDR Contact: 01/13/2020
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/19/2019

Telephone: 703-603-8704  
Last EDR Contact: 10/04/2019  
Next Scheduled EDR Contact: 01/13/2020  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 07/19/2019  
Date Data Arrived at EDR: 07/30/2019

Last EDR Contact: 10/02/2019  
Next Scheduled EDR Contact: 01/27/2020  
Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/19/2019	Source: EPA
Date Data Arrived at EDR: 07/30/2019	Telephone: 800-424-9346
Date Made Active in Reports: 09/03/2019	Last EDR Contact: 10/02/2019
Number of Days to Update: 35	Next Scheduled EDR Contact: 01/27/2020
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 06/24/2019	Source: EPA
Date Data Arrived at EDR: 06/26/2019	Telephone: 800-424-9346
Date Made Active in Reports: 10/17/2019	Last EDR Contact: 09/16/2019
Number of Days to Update: 113	Next Scheduled EDR Contact: 01/06/2020
	Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/24/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/26/2019	Telephone: (415) 495-8895
Date Made Active in Reports: 10/17/2019	Last EDR Contact: 09/16/2019
Number of Days to Update: 113	Next Scheduled EDR Contact: 01/06/2020
	Data Release Frequency: Quarterly

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/24/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/26/2019	Telephone: (415) 495-8895
Date Made Active in Reports: 10/17/2019	Last EDR Contact: 09/16/2019
Number of Days to Update: 113	Next Scheduled EDR Contact: 01/06/2020
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/24/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/26/2019	Telephone: (415) 495-8895
Date Made Active in Reports: 10/17/2019	Last EDR Contact: 09/16/2019
Number of Days to Update: 113	Next Scheduled EDR Contact: 01/06/2020
	Data Release Frequency: Quarterly

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/24/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/26/2019	Telephone: (415) 495-8895
Date Made Active in Reports: 10/17/2019	Last EDR Contact: 09/16/2019
Number of Days to Update: 113	Next Scheduled EDR Contact: 01/06/2020
	Data Release Frequency: Quarterly

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 08/13/2019	Source: Department of the Navy
Date Data Arrived at EDR: 08/20/2019	Telephone: 843-820-7326
Date Made Active in Reports: 08/26/2019	Last EDR Contact: 08/07/2019
Number of Days to Update: 6	Next Scheduled EDR Contact: 11/25/2019
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 08/19/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/20/2019	Telephone: 703-603-0695
Date Made Active in Reports: 08/26/2019	Last EDR Contact: 08/20/2019

### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

## ***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/03/2019

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 06/11/2019

	Data Release Frequency: Semi-Annually

### DEED: Deed Restriction Listing

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 06/04/2019	Source: DTSC and SWRCB
Date Data Arrived at EDR: 06/04/2019	Telephone: 916-323-3400

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012	Source: FirstSearch

	Data Release Frequency: No Update Planned

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995  
Date Data Arrived at EDR: 07/03/1995

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/14/2019	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 05/14/2019	Telephone: 860-424-3375
Date Made Active in Reports: 08/05/2019	Last EDR Contact: 08/07/2019

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers for Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

## Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

## Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

## Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

## GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

1000 E WALNUT STREET  
1000 E WALNUT ST  
PASADENA, CA 91106

### TARGET PROPERTY COORDINATES

Latitude (North):	34.149309 - 34° 8' 57.51"
Longitude (West):	118.129835 - 118° 7' 47.41"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	395840.2
UTM Y (Meters):	3779093.0
Elevation:	832 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	5636829 PASADENA, CA
Version Date:	2012

Northeast Map:	5636853 MOUNT WILSON, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06037C1375F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06037C1400F	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
PASADENA	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### **Site-Specific Hydrogeological Data\*:**

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### **ROCK STRATIGRAPHIC UNIT**

Era: Cenozoic  
System: Quaternary  
Series: Quaternary  
Code: Q (*decoded above as Era, System & Series*)

### **GEOLOGIC AGE IDENTIFICATION**

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam  
 gravelly - sandy loam  
 silt loam  
 clay  
 fine sand  
 gravelly - sand  
 sand  
 fine sandy loam

Surficial Soil Types: sandy loam  
 gravelly - sandy loam  
 silt loam  
 clay  
 fine sand  
 gravelly - sand  
 sand  
 fine sandy loam

Shallow Soil Types: fine sandy loam  
 gravelly - loam  
 sandy clay  
 sandy clay loam  
 clay  
 silty clay  
 sand

Deeper Soil Types: gravelly - sandy loam  
 sandy loam  
 very gravelly - sandy loam  
 stratified  
 very fine sandy loam  
 weathered bedrock  
 sand  
 gravelly - fine sandy loam  
 silty clay loam  
 clay loam

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## WELL SEARCH DISTANCE INFORMATION

# GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS RADON

## AREA RADON INFORMATION

State Database: CA Radon

### Radon Test Results

Zipcode	Num Tests	> 4 pCi/L
91106	23	2

Federal EPA Radon Zone for LOS ANGELES County: 2

- Note: Zone 1 indoor average level > 4 pCi/L.  
 : Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L.  
 : Zone 3 indoor average level < 2 pCi/L.

---

### Federal Area Radon Information for LOS ANGELES COUNTY, CA

Number of sites tested: 63

Area	Average Activity	% <4 pCi/L	% 4-20 pCi/L	% >20 pCi/L
Living Area - 1st Floor	0.711 pCi/L	98%	2%	0%
Living Area - 2nd Floor	Not Reported	Not Reported	Not Reported	Not Reported
Basement	0.933 pCi/L	100%	0%	0%

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

#### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

## OTHER STATE DATABASE INFORMATION

#### California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

#### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

### RADON

#### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

## **1.0 INTRODUCTION**

ACC Environmental Consultants, Inc. (ACC) has prepared this Phase II Environmental Site Assessment Report for the property identified as 1000 East Walnut Street, Pasadena, California 91106 (Site) at the request of The Salvation Army (Client). The purpose of the investigation was to address Recognized Environmental Conditions (RECs) identified in the Phase I ESA prepared for the Site by ACC and dated November 7, 2019:

**REC:** Based on the historical land use of the northeastern portion of the Subject Property as various automobile and equipment repair facilities, metal fabricators, and machine shop for approximately 20 years, there is a potential for subsurface impacts by chemicals-of-concern.

## **2.0 BACKGROUND**

### **2.1 Site Location**

The Site is situated on the southwest corner of the intersection of East Walnut Street and North Catalina Avenue in the City of Pasadena. The Subject Property is currently developed with a two-story multi-tenant commercial office building. The surrounding area is developed for residential and commercial use.

### **2.2 Site Redevelopment**

The Client plans to redevelop the Site as a new mixed-use building occupied by the Pasadena Hope Center on the ground floor and residential units on the upper floors. The proposed four-story building is planned in roughly the same location as the current building with paved parking areas along the southern and western portions.

## **3.0 SAMPLING METHODOLOGY**

### **3.1 Soil Sampling**

On April 1, 2020, ACC collected soil samples from approximately 0.5 and 2 feet below ground surface (ft bgs) via a direct push rig at the locations of the soil vapor borings. The approximate soil boring locations are shown on the attached Figure 1.

Soil samples were collected in acetate liners capped with Teflon sheeting and tight-fitting plastic caps, labeled, logged on a chain-of-custody form, and stored immediately on ice in a cooler pending transport to the laboratory following standard chain-of-custody protocol. Soil sample identification numbers include the soil boring ID and approximate depth from which the sample was collected.

### 3.2 Soil Vapor Sampling

On April 1 and 2, 2020, ACC collected 10 soil vapor samples from five soil borings located in the vicinity of the former three commercial buildings. Soil vapor sampling was conducted based on the document *Advisory – Active Soil Gas Investigations* prepared by the Department of Toxic Substances Control (July 2015).

Soil vapor borings were advanced via a hydraulic direct-push rig. Dedicated sample probes and Teflon tubing were installed at approximately 5 feet and 15 feet bgs using a PVC pipe. Approximately six inches of kiln-dried sand was placed both above and below each probe, followed by one foot of dry bentonite. The soil boring was subsequently backfilled to ground surface with hydrated bentonite.

Subsurface conditions within the soil vapor boring were allowed to equilibrate for a minimum of two hours prior to sample collection. Dedicated one-liter SUMMA canisters and tubing were used at each soil vapor sampling location. Shut-in tests were conducted at each location prior to sampling in order to assess the integrity of the sample train. Approximately three volumes were purged from the sample tubing and pore space prior to sampling. Sample flow rates were approximately 200 millimeters per minute. Helium was used as a leak detection compound via a helium shroud.

### 4.0 SUBSURFACE CONDITIONS

Soils encountered during this investigation consisted of soft, brown silt with various amounts of sand and trace gravel extending up to approximately 15.5 feet below ground surface (ft bgs). Groundwater was not encountered during this sampling event.

### 5.0 SOIL ANALYTICAL RESULTS

Soil samples were delivered to Enthalpy Analytical Laboratories in Orange, California following chain-of-custody protocol. The complete laboratory reports and chain-of-custody are attached as Appendix B. Soil analytical results were compared to Regional Water Quality Control Board (RWQCB) Human Health Risk Levels (HHRLs) for direct exposure at commercial properties, residential properties, and direct exposure to construction workers. Soil analytical results and corresponding HHRLs are summarized in the attached Tables 1-2. Soil samples were analyzed for some or all of the following constituents:

- Total Petroleum Hydrocarbons as gasoline (TPH-g), diesel (TPH-d), and motor oil (TPH-mo) by analytical method 8015;
- Volatile Organic Compounds (VOCs) by analytical method 8260;

- Semi-Volatile Organic Compounds (SVOCs) by analytical method 8270;
- PCBs by analytical method 8082; and
- LUFT 5 Metals by analytical method 6020

**TPH:** Total petroleum hydrocarbons as diesel (TPH-d) and motor oil (TPH-mo) were detected up to concentrations of 180 and 1600 milligrams per kilogram (mg/kg), which are less than corresponding HHRLs.

**VOCs:** Chlorobenzene was detected up to a concentration of 0.0012 mg/kg, which does not exceed the corresponding HHRLs. Additional VOCs were not detected in soil.

**SVOCs:** SVOCs were detected in soil at concentrations less than corresponding HHRLs.

**Metals:** With the exception of lead, metal concentrations detected at the Site do not appear elevated above naturally occurring background concentrations for soil. Lead was detected up to a concentration of 180 mg/kg, which exceeds the corresponding HHRLs for residential properties and direct exposure to construction worker of 80 mg/kg and 160 mg/kg, respectively. Additional metal concentrations were below corresponding HHRLs.

TPH-g and PCBs were not detected in soil samples during this sampling event.

## 6.0 SOIL VAPOR ANALYTICAL RESULTS

Soil vapor samples were delivered to Enthalpy Analytical Laboratories in Orange, California following chain-of-custody protocol. The complete laboratory reports and chain-of-custody are attached as Appendix B. Soil vapor samples were analyzed for VOCs by method TO-15. Soil vapor analytical results were compared to San Francisco Regional Water Quality Control Board (RWQCB) Human Health Risk Levels (HHRLs) for soil vapor intrusion risk at residential and commercial properties. Soil vapor analytical results and corresponding HHRLs are summarized in the attached Table 3.

Benzene was detected up to a concentration of 27 micrograms per cubic meter ( $\mu\text{g}/\text{m}^3$ ), which exceeds the corresponding HHRLs for vapor intrusion at residential and commercial properties of 3.2 and 14  $\mu\text{g}/\text{m}^3$ , respectively.

Ethylbenzene was detected up to a concentration of 130  $\mu\text{g}/\text{m}^3$ , which exceeds the corresponding HHRL for vapor intrusion at residential properties of 37  $\mu\text{g}/\text{m}^3$ .

Chloroform was detected in the deeper soil vapor samples up to a concentration of up to 55  $\mu\text{g}/\text{m}^3$ , which exceeds the corresponding HHRLs for vapor intrusion at residential and commercial properties of 4.1 and 18  $\mu\text{g}/\text{m}^3$ , respectively.

Tetrachloroethylene (PCE) was detected in the deeper soil vapor samples up to a concentration of 29  $\mu\text{g}/\text{m}^3$ , which exceeds the corresponding HHRL for vapor intrusion at residential properties of 15  $\mu\text{g}/\text{m}^3$ .

Bromodichloromethane was detected in the deeper soil vapor samples up to a concentration of 37  $\mu\text{g}/\text{m}^3$ , which exceeds the corresponding HHRLs for vapor intrusion at residential and commercial properties of 2.5 and 11  $\mu\text{g}/\text{m}^3$ , respectively.

Additional VOCs detected in soil vapor do not exceed corresponding HHRLs.

Helium was detected in one soil vapor sample (SV1-5') at 9.7%, and exceeds the DTSC QA/QC criteria of 5% indicating ambient air may have affected the sample. Helium results for remaining soil vapor samples are within DTSC QA/QC criteria and indicate that the soil vapor sample train and soil vapor boring were sufficiently sealed during soil vapor sampling.

## 7.0 QUALITY ASSURANCE/QUALITY CONTROL (QA/QC)

QA/QC procedures followed in the field were as follows:

- Sampling equipment was decontaminated prior to advancement at each soil boring location using an Alconox solution and double rinsed with potable water;
- Nitrile gloves were worn and changed frequently (at a minimum of once between each sampling location) when handling samples in order to prevent cross-contamination of samples;
- A helium shroud was used as a QA/QC measure during soil vapor sampling; and
- Samples were labeled in the field and stored on ice during transport to the laboratory. Every effort was made to cool the samples to 4.0 degrees Celsius and chain-of-custody procedures were followed during the sample collection and analysis

Laboratory QA/QC data area included in the attached Appendix B.

## **8.0 CONCLUSIONS & RECOMMENDATIONS**

### **8.1 Soil Vapor**

Benzene, chloroform, and bromodichloromethane were detected in soil vapor at concentrations above respective HHRLs for vapor intrusion at commercial and residential properties. In addition, tetrachloroethene (PCE) and ethylbenzene were detected in soil vapor at concentrations above respective HHRLs for vapor intrusion at residential properties.

Soil vapor analytical data indicate a potential for health risks associated with VOC impacts to indoor air as a result of historical site use. ACC recommends conducting indoor air sampling to confirm whether VOCs detected in soil vapor are migrating into the building at concentrations above HHRLs.

ACC additionally recommends further testing to assess the lateral and vertical extent of soil vapor impacts at the Site.

### **8.2 Soil**

Lead was detected in shallow soil samples above the corresponding HHRL for direct exposure at residential properties and direct exposure to construction workers. Based on current site use as commercial, lead does not pose a risk to on site occupants.

### **8.3 Proposed Redevelopment**

If the Site is redeveloped, preparation of a Corrective Action Plan (CAP) will likely be required by regulatory agencies in order to ensure protection of site occupants, workers, and the community during and subsequent to redevelopment. Pending additional sampling, a vapor mitigation system designed by a licensed engineer and incorporated into plans for new on-site buildings may be warranted. Additional soil sampling to address waste characterization and worker exposure during earthwork is warranted prior to disturbing soils.

## **9.0 LIMITATIONS**

The service performed by ACC has been conducted in a manner consistent with the levels of care and skill ordinarily exercised by members of our profession currently practicing under similar conditions in the area. No other warranty, expressed or implied, is made.

The conclusions presented in this report are professional opinions based on the indicated data described in this report and applicable regulations and guidelines currently in place. They are intended only for the purpose, site, and project indicated. Opinions and recommendations

presented herein apply to site conditions existing at the time of our study. Site conditions could change over time due to unforeseen circumstances.

ACC has included analytical results from a state-certified laboratory, which performs analyses according to procedures suggested by the U.S. Environmental Protection Agency and/or the State of California. ACC shall not be responsible for laboratory errors.

We appreciate the opportunity to assist you with this project. If you have any questions regarding this report please contact 510.773.0752 or [isutherland@accenv.com](mailto:isutherland@accenv.com).

Lab Job Number: 319194  
Project No: PASADENA SUBSURFACE  
Date Received: 04/03/20

---

This data package contains sample and QC results for five soil samples, requested for the above referenced project on 04/03/20. The samples were received cold and intact.

**TPH-Purgeables and/or BTXE by GC (EPA 8015B):**

No analytical problems were encountered.

**TPH-Extractables by GC (EPA 8015B):**

Matrix spikes QC1014292, QC1014293 (batch 279753) were not reported because the parent sample required a dilution that would have diluted out the spikes. B4-0.5 (lab # 319194-001), B5-0.5 (lab # 319194-003), and B3-0.5 (lab # 319194-005) were diluted due to the dark and viscous nature of the sample extracts. No other analytical problems were encountered.

**Volatile Organics by GC/MS (EPA 8260B):**

No analytical problems were encountered.

**Semivolatile Organics by GC/MS (EPA 8270C):**

High surrogate recovery was observed for 2-fluorobiphenyl in B3-0.5 (lab # 319194-005); no target analytes were detected at or above RL in the sample. A number of samples were diluted due to the dark and viscous nature of the sample extracts. No other analytical problems were encountered.

**PCBs (EPA 8082):**

All samples underwent sulfuric acid cleanup using EPA Method 3665A. All samples underwent sulfur cleanup using the copper option in EPA Method 3660B. B4-0.5 (lab # 319194-001) was diluted due to the color of the sample extract. No other analytical problems were encountered.

**Metals (EPA 6010B):**

Chromium was detected between the MDL and the RL in the method blank for batch 279716; this analyte was detected in samples at a level at least 10 times that of the blank. No other analytical problems were encountered.

## Detection Summary for 319194

**Client:** ACC Environmental Consultants

**Project:** PASADENA SUBSURFACE

**SAMPLE RECEIPT CHECKLIST**

Section 1: Login # 319194 Client: ACC  
 Date Received: 4/3/20 Project: \_\_\_\_\_

Section 2: Shipping info (if applicable) \_\_\_\_\_  
 Are custody seals present?  No, or  Yes. If yes, where?  on cooler,  on samples,  on package  
 Date: \_\_\_\_\_ How many \_\_\_\_\_  Signature,  Initials,  None  
 Were custody seals intact upon arrival?  Yes  No  N/A  
 Samples received in a cooler?  Yes, how many? \_\_\_\_\_  No (skip Section 3 below)  
 If no cooler Sample Temp (°C): \_\_\_\_\_ using IR Gun #  B, or  C  
 Samples received on ice directly from the field. Cooling process had begun  
 If in cooler: Date Opened 4/3/20 By (print) ZA (sign) \_\_\_\_\_

Section 3: **Important: Notify PM if temperature exceeds 6°C or arrive frozen.**  
 Packing in cooler: (if other, describe) \_\_\_\_\_  
 Bubble Wrap,  Foam blocks,  Bags,  None,  Cloth material,  Cardboard,  Styrofoam,  Paper towels  
 Samples received on ice directly from the field. Cooling process had begun  
 Type of ice used:  Wet,  Blue/Gel,  None Temperature blank(s) included?  Yes,  No  
 Temperature measured using  Thermometer ID: \_\_\_\_\_, or IR Gun #  B  C  
 Cooler Temp (°C): #1: 2.4, #2: \_\_\_\_\_, #3: \_\_\_\_\_, #4: \_\_\_\_\_, #5: \_\_\_\_\_, #6: \_\_\_\_\_, #7: \_\_\_\_\_

Section 4:	YES	NO	N/A
Were custody papers dry, filled out properly, and the project identifiable	<input checked="" type="checkbox"/>		
Were Method 5035 sampling containers present?		<input checked="" type="checkbox"/>	
If YES, what time were they transferred to freezer?			
Did all bottles arrive unbroken/unopened?	<input checked="" type="checkbox"/>		
Are there any missing / extra samples?		<input checked="" type="checkbox"/>	
Are samples in the appropriate containers for indicated tests?	<input checked="" type="checkbox"/>		
Are sample labels present, in good condition and complete?	<input checked="" type="checkbox"/>		
Does the container count match the COC?	<input checked="" type="checkbox"/>		
Do the sample labels agree with custody papers?	<input checked="" type="checkbox"/>		
Was sufficient amount of sample sent for tests requested?	<input checked="" type="checkbox"/>		
Did you change the hold time in LIMS for unpreserved VOAs?			
Did you change the hold time in LIMS for preserved terracores?			<input checked="" type="checkbox"/>
Are bubbles > 6mm present in VOA samples?			<input checked="" type="checkbox"/>
Was the client contacted concerning this sample delivery?		<input checked="" type="checkbox"/>	
If YES, who was called? _____ By _____ Date: _____			

Section 5:

	YES	NO	N/A
Are the samples appropriately preserved? (if N/A, skip the rest of section 5)			<input checked="" type="checkbox"/>
Did you check preservatives for all bottles for each sample?			
Did you document your preservative check? pH strip lot# _____, pH strip lot# _____, pH strip lot# _____			
Preservative added:			
<input type="checkbox"/> H2SO4 lot# _____ added to samples _____ on/at _____			
<input type="checkbox"/> HCL lot# _____ added to samples _____ on/at _____			
<input type="checkbox"/> HNO3 lot# _____ added to samples _____ on/at _____			
<input type="checkbox"/> NaOH lot# _____ added to samples _____ on/at _____

# ENTHALPY ANALYTICAL

## SAMPLE ACCEPTANCE CHECKLIST

### Section 1

Client: ACC Environmental  
Date Received: 04/02/20

Project: \_\_\_\_\_  
Sampler's Name Present:  Yes  No

### Section 2

Sample(s) received in a cooler?  Yes, How many? 1  No (skip section 2) Sample Temp (°C) (No Cooler): \_\_\_\_\_

Sample Temp (°C), One from each cooler: #1: 9.0 #2: \_\_\_\_\_ #3: \_\_\_\_\_ #4: \_\_\_\_\_

*(Acceptance range is < 6°C but not frozen for Microbiology samples, acceptance range is < 10°C but not frozen). It is acceptable for samples collected the same day as sample receipt to have a higher temperature as long as there is evidence that cooling has begun.)*

Shipping Information: \_\_\_\_\_

### Section 3

Was the cooler packed with:  Ice  Ice Packs  Bubble Wrap  Styrofoam  
 Paper  None  Other \_\_\_\_\_

Cooler Temp (°C): #1: 6.0 #2: \_\_\_\_\_ #3: \_\_\_\_\_ #4: \_\_\_\_\_

### Section 4

	YES	NO	N/A
Was a COC received?	✓		
Are sample IDs present?	✓		
Are sampling dates & times present?	✓		
Is a relinquished signature present?	✓		
Are the tests required clearly indicated on the COC?	✓		
Are custody seals present?		✓	
If custody seals are present, were they intact?			✓
Are all samples sealed in plastic bags? (Recommended for Microbiology samples)			✓
Did all samples arrive intact? If no, indicate in Section 4 below.	✓		
Did all bottle labels agree with COC? (ID, dates and times)	✓		
Were the samples collected in the correct containers for the required tests?	✓		
Are the containers labeled with the correct preservatives?			✓
Is there headspace in the VOA vials greater than 5-6 mm in diameter?			✓
Was a sufficient amount of sample submitted for the requested tests?	✓		

### Section 5 Explanations/Comments

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

### Section 6

For discrepancies, how was the Project Manager notified?  Verbal PM Initials: \_\_\_\_\_ Date/Time \_\_\_\_\_  
 Email (email sent to/on): \_\_\_\_\_ / \_\_\_\_\_

Project Manager's response:

Completed By: \_\_\_\_\_ Date: 4/2/20

## Case Narrative

---

ACC Environmental Consultants  
7977 Capwell Drive  
Suite 100  
Oakland, CA 94621  
Kim Bunting

Lab Job Number: 319545  
Project No: PASADENA SUBSURFACE  
Date Received: 04/03/20

---

This data package contains sample and QC results for five soil samples, requested for the above referenced project on 04/30/20. The samples were received cold and intact.

**Volatile Organics by GC/MS (EPA 8260B):**

A number of samples were analyzed outside of hold time; affected data was qualified with "H". No other analytical problems were encountered.

**Metals (EPA 6010B):**

No analytical problems were encountered.

## Detection Summary for 319545

**Client:** ACC Environmental Consultants

**Project:** PASADENA SUBSURFACE

No detections for B4-2, Lab ID 319545-001

No detections for B5-2, Lab ID 319545-002

Sample ID: B3-2 Lab ID: 319545-003

Analyte	Result	Flags	RL	MDL	Units	Basis	IDF	Method	Prep Method
Lead	3.6		1.0	0.12	mg/Kg	As Recd	1.000	EPA 6010B	EPA 3050B

Sample ID: B2-2 Lab ID: 319545-004

Analyte	Result	Flags	RL	MDL	Units	Basis	IDF	Method	Prep Method
Lead	5.0		0.97	0.12	mg/Kg	As Recd	1.000	EPA 6010B	EPA 3050B

No detections for B1-2, Lab ID 319545-005

## Case Narrative

---

ACC Environmental Consultants  
7977 Capwell Drive  
Suite 100  
Oakland, CA 94621  
Kim Bunting

Lab Job Number: 319171  
Project No: PASADENA SUBSURFACE  
Date Received: 04/02/20

---

This data package contains sample and QC results for ten air samples, requested for the above referenced project on 04/02/20. The samples were received cold and intact.

**Volatile Organics in Air (EPA TO-15):**

Enthalpy Analytical in Orange, CA performed the analysis (NELAP certified). Please see the Enthalpy Analytical case narrative.

**(ASTM D1946):**

Enthalpy Analytical in Orange, CA performed the analysis (NELAP certified). Please see the Enthalpy Analytical case narrative.

## Detection Summary for 319171

**Client:** ACC Environmental Consultants

**Project:** PASADENA SUBSURFACE

No detections for SV4-5, Lab ID 319171-001

No detections for SV4-15, Lab ID 319171-002

No detections for SV5-5, Lab ID 319171-003

No detections for SV5-15, Lab ID 319171-004

No detections for SV3-5, Lab ID 319171-005

No detections for SV3-15, Lab ID 319171-006

No detections for SV1-5, Lab ID 319171-007

No detections for SV1-15, Lab ID 319171-008

No detections for SV2-5, Lab ID 319171-009

No detections for SV2-15, Lab ID 319171-010

This data package contains sample and QC results for ten air samples, requested for the above referenced project on 04/02/20. The samples were received cold and intact.

**Volatile Organics in Air by MS (EPA TO-15):**

High ICAL percent RSD (relative standard deviation) was observed for 1,2,4-trimethylbenzene in the calibration analyzed 03/26/20 18:13; affected data was qualified with "b". No other analytical problems were encountered.

# ENTHALPY ANALYTICAL

## SAMPLE ACCEPTANCE CHECKLIST

**Section 1**  
 Client: ACC Environmental Project: \_\_\_\_\_  
 Date Received: 04/02/20 Sampler's Name Present:  Yes  No

**Section 2**  
 Sample(s) received in a cooler?  Yes, How many? \_\_\_\_\_  No (skip section 2) Sample Temp (°C) (No Cooler): Ambie  
 Sample Temp (°C), One from each cooler: #1: 9 #2: \_\_\_\_\_ #3: \_\_\_\_\_ #4: \_\_\_\_\_  
*(Acceptance range is < 6°C but not frozen (for Microbiology samples, acceptance range is < 10°C but not frozen). It is acceptable for samples collected the same day as sample receipt to have a higher temperature as long as there is evidence that cooling has begun.)*  
 Shipping Information: \_\_\_\_\_

**Section 3**  
 Was the cooler packed with:  Ice  Ice Packs  Bubble Wrap  Styrofoam  
 Paper  None  Other \_\_\_\_\_  
 Cooler Temp (°C): #1: \_\_\_\_\_ #2: \_\_\_\_\_ #3: \_\_\_\_\_ #4: \_\_\_\_\_

Section 4	YES	NO	N/A
Was a COC received?	✓		
Are sample IDs present?	✓		
Are sampling dates & times present?	✓		
Is a relinquished signature present?	✓		
Are the tests required clearly indicated on the COC?	✓		
Are custody seals present?		✓	
If custody seals are present, were they intact?			✓
Are all samples sealed in plastic bags? (Recommended for Microbiology samples)			✓
Did all samples arrive intact? If no, indicate in Section 4 below.	✓		
Did all bottle labels agree with COC? (ID, dates and times)	✓		
Were the samples collected in the correct containers for the required tests?	✓		
Are the containers labeled with the correct preservatives?			✓
Is there headspace in the VOA vials greater than 5-6 mm in diameter?			✓
Was a sufficient amount of sample submitted for the requested tests?	✓		

**Section 5 Explanations/Comments**  
 \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_

**Section 6**  
 For discrepancies, how was the Project Manager notified?  Verbal PM Initials: \_\_\_\_\_ Date/Time \_\_\_\_\_  
 Email (email sent to/on): \_\_\_\_\_ / \_\_\_\_\_  
 Project Manager's response:  
 \_\_\_\_\_

## **1.0 INTRODUCTION**

ACC Environmental Consultants (ACC) has prepared this Corrective Action Plan (CAP) on behalf of The Salvation Army (Client) for the Pasadena Hope Center located at 1000 East Walnut Street in Pasadena, California (Site). The purpose of this CAP is to present corrective actions that may be implemented at the Site in conjunction with redevelopment activities in order to protect Site occupants subsequent to redevelopment and construction workers during redevelopment. This CAP is based on subsurface data currently available to ACC.

## **2.0 BACKGROUND & PROJECT DESCRIPTION**

### **2.1 Site Background**

The Site is located on the southwest corner of the intersection of East Walnut Street and North Catalina Avenue in Pasadena, California. The Site consists of an approximately 0.61 acre parcel of land (APN: 5738-003-031), and is currently developed with a two-story multi-tenant commercial office building and associated asphalt/concrete paved parking and landscaped areas. The current occupants include The Salvation Army and various professional offices. The Site is shown in the attached Figures 1 and 2.

The Site was originally developed with seven single-family residential dwellings between 1910 and 1928. By 1938 the Site was developed with three commercial buildings on the northern and northeastern portions of the property. Historical occupants of the previous commercial buildings include automobile and equipment repair facilities, metal fabricators, and machine shop (ACC 2019). Sometime prior to 1968 all the buildings on the Site were demolished and the property was developed with the existing building.

### **2.2 Geology and Hydrogeology**

The geologic materials underlying the site consist of fill mater and native alluvial soils. Fill encountered at the Site extends to a depth of approximately one foot below existing grade. The fill consists of silty sand, which is dark brown in color, slightly moist, medium dense, and fine grained.

The fill is underlain by native alluvial soils consisting of silty sand and sand. The alluvium ranges from dark to yellowish brown in color, slightly moist to moist, medium dense to very dense, and fine to coarse grained with varying amounts of gravels and cobbles intermixed.

Groundwater was not encountered during previous site investigations to a maximum excavated depth of 20 feet below the ground surface. At this time groundwater is anticipated at roughly 150 ft bgs (Geotechnologies 2020 and ACC 2020).

### **2.3 Previous Site Investigations**

On April 1, 2020 ACC advanced five exploratory soil borings to a depth of 15 feet below ground surface (ft bgs) for the collection of soil and soil vapor samples. Petroleum hydrocarbons (TPH-g, TPH-d, and TPH-mo) volatile organic compounds (VOCs), and semi-volatile organic compounds (SVOCs) detected in soil during this sampling event do not indicate a human health risk with regard to proposed redevelopment based on applicable Regional Water Quality Control Board (RWQCB) Direct Exposure Human Health Risk Levels (HHRLs) for residential sites and construction workers.

Lead was detected in soil up to a concentration of 180 milligrams per kilogram (mg/kg), which exceeds the corresponding HHRLs for residential properties and direct exposure to construction workers of 80 mg/kg and 160 mg/kg, respectively. Additional metal concentrations were below corresponding HHRLs and do not appear elevated above naturally occurring background concentrations for soil.

Elevated concentrations of lead were detected in soil samples at an approximate depth of 0.5 ft bgs (ACC 2020). ACC's opinion is that elevated lead concentrations are limited to shallow soils as a result of historical site use prior to construction of the current building. At this time it appears that approximately one foot of fill material exists beneath the current structure, and lead impacts to soil could be limited to this layer of fill material.

As part of the April 2020 ACC investigation soil vapor samples were collected at approximately 5 and 15 ft bgs at five locations. Concentrations of benzene, ethylbenzene, chloroform, tetrachloroethylene (PCE), and bromodichloromethane detected in soil vapor samples exceed the RWQCB HHRLs for vapor intrusion concern for residential and commercial properties. RWQCB screening levels for vapor intrusion concerns are currently consistent with California Department of Toxic Substances Control (DTSC) vapor intrusion screening levels.

The approximate soil boring locations are shown on the attached Figure 2. Analytical results tables and soil boring logs from the 2020 ACC Phase II ESA are attached as Appendix A.

### **2.4 Proposed Site Redevelopment**

Proposed Site redevelopment includes demolition of existing Site improvements and construction of a four-story mixed-use building occupied by The Salvation Army's Pasadena Hope Center. The Salvation Army community and food pantry services will be located on the ground floor, and residential units for vulnerable populations will occupy the upper floors. There are 68 planned residential units including three manager units; as well as storage areas, community rooms, exercise facilities, and laundry facilities. The proposed building is planned in roughly the same location as the current building with paved parking areas along the southern and western portions.

Soil disturbance will generally be limited to approximately 5 ft bgs during redevelopment.

Excerpts from available ground floor building plans are attached as Appendix B.

## **2.5 Regulatory Status**

The Site is not currently subject to regulatory oversight, however ACC anticipates that regulatory oversight is warranted based on data currently available and redevelopment plans. Additional investigations, documents, and/or corrective actions beyond the scope of this CAP may be required by regulatory agencies during the course of redevelopment at the Site. This CAP will be updated as needed to include additional corrective actions.

Subsequent to site characterization, and final approval of the CAP by a regulatory agency, ACC will prepare a Corrective Action Implementation Plan (CAIP). The CAIP provides a detailed approach to address each corrective action and discusses procedures to be incorporated into construction and redevelopment. Procedures may include, but are not limited to, confirmation soil sampling, soil waste disposal, land use covenants, and engineering drawings for the construction of a vapor mitigation system.

If redevelopment does not occur at the Site, a human health risk assessment consisting of indoor air sampling and data assessment by a toxicologist is recommended to determine whether there is a human health risk associated with vapor intrusion into the current building.

## **3.0 CORRECTIVE ACTION OBJECTIVES FOR PCOCs**

Potential chemicals-of-concern (PCOCs) at this time include lead in soil, and benzene, ethylbenzene, chloroform, tetrachloroethylene (PCE), and bromodichloromethane in soil vapor. Corrective action objectives (CAOs) are general goals for protecting human health and the environment with regard to PCOCs. A CAO specifies a contaminant of concern, the potential exposure routes and receptors, and the acceptable contaminant level. For the Site, the CAOs are intended to be protective of future residential and commercial occupants at the Site.

### **3.1 Lead in Soil**

The potential exposure pathways for lead-impacted soils are incidental ingestion of soil, dermal contact with soil, and inhalation of dust containing elevated lead concentrations. The CAOs at this Site are based on DTSC and RWQCB lead screening levels of 80 milligrams per kilogram (mg/kg) for residential properties and the RWQCB lead screening level for construction workers of 160 mg/kg (RWQCB, 2019); as well as the potential to eliminate potential exposure pathways for lead-impacted soils.

Achievement of COAs for lead may be assessed based on the calculation of the 95 percent upper confidence limit (UCL) of the mean of the sample data that represent soil remaining after cleanup.

### **3.2 Soil Vapor**

The potential exposure pathway for these receptors under consideration for this CAP is vapor intrusion of volatile organic compounds (VOCs) into indoor air, and subsequent inhalation.

The CAO for soil vapor is based on Soil Gas Vapor Intrusion HHRLs in Table SG-1 for residential land use (RWQCB, 2019). The CAOs are to protect future residential and commercial occupants of the Site from vapor intrusion of VOCs (benzene, ethylbenzene, chloroform, tetrachloroethylene (PCE), and bromodichloromethane) into the proposed Site building. RWQCB screening levels for vapor intrusion concerns are currently consistent with California Department of Toxic Substances Control (DTSC) vapor intrusion screening levels.

### **4.0 PROPOSED ADDITIONAL SITE CHARACTERIZATION**

ACC has proposed to conduct additional soil and soil vapor sampling at the Site to assess the vertical and lateral extent of volatile organic compound (VOC) impacts to soil vapor as well as lead impacts to shallow soil (less than 2 feet). ACC has additionally proposed to characterize on-site fill material in accordance with California and Federal hazardous waste criteria in the event that soils are hauled off-site during earthwork or as part of corrective actions. Revision of this CAP may be warranted based on additional subsurface data.

### **5.0 CORRECTIVE ACTION FOR LEAD-IMPACTED SOILS**

ACC has identified two potential corrective actions to achieve the site-specific CAOs for lead-impacted soils: off-site disposal of impacted soil and on-site capping and long-term management of impacted soils. Corrective actions will be selected based on Client input, the results of the additional subsurface investigation presented in Section 4.0, and potential regulatory input and/or directives.

#### **5.1 Actions for Excavation and Off-Site Disposal**

Removal of lead-impacted soils from the Site could facilitate a no-further action status for on-site soils. Areas proposed for excavation would be delineated on-site based on the locations of previous soil samples and samples collected during the additional subsurface investigation.

Soil would be excavated within the delineated areas to the specified depths. The removed soil would be segregated from other site soil and placed on and covered with plastic sheeting. Excavation boundaries, including the sidewalls and floor, will be confirmed as final by the location of samples, collected previously or during the additional subsurface investigation, that satisfy the CAOs.

The stockpile of impacted soil would be characterized for disposal at an off-site, permitted landfill. The characterization will be conducted in accordance with the landfill's waste acceptance criteria.

## **5.2 Actions for On-Site Capping and Long-Term Management**

Capping lead-impacted soils may reduce the volume of soil exported from the site during construction but would warrant institutional controls and long-term soil management. Because the proposed development will cover nearly the entire site with the new structure and pavement, minimal additional earthwork would be necessary to meet the CAOs. Some consolidation of impacted soil may be required to remove soil near landscaping or storm water infiltration features. Depending on the size and extent, areas or “cells” of impacted soil may be enveloped in a geotextile marker fabric and surveyed for delineation for future reference.

Lead concentrations in soils left on Site subsequent to redevelopment may warrant a land use covenant recorded with the property deed that restricts future land use and construction so that future exposure to impacted soil is properly managed. The determination of a land use covenant is conducted by a regulatory agency, and may require inspections of the Site by a representative of the responsible party and/or regulatory agency in order to monitor that the site remains effectively capped. Cap inspections may occur as frequent as biennially.

## **6.0 SOIL VAPOR CORRECTIVE ACTION**

Based on available data a vapor mitigation system for the proposed new building is warranted at this time. The vapor mitigation system would be designed by a professional engineer and is typically approved by a regulatory agency. The mitigation system could consist of an active vapor extraction system or potentially a passive sub-slab depressurization system. Additional measures include chemical vapor barriers, floor sealants, and utility trench dams. Installation of the vapor mitigation system will mitigate the potential for contaminated soil vapor from entering the building at concentrations exceeding human health risk levels. Pending the type of system, long-term monitoring of soil vapor and/or indoor air may be warranted.

ACC’s opinion at this time is that a definitive on-site point source of VOCs in soil vapor may not be present and that excavation of soils to remediate soil vapor impacts would not be economically feasible. In addition, point sources for VOC impacts detected in soil vapor may be present off-site.

Based on current data, ACC’s opinion at this time indicates a passive sub-slab depressurization will likely be an effective corrective action and an active vapor extraction system is not warranted.

## **7.0 CORRECTIVE ACTION PROCEDURES DURING EARTHWORK**

### **7.1 Work Health & Safety**

Prior to soil disturbance at the Site, an Environmental Health and Safety Plan (EHASP) will be prepared describing applicable health and safety training requirements, personal protective equipment requirements, and specific personal hygiene and/or monitoring equipment that may be

warranted during excavation activities to protect workers. Worker health and safety is the responsibility of the corresponding employer. Employers are responsible for reviewing all available subsurface data to assess the potential for worker exposure.

## **7.2 Hazardous Waste Operations**

Contractors who manage and/or excavate impacted soil may require a Hazardous Substance Removal Certification from the Contractors State License Board. Workers with potential exposure to impacted soil will likely need to be trained in accordance with the Hazardous Waste Operations and Emergency Response (HAZWOPER) requirements of California Code of Regulations, Title 8, Section 5192.

HAZWOPER-trained workers will perform site work in accordance with a site-specific health and safety plan. The plan will summarize health and safety considerations for the site relative to the chemical constituents detected in soil, describe personal protective equipment and monitoring requirements, identify physical hazards that may be associated with the work, establish exclusion and decontamination zones, identify safeguards for working around excavations, and present equipment decontamination procedures.

## **7.3 Soil Disposal During Excavation**

Soil profiling will be conducted via additional sampling (in situ and/or subsequent to soil stockpiling) in accordance with State of California Code of Regulations (CCR) Title 22 Chapter 11, Article 3 and Code of Federal Regulations (CFR) Title 40. Soils deeper than approximately 2 ft bgs will be segregated from shallow lead-impacted fill material and profiled separately.

The generator is responsible for the fate of soil hauled off-site. Waste profiling and acceptance by an appropriate acceptance facility is required prior to hauling soils off-site. The transportation of hazardous or contaminated soils is to be conducted in accordance with applicable California regulations (CCR Title 22, Division 4.5, Chapter 11) and applicable Federal regulations (40 CFR Part 261), and handling is to be conducted in accordance with applicable California regulations (CCR Title 22, Division 4.5, Chapters 13 and 29) and applicable Federal regulations (29 CFR 1910.120), as warranted.

Hazardous waste manifests should be signed at the time by the generator (typically the owner) or designated representative for the generator. ACC recommends that all hazardous waste manifests and soil weight tags for all soil waste be obtained by the generator and stored on file. Annual California Department of Tax Fee Administration (CDTFA) fees and annual DTSC manifest fees will be incurred based on the volume of hazardous waste hauled off-site. Hazardous waste generator fees were formerly administered by the California Board of Equalization (BOE). The CDTFA fees will be sent to the generator. Hazardous waste generator fees could be upwards of \$80,000 pending the volume of soil hauled off-site. BOE fees are the responsibility of the generator.

## 7.4 Dust Control

The generation of airborne dust will be minimized to the extent practical at all times. Minimum steps that will be taken to reduce generation of airborne dust during earthwork at the Site will include (but not be limited to):

- Covering fences along site boundaries with fabric or dust curtains to minimize wind and off-site migration of airborne dust;
- Wetting down areas around soil improvement operations, visibly dry disturbed soil surface areas, and visibly dry disturbed unpaved driveways at least three times per 8-hour shift per day (more as warranted). Soils shall be moistened but not saturated (no runoff);
- Suspending operations if visible airborne dust persists for more than a few minutes;
- Limiting the area subject to excavation and grading at any given time;
- Loading trucks so that soil does not extend above the walls of the truck bed;
- Minimizing drop heights from the excavator bucket;
- Watering down disturbed soils during excavation, grading, truck loading, other earthwork, and prior to covering loaded trucks;
- Covering truck beds as they leave the Site;
- Establishing a 10 mile-per-hour speed limit for vehicles entering and exiting the Site.
- Sweeping loose soil off truck beds, sides and wheels prior to leaving the Site;
- Covering inactive stockpiles with plastic; and
- Installing rumble strips at all exits around the site to control dust and limit the spread of soil outside the Site by vehicles and equipment. Egress points for trucks and equipment transported from the Site will be kept clean of dirt and other material during earthwork; and
- Wet sweeping or vacuuming streets and sidewalks at egress points if soil is visible.

Dust and odor complaints will be handled in a responsive and proactive manner to minimize impacts to workers and surrounding businesses. The contractor will be responsible for the mitigation of dust during construction activities. If visible dust is observed at the perimeter of the site boundaries as a result of on-site construction activities, or if sensitive receptors are present during construction activities, the contractor shall enhance mitigation measures to eliminate the presence of visible dust at the site boundaries.

Air monitoring for fugitive dust during earthwork activities using direct-reading instruments at locations upwind and downwind of the earthwork may be warranted. The action level for airborne dust is the California Ambient Air Quality 24-Hour Standard for PM10 (the fraction of total suspended particulate matter that is no larger than 10 micrometers in size) of 50 micrograms per cubic meter. If results from any day or work shift show that the downwind perimeter airborne

dust concentration (total or PM10) exceeds the action level, the contractor will halt work and implement additional measures until dust generation is adequately controlled.

### **7.5 Soil Stockpiling**

Soil stockpiles will be placed on polyethylene sheeting. Inactive stockpiles will be covered with polyethylene sheeting and any potential runoff will be minimized using best management practices (polyethylene sheeting held down with weights, straw waddles, or berms to prevent runoff).

### **7.6 Imported Fill Material**

The following data pertaining to the imported fill material shall be presented to the environmental consultant for review prior to importing soil on-site:

- The type and quantity of material;
- The source of the material (and any relevant history of the borrow area); and
- Representative analytical results (including but not limited to TPH, VOCs, SVOCs, PCBs, CAM 17 Metals, OCPs, and Asbestos by the CARB435 method) confirming the quality of the material.

A qualified engineer should additionally be consulted with regard to the geotechnical specifications and usability of imported soils.

### **7.7 Groundwater Management**

Based on reviewed groundwater data (ACC 2019), groundwater at the Site is potentially as deep at 150 ft bgs. Based on ACC's understanding of the proposed Site redevelopment it is not anticipated that groundwater will be encountered during construction. If groundwater is encountered during excavation the on-call environmental consultant will be notified and groundwater will be tested to evaluate the best option for groundwater disposal and management.

At no time shall groundwater be discharged to sanitary sewer lines, storm drains, or surface drainage systems (i.e. creeks, drainage ditches, etc.) until the groundwater has been profiled and the discharge is authorized under permit by the proper regulatory authority, including the regulations addressed by Pasadena Water and Power.

### **7.8 Storm Water**

The Los Angeles Regional Water Quality Control Board (LARWQCB) regulates storm water quality under the authority of the federal Clean Water Act and California's Porter-Cologne Water Quality Control Act. Regulated storm water includes storm water runoff from construction sites.

Construction activities that disturb one or more acres of soil or whose projects disturb less than one acre but are part of a larger common plan of development that in total disturbs one or more acres, are required to obtain coverage under the General Permit for Discharges of Storm Water Associated with Construction Activity.

A Storm Water Pollution Prevention Plan (SWPPP) is not required for this project, however the general contractor will conduct Best Management Practices (BMPs) as warranted for this project, which will include but may not be limited to:

- Scheduling (BMP EC-1) – Assess weather forecast/precipitation when scheduling earthwork, etc.;
- Fiber Rolls (SE-5) – As warranted to prevent sediment migrating off-site as a result of storm water runoff;
- Street Sweeping and Vacuuming (SE-7) – As warranted if soil is tracked off-site during earthwork;
- Storm Drain Inlet Protection (SE-10) – As warranted based on the presence of storm water drains;
- Stabilized Construction Entrance/Exit (TC-1);
- Entrance/Exit Tire Wash (TC-3) – As warranted if soil is tracked off-site during earthwork; and
- Vehicle and Equipment Fueling (NS-9) – As warranted if vehicle and equipment fueling is conducted on-site.

## 7.9 Unexpected Conditions

Unexpected environmental conditions that may be encountered include, but are not limited to, previously unidentified stained soil, buried drums or other containers, undocumented wells, other potential subsurface conduits, or underground storage tanks (USTs). If unexpected conditions are encountered work must stop in the corresponding work area, the area delineated (via traffic cones, warning tape, etc.) to prevent further access, and the responsible person shall contact the on-call environmental consultant for purposes of assessing the unexpected condition and updating this CAP as warranted. Typical steps followed by the environmental consultant are as follows:

- Inspect the impacted soil for visual and/or odoriferous qualities characteristic of potential contaminants;
- Screen for volatile organic compounds using a photoionization detector (PID) and other equipment (four-gas meter, etc.), as warranted;
- Conduct environmental sampling to characterize potential contaminants;
- Recommend and/or prepare a Health Risk Assessment addressing the specific unexpected condition encountered, if deemed necessary based on laboratory analytical results;

- Amend this CAP, as warranted;
- Notify the Pasadena Fire Department (PFD) on behalf of the owner, as warranted.

Should an underground storage tank (UST) be encountered, work will be suspended and the Site owner notified. The Site owner or representative will notify the City of Pasadena Fire Department of the situation and the proposed response actions. The UST shall be removed under permit with PFD. PFD should be sent a copy of permits and tank closure reports.

### **7.10 ODOR CONTROL**

If unusual odors are encountered the on-call environmental consultant shall be contacted to assess the source of the odor. The consultant shall evaluate the odor using a photoionization detector (PID) and four-gas meter (and/or additional monitoring equipment as warranted); and shall collect an air sample as soon as feasible using an evacuated SUMMA canister to be analyzed by EPA method TO-15 (or other sampling container/method as deemed appropriate). Additional actions or recommendations may be warranted based on the assessment, including covering exposed soils with plastic sheeting or other materials. This SMP shall be updated, as warranted.

### **7.11 Record Keeping During Construction**

The property owner and/or general contractor will keep the following records:

- Duration of earthwork;
- Results of any additional soil, air, or soil vapor analytical testing,
- Destination and quantities of soil hauled off-site,
- Copies of waste manifests and/or weigh tickets/bills-of-lading,
- Details of any unexpected conditions encountered during excavating, and
- A discussion of any deviations from applicable portions of this CAP.

## **8.0 ADDITIONAL INFORMATION**

For questions or additional information regarding this CAP please contact (510)-773-0752 or [isutherland@accenv.com](mailto:isutherland@accenv.com).
