**HEARING OFFICER DECISION LETTER**  
**(DATED JANUARY 11, 2021)**

PLANNING & COMMUNITY DEVELOPMENT DEPARTMENT  
PLANNING DIVISION

January 11, 2021

City of Pasadena  
Water and Power Department  
150 South Los Robles Avenue, Suite 200  
Pasadena, CA 91101

**Re: Modification to Conditional Use Permit #6222  
3420 and 3500 North Arroyo Blvd  
Council District #1**

**PLN2019-00297**

Dear Ms. Ventura:

Your application for a **Modification to Conditional Use Permit #6222 at 3420 and 3500 North Arroyo Blvd** was considered by the **Hearing Officer** on **January 6, 2021**.

**MODIFICATION TO CONDITIONAL USE PERMIT#6222:** To allow the repair and replacement of City's water infrastructure facilities within the Upper Arroyo Seco that were damaged by debris flows caused by storms following the 2009 Station Fire. Damage to these structures has greatly reduced the City's capacity to divert water from the Arroyo Seco for spreading and pumping credits. The proposed improvements would allow for increased utilization of the City's pre-1914 surface water rights from the Arroyo Seco. A Conditional Use Permit is required for improvements within the Open Space (OS) Zoning District.

After careful consideration of this application, and with full knowledge of the property and vicinity, the Hearing Officer made the findings as shown on Attachment A to this letter. Based upon these findings, it was decided by the Hearing Officer that the **Conditional Use Permit** be approved with the conditions in Attachment B and in accordance with approved plans stamped **January 6, 2021**.

In accordance with Section 17.64.040 (Time Limits and Extensions) of the Pasadena Municipal Code, the exercise of the right granted under this application must be commenced within three years of the effective date of the approval. This approval is eligible for two one-year extensions. Each one year extension is required to be reviewed and approved by the Hearing Officer at a noticed public hearing. In order for a project to be eligible for a time extension, the applicant is required to submit the required fee and time extension application to the Permit Center prior to the expiration date of the land use entitlement. The right granted by this approval may be revoked if the entitlement is exercised contrary to the conditions of approval or if it is exercised in violation of the Zoning Code.

You are advised that an application for a building permit is not sufficient to vest the rights granted by this approval. The building permit must be issued and construction diligently pursued to

completion prior to the expiration of this approval. It should be noted that the time frame within which judicial review of the decision must be sought is governed by California Code of Civil Procedures, Section 1094.6.

You are hereby notified that, pursuant to Pasadena Municipal Code Chapter 17.72, any person affected or aggrieved by the decision of the Hearing Officer has the right to appeal this decision within **ten days (January 19, 2021)**. The effective date of this case will be **January 20, 2021**. Prior to such effective date, a member of the City Council or Planning Commission may request that it be called for review to the Board of Zoning Appeals. However, if there is a request for a call for review, the appeal period will continue to run. If the tenth day falls on a day when City offices are closed, the appeal deadline shall be extended through the next day when offices are open. The decision becomes effective on the eleventh day from the date of the decision. The regular Appeal fee is \$1,614.50. The Appeal fee for non-profit community-based organizations is \$807.25.

Any permits necessary may be issued to you by the Building Division on or after the effective date stated above. A building permit application may be submitted before the appeal deadline has expired with the understanding that should an appeal be filed, your application may, at your expense, be required to be revised to comply with the decision on the appeal. A copy of this decision letter (including conditions of approval) shall be incorporated into the plans submitted for building permits.

The Hearing Officer certified the Final Environmental Impact Report (SCH #2014101022) and adopted CEQA Findings and a Mitigation Monitoring and Reporting Program for the proposed project, and adopted a Statement of Overriding Considerations. The FEIR identified potentially significant effects related to the following topics: Biological Resources, Cultural and Tribal Cultural Resources, Hazards and Hazardous Materials, Noise, Recreation, and Transportation. With incorporation of mitigation measures, the FEIR determined that all potentially significant effects would be reduced to a less-than-significant level, with the exception of impacts related to Cultural Resources, which would remain significant and unavoidable after mitigation.

Hazardous Material: The Project site is not listed on any hazardous materials or waste databases pursuant to Section 65962.5 of the Government Code.

For further information regarding this case please contact **Beilin Yu** at [byu@cityofpasadena.net](mailto:byu@cityofpasadena.net).

Please be advised that during this COVID-19 health emergency, all individuals performing work on the site are required to adhere to the City's policies related to social distancing (see attached guidelines).

Sincerely,

Paul Novak  
Hearing Officer

Enclosures:

**ATTACHMENT A**  
**SPECIFIC FINDINGS FOR MODIFICATION TO CONDITIONAL USE PERMIT #6222**

Conditional Use Permit: To Allow Infrastructure Improvements within OS Zoning District

1. *The proposed use is allowed with a Conditional Use Permit within the applicable zoning district and complies with all applicable provisions of this Zoning Code.* The proposed improvements are permitted subject to the review and approval of a conditional use permit. The improvements proposed with the project will allow for increased utilization of the City's surface water rights from the Arroyo Seco and maximize the beneficial uses of this important local water resource. The proposed project will implement a multi-benefit approach to the repair and replacement of damaged infrastructure in the Arroyo Seco, with the overall project objective of increasing the beneficial use of the surface water rights held by the City and improving biological functions within the Arroyo Seco. For any future fish populations that may establish in the Arroyo Seco, the new intake will include a fish screening feature to prevent fish populations from passing into the intake and conveyance system, and a roughened channel will be constructed directly downstream of the new weir to allow for future fish passage upstream during moderate flow periods. To ensure the project does not negatively impact the surrounding areas, conditions have been recommended through mitigation measures, as well as conditions of the conditional use permit approval.
2. *The location of the proposed use complies with the special purposes of this Zoning Code and the purposes of the applicable zoning district.* The subject site is located within the Open Space (OS) zoning district and has been utilized for open space use. The purpose of the project is to repair as well as enhance existing amenities within the Arroyo Seco Canyon Area. The proposed conditional use permit will allow for the necessary repairs of the existing Water Division facilities, while expanding open space opportunities for members of the public. As such, the location of the proposed use complies with the special purposes of this Zoning Code and the purposes of the applicable zoning district.
3. *The proposed use is in conformance with the goals, policies, and objectives of the General Plan and the purpose and intent of any applicable specific plan.* The City's General Plan Open Space and Conservation Element sets forth objectives related to the use of water resources in the City (City of Pasadena 2012). The proposed project supports these objectives, as follows:
  - Increase the efficiency of water use among Pasadena residents, and commercial and industrial organizations.
  - The proposed project will facilitate the efficient use of water in the Arroyo Seco by allowing for the full utilization of the City's surface water rights and reducing reliance upon imported water supplies from the Metropolitan Water District of Southern California (MWD). PWP has a longstanding right to divert up to 25 cfs from this source. MWD imports water from the Sacramento-San Joaquin Delta via the State Water Project, and from the Colorado River. In recent years, MWD has imposed allocation limits on its water supply deliveries to its member agencies, and the future reliability of imported water will continue to face uncertainties from climate change, environmental regulations, and droughts. Another important issue associated with imported water is cost, which has increased substantially in the past few years (City of Pasadena 2012). Achieving water supply reliability will depend on a number of key water policy and management decisions on a regional and local level, including implementation of projects such as the proposed Arroyo Seco Canyon Project Areas 2 and 3.

- Protect local water supply sources and plant trees and vegetation that are consistent with habitat and water conservation policies.

The proposed project will facilitate the protection of local water supply sources by improving the ability of the diversion weir and intake structure to capture water during high-flow storm events. It has been PWP's practice in the past (more so after floods following the Station Fire damaged the upstream settling basins) to bypass water from high-flow storm events when the water is sediment-laden and turbid in order to protect the existing infrastructure from damage. The proposed project will include improvements to the diversion weir and intake structure to better accommodate turbid waters in high-flow events, as well as improvements to the capacity of the spreading basins, both of which will facilitate increased availability and use of local water supply sources.

- Improve surface permeability and recharge aquifers/enhance storm water quality to prevent pollution/trash from entering Los Angeles and San Gabriel Rivers and ocean.

The proposed project will improve the functionality and efficiency of the facilities responsible for the diversion and infiltration of water into the Raymond Basin. PWP has in the past forfeited available water due to the lack of spreading capacity within the spreading basins (Carollo Engineers 2013). The increased capacity and efficiency of the spreading basin improvements in Area 3 (which includes a new sedimentation basin for sediment to settle out before water is directed to the spreading basins) will maximize capacity and infiltration rates, thereby improving the recharge of groundwater supplies.

Furthermore, the project is consistent with the following General Plan Land Use Element Policies:

- Policy 2.14 – Natural Areas: maintain existing and acquire additional natural areas to protect watersheds, natural resources, and afford recreational opportunities for Pasadena's residents;
- Policy 10.9 – Natural Open Space: protect natural open spaces, hillsides, watersheds, and critical habitats to safeguard the health, safety, and beauty of the City for the benefit of present and future generation; and
- Policy 10.18 – Water Quality: encourage the use of natural processes to capture, treat, and infiltrate urban runoff throughout the watershed.

The proposed project will repair and replace the City's water infrastructure facilities in the Upper Arroyo Seco that were damaged by debris flows caused by storms following the 2009 Station Fire. Damage to these structures has greatly reduced the City's capacity to divert water from the Arroyo Seco for spreading and pumping credits. The proposed improvements will allow for increased utilization of the City's pre-1914 surface water rights from the Arroyo Seco and maximize the beneficial use of this important local water resource. The proposed project will implement a multi-benefit approach to the repair and replacement of damaged infrastructure in the Arroyo Seco, with the overall project objective of increasing the beneficial use of the surface water rights held by the City and improving biological functions within the Arroyo Seco.

The spreading basin designs in Area 3 will incorporate a network of local trails for recreation use, and these recreational amenities will be further improved through selective planting around the basins. The proposed basin layout and landscaping will enhance the proposed

trail network for pedestrians and equestrian usage with incorporation of benches, interpretive signage, and shade structures adjacent to the spreading basins along the proposed pedestrian trails/maintenance roads.

4. *The establishment, maintenance, or operation of the use would not, under the circumstances of the particular case, be detrimental to the health, safety, or general welfare of persons residing or working in the neighborhood of the proposed use.* The proposed improvements are intended to increase water quality and supply reliability, and to expand the potential for recreational activities within the Arroyo Seco Canyon Area. These improvements will adhere to all building code requirements, especially the requirements for accessibility. In addition, the proposal will also be required to meet the standards of all respective City departments prior to the issuance of any building permits. Furthermore, conditions of approval have been imposed to reduce any potential impacts resulting from the project.
5. *The use, as described and conditionally approved, would not be detrimental or injurious to property and improvements in the neighborhood or to the general welfare of the City.* The proposed improvements are not intended to be obtrusive to the surrounding areas. The project is intended to implement a multi-benefit approach to the repair and replacement of damaged infrastructure in the Arroyo Seco, with the overall project objective of increasing the beneficial use of the surface water rights held by the City and improving biological functions within the Arroyo Seco. For any future fish populations that may establish in the Arroyo Seco, the new intake will include a fish screening feature to prevent fish populations from passing into the intake and conveyance system, and a roughened channel will be constructed directly downstream of the new weir to allow for future fish passage upstream during moderate flow periods. These improvements will be required to adhere to all requirements, including, but not limited to compliance with the building code. The proposal will also be required to meet all conditions as imposed herein by all respective City departments, as well as state agencies prior to the issuance of building permits (ex. Building, Water, Zoning etc.).
6. *The design location, operating characteristics, and size of the proposed use would be compatible with the existing and future land uses in the vicinity in terms of aesthetic values, character, scale, and view protection.* The proposed water facilities are repairs to existing facilities for the most part, and the new percolation ponds will be in close proximity to existing ponds and will replace a parking lot, thereby improving the aesthetic value of the area. The proposed recreational amenities proposed as part of the project will be of a size, style and scale that will be compatible to the natural surroundings. The physical features of the recreational amenities will not be a design feature of primary focus, but will allow the trees, vegetation, streambed, and mountainous terrain to take the spotlight.
7. *There are changed circumstances sufficient to justify the modification to the original approval.* The proposed project under this Modification request are the elements of the project that were set aside with the approval of the first Modification to CUP #6222 by the City Council in July 2017. An Environmental Impact Report, in accordance with the requirements of the California Environmental Quality Act, has been prepared for these components and activities. The FEIR identified potentially significant effects related to the following topics: Biological Resources, Cultural and Tribal Cultural Resources, Hazards and Hazardous Materials, Noise, Recreation, and Transportation. With incorporation of mitigation measures, the FEIR determined that all potentially significant effects will be reduced to a less-than-significant level, with the exception of impacts related to Cultural Resources, which will remain significant and unavoidable after mitigation.

**ATTACHMENT B**  
**CONDITIONS OF APPROVAL FOR MODIFICATION TO CONDITIONAL USE PERMIT #6222**

The applicant or successor in interest shall meet the following conditions:

1. The proposed project shall substantially conform to the site plan submitted with this application and dated "Approved at Hearing January 6, 2021", except as modified herein.
2. The approval of this application authorizes the improvements within the Arroyo Seco Area, which include those improvements identified in the plans stamped "Approved at Hearing January 6, 2021", including, but not limited to:
  - a) construction of a new diversion weir and intake in the same location as the existing structure,
  - b) construction of an engineered roughened channel in the section of stream directly downstream of the diversion structure,
  - c) replacement of existing Ponds 1 and 2, and Basins 1 and 2, with Basin A, and
  - d) construction of six new spreading basins.
3. In accordance with Section 17.64.040 of the Pasadena Municipal Code, the exercise of the right granted under this application must be commenced within three years of the effective date of the approval. This approval is eligible for two one-year extensions. Each one year extension is required to be reviewed and approved by the Hearing Officer at a noticed public hearing. In order for a project to be eligible for a time extension, the applicant is required to submit the required fee and time extension application to the Permit Center prior to the expiration date of the land use entitlement.
4. Pursuant to Chapter 17.61.040.J (Post-Approval Procedures) of the Zoning Code, the Zoning Administrator can call for a review of the approved conditions if it can be reasonably shown that there are grounds for revocation or modification of this Conditional Use Permit. These conditions may be modified or new conditions may be added to reduce any impacts of the use.
5. Any change to these conditions of approval or expansion of the use shall require the modification of this Conditional Use Permit or a new Conditional Use Permit.
6. The applicant or successor in interest shall meet the applicable code requirements of all other City Departments.
7. The applicant or successor in interest shall retain a Mitigation Monitoring Coordinator (Mitigation Coordinator) with experience on large construction projects to serve as a liaison to between the development/construction team and the City. The Mitigation Coordinator will monitor the implementation of the Mitigation Monitoring and Reporting Program as specified in the project Environmental Impact Report or Mitigated Negative Declaration, and prepare and submit written weekly reports to the Condition/Mitigation Monitoring Coordinator of the City of Pasadena. The format of the written reports is subject to approval by the Code Compliance Manager.

Planning Division

8. The applicant or successor in interest shall meet all of the mitigation measures of the Final Environmental Impact Report.

9. The project shall adhere to the City regulations governing hours of construction, noise levels generated by construction and mechanical equipment, and the allowed level of ambient noise as specified in Chapter 9.36 of the Pasadena Municipal Code.
10. The applicant shall satisfy all applicable requirements of the United States Army Corps of Engineers; the State of California Regional Water Quality Control Board, Los Angeles Region; and the State of California Department of Fish and Wildlife; and provide evidence of compliance to the satisfaction of the Zoning Administrator.
11. If construction will occur within the Los Angeles County Flood Control District easement, the applicant shall secure any applicable permit from the Los Angeles County Flood Control District; and provide evidence of compliance to the satisfaction of the Zoning Administrator.

Public Works Department

12. Approval from the Urban Forestry Advisory Committee (UFAC) for the proposed tree removal/tree planting on this project. Please contact Michael King, Urban Forestry, at (626) 744-9846 or MKing@cityofpasadena.net , for more details.
13. In addition to the above condition, the requirements of the following ordinance may apply to the proposed project:

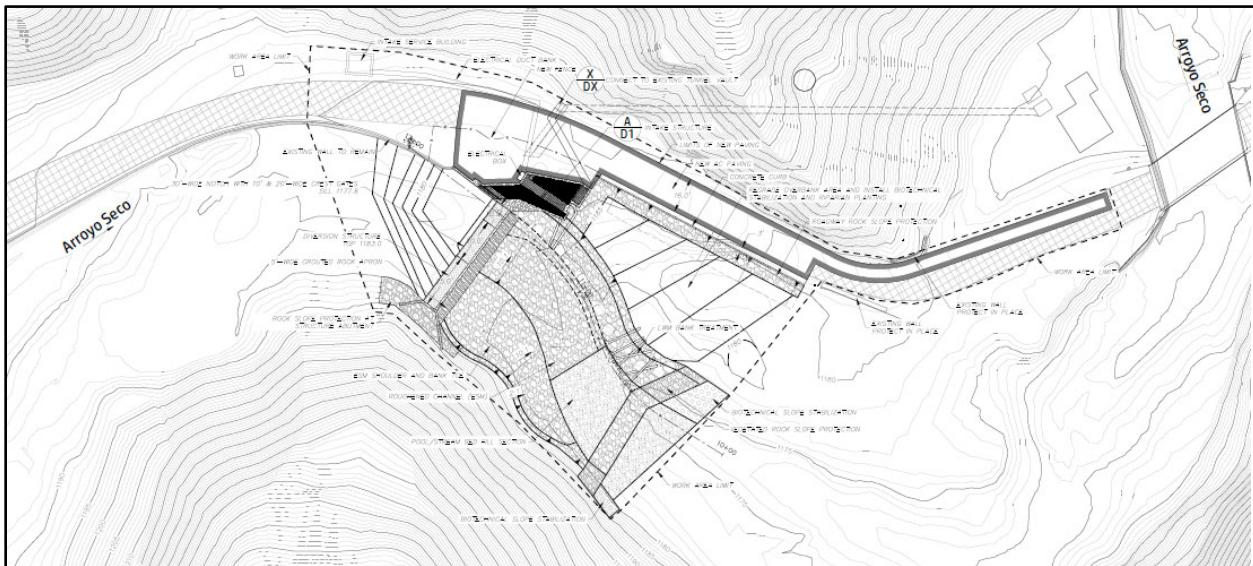

City Trees and Tree Protection Ordinance - Chapter 8.52 of the PMC

The ordinance provides for the protection of specific types of trees on private property as well as all trees on public property. No street trees in the public right-of-way shall be removed without the support of the Urban Forestry Advisory Committee. No trees shall be damaged by the proposed construction, if a City tree is damaged, the applicant may be liable for the assessed value of the tree. Refer to <https://www.cityofpasadena.net/public-works/parks-and-natural-resources/urban-forestry/> for guidelines and requirements for tree protection.

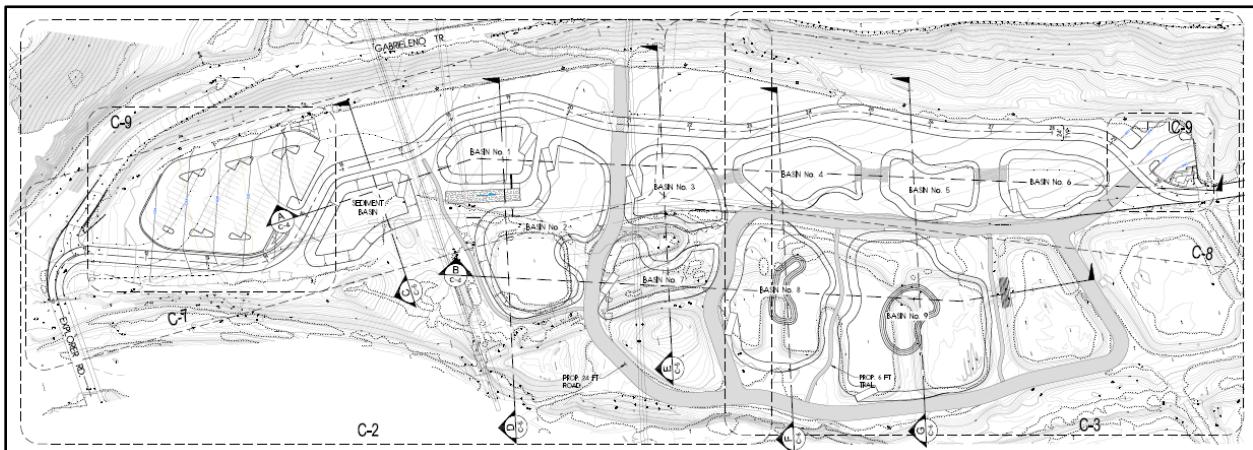

14. Prior to the start of construction or the issuance of any permits, the applicant shall submit a Construction Staging and Traffic Management Plan to the Department of Public Works for review and approval. The template for the Construction Staging and Traffic Management Plan can be obtained from the Department of Public Works webpage at: <https://www.cityofpasadena.net/public-works/engineering-and-construction/engineering/>. A non-refundable flat fee, based on the current General Fee Schedule, is required for plan review and on-going monitoring during construction. This plan shall show the impact of the various construction stages on the public right-of-way (and the private street) including all street occupations, lane closures, detours, staging areas, and routes of construction vehicles entering and exiting the construction site. An occupancy permit shall be obtained from the department for the occupation of any traffic lane, parking lane, parkway, or any other public right-of-way. All lane closures shall be done in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) and California Supplement. If the public right-of-way occupation requires a diagram that is not a part of the MUTCD or California Supplement, a separate traffic control plan must be submitted as part of the Construction Staging and Traffic Management Plan to the department for review and approval. No construction truck idling or staging, material storage, or construction trailer are allowed in the public right-of-way.

The applicant shall protect all existing public facilities and maintain the right of way in good clean condition during the construction. If any damage is proven to be caused by the subject development, the applicant is responsible for replacing and/or repairing the facilities to the satisfaction of the City, prior to the issuance of Certificate of Occupancy.

**RESOLUTION CERTIFYING THE FINAL EIR,**  
**ADOPTING ENVIRONMENTAL FINDINGS OF FACT AND**  
**A MITIGATION MONITORING AND REPORTING PROGRAM**

**RESOLUTION NO. 2021-01**

**A RESOLUTION OF THE HEARING OFFICER OF THE CITY OF PASADENA  
CERTIFYING THE FINAL ENVIRONMENTAL IMPACT REPORT (SCH NO.  
2014101022) FOR THE ARROYO SECO CANYON PROJECT AREAS 2 AND 3,  
ADOPTING ENVIRONMENTAL FINDINGS AND A MITIGATION MONITORING AND  
REPORTING PROGRAM**

**WHEREAS**, on January 6, 2021, the Hearing Officer held a duly noticed public hearing to consider the Arroyo Seco Canyon Project Areas 2 and 3, proposed to repair and replace the City's water infrastructure facilities in the Upper Arroyo Seco, and during the public hearing on the Project, the Hearing Officer received oral and written evidence concerning the environmental impacts of the Project. This evidence included the Final EIR, including the public comments about environmental impacts that were made on the Draft Environmental Impact Report prepared for the Project.

**NOW, THEREFORE, THE HEARING OFFICER OF THE CITY OF PASADENA  
RESOLVES AS FOLLOWS:**

The Findings of Fact, including the Resolutions set forth therein, attached hereto are adopted.

Adopted at the Special meeting of the Hearing Officer on the 6th day of January, 2020 by the following vote:

  
\_\_\_\_\_  
Recording Secretary

APPROVED AS TO FORM:

  
\_\_\_\_\_  
Theresa E. Fuentes  
Assistant City Attorney

**ATTACHMENT E**  
**RESOLUTION ADOPTING A STATEMENT OF OVERRIDING CONSIDERATIONS**

**RESOLUTION NO. 2021-02**

**A RESOLUTION OF THE HEARING OFFICER OF THE CITY OF PASADENA  
ADOPTING A STATEMENT OF OVERRIDING CONSIDERATIONS IN CONNECTION  
WITH THE ARROYO SECO CANYON PROJECT AREAS 2 AND 3 (ALTERNATIVE  
B)**

WHEREAS, the California Environmental Quality Act ("CEQA") requires the decision-making agency to balance the economic, legal, social, technological, or other benefits of a project against its unavoidable environmental impacts when determining whether to approve a project. If the benefits of the project outweigh the unavoidable adverse impacts, those impacts may be considered acceptable. CEQA requires the agency to provide written findings supporting the specific reasons for considering a project acceptable when significant impacts are unavoidable. Such reasons must be based on substantial evidence in the administrative record.

WHEREAS, on January 6, 2021, the Hearing Officer held a duly noticed public hearing to consider the Arroyo Seco Canyon Project Areas 2 and 3, (Project or proposed Project) proposed to repair and replace the City's water infrastructure facilities in the Upper Arroyo Seco that were damaged by debris flows caused by storms following the 2009 Station Fire. Damage to these structures has greatly reduced the City's capacity to divert water from the Arroyo Seco for spreading and pumping credits. The proposed improvements would allow for increased utilization of the City's pre-1914 surface water rights from the Arroyo Seco and maximize the beneficial use of this important local water resource. The proposed Project includes improvements in two primary areas: Area 2, Diversion and Intake Replacement and Area 3, Spreading Basin Improvements. These areas are connected by the Gabrielino Trail/Access Road, which includes three bridge crossings over the Arroyo Seco in the vicinity of the Project site. The proposed Project involves construction activity and water infrastructure facility improvements in both areas, as well as construction truck traffic along portions of the Gabrielino Trail/Access Road.

The proposed Project would also improve biological functions within the Arroyo Seco. For any future fish populations that may establish in the Arroyo Seco, the new intake would include fish screens to prevent fish populations from passing into the intake and conveyance system, and a roughened channel constructed downstream of the new diversion structure to allow upstream fish passage under certain conditions.

In Area 2, the Project would demolish and remove the following structures: (1) existing concrete diversion weir, associated masonry abutments, and rock wall built over concrete dam that extends under the trail; (2) intake structure, metal ladder and platform, and trash racks; (3) concrete slab adjacent to the Gabrielino Trail/Access Road, and (4) excavations of soil/sediment, rocks, debris, and vegetation within the upstream diversion

pool, downstream streambed, and on the adjacent slopes on the downstream side of the diversion weir.

The Project involves the construction of a new diversion weir and intake in the same location within the Arroyo Seco as the current facility. The proposed reinforced concrete diversion control structure would span the entire width of the existing channel with an operable weir crest gate located in a notched section of the structure that would be mechanically operated. Operation of the crest gate would be controlled by water depth measurements from a transducer located immediately upstream of the diversion. The crest gate would be raised to create a pool of water for diversion to the intake structure and lowered to bypass diversions. During high flow conditions, the weir gate would be lowered to move sediment downstream and periodically restore the streambed elevation to the crest of the notch. A roughened channel would be constructed in the section of stream directly downstream of the diversion structure. The new intake would be equipped with a trash rack and fish screens.

In Area 3, the proposed Project includes the reconfiguration and expansion of the spreading basins in order to accommodate the increased diversion of stream flows for infiltration into the Raymond Basin. Existing Ponds 1 and 2, and Basins 1 and 2, would be replaced with Basin A and six new-expanded spreading basins. Stream flows from the existing conveyance system would outlet to the new sedimentation basin (Basin A) or to new spreading Basin E located over the existing Pasadena Pond 1. Basin F would be adjacent to mature trees to be preserved and would be located at the site of the existing Pasadena Pond 2. Basins G, H, and I would be located at the site of the existing Basins 1 and 2 and a portion of the City's open area (i.e., formerly paved JPL East Parking Lot). Each new basin would have an access ramp for maintenance. The new basins would remain connected to the remaining existing downstream basins within the City's spreading basin system.

Upon completion of the proposed Project, the City intends to keep the existing structural bridge overlay on top of Bridge No. 3 into the foreseeable future, but the City may need to remove some or all of the bridge to protect public safety. During construction of the proposed Project, there may be times when portions of the Altadena Crest Trail, Gabrielino Trail/Access Road, Arroyo Seco Trail, and the unnamed trails/maintenance roads would be partially or fully closed to the public due to construction activities. Upon completion of the proposed Project, the temporarily disrupted trail network would be restored.

Long-term operations in Areas 2 and 3 would not be substantively different than the current conditions. No new employees or operations would be required to continue maintenance on the proposed facilities. At the hearing, the Hearing Officer also

considered the Final Environmental Impact Report (the "Final EIR") that was prepared for the Project and certified the Final EIR by adopting Resolution No. 2021-01

WHEREAS, as set forth in Resolution No.2021-01 Alternative B to the proposed Project was not rejected, and was identified as the preferred project. Alternative B includes an alternative design to Area 3, the objective of which would be to provide an improved design with more appeal for recreational users by eliminating the rectangular shapes of the existing condition, as well as the proposed Project design, through use of curvilinear basin features that more closely resemble natural channel and stream functions. Accordingly, it is the changes to the proposed Project as set forth in Alternative B that are the subject of this SOC.

WHEREAS, during the public hearing on the Project, the Hearing Officer received oral and written evidence concerning the environmental impacts of the Project and the Overriding Considerations of the Project. This evidence included the Final EIR, including the public comments about environmental impacts that were made on the Draft Environmental Impact Report prepared for the Project. Those Overriding Considerations include, but are not limited to:

- Replacement of 90-year old facilities that were damaged during storms following the 2009 Station Fire with the construction of a new diversion and intake structure that will provide increased capacity to divert Arroyo Seco flows from the larger storm events, consistent with the City's water rights. By capturing a greater proportion of the larger stream flows and diverting these to spreading basins, more water is retained in the Hahamongna Watershed and infiltrated to the underlying Raymond Basin, and less water is lost to outflows from Los Angeles County's Devil's Gate Dam.
- Construction of an additional 3 acres of spreading basins that will allow for the projected increase in diversions to percolate into the Raymond Basin which serves as an underground reservoir for the City's local water supplies.
- Additional local water supply which increases reliability and system resiliency by reducing the City's dependency upon more expensive water imported from the environmentally-sensitive Sacramento/San Joaquin Delta and the Colorado River.
- An additional tool for managing and improving the reliability of the Raymond Basin in partnership with other Raymond Basin member agencies and the County of Los Angeles in conformance with standards and requirements of the regulating agencies.
- The inclusion of features in the diversion and intake structures that do not currently exist that will protect aquatic animals from passing into the conveyance system and that will allow for passage of any future fish.

- The addition of bio-retention basins that will protect the water quality of the Arroyo Seco by capturing and treating surface runoff prior to percolation into the groundwater table.
- A spreading basin design that emulates natural channels and stream functions for visual enhancement and that incorporates a network of local trails for recreational use.
- The conversion of a barren formerly paved parking lot into a multi-purpose water supply and recreation area that will include native landscaping for shade and habitat.

**NOW THEREFORE, BE IT RESOLVED THAT**, the Hearing Officer acknowledges the environmental impacts identified in the Final EIR and elsewhere in the record of proceedings, but finds that the benefits of the Project, as modified by Alternative B, outweigh the significant and unavoidable impacts identified in the Final EIR and the record of proceedings. In making this finding, the Hearing Officer has balanced the benefits of the Project, as modified by Alternative B, against its unavoidable impacts and indicates its willingness to accept those adverse impacts. The Hearing Officer finds that the benefits of the Project, as modified by Alternative B, set forth in Section 3 above, independent of any other benefits, warrant approval of the Project, as modified by Alternative B, notwithstanding the unavoidable environmental impacts of the Project.

Adopted at the Special meeting of the Hearing Officer on the 6th day of  
January, 2020.

# Mitigation Monitoring and Reporting Program

---

Section 15097 of the California Environmental Quality Act (CEQA) Guidelines requires that, whenever a public agency approves a project based on a mitigated negative declaration or an environmental impact report (EIR), the public agency shall establish a mitigation monitoring or reporting program to ensure that all adopted mitigation measures are implemented.

This mitigation monitoring and reporting program (MMRP) for the Arroyo Seco Canyon Project Areas 2 and 3 (proposed Project) has been prepared pursuant to CEQA (Public Resources Code Section 21000 et seq.) and the CEQA Guidelines (14 California Code of Regulations, Chapter 3, Sections 15074 and 15097). This MMRP is intended to be used by City of Pasadena staff and mitigation monitoring personnel to ensure compliance with mitigation measures during project implementation. Mitigation measures identified in this MMRP were developed in the Draft EIR prepared for the proposed Project. A master copy of this MMRP shall be kept in the office of the City of Pasadena Department of Water and Power and shall be available for viewing upon request.

The Draft EIR for the proposed Project presents a detailed set of mitigation measures required for implementation. As noted above, the intent of the MMRP is to ensure the effective implementation and enforcement of all adopted mitigation measures. The MMRP includes all mitigation measures identified in the Draft EIR and, for each measure, the party responsible for implementation and implementation timing (see Table 1).

**Table 1. Mitigation Monitoring and Reporting Program**

Mitigation Measure	Party Responsible for Implementation	Implementation Timing
<b>Mitigation Measures Identified in the Environmental Impact Report</b>		
<b>Biological Resources</b>		
<b>MM-BIO-1:</b> Prior to commencement of any earthmoving activities or the pre-construction staging of equipment on the Project site, the City shall develop a Preconstruction Survey and Relocation Plan for terrestrial reptiles, including the California newt, two-striped gartersnake, Southern California legless lizard, and coastal whiptail. Although considered to be extinct, Pasadena shrimp ( <i>Synecaris pasadenae</i> ) will be added to the Plan as a focal species. The Preconstruction Survey and Relocation Plan shall be submitted to the California Department of Fish and Wildlife (CDFW) for review prior to any ground-disturbing activities within potentially occupied habitat.	<p>(1) City of Pasadena/PWP shall ensure the development of a Preconstruction Survey and Relocation Plan</p> <p>(2) Subsequently, City of Pasadena/PWP shall ensure the final documentation of any wildlife relocated during Project activities is provided to CDFW for confirmation that construction activities were executed in compliance with the Preconstruction Survey and Relocation Plan</p> <p>The Plan shall include at a minimum, the following: (1) protocols for pre-construction surveys to flush out and/or move identified special status wildlife within the study area, as feasible; (2) the timing, frequency, and locations where surveys should be conducted; (3) the habitat and conditions in the proposed relocation site(s); (4) the methods that would be used for trapping and relocating identified species; (5) protocols for documentation/recording of the species and number of animals relocated; and (6) protocols for notifying CDFW in the event that identified species cannot be relocated.</p> <p>The Plan shall require that a Biological Monitor be present during all vegetation clearing and ground disturbance activities within Area 2, as well as three times weekly until construction activities are completed. For Area 3, a Biological Monitor will be present during initial vegetation clearing and initial ground disturbance activities. The Biological Monitor shall be familiar with southwestern willow flycatcher and least Bell's vireo and shall conduct pre-clearing non-protocol surveys for this species while onsite. If a least Bell's vireo or other State of federally listed species is detected, work activity within 500 feet of the detected occupied habitat will be temporarily halted and the City will consult with the appropriate wildlife agencies. With authorization from these agencies, which may include a 'take' permit, the project will proceed in accordance with conditions developed in the consultation. Conditions will include avoidance and minimization measures to prevent or minimize impacts on the listed species(s) occurring on or adjacent to the site.</p> <p>The Plan shall require that any individual special-status terrestrial wildlife species observed within the study area during the pre-construction survey(s) shall be flushed out and/or</p>	<p>(1) Prior to commencement of any earthmoving activities or the pre-construction staging of equipment on the Project site</p> <p>(2) Upon completion of final documentation of compliance with the Preconstruction Survey and Relocation Plan</p>

Mitigation Measure	Party Responsible for Implementation	Implementation Timing
moved out of harm's way to avoid direct impacts to these species, and if special-status species are detected, the Biological Monitor shall capture and relocate individuals to nearby undisturbed areas with suitable habitat outside of the construction area, but as close to their origin as possible. The final recordation/documentation of any wildlife relocated during Project activities shall be made available to CDFW for confirmation that construction activities were executed in compliance with the approved Preconstruction Survey and Relocation Plan.		Nesting bird pre-construction survey shall be conducted by a qualified Biologist for nesting birds and/or raptors within 3 days prior to clearing of any vegetation and/or any work near existing structures
<b>MM-BIO-2:</b> Project construction shall be conducted in compliance with the conditions set forth in the Migratory Bird Treaty Act (MBTA) and California Fish and Game Code with methods approved by the California Department of Fish and Wildlife (CDFW) to protect active bird/raptor nests. To the maximum extent feasible, vegetation removal shall occur during the non-breeding season for nesting birds (generally late September to early March) and nesting raptors (generally early July to late January) to avoid impacts to nesting birds and raptors. If the Project requires that work be initiated during the breeding season for nesting birds (March 1–September 30) and nesting raptors (February 1–June 30), in order to avoid direct impacts on active nests, a pre-construction survey shall be conducted by a qualified Biologist for nesting birds and/or raptors within 3 days prior to clearing of any vegetation and/or any work near existing structures (i.e., within 300 feet for nesting birds, 500 feet for southwestern willow flycatcher and least Bell's vireo, and within 500 feet for nesting raptors). If the Biologist does not find any active nests within or immediately adjacent to the impact areas, the vegetation clearing/construction work shall be allowed to proceed.	City of Pasadena/PWP shall ensure that a qualified Biologist conducts surveys in compliance with the conditions set forth in the Migratory Bird Treaty Act (MBTA) and California Fish and Game Code	

If the Biologist finds an active nest within or immediately adjacent to the construction area and determines that the nest may be impacted or breeding activities substantially disrupted, the Biologist shall delineate an appropriate buffer zone around the nest depending on the sensitivity of the species and the nature of the construction activity. Any nest found during survey efforts shall be mapped on the construction plans. The active nest shall be protected until nesting activity has ended. To protect any nest site, the following restrictions to construction activities shall be required until nests are no longer active, as determined by a qualified Biologist: (1) clearing limits shall be established within a buffer around any occupied nest (the buffer shall be 100–300 feet for nesting birds, 500 feet for southwestern willow flycatcher and least Bell's vireo, and 300–500 feet for nesting raptors), unless otherwise determined by a qualified Biologist and (2) access and surveying shall be restricted within the buffer of any occupied nest, unless otherwise determined by a qualified Biologist. Encroachment into the buffer area around a known nest shall only be allowed if

Mitigation Measure	Party Responsible for Implementation	Implementation Timing
<p>the Biologist determines that the proposed activity would not disturb the nest occupants. Construction can proceed when the qualified Biologist has determined that fledglings have left the nest or the nest has failed.</p> <p><b>MM-BIO-3:</b> A CDFW-approved bat biologist shall conduct a pre-construction bat habitat assessment within the Project and within a 500-foot buffer. The assessment will consist of a daytime roost assessment to identify any sign indicating presence (i.e. guano, staining, etc.), acoustic monitoring for nighttime bat emergence and foraging activity, and visual emergence observations. Potential for roosting shall be categorized by 1) potential for solitary roost sites, 2) potential for colonial roost sites (10 bats or more). If the potential for colonial roosting is determined, those trees shall not be removed during the bat maternity roost season (March 1 – July 31). Trees potentially supporting colonial roosts outside of maternity roost season, and trees potentially supporting solitary roosts may be removed via a two-step removal process, whereby some level of disturbance (such as trimming of lower branches) (at the direction of Biological Monitor) is applied to the tree on day one to allow bats to escape during the darker hours, and the roost tree shall be removed two days later (i.e., there shall be no less or more than two nights between initial disturbance and the grading or tree removal). When feasible, trees will be dropped slowly and a Biological Monitor will monitor the activity. If buildings are determined to be occupied, one-way exclusionary devices will be placed over bat access points and left in place for two nights prior to building removal.</p>	<p>City of Pasadena/PWP shall ensure that a qualified bat biologist conducts a bat habitat assessment within the Project and within a 500-foot buffer</p>	<p>Within 3 days prior to clearing of any vegetation and/or any work near existing structures.</p>
<p><b>MM-BIO-4:</b> Direct impacts to sensitive vegetation communities (white alder-California sycamore woodland association and California sycamore woodlands alliance) shall be mitigated through a combination of on-site and/or off-site measures. Mitigation for impacts to sensitive vegetation communities shall consider and overlap with compensation for jurisdictional waters (MM-BIO-6) since the sensitive vegetation is associated with the jurisdictional limits of Arroyo Seco. Mitigation for direct impacts to sensitive vegetation communities shall be implemented through on-site creation/enhancement, program funding, mitigation bank credits, and/or creation/enhancement of native vegetation communities on City lands. Mitigation acreages shall be implemented as shown in the Table below.</p>	<p>(1) City of Pasadena/PWP shall ensure that a qualified biologist prepares a Habitat Mitigation and Monitoring Plan            (2) City of Pasadena/PWP shall ensure that the HMMP is submitted to CDFW, USACE, and RWQCB for review and comment, and revised to the satisfaction of the City and the three agencies.</p>	<p>(1) Prior to the issuance of a ground disturbing activities or the pre-construction staging of equipment on the Project site            (2) Prior to the issuance of a ground disturbing activities or the pre-construction staging of equipment on the Project site</p>

Mitigation Measure	Party Responsible for Implementation	Implementation Timing	
Sensitive Vegetation Community	Direct Impacts (acres)	Mitigation Ratio	Mitigation (acres)
White alder-California sycamore woodland association	0.47	3:1	1.41
California sycamore woodlands alliance	0.04	3:1	0.12
<b>Totals:</b>	<b>0.51</b>	<b>–</b>	<b>1.53</b>

**On-site Mitigation.** White alder-California sycamore woodland association and California sycamore woodlands alliance could be established within Area 1 (previously approved components of the Arroyo Seco Canyon Project), and California sycamore woodlands alliance could be established in the upland portions surrounding the spreading basins in Area 3. Prior to the issuance of a grading permit or any earthwork on the Project site, PWP shall prepare a Habitat Mitigation and Monitoring Plan (HMMP) for habitat enhancement and creation activities. The HMMP shall at a minimum include a feasible implementation structure, salvage/seeding details, invasive species eradication methods, irrigation system and schedule, a monitoring schedule, performance standard of success, estimated costs, the implementation of a restrictive covenant on the land, long-term management of the habitat, and identification of responsible entities. The HMMP shall include restoration of the following habitats:

**Riparian Woodlands.** Impacted areas of (white alder-California sycamore woodland association and California sycamore woodlands alliance) shall be created/restored within and adjacent to the same on-site areas that the woodland currently existed prior to Project implementation, as well as other areas deemed to have appropriate soils and topography for successful establishment. Understory areas shall be revegetated with a diversity of locally collected seeds. Temporary irrigation shall be established and maintained, with irrigation suspensions in times of rainfall. Successful establishment of the woodland shall be determined only after removal of irrigation system and confirmed ability of the woodland to survive in the absence of irrigation.

It is anticipated that a one-time restoration effort followed by monitoring and invasive weed removal for a minimum of five (5) years would be required. The HMMP shall be submitted by the City to CDFW, USACE, and RWQCB for review and comment, and revised to the satisfaction of the City and the three agencies.

Mitigation Measure	Party Responsible for Implementation	Implementation Timing
<p><b>Off-site Mitigation.</b> If mitigation is implemented through mitigation program funding and/or mitigation bank credits, the City shall work with CDFW, USACE, and RWQCB to ensure the mitigation program funding and/or mitigation bank credits are appropriate to offset permanent impacts. If program funding is utilized, it would be accompanied by a specific work plan identifying habitat/jurisdictional resource acreage and/or functional gains. Mitigation lands shall be comprised of similar or higher quality riparian woodland and preferably located in the vicinity of the site or watershed. Off-site mitigation lands will be protected in perpetuity under a conservation easement, with a non-wasting endowment and manager/easement holder for long-term management.</p> <p>If mitigation is implemented through offsite enhancement of City-owned lands, the City shall prepare a HMMP that details the location and existing conditions of the ofsite lands. The HMMP shall at a minimum include a feasible implementation structure, salvage/seeding details, invasive species eradication methods, irrigation system and schedule, a monitoring schedule, performance standard of success, estimated costs, the implementation of a restrictive covenant on the land, long-term management of the habitat, and identification of responsible entities. It is anticipated that a one-time restoration effort followed by monitoring and invasive weed removal for a minimum of five (5) years would be required. The HMMP shall be submitted by the City to CDFW, USACE, and RWQCB for review and comment, and revised to the satisfaction of the City and the three agencies.</p>		<p>(1) Prior to commencement of any ground disturbing activities or the pre-construction staging of equipment on the Project site</p> <p>(2) Ongoing during construction in compliance with Preconstruction Survey and Relocation Plan per MM-BIO-1</p>
<p><b>MM-BIO-5:</b> To prevent inadvertent disturbance to sensitive vegetation communities outside the limits of work, the construction limits shall be clearly demarcated (e.g., installation of flagging or temporary high visibility construction fence) prior to ground disturbance activities. All construction activities including equipment staging and maintenance shall be conducted within the marked disturbance limits. A qualified biologist shall be present during initial ground-disturbing activities within the Project site to ensure that Project activities stay within the demarcated limits. The integrity of the demarcation limits will be in accordance with the monitoring required in MM-BIO-1.</p> <p>Additionally, all hollow posts and pipes associated with new facilities in Areas 2 and 3 shall be capped to prevent wildlife entrapment and mortality. Metal fence stakes used on the Project site shall be plugged with bolts or other plugging materials to avoid impacts to raptor talons. Additionally, the City shall ensure the prohibition of the use of rodenticides throughout all construction activities.</p>	<p>(1) City of Pasadena/PWP shall ensure that a qualified biologist conducts flagging of disturbance limits</p> <p>(2) City of Pasadena/PWP shall ensure that a qualified biologist conducts the required monitoring</p>	

Mitigation Measure	Party Responsible for Implementation	Implementation Timing
<b>MM-BIO-6:</b> Mitigation for direct impacts to jurisdictional waters shall be implemented through on-site enhancement of remaining jurisdictional waters and/or off-site acquisition, program funding, and/or mitigation bank credits. Mitigation ratios for each type of jurisdictional waters is shown in the Table below. Mitigation for temporary and permanent impacts to jurisdictional wetlands and waters shall consider and overlap with compensation for sensitive vegetation communities (MM-BIO-4).	<p>(1) City of Pasadena/PWP shall ensure that a qualified biologist prepares a Habitat Mitigation and Monitoring Plan</p> <p>(2) City of Pasadena/PWP shall ensure that the HMMP is submitted to CDFW, USACE, and RWQCB for review and comment, and revised to the satisfaction of the City and the three agencies.</p>	<p>(1) Prior to the issuance of a ground disturbing activities or the pre-construction staging of equipment on the Project site</p> <p>(2) Prior to the issuance of a ground disturbing activities or the pre-construction staging of equipment on the Project site</p>

Jurisdictional Waters Type	Direct Impacts (acres)	Mitigation Ratio	Mitigation (acres) <sup>a</sup>
USACE waters of the United States	0.20	1:1	0.20
RWQCB waters of the state	2.58	1:1	2.58
CDFW streambed and bank, with riparian vegetation <sup>b</sup>	0.49	3:1	1.47
CDFW streambed and bank, with non-riparian habitat <sup>c</sup>	2.41	1:1	2.41

**Notes:**

- a. Mitigation areas for each jurisdictional type may overlap
- b. white alder -California sycamore woodland (0.48 acres) and coast live oak woodland (<0.01 acres)
- c. California sagebrush-California buckwheat-laurel sumac scrub (<0.001 acres); urban/developed (0.03 acres); disturbed habitat (2.38 acres); laurel sumac scrub (<0.01 acres)

**On-site Mitigation.** Jurisdictional waters and associated vegetation could be established within Area 1 (previously approved components of the Arroyo Seco Canyon Project). Prior to the issuance of a grading permit or any earthwork on the Project site, PWP shall prepare a HMMP for habitat enhancement and creation activities. The HMMP shall set a minimum include a feasible implementation structure, salvage/seeding details, invasive species eradication methods, irrigation system and schedule, a monitoring schedule, performance standard of success, estimated costs, the implementation of a restrictive covenant on the land, long-term management of the habitat, and identification of responsible entities. The HMMP shall include restoration of the following habitats:

**Riparian Woodlands.** Impacted areas of (white alder-California sycamore woodland association and coast live oak woodland) shall be created/restored within and adjacent to

<p>the same on-site areas that the woodland currently existed prior to Project implementation, as well as other areas deemed to have appropriate soils and topography for successful establishment. Understory areas shall be revegetated with a diversity of locally collected seeds. Temporary irrigation shall be established and maintained, with irrigation suspensions in times of rainfall. Successful establishment of the woodland shall be determined only after removal of irrigation system and confirmed ability of the woodland to survive in the absence of irrigation.</p> <p>It is anticipated that a one-time restoration effort followed by monitoring and invasive weed removal for a minimum of five (5) years would be required. The HMMP shall be submitted by the City to the CDFW, USACE, and RWQCB for review and comment, and revised to the satisfaction of the City and the three agencies.</p> <p><b>Off-site Mitigation.</b> If mitigation is implemented through mitigation program funding and/or mitigation bank credits, the City shall work with the CDFW, USACE, and RWQCB to ensure the mitigation program funding and/or mitigation bank credits are appropriate to offset permanent impacts. If program funding is utilized, it would be accompanied by a specific work plan identifying habitat/jurisdictional resource acreage and/or functional gains. Mitigation lands shall be comprised of similar or higher quality riparian woodland and preferably located in the vicinity of the site or watershed. Off-site mitigation lands will be protected in perpetuity under a conservation easement, with a non-wasting endowment and manager/easement holder for long-term management.</p>		
<p>If mitigation is implemented through offsite enhancement of City-owned lands, the City shall prepare a HMMP that details the location and existing conditions of the offsite lands. The HMMP shall at a minimum include a feasible implementation structure, salvage/seeding details, invasive species eradication methods, irrigation system and schedule, a monitoring schedule, performance standard of success, estimated costs, the implementation of a restrictive covenant on the land, long-term management of the habitat, and identification of responsible entities. It is anticipated that a one-time restoration effort followed by monitoring and invasive weed removal for a minimum of five (5) years would be required. The HMMP shall be submitted by the City to the CDFW, USACE, and RWQCB for review and comment, and revised to the satisfaction of the City and the three agencies.</p> <p><b>MM-BIO-7:</b> Prior to the commencement of earthmoving within Area 2 for the demolition of the existing diversion/weir structure, the City shall develop a Native Resident and</p>	<p>City of Pasadena/PWP shall ensure that a qualified biologist prepares a</p>	<p>Prior to the issuance of a ground disturbing activities or the pre-</p>

Mitigation Measure	Party Responsible for Implementation	Implementation Timing
Migratory Fish Monitoring Plan (Monitoring Plan), in consultation with CDFW. This Monitoring Plan shall set forth annual monitoring requirements to determine if native fish species or migratory fish populations are present within an approximate 3,500-foot section of the stream (about 1,500 feet upstream of the diversion/weir structure to the abandoned headworks (Area 1) and 2,000 feet downstream to the JPL Bridge at the mouth of the canyon). The Monitoring Plan will include the results of the baseline conditions for fish, which shall be conducted prior to commencement of earthwork in Area 2 within the 3,500 section of the stream using the survey methodology described in the 2010 California Salmonid Stream Habitat Restoration Manual (4 <sup>th</sup> Edition). Annual survey protocols shall be established to the satisfaction of CDFW and set forth in the Monitoring Plan. If the results of the annual surveys reveal a positive presence of native fish, the Monitoring Plan shall set forth thresholds for determining the permanency of the population, and whether or not connectivity both upstream and downstream of the diversion structure is appropriate and in the best interest of the long-term survival of an established native or migratory fish population, given hazards associated with stranding downstream. Until passage for steelhead is restored to the Arroyo Seco, the City shall implement a program to rescue fish between the diversion structure and the JPL Bridge. If rescue is determined to be ineffective or impractical, then the City shall modify its operations to accommodate passage. At such time as steelhead passage is restored, the City shall alter either the design of the diversion/weir structure, the operational methods of the diversion/weir structure, or both to satisfy Fish and Game Code Sections 5901 and 5937.	Native Resident and Migratory Fish Monitoring Plan that sets forth survey protocols satisfaction of CDFW.	construction staging of equipment on the Project site
<b>MM-BIO-8:</b> A qualified biologist shall be present during initial ground disturbing activities within the Project site to ensure that Project activities stay within the demarcated limits, as required in MM-BIO-5. This qualified biologist shall identify the number of City-protected trees that are removed as a result of Project construction activities, as well as trees that would be encroached upon. This inventory of trees shall be used to determine an appropriate tree replacement program that shall be, at a minimum, consistent with the administrative guideline tree replacement matrix of the City's Tree Ordinance (Chapter 8.52 of the Pasadena Municipal Code), as it relates to tree replacement of protected trees.	(1) City of Pasadena/PWP shall ensure that a qualified biologist identifies City-protected trees  (2) City of Pasadena/PWP shall ensure that a qualified biologist prepares tree mitigation per City's Tree Ordinance	(1) Upon completion of demarcation limits per MM-BIO-5  (2) Upon determination of the final number/type of impacted trees

Mitigation Measure	Party Responsible for Implementation	Implementation Timing
All trees that have been substantially root pruned (30% or more of their root zone) during construction within the TPZ shall be monitored by an International Society of Arboriculture Certified arborist for the first five years after construction completion. The arborist shall submit an annual report, photograph each tree and compare tree health and condition to the original, pre-construction baseline. For trees that do not survive the five-year monitoring period, such trees shall be replaced in accordance with the requirements of this measure.	For all trees that are identified for removal resulting from the proposed Project, such trees shall be inspected by a qualified arborist for contagious tree diseases, including but not limited to Polyphagous Shot Hole Borer; thousand canker fungus, and goldspotted oak borer. If contagious tree diseases are identified, the trees shall be treated using the best available management practices relevant for each tree disease observed prior to transporting the trees offsite.	(1) Prior to the commencement of construction vehicle and truck traffic along the Gabrielino Trail/Access Road north of the JPL Bridge, the City shall ensure that Bridge No. 2 and all identified arroyo stone wall features along the affected portions of the Gabrielino Trail/Access Road are properly protected for the duration of construction activities. The City shall install temporary protective barriers in the form of concrete k-rails along the decorative railings of Bridge No. 2 on both sides of the road to protect the railings from further deterioration and damage from vehicles. The concrete k-rails shall be removed once the Project is completed leaving Bridge No. 2 intact. The concrete k-rails shall be installed parallel to the Bridge's existing baluster railings, with approximately 2 feet of separation between the k-rail and the resource. The k-rails shall be positioned to ensure that the Bridge railings are protected from daily construction traffic. The k-rails shall not be permanently attached to the bridge. All arroyo stone wall features adjacent to the Gabrielino Trail/Access Road shall be protected by concrete k-rails wherever feasible; however, in areas where k-rails would create an impassable or bottleneck situation for vehicles, the City shall utilize other reasonable protections, including cones and flagging, to ensure that the arroyo stone walls are not inadvertently damaged during construction vehicle movement and equipment transport. The plans for the temporary barriers shall be reviewed by a qualified architectural historian prior to
<b>Cultural Resources and Tribal Cultural Resources</b>	<b>MM-CU1-1:</b> Prior to the commencement of construction vehicle and truck traffic along the Gabrielino Trail/Access Road north of the JPL Bridge, the City shall ensure that Bridge No. 2 and all identified arroyo stone wall features along the affected portions of the Gabrielino Trail/Access Road are properly protected for the duration of construction activities. The City shall install temporary protective barriers in the form of concrete k-rails along the decorative railings of Bridge No. 2 on both sides of the road to protect the railings from further deterioration and damage from vehicles. The concrete k-rails shall be removed once the Project is completed leaving Bridge No. 2 intact. The concrete k-rails shall be installed parallel to the Bridge's existing baluster railings, with approximately 2 feet of separation between the k-rail and the resource. Mitigation Measure	Party Responsible for Implementation	Implementation Timing
Project implementation. In order to ensure that the bridge and stone walls are adequately protected during Project activities, the City shall ensure completion of pre-construction and post-construction surveys by a qualified historic preservation consultant to ensure that adverse effects or significant impacts have not occurred to Bridge No. 2. If the pre-construction survey identifies deficiencies in the protections for Bridge No. 2 or the stone walls, recommendations for additional physical barriers or visual warnings shall be provided and implemented prior to initiation of construction activities. The installation/construction methodology and post-construction survey shall be submitted to the City of Pasadena Department of Planning – Historic Preservation for review and approval.		Road north of the JPL Bridge
<b>MM-CUL-2:</b> Prior to construction completion, the City shall ensure preparation of Historic American Engineering Record (HAER) documentation for Bridge No. 3 in accordance with the Secretary of the Interior's Standards for Architectural and Engineering Documentation. Documentation shall be completed by a qualified historic preservation professional who meets the Secretary of the Interior's Professional Qualifications Standards for architectural history. The documentation shall capture the physical description of the existing bridge with: 1) existing as-built/s/drawings (where/if available); 2) a written narrative that includes a detailed history and architectural description of the bridge and a discussion of its historical significance; 3) photographs of the bridge with large format negatives to demonstrate its current condition; and 4) provide other photographs of the bridge prior to installation of the current overlay. Upon approval of the final HAER package, the City shall offer one original copy of the final HAER package to the City of Pasadena Historic Preservation Program, the South Central Coastal Information Center at California State University, Fullerton, and the Angeles National Forest Administrative Office.	(1) City of Pasadena/PWP shall ensure completion of a Historic American Engineering Record (HAER) documentation for Bridge No. 3.  (2) City of Pasadena/PWP shall ensure completion of a review of the bridge overlay design on Bridge No. 3 for compliance with the City's Arroyo Seco Design Guidelines	(1) Prior to the commencement of construction vehicle and truck traffic along the Gabrielson Trail/Access Road north of the JPL Bridge  (2) Prior to the completion of construction activities in Area 2

Mitigation Measure	Party Responsible for Implementation	Implementation Timing
<b>MM-CUL-3:</b> Prior to commencement of Project construction activities that would require equipment staging at the Behner Water Treatment Plant (WTP), the City shall ensure that the exterior of the WTP building is adequately protected from equipment and vehicle staging activities. The northwest and southwest exterior elevations of the WTP shall, at a minimum, be protected by construction fencing and signage to ensure that none of the major exterior character-defining features of the building are inadvertently damaged. Fencing shall be placed at a minimum distance of five (5) feet from the exterior of the building, and crews working in the immediate vicinity should be alerted to the presence of an historical resource and instructed to avoid it. The City shall ensure that Project-related equipment and materials are not in contact with the exterior or the building, including absolute avoidance of leaning materials and equipment against exterior walls. The temporary fencing, signage, and barriers shall be removed at the conclusion of construction activities.	City of Pasadena/PWP shall ensure installation of protective measures for building protection from equipment and vehicle staging activities	Prior to commencement of Project construction activities that would require equipment staging at the Behner Water Treatment Plant
<b>MM-CUL-4:</b> Prior to commencement of earthmoving activities, the City shall retain a qualified Archaeologist meeting the Secretary of the Interior's Professional Qualification Standards for Archaeology. The Archaeologist shall be present at the pre-grade conference; shall establish procedures for archaeological resource surveillance; and shall establish, in cooperation with the Contractor, procedures for temporarily halting or redirecting work to permit the sampling, identification, and evaluation of the artifacts, as appropriate. At a minimum, in the event archaeological resources are exposed during construction activities, all construction work occurring within 100 feet of the find shall immediately stop until a qualified archaeologist can evaluate the significance of the find and determine whether or not additional study is warranted. The Archaeologist shall first determine whether it is a "unique archaeological resource" pursuant to the California Environmental Quality Act (CEQA, i.e., Section 21083.2[g] of the California Public Resources Code) or a "historical resource" pursuant to Section 15064.5(a) of the State CEQA Guidelines. If the archaeological resource is determined to be a "unique archaeological resource" or a "historical resource", the Archaeologist shall formulate a mitigation plan in consultation with the City of Pasadena that satisfies the requirements of the above-referenced sections. The Archaeologist shall prepare a report of the results of any study prepared as part of a testing or mitigation plan, following guidelines of the California Office of Historic Preservation, and s/he shall record the site and submit the recordation form to the City of Pasadena and the California Historic Resources Information System (CHRIS) at the South Central Coastal Information Center (SCCIC) at California State University, Fullerton. Work may proceed in other areas of the site, subject to the direction of the Archaeologist.	(1) City of Pasadena/PWP shall ensure hiring of a qualified archaeologist for meeting attendance and preparation of a mitigation plan  (2) If any archaeological finds are studied, the City of Pasadena/PWP shall ensure the qualified archaeologist prepares a testing or mitigation plan	(1) Prior to the commencement of a ground disturbing activities or the pre-construction staging of equipment on the Project site  (2) Upon discovery of any archaeological finds

Mitigation Measure	Party Responsible for Implementation	Implementation Timing
<b>MM-PALO-1:</b> Prior to commencement of any grading activity on-site, the City shall retain a qualified Paleontologist per the Society of Vertebrate Paleontology (SVP) (2010) guidelines. The paleontologist shall prepare a Paleontological Resources Impact Mitigation Program (PRIMP) for the Project. The PRIMP shall be consistent with the SVP 2010 guidelines. Minimum requirements to be set forth in the PRIMP include: (1) attendance at the preconstruction meeting and worker environmental awareness training, where monitoring is required within the proposed Project site based on construction plans and/or geotechnical reports; (2) procedures for adequate paleontological monitoring and discoveries treatment, and paleontological methods, including sediment sampling for microvertebrate fossils, reporting, and collections management; (3) mandatory monitoring on-site during all rough grading and other significant ground-disturbing activities, including augering in previously undisturbed, fine-grained Pleistocene alluvial deposits; (4) mandatory actions in the event that paleontological resources (e.g., fossils) are unearthed during grading, including the requirement for the paleontological monitor to temporarily halt and/or divert grading activity to allow recovery of paleontological resources, and roping/fencing off of the discovery with a 50-foot radius buffer; and (5) if resources are discovered, methods for coordination between the qualified paleontologist and the City for appropriate exploration and/or salvage, as well as final disposition of the resources in an accredited institution or museum, such as the Natural History Museum of Los Angeles County.	City of Pasadena/PWP shall ensure hiring of a qualified paleontologist to prepare a Paleontological Resources Impact Mitigation Program	Prior to the commencement of a ground disturbing activities
<b>Noise</b>	<p><b>MM-NOI-1:</b> The City and/or their Construction Contractor shall implement the following noise reduction measures during all construction activities:</p> <ul style="list-style-type: none"> <li>• Equip all construction equipment (fixed or mobile) with properly operating and maintained mufflers, consistent with or exceeding manufacturers' standards.</li> <li>• Ensure that construction equipment engine enclosures and covers as provided by manufacturers shall be in place during operation.</li> <li>• Place all stationary construction equipment so that the equipment is as far as feasible from noise-sensitive receptors and so that the emitted noise is directed away from the noise-sensitive receptors.</li> <li>• Locate equipment and materials staging in areas that will create the greatest distance between staging area noise sources and noise-sensitive receptors during Project construction.</li> </ul>	<p>City of Pasadena/PWP shall ensure construction activities implement required noise reduction actions</p> <p>During all demolition, earthwork and construction activities</p>

Mitigation Measure	Party Responsible for Implementation	Implementation Timing
<ul style="list-style-type: none"> <li>Ensure that construction equipment is shut down when not in use.</li> <li>Limit haul truck deliveries to the same hours specified for the operation of construction equipment.</li> </ul>		
<b>Recreation</b>		
<b>MM-REC-1:</b> Prior to the closure of recreational trails for public use, the City of Pasadena shall post signs providing at least one week of advanced notice of the dates and times of planned trail closures at the following locations:	City of Pasadena/PWP shall ensure implementation of required notifications	During all demolition, earthwork and construction activities
<ul style="list-style-type: none"> <li>Intersection of Ventura Street and Windsor Avenue</li> <li>Sunset Overlook</li> <li>Altadena Crest Trail (adjacent to the North Arroyo Boulevard)</li> <li>Arroyo Seco Trail</li> <li>West Rim Trail/East Rim Trail</li> </ul>		
In addition to the closure notice signage, the City shall provide the locations of nearby trails and recreational facilities in the surrounding area that would be open for public use at the times when the trails are closed. This information shall also be posted on the City's Parks, Recreation and Community Services website.		
<b>Transportation</b>		
<b>MM-TRA-1:</b> During the peak phase of construction activities (i.e. during the demolition phase requiring haul truck trips) in Area 3, all Construction Contractors shall schedule the arrival and departure of the sediment export haul trucks to be outside the AM peak hours of 7:30 AM to 8:30 AM and the PM peak hours of 4:30 PM to 5:30 PM.	City of Pasadena/PWP shall ensure construction activities comply with haul truck schedule limits	During demolition phase in Area 3
<b>MM-TRA-2:</b> During construction activities in Areas 2 and 3, use of the North Arroyo Boulevard or Gabrielino Trail/Access Road by hikers, bicyclists and equestrians shall be limited or prohibited when temporary partial or full closures of the Gabrielino Trail/ Access Road, Explorer Road, hiking trails or maintenance roads is necessary. In addition to the requirements for notification set forth in the City's Supplements and Modifications to the Greenbook, flagpersons and/or other safety procedures shall be used as necessary to ensure the safety of recreational users.	City of Pasadena/PWP shall ensure notification of trail closure and safety procedures	During demolition, grading, and construction activities

Mitigation Measure	Party Responsible for Implementation	Implementation Timing
<b>MM-TRA-3:</b> Prior to the start of construction, the City and/or their Construction Contractor shall provide written notice to the USFS and residences at the Ranger Station of the anticipated construction schedule, stating that access may be temporarily obstructed on an intermittent basis and providing a schedule of anticipated closures. In order to ensure that emergency vehicles would not be obstructed at any time, any temporary obstructions to the Gabriellino Trail/Access Road that could hinder emergency vehicular access shall be mobile and able to be removed from the roadway immediately upon notice from emergency responders.	City of Pasadena/PWP shall ensure notification of trail closure to USFS	Prior to commencement of construction activities, and ongoing, as needed
<b>MM-CUML-1:</b> The City and/or their Construction Contractor shall coordinate with the Los Angeles County Department of Public Works and/or their contractor for the sediment removal activities at Devil's Gate Reservoir regarding the schedule of trucks to and from landfills that would require the use of Interstate 210 eastbound ramps/Arroyo Boulevard intersection. If it is determined that activities would overlap and Project traffic and cumulative traffic including the Devil's Gate project traffic would have vehicle queues at Caltrans facilities that exceed available storage lengths, then the City and/or their contractor shall implement construction vehicle/hauling restrictions that disallow the proposed Project's truck traffic during the AM and PM peak hours of 7:30 AM to 8:30 AM and 4:30 PM to 5:30 PM.	City of Pasadena/PWP shall ensure coordination with LACDPW	During demolition, grading, and construction activities
<b>Tribal Cultural Resources</b>		
<b>MM-TCR-1:</b> Prior to commencement of any ground-disturbing activities, the City of Pasadena shall retain a Native American Monitor approved by the Gabrieleño Band of Mission Indians-Kizh Nation – the tribe that consulted on this project pursuant to Assembly Bill AB 52 (the “Tribe” or the “Consulting Tribe”). The Tribal monitor shall only be present on the Project site during the construction phases that involve ground-disturbing activities. Ground disturbing activities may include, but may not be limited to, pavement removal, potholing or auguring, grubbing, tree removals, boring, grading, excavation, drilling, and trenching within the Project area. The Tribal Monitor shall complete daily monitoring logs that provide descriptions of the day’s activities, including construction activities, locations, soil, and any cultural materials identified. The on-site monitoring shall end when all ground-disturbing activities on the Project site are completed, or when the Tribal Representatives and Tribal Monitor have indicated that all upcoming ground disturbing activities at the Project site have little to no potential for impacting Tribal Cultural Resources. Upon discovery of any Tribal Cultural Resources, construction activities shall cease in the	(1) City of Pasadena/PWP shall retain a Native American Monitor approved by the Gabrieleño Band of Mission Indians-Kizh Nation.  (2) City of Pasadena/PWP shall ensure that the Native American Monitor observes ground disturbing activities	(1) Prior to commencement of ground disturbing activities and during any ground disturbing activities.  (2) Only on the Project site during the construction phases that involve ground-disturbing activities

Mitigation Measure	Party Responsible for Implementation	Implementation Timing
immediate vicinity of the find (not less than the surrounding 100 feet) until the find can be assessed. All Tribal Cultural Resources unearthed by Project activities shall be evaluated by the qualified archaeologist (as required in MM-CUL-4) and the Tribal Monitor approved by the Consulting Tribe. If the resources are Native American in origin, the Consulting Tribe will retain it/them in the form and/or manner the Tribe deems appropriate, for educational, cultural and/or historic purposes.	City of Pasadena/PWP shall ensure compliance with applicable protocols and notifications and prepare a treatment plan, as appropriate	Upon discovery of human remains and/or grave goods during construction activities
<b>MM-TCR-2:</b> If human remains and/or grave goods are discovered or recognized at the Project Site, all ground disturbance shall immediately cease, and the county coroner shall be notified per Public Resources Code Section 5097.98, and Health & Safety Code Section 7050.5. Human remains and grave/burial goods shall be treated alike per California Public Resources Code section 5097.98(d)(1) and (2). Work may continue on other parts of the Project site while evaluation and, if necessary, mitigation takes place (CEQA Guidelines Section 15064.5(f)). If a non-Native American resource is determined by the qualified archaeologist to constitute a "historical resource" or "unique archaeological resource," time allotment and funding sufficient to allow for implementation of avoidance measures, or appropriate mitigation, must be available. The treatment plan established for the resources shall be in accordance with CEQA Guidelines Section 15064.5(f) for historical resources and PRC Sections 21083.2(b) for unique archaeological resources. Preservation in place (i.e., avoidance) is the preferred manner of treatment. If preservation in place is not feasible, treatment may include implementation of archaeological data recovery excavations to remove the resource along with subsequent laboratory processing and analysis. Any historic archaeological material that is not Native American in origin shall be curated at a public, non-profit institution with a research interest in the materials, such as the Natural History Museum of Los Angeles County or the Fowler Museum, if such an institution agrees to accept the material. If no institution accepts the archaeological material, it shall be offered to a local school or historical society in the area for educational purposes.		
<b>Mitigation Measures Revised and/or Carried Forward from 2015 IS/MND Mitigation Monitoring and Reporting Program</b>		
<b>MM HAZ-1</b> The City shall require Construction Contractors to implement the following measures: <ul style="list-style-type: none"> <li>• Trucks and equipment entering the site shall be inspected to be free from oil, gasoline, or other vehicle fluid leaks.</li> </ul>	City of Pasadena/PWP	Periodically during construction (at least once per month)

Mitigation Measure	Party Responsible for Implementation	Implementation Timing
<ul style="list-style-type: none"> <li>Equipment fueling areas shall be located outside jurisdictional waters as identified by the USACE and CDFW.</li> <li>Hazardous materials shall not be stored within the 50-year floodplain for the Arroyo Seco. Instead, hazardous materials shall be stored within staging areas located away from the Arroyo Seco and shall be removed prior to the start of the storm season.</li> <li>All hazardous material spills and contaminated soils shall be excavated immediately upon discovery to minimize soil and water contamination and the potential of wildlife being poisoned or otherwise harmed.</li> <li>The Contractor shall maintain hazardous materials spill control, containment, and cleanup kits of adequate size and materials for potential accidental instream spills and releases.</li> </ul>		
<b>MM HAZ-2</b> Should discolored or odorous soils be encountered during grading and excavation activities in Area 3, the Contractor shall have a sample of the soils analyzed for the presence of contamination. If the results of the testing show that chemical levels are present below regulatory levels, grading and excavation activities may proceed accordingly. Otherwise, remediation and/or removal of the contaminated soils shall be completed prior to continued ground disturbance if chemical levels are above regulatory standards. Remediation and/or disposal shall be conducted with the oversight of applicable regulatory agencies such as the Los Angeles County Fire Department, the South Coast Air Quality Management District (SCAQMD), the California Department of Toxic Substances Control (DTSC), and/or the U.S. Environmental Protection Agency in compliance with established maximum contaminant levels (MCLs).	City of Pasadena/PWP	During construction activities, if odorous or discolored soils are found
<b>MM HAZ-3</b> The Contractor shall schedule the access road reconstruction in Area 2 so as to shorten the necessary closures of the access road to the extent feasible. The Contractor shall also inform the Pasadena Department of Water and Power (PWP), the Pasadena Fire Department, the Pasadena Police Department, the Los Angeles County Fire Department, and the United States Forest Service (USFS) at least one week in advance of the start of construction of the times when work on the Gabrielson Trail/access road are planned. Any major changes to the schedule shall be forwarded to these agencies at least one week prior to trail closures.	City of Pasadena/PWP and Parks and Natural Resources Division	At least one week prior to bridge and Gabrielson Trail/Access Road closure

Mitigation Measure	Party Responsible for Implementation	Implementation Timing
<b>MM HAZ-4</b> The Contractor shall not use, operate, or cause to be operated any internal combustion engine that uses hydrocarbon fuel, unless the engine is equipped with a spark arrestor and is maintained in effective working order, or the engine is constructed, equipped and maintained for the prevention of fire.	City of Pasadena/PWP	Periodically during construction (at least once per month)

# COVID-19 SAFETY GUIDANCE FOR CONSTRUCTION SITES

## APRIL 1, 2020

The following guidelines are based on Interim CDC's Guidance for Businesses and Employers to Plan and Respond to Coronavirus Disease 2019 (COVID-19), OSHA's Guidance on Preparing Workplaces for COVID-19, and other publications.

Construction industry employers shall develop a comprehensive COVID-19 exposure control plan, which includes control measures such as social distancing; symptom checking; hygiene; decontamination procedures, and training. An exposure control plan and the following practices must be followed to prevent any onsite worker from contracting COVID-19, as many people with COVID-19 are asymptomatic and can potentially spread disease. Failure to comply with this guidance shall be deemed as creating unsafe conditions and may result in withheld inspections or shutting down the construction site until corrected.

City staff will verify compliance with these guidelines during regular scheduled inspections for projects under construction as well as during investigations associated with complaints that may be submitted to the Pasadena Citizens Service Center at 626-744-7311 or at <http://www5.cityofpasadena.net/citizen-service-center/>.

1. Practice social distancing by maintaining a minimum 6-foot distance from others. No gatherings of 10+ people. Workers on break or lunch break should not gather in groups and should maintain 6-foot distance.
2. Preclude gatherings of any size, and any time two or more people must meet, ensure minimum 6-foot separation. Meetings should be conducted online or via conference call when possible.
3. Provide personal protective equipment (PPE) such as gloves, goggles, face shields, and face masks as appropriate for the activity being performed. Do not share personal protective equipment.
4. The owner/contractor shall designate a site specific COVID-19 Supervisor to enforce this guidance. A designated COVID-19 Supervisor shall be present on the construction site at all times during construction activities. The COVID-19 Supervisor can be an on-site worker who is designated to carry this role.
5. Identify “choke points” and “high-risk areas” where workers are forced to stand together, such as hallways, hoists and elevators, break areas, and buses, and control them so social distancing is maintained.
6. Minimize interactions when picking up or delivering equipment or materials, ensure minimum 6-foot separation.
7. Stagger the trades as necessary to reduce density and maintain minimum 6-foot separation social distancing. Limit the number of people to the minimum possible. Restrict non-essential visitors.
8. Discourage workers from using other worker's phones, desks, offices, work tools and equipment. If necessary, clean and disinfect them before and after use, and hand shaking.
9. Post, in areas visible to all workers, required hygienic practices including not touching face with unwashed hands or gloves; washing hands often with soap and water for at least 20 seconds; use of hand sanitizer with at least 60% alcohol, cleaning AND disinfecting frequently touched objects and surfaces, such as workstations, keyboards, telephones, handrails, machines, shared tools, elevator control buttons, and doorknobs; covering the mouth and nose when coughing or sneezing as well as other hygienic recommendations by the CDC.
10. Place wash stations or hand sanitizers in multiple locations to encourage hand hygiene, identify location of trash receptacles for proper disposal.
11. Require anyone on the project to stay home if they are sick, except to get medical care.
12. Have employees inform their supervisor if they have a sick family member at home with COVID-19.
13. Maintain a daily attendance log of all workers and visitors.
