This correspondence relates to the March 31, 2021 meeting of the City Council, agenda item number 4

Supervisor Barger:

Pasadena Latinos are not receiving their fair share of COVID vaccination shots. As of March 30, according to Pasadena's own "COVID-19 Dashboard", 43% of Asians have been inoculated but less than 21% of Hispanics have been inoculated. Pasadena's Director of Public Health Ying-Ying Goh has obviously prioritized Asians over Latinos. Ying-Ying Goh has also unethically allocated vaccination supply by race, providing at least one Black organization with exclusive access to vaccine while denying it to others. Ying-Ying Goh has even proudly announced she was making medical and public health decisions by race.

As of March 22, it is the official policy of Pasadena to "root out systemic racism" which means that City government is taking action to enforce Critical Race Theory which states that all white people are racist and perpetuate a racist system in Pasadena and as a result white residents should be treated as enemies and "rooted out".

In reality, it is increasingly obvious that Pasadena government, now controlled for the first time by a Supermajority of racial minorities, has predictably descended into a corrupt racial spoils system.

Please take away all of Ying-Ying Goh's and the Pasadena Health Department's access to vaccine and have the County Health department intervene to help Pasadena Latinos get vaccinated in percentages equal to other groups.

Please also investigate how members of the Pasadena City Council were allowed to skip the line and given vaccination shots prior to the eligibility of their particular age group.
