My name is Andrea Leos and I am writing to oppose vaccine mandates and vaccine discrimination among kids. I really hope my voice will be heard regarding this. Kids do not need vaccines as studies have shown that their immune systems are strong and there is very low risk of death if kids get COVID-19. If you have any questions please feel free to contact me. Thank you.

Sincerely,

Andrea Leos

Dear Dr. Goh,

I write to you today to ask that you please put our children's mental health first when considering quarantine and vaccine mandates.

It's such a blessing and freedom that we are able to enjoy in our country that we have the right to "choose"!

Parents have the right to decide what is best for their children and family when it comes to vaccines. If we take this right away, we are no longer a Democracy, we will have become Communists!

Our children (and society) has suffered for nearly two years:

When is it finally enough and time to accept we are not immortal!

To take away the rights and choices that make our country the best in the world is a very sad thing.

Please take this into consideration and help keep Pasadena (and our Country) a free Nation!

Sincerely,

Angela Buchanan

Pasadena City Council,

The quarantine days are too long for children given that they are known to be low risk. I have 2 children who attend school in the Pasadena area and this is not a realistic order. In addition, with many businesses now opened, it is unrealistic to expect parents to take time off work for quarantine should their children be asked by the school. This needs to be reconsidered.

Sincerely,
Yennis Wong

Good afternoon Dr. Ying-Ying Goh,

As a parent of 2 affected by the discriminatory COVID guidelines set by PPHD for unvaccinated vs vaccinated children. I am asking you to review these guidelines and make the appropriate changes to remove anything that discriminates between vaccinated and unvaccinated children.

Thank you,
Nancy

To Whom it may concern,

This comment is for this evening's meeting, Monday, September, 27th.

Hello, name is Janet Labrador and I am writing to OPPOSE the vaccine mandates and vaccine discrimination against all people who have chosen NOT to get vaccinated. Continue to wash your hands with soap and water and mind your distance. Be safe and healthy. God bless you. Thank you for your consideration.

Dr. Goh needs to make decisions based on current evidence, not fear or liability. The VAST majority of children do well, are not hospitalized and do not die. MIS-C remains rare. Long Covid is uncommon in children. Myocarditis can occur in children after vaccination. If there is risk, THERE MUST BE CHOICE. Not enough children were in the study to identify risks and we certainly can't know the long term effects.

Vaccinated and unvaccinated people can get infected and spread it. A vaccine mandate will send thousands out of state or straight to homeschool. Allow children a normal childhood and let them take off their masks and get back to living.

Sincerely, Sara Gillissie

Dear Dr. Goh,

I am a resident of Pasadena, California and I have been my entire life. Covid-19 has put a huge toll on everyone and we are finally at a place where life is as normal as it can be. Except for one thing, these mandates that unnecessarily discriminate against those who are unvaccinated. The virus can spread amongst people whether or not they are vaccinated. So there is no need to add discriminatory restrictions to those who are unvaccinated especially when they are complying and showing proof of a negative test.
