Please keep the two day per week watering for residents. Allowing three days is misguided. This winters water will not last forever and all predictions say we will continue in a drought pattern. Save our water !

Although we got over 40 inches of rain, the southwest is still in a severe drought. We need to continue to conserve our water resources. Lifting the water restrictions is shortsighted. No one needs to water three days a week; allowing a 2 day a week schedule would save a significant amount of water. Please consider changing the present policy to a two day a week schedule.

Bob
