APPENDIX II: RADIUS MAP REPORT

APPENDIX III: SUPPORTING DOCUMENTATION

EXECUTIVE SUMMARY

EFI Global, Inc. has performed a Phase I Environmental Site Assessment (Phase I) for Stanford Pasadena, LLC (Client) for a commercial property located at 111 South Hudson Avenue and 118 South Oak Knoll Avenue, in Los Angeles County and the City of Pasadena, California, Assessor's Parcel Numbers: 5734-025-027 and 5734-025-029. The research conducted for this study and the report prepared are in conformance with the United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) standard and the American Society for Testing and Materials (ASTM) E 1527-13 scope of work.

Site Description

According to our research and information provided by the Client, the following addresses have been found to be associated with the subject property: 116 and 116 ½ Franklin Avenue, 101, 103, 111, 113, 113 ½, 123, and 123 ½ South Hudson Avenue, and 118 and 120 South Oak Knoll Avenue, Pasadena, California. The subject property is composed of two parcels, Assessor's Parcel Numbers (APN) 5734-025-027 towards the west and APN 5734-025-029 towards the east, between South Hudson and South Oak Knoll Avenues, approximately 170-feet south of East Green Street, in the City of Pasadena. The subject property is approximately 1.12 acres in size and is occupied by two commercial structures that are approximately 15,400 total square feet in size. The buildings are currently occupied by mental health service offices. The remaining portions of the property consist of concrete paved parking areas. The surrounding area is used for commercial and residential purposes. Groundwater is estimated to be in excess of 100-feet below ground surface in the area of the site and is assumed to flow towards the southeast.

 No significant hazardous material storage or recognized environmental conditions were observed at the site. Those interviewed, as persons familiar with the site were not aware of any negative environmental conditions associated with the property.

Historical Land Use

According to EFI Global, Inc.'s interpretation of the historical research data, the west portion of the subject property (*Parcel -027*) was developed with a residential structure sometime prior to 1903. By 1910, the east portion of the subject property (*Parcel -029*) was also developed with three residential structures. The subject property remained in this configuration until at least 1949. In 1950, all residential structures on both parcels were demolished and in 1951, the existing commercial structures were constructed.

Historical tenants of 118 South Oak Knoll Avenue have included: residential (1937-1942), Community Service Center (1950-1961), Family Services of Pasadena (1961-1965), Volunteer Services Placement Office (1961-1965), Martha Steen (1971), Catholic Big Brothers (1976), Catholic Social Services (1976), Local Business Development Organization (1976), Pasadena Urban Coalition (1976), United Way (1976), and Foothill Family Service (1976-present). Historical tenants of 101 South Hudson Avenue was residential from at least 1932 through 1950. Historical tenants of 103 South Hudson Avenue was residential from at least 1921 through 1950. Historical tenants of 111 South Hudson Avenue included: Ed White (1951), State Board of Equalization (1951-1975), California Alcoholic Beverage Control Department (1951-1957), Vacant (1976), C.Clay (1977), Zach Gray & Sons (1977), Robert Baker Attorney's Office (1980-1986), CNA Insurance (1980), Connecticut Mutual life Insurance Co. (1980-1985), Lewin Ann Attorney's Office (1980-1981), Stephen Edwards Attorney's Office (1980), Warren Orfall Public Accountant Office (1980), Pasadena Escrow Inc (1980), Bradley Douglas Insurance Services (1981), Creative Transportation (1985), Dorothy Hall Realtor (1985), Edgar Lauther Management Consultant (1985), Reichert & Associates Inc. (1985), Consumers Guide LTD (1985-1986), The Roth Group (1985), HA Finance (1986), Valentina Lert

DC (1986), Michael Doyle (1990), Stone & Dolye (1990-1995), Baylon Design (1995), Dr. Clark Charles (1995), K Imports (1995), Martin Douglas Law Corporation (1995), Nell Recorders (1995), and Foothill Family Service (2003-present).

• The earliest historical resource obtained during this investigation was a Sanborn map from 1903 which indicated development of the subject property at Parcel -027 for residential uses. The lack of historical data sources for the subject property dating back to first developed uses represents historical data source failure. However, it is assumed that prior to 1903, the subject property would have been developed for residential uses, if not undeveloped. Based on this notion, this limitation is not expected to significantly alter the findings of this investigation.

Environmental Data Search

- The subject property is not listed on any of the regulatory databases researched.
- There are no properties within 100-feet of the subject property where a release is considered likely or a known release has occurred.
- In our opinion, none of the other sites listed on the regulatory database report pose a significant threat
 to the subject property as there is no indication of a release at the respective sites, a release has
 occurred but groundwater has not been impacted, a release has occurred but the case is closed, or
 the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the
 subject property.
- The regional offices of the Los Angeles Regional Water Quality Control Board (LARWQCB), Department of Toxic Substances Control (DTSC), South Coast Air Quality Management District (SCAQMD), The Los Angeles County Department of Health Services Public Health Investigations (LACDHS PHI), Pasadena Fire Department (PFD), Los Angeles County Department of Public Works (LACDPW), and Los Angeles County Sanitation District (LACSD) were contacted regarding hazardous materials, underground storage tank, industrial waste discharge records, permits, and site investigation files for the subject property. Additionally, the State Water Resources Control Board (SWRCB) GeoTracker, DTSC Hazardous Waste Tracking System (HWTS) and EnviroStor, and SCAQMD Facility INformation Detail (FIND) databases were reviewed for information pertaining to the subject property.
 - According to responses to our requests from DTSC, SCAQMD, PFD, LACDPW, and LACSD and a review of the aforementioned databases, there are no files for the subject property.
 - The LARWQCB responded to our request indicating there were records for the subject property.
 However, the response was erroneous and the records were for 111 Hudson Avenue in the City of Industry. Therefore no records pertaining to the subject property were found by LARWQCB.
 - At the time this report was issued, no response has been received from LAC DHS PHI. Should relevant information be obtained from this agency subsequent to issuing this report, an addendum will be prepared and provided to the Client.
- The Division of Oil, Gas, and Geothermal Resources (DOGGR) Online Mapping System was reviewed
 for information pertaining to oil and gas exploration on or nearby the subject property. No oil wells were
 identified within 500 feet of the subject property.

The user did not provide EFI Global any information either verbally or in writing (i.e. Title Report)
regarding environmental cleanup liens or activity and use limitations encumbering the subject property.
An environmental lien search was not requested by the user; however, based on our review of
the Department of Toxic Substances Control (DTSC) EnviroStor Database, no environmental liens
enforced by the DTSC were identified.

Additional Issues

- Based on the age of the onsite structures, there is a potential for asbestos containing building materials at the site, however, no testing was completed as part of this report. Potential ACM observed during the reconnaissance included drywall, carpet mastic, and 2' by 2' drop ceiling panels. However observed potential ACM appeared to be in good condition.
- Based on the age of the onsite structures, there is a potential for lead based paint at the site. However, all painted surfaces appeared to be in good condition.
- · According to research the potential for radon at this property is low.
- EFI Global, Inc. did not observe visible or olfactory indications of the presence of mold, nor did EFI Global, Inc. observe obvious indications of significant water damage. No sampling was conducted as part of this assessment.
- The Los Angeles County Department of Public Works, Solid Waste Information System was reviewed to determine if the property is within 1,000 feet of a landfill or 300 feet of an oil well. According to the information reviewed, the subject property is not located within 1,000 feet of a landfill or 300 feet of an oil well. Therefore, the presence of methane beneath the property is considered low.

CONCLUSIONS

EFI Global, Inc. has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice 1527-13, at 111 South Hudson Avenue and 118 South Oak Knoll Avenue, Pasadena, California, the subject property. Any exceptions to or deletions from this practice are described in the individual sections of this report. This assessment has revealed no evidence of recognized environmental conditions or *de minimis* conditions in connection with the subject property.

Recognized Environmental Conditions (REC)

In our opinion, no RECs were identified during the course of this assessment.

Historical Recognized Environmental Conditions (HREC)

In our opinion, no HRECs were identified during the course of this assessment.

Controlled Recognized Environmental Conditions (CREC)

In our opinion, no CRECs were identified during the course of this assessment.

De Minimis Conditions

In our opinion, no de minimis conditions were identified during the course of this assessment.

RECOMMENDATIONS

Based on the foregoing, no additional investigation is recommended at this time.

1.0 INTRODUCTION

EFI Global, Inc. has performed a Phase I Environmental Site Assessment (Phase I) for the property located at 111 South Hudson Avenue and 118 South Oak Knoll Avenue, in Los Angeles County and the City of Pasadena, California (Subject Property). This report has been prepared for the sole use of Stanford Pasadena, LLC (Client).

The research conducted for this study and the report prepared are in general conformance with the EPA "All Appropriate Inquiries" standard and the ASTM 1527-13 "Standard Practices for Environmental Site Assessments: Phase I Environmental Site Assessment Process". The primary purpose for performing a Phase I ESA is to "...permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations (commonly known as landowner liability protections) on Comprehensive Emergency Response Compensation and Liability Act (CERCLA) liability." (ASTM, 2013) An environmental site assessment meeting or exceeding this practice and completed less than 180 days prior to the date of acquisition is presumed to be valid under this standard. In order to maintain landowner liability protections, the user also has a "continuing obligation to not interfere with activity and use limitations associated with the property," must take "reasonable steps to prevent releases" and must "comply with legal release reporting obligations." (ASTM, 2013) Further, it is the goal of this study to identify business risks related to the property associated with environmental conditions. This investigation is not an environmental compliance audit and is not designed to determine if the operations of an existing facility are in compliance with applicable environmental laws and regulations.

The goal of this process is to identify any (1) recognized environmental conditions (RECs), (2) historic recognized environmental conditions (HRECs), (3) controlled recognized environmental conditions (CRECs), and/or (4) *de minimis* conditions associated with the subject property.

- A recognized environmental condition is defined as "...the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." This definition does not include de minimis conditions defined as "a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies" (ASTM, 2013).
- A historical recognized environmental condition is defined as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." (ASTM, 2013). The HREC designation requires the comparison of residual contamination concentrations, if any, to currently regulatory standards.
- A controlled recognized environmental condition is defined as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria

established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)" (ASTM, 2013).

 A de minimis condition is defined as "a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions" (ASTM, 2013).

In order to identify environmental conditions at the site, the Phase I ESA includes a site inspection, interviews with parties familiar with the property, historical research into the past uses of the property, and an environmental records search with regard to the subject property, adjoining and immediately surrounding properties, and the surrounding area. In addition, EFI Global, Inc. provides an opinion regarding the potential for asbestos containing materials, lead-based paints, mold, radon, oil and gas exploration, and methane as they relate to the subject property. Reviewing those documents that are publicly available, reasonably ascertainable, and practically reviewable controls the completeness of this assessment. The inability to review documents which do not exist or are not publicly available, reasonably ascertainable, or practically reviewable may result in a data gap.

1.1 Significant Assumptions

While this report provides an overview of potential environmental concerns, both past and present, the environmental assessment is limited by the availability of information at the time of the assessment. It is possible that unreported disposal of waste or illegal activities impairing the environmental status of the property may have occurred which could not be identified. The conclusions and recommendations regarding environmental conditions that are presented in this report are based on a scope of work authorized by the Client. Note, however, that virtually no scope of work, no matter how exhaustive, can identify all contaminants or all conditions above and below ground.

1.2 Limitations and Exceptions

This report has been prepared in accordance with generally accepted environmental methodologies referred to in ASTM 1527-2013, and contains all of the limitations inherent in these methodologies. No other warranties, expressed or implied, are made as to the professional services provided under the terms of our contract and included in this report. The conclusions of this report are based in part, on the information provided by others. The possibility remains that unexpected environmental conditions may be encountered at the site in locations not specifically investigated. The services performed and outlined in this report were based, in part, upon visual observations of the site and attendant structures. Our opinion cannot be extended to portions of the site that were unavailable for direct observation, reasonably beyond the control of EFI Global, Inc. The objective of this report was to assess environmental conditions at the site, within the context of our contract and existing environmental regulations within the applicable jurisdiction. Evaluating compliance of past or future owners with applicable local, provincial, and federal government laws and regulations was not included in our contract for services. Our observations relating to the condition of environmental media at the site are described in this report. It should be noted that compounds or materials other than those described could be present in the site environment.

1.3 Reliance

This report has been prepared for the sole use of Stanford Pasadena, LLC. The contents should not be relied upon by any other parties without the express written consent of Stanford Pasadena, LLC and EFI Global, Inc.

1.4 User Responsibilities

The United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) and ASTM E 1527-13 Phase I Standards require that the user conduct independent research and consider certain information before purchasing a property:

- Obtain a recent (less than 180 days old) title report prepared for the subject property. The report should be reviewed to obtain information regarding environmental clean-up liens or activity and use limitations (AULs) with regard to the subject property. If environmental cleanup liens or AULs encumbering the subject property or in connection with the subject property are identified, the user should provide that information to the Environmental Professional (EFI Global, Inc.). If the user has actual knowledge of environmental cleanup liens or AULs encumbering the subject property or in connection with the subject property, the user should provide that information to the Environmental Professional (EFI Global, Inc.).
- The user should provide the Environmental Professional (EFI Global, Inc.) with any specialized knowledge the user has with regard to recognized environmental conditions in connection with the property.
- If the user is aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions, the user should provide the information to the Environmental Professional (EFI Global, Inc.).
- If this Phase I ESA was prepared as due diligence for a property transaction, it is the responsibility
 of the user to consider the relationship of the purchase price to the fair market value of the property.
 If the purchase price is significantly lower than the fair market value, the user should identify
 the alternate reason for the low purchase price if the lower purchase price is not related to the
 property being affected by hazardous substances or petroleum products.

2.0 SITE DESCRIPTION

EFI Global, Inc. has performed a Phase I for a commercial property located at 111 South Hudson Avenue and 118 South Oak Knoll Avenue, in Los Angeles County and the City of Pasadena, California. The subject property is composed of two parcels, Assessor's Parcel Numbers (APN) 5734-025-027 towards the west and APN 5734-025-029 towards the east, between South Hudson and South Oak Knoll Avenues, approximately 170-feet south of East Green Street, in the City of Pasadena. The subject property is approximately 1.12 acres in size and is occupied by two commercial structures that are approximately 15,400 total square feet in size. The buildings are currently occupied by mental health service offices. The remaining portions of the property consist of concrete paved parking areas. The surrounding area is used for commercial and residential purposes.

Natural gas and electrical services are provided to the subject property by Southern California Gas Company and Southern California Edison, respectively. Potable water and sewer services are provided by the City of Pasadena.

2.1 Current and Historical Addresses

According to our research and information provided by the Client, the following addresses have been found to be associated with the subject property: 116 and 116 ½ Franklin Avenue, 101, 103, 111, 113, 113 ½, 123, 123 ½ South Hudson Avenue, and 118 and 120 South Oak Knoll Avenue, Pasadena, California.

2.2 Legal Description

According to the Los Angeles County Assessor's Office, the subject property is located in the City of Pasadena, and is described by the Assessor's Parcel Numbers: 5734-025-027 and 5734-025-029.

2.3 Physical Setting

The elevation of the subject property is approximately 810 feet above sea level (USGS Pasadena, California 7.5 minute topographic quadrangle). Based on our review of the GeoCheck Section of the EDR Radius report, the subject property is not situated within a 100-year FEMA Flood Zone. No wetlands were identified at the property or adjoining/immediately surrounding properties. Based on our review of groundwater data presented in the State Water Resources Control Board (SWRCB) GeoTracker website, groundwater was detected at groundwater monitoring well ID 01N12W34H001S (1151 Oxford Road) approximately 1.70 miles southeast of the subject property at approximately 170-feet below ground surface. However, perched and semi-perched aquifers may be present beneath the site. Based on topographic map interpretation, regional groundwater flow direction is estimated to be towards the southeast; however local groundwater flow direction may vary.

3.0 SITE RECONNAISSANCE/INTERVIEWS

3.1 Site Reconnaissance

On March 29, 2017, Mr. Min Kim of EFI Global, Inc. conducted a site reconnaissance of the subject property. The site inspection was conducted to attempt to identify current site use(s), current hazardous materials storage, and evidence of past site uses and hazardous material storage and to identify evidence of other recognized environmental conditions. The following table summarizes our Site Reconnaissance observations:

| Yes | No | Observed Feature(s) |
|-----|----|--|
| | ~ | Hazardous Substances and Petroleum Products Containers |
| | ~ | Underground and/or Aboveground Storage Tanks |
| ~ | | Drains/Sumps/Clarifiers/Sewer Interceptors/Septic Systems |
| | ~ | Stained or Corroded Surfaces/Stained Soil or Stressed Vegetation |
| | ~ | Pits/Ponds/Lagoons/Wetlands |
| | ~ | Electrical Equipment with the Potential to contain Fluids |
| | ~ | Production or Monitoring Wells |
| | ~ | Evidence of Solid Waste Disposal/Dumping/Fill Areas |

3.1.1 Exterior Observations

The exterior portions of the site consist of concrete paved parking areas and access ways and landscaped areas. The concrete pavement appeared to be in good condition with no cracking and only minor staining observed from regular vehicular use. Two trash dumpster containers containing non-hazardous debris were observed on the southeast portion of Assessor's *Parcel Number 5734-025-029*. No hazardous materials or wastes were observed in the vicinity. A storm drain was also observed on the east portion of *parcel -029*. The drain appeared to be in good condition with no staining and no odors observed.

No recognized environmental conditions were observed in this portion of the site.

3.1.2 Interior Observations

The subject property contains two onsite structures of wood frame construction and concrete slab foundation. The structure on *parcel -027* is two stories and has a flat roof. The structure on *parcel -029* is one story, with brick facade, and has a pitched roof. Building materials observed in both structures included drywall, carpet and linoleum floors, and 2' by 2' drop ceiling panels. Both structures consisted of offices, conference rooms, bathrooms, and employee break rooms. No floor drains were observed in the bathrooms or employee break room areas of either structure. Household cleaning supplies were observed throughout both structures. Based on the low quantity of the cleaning supplies stored, they are unlikely to represent a significant environmental concern.

No significant hazardous material storage or recognized environmental conditions were observed in the interior portions of the site.

3.1.3 Reconnaissance Limitations

No significant limitations were encountered during our reconnaissance of the subject property.

3.2 Adjoining and Immediately Surrounding Properties

The adjoining and immediately surrounding properties (within 100-feet of the subject property boundary) were visually and physically observed from public right-of ways and the subject property in an attempt to identify recognized environmental conditions. Our observations are summarized in the following table:

| Location | Address(es) | Uses/Observations |
|----------|-----------------------------|--------------------|
| North | 104 South Oak Knoll Avenue | Parking lot |
| | 770-790 East Greet Street | Commercial office |
| South | 128 South Oak Knoll Avenue | Church |
| | 133 South Hudson Avenue | Commercial office |
| East | 111 South Oak Knoll Avenue | Apartments |
| West | 114-124 South Hudson Avenue | Commercial offices |

[•] The immediately surrounding property to the north (790 East Green Street) was listed on the regulatory database report and is further discussed in Section 5.2 below.

3.3 Surrounding Area Observations

3.3.1 Surrounding Property Uses

The surrounding area is mostly developed with commercial and residential structures.

3.3.2 Surrounding Geography

The surrounding area is mostly flat with a slight topographic slope to the southeast. No nearby hills or bedrock outcroppings were observed in the area of the site. No lakes, ponds, rivers or streams were observed in the surrounding area.

3.4 Interviews

3.4.1 Property Owner

The property owner was not available for interview during the course of this investigation.

3.4.2 Key Site Manager

Ms. Rhonda Mairs, the site manager, was interviewed during the course of the site reconnaissance. According to the site manager, no hazardous materials are utilized at the subject property. Ms. Mairs was not aware of any environmental conditions at the subject property.

3.4.3 Property Occupants

No occupants were available for interview during the completion of this report.

3.4.4 Past Owners, Operators and Occupants

Past owners, operators and occupants were not able to be identified for an interview for this report.

3.4.5 Prospective Purchaser

Mr. Brian Taban, the prospective purchaser, completed a potential purchaser questionnaire for the purpose of this report, dated April 3, 2017. Mr. Taban was unaware of any recognized environmental conditions such as underground storage tanks or any generated hazardous materials associated with the property.

3.4.6 Neighboring Property Owners/Tenants

Per ASTM, an attempt to interview neighboring property owners/tenants should be conducted when the subject property is vacant and unsecured land.

As the subject property is currently developed and utilized for commercial purposes, no neighboring property owners/tenants were interviewed during this assessment.

3.5 User Provided Information

The United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) and ASTM 1527-13 Phase I Standards require that the Report User conduct independent research and consider certain information before purchasing a property. EFI Global, Inc. recommends that the User documents completion of the following items:

3.5.1 Lien Search

The User is required to obtain a recent (less than 180 days old) title report prepared for the subject property. The report should be reviewed to obtain information regarding environmental clean-up liens or activity and use limitations with regard to the subject property. If environmental cleanup liens or activity and use limitations encumbering the subject property or in connection with the subject property are identified, the User should provide that information to the Environmental Professional (EFI Global, Inc.). If the User has actual knowledge of environmental cleanup liens or activity and use limitations encumbering the subject property or in connection with the subject property, the User should provide that information to the Environmental Professional (EFI Global, Inc.).

The user did not provide EFI Global any information either verbally or in writing (i.e. Title Report)
regarding environmental cleanup liens or activity and use limitations encumbering the subject
property. An environmental lien search was not requested by the user; however, based on
our review of the Department of Toxic Substances Control (DTSC) EnviroStor Database, no
environmental liens enforced by the DTSC were identified.

3.5.2 Specialized Knowledge

The User should provide the Environmental Professional (EFI Global, Inc.) with any specialized knowledge the User has with regard to recognized environmental conditions in connection with the property.

• The User has no specialized knowledge with respect to recognized environmental conditions in connection with the property.

3.5.3 Commonly Known or Reasonably Ascertainable Information

If the User is aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions, the User should provide the information to the Environmental Professional (EFI Global, Inc.).

 The User is not aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions.

3.5.4 Property Valuation

If this Phase I ESA was prepared as due diligence for a property transaction, it is the responsibility of the User to consider the relationship of the purchase price to the fair market value of the property. If the purchase price is significantly lower than the fair market value, the User should identify the alternate reason for the low purchase price if the lower purchase price is not related to the property being affected by hazardous substances or petroleum products.

· According to the User, the purchase price generally reflects the fair market value of the property.

3.5.5 Purpose of Performing Phase I ESA

According to the User, the user is a prospective purchaser of the subject property and the Phase I
is being performed to qualify for landowner liability protections under CERCLA as well as identify
business risks related to the property associated with environmental conditions.

3.6 User Provided Documents

• No documents were provided to EFI Global, Inc. by the Report User.

4.0 HISTORICAL LAND USE

A review of historical data derived from standard historical resources is provided in this section. The objective of consulting historical sources is to develop a history of the previous uses of the property and surrounding area, in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the property. During our historical review, acute attention is paid to the subject property. Data relating to the adjoining and immediately surrounding properties (within 100-feet of the subject property boundary) and the surrounding area is reviewed to the extent that it is revealed in the course of researching the property itself.

4.1 Aerial Photography Review

Aerial Photography of many portions of the United States dates back to the 1920's. Items searched for in each photograph included, but were not limited to: evidence of tanks, gas stations, industrial site usage, water drainage pathways, areas which show evidence of drums or excessive debris, discolored or stained soils, areas of distressed vegetation, et cetera.

Aerial Photograph Coverage was available from Environmental Data Resources (EDR) for the years: 1928, 1938, 1949, 1952, 1964, 1972, 1981, 1989, 1994, 2005, 2009, 2010, and 2012. A summary of our observations is presented in the following table.

| Year | Subject Property | Notable Adjoining Property Observations | Notable Observations of the Surrounding Area |
|----------------------------|---|---|--|
| 1928, 1938, and 1949 | The subject property appears to be developed for residential purposes. | Residential | Commercial and residential |
| 1972, 1981, 1989, 1994, | The subject property appears to be developed with the existing commercial structures. | Commercial and residential | Commercial and residential |

4.2 Building Department Records Review

The addresses identified as current and historical addresses for the subject property were researched at the City of Pasadena Building Department. Items considered in the course of the building permit review are previous site usage, previous ownership, and the construction or demolition of any structures that may have had a negative environmental impact on the property. The following table summarizes relevant building permits obtained and reviewed:

| 118 South Oak Knoll Avenue | | |
|----------------------------|----------------|--|
| Date | Owner/Occupant | Purpose |
| 01/04/1940 | KE Felton | Plumbing permit for bath tub and heater |
| 10/04/1950 | , | Building permit to construct new structure |

| 118 South Oak Knoll Avenue | | |
|----------------------------|--------------------------|--|
| Date | Owner/Occupant | Purpose |
| 11/28/1951 | Community Service Center | Tenant improvement to expand existing office building |
| 11/01/1953 | Community Service Center | Plumbing permit for floor sinks and gas outlets |
| 09/11/1958 | Community Service Center | Electrical permit to rewire building |
| 09/22/1976 | United Way | Plumbing permit for two water heaters |
| 04/01/1980 | Foothill Family Service | HVAC permit |
| 11/11/1981 | Foothill Family Service | Reroofing permit |
| 06/23/1992 | Foothill Family Service | Install dedicated circuits for coffee machines and microwave |
| 06/02/1994 | Foothill Family Service | Two H/C Ramps |
| 08/30/1995 | Foothill Family Service | Tenant improvement - renovation |
| 06/18/2003 | Foothill Family Service | Sign permit for free standing signs |

| 111 South Hudson Avenue | | |
|-------------------------|-------------------------|--|
| Date | Owner/Occupant | Purpose |
| 01/09/1951 | Ed White | Construct underpin foundation for commercial structure |
| 08/03/1977 | C. Clay | Install T-bar ceiling for office structure |
| 09/06/1977 | Zach Gray & Sons | Tenant improvement - install 10-feet wall |
| 11/14/1986 | Robert Baker | Install toilet for existing washroom |
| 06/12/2003 | Foothill Family Service | Sign permit for new sign |

- There were no building permits identified for the other current or historical site addresses.
- The remaining permits obtained and reviewed were for minor tenant improvements, sign permits, or other permits which are not significant and did not contain information about the historical site use or the potential for recognized environmental conditions.

4.3 City Directory Review

City directories have been published since the 1800's and provide detailed occupant information for the property and its surrounding area at five-year intervals. The purpose of the City Directory research is to attempt to determine the businesses that historically occupied the subject property. Historical City Directories provided by EDR and reviewed by EFI Global, Inc. are listed below.

| 118 South Oak Knoll Avenue | | |
|----------------------------|--|--|
| Date | Listing | |
| 1937 and 1942 | Residential | |
| 1961 | Community Service Center, Family Services of Pasadena, and Volunteer | |
| | Services Placement Office | |

| 118 South Oak Knoll Avenue | | |
|----------------------------|--|--|
| Date | Listing | |
| | Catholic Welfare Bureau, Community Planning Council of Pasadena, Community Service Center, Family Service Center of Pasadena, United Way Inc., and Volunteer Services Placement Office | |
| 1971 | Martha Steen | |
| 1976 | Catholic Big Brothers, Catholic Social Services, Foothill Family Services, Local Business Development Organization, Pasadena Urban Coalition, and United Way Service Center. | |

| 101 South Hudson Avenue | | |
|-------------------------|-------------|--|
| Date | Listing | |
| 1932, 1947, and 1950 | Residential | |

| 103 South Hudson Avenue | | | |
|-------------------------|-------------|--|--|
| Date | Listing | | |
| 1921, 1927, 1937, | Residential | | |
| 1947, and 1950 | | | |

| 111 South Hudson Avenue | | | |
|--|---|--|--|
| Date | Listing | | |
| 1951,1956, and 1957 | State Board of Equalization, California Alcoholic Beverage Control Department | | |
| 1960, 1961, 1962, 1964, 1965, 1966, 1971, and 1975 | California State Board of Equalization | | |
| 1976 | Vacant | | |
| 1980 | Robert Baker Attorney's Office, CNA Insurance, Connecticut Mutual Life Insurance Co., Lewin Ann Attorney's Office, Stephen Edwards Attorney's Office, Warren Orfall Public Accountant Office, and Pasadena Escrow Inc. | | |
| 1981 | Robert Baker Attorney's Office, Bradley Douglas Insurance Services, and Lewin & Lewin Attoreny's at Law | | |
| 1985 | Creative Transportation, Dorothy Hall Realtor, Edgar Lauther Management Consultant, Reichert & Associates Inc., Connecticut Mutual Life Insurance Co., Consumers Guilde Ltd, The Roth Group, and Robert Baker and Linda Thornton Attorney's Office. | | |
| 1986 | Robert Baker Attorney, Consumers Guide LTD, HA Finance, and Valentina Lert DC. | | |
| 1990 | Michael Doyle, Stone & Doyle | | |
| 1995 | Baylon Design, Doctor Clark Charles, Doyle Michael Attorney, K Imports, Martin Douglas Law Corporation, Nell Recorders, Stone & Doyle | | |

| 113 South Hudson Avenue | | | |
|-------------------------|-------------|--|--|
| Date Listing | | | |
| 1921, 1927, 1937, | Residential | | |
| 1947, and 1950 | | | |

| 123 South Hudson Avenue | | | |
|-------------------------|-------------|--|--|
| Date | Listing | | |
| 1932 | Residential | | |

• Listings for adjoining and immediately surrounding properties reviewed during the course of researching the subject property did not reveal any uses of concern.

4.4 Sanborn Map Review

Originally compiled by the Sanborn Map Company of Pelham, New York for fire insurance companies to assess fire risks related to building materials and hazardous materials storage, today Sanborn Maps are an invaluable tool for Environmental Professionals in determining historical site use and the potential for environmental conditions. Sanborn Map Coverage is available from as early as 1867 in some cities. Although Sanborn maps were created for approximately twelve thousand cities and towns in the United States, Canada, and Mexico, Sanborn Map Coverage is not available in newer and more rural communities. Sanborn Map Coverage was available from EDR for the years: 1903, 1910, 1931, 1950, and 1970. A summary of our observations is presented in the following table.

| Year | Subject Property | Notable Adjoining Property Observations | Notable Observations of the Surrounding Area |
|------|--|---|--|
| 1903 | The subject property appears to be developed with a residential structure on <i>Parcel -027</i> and undeveloped land on <i>Parcel -029</i> . | Residential and undeveloped land | Residential and undeveloped land. |
| 1910 | The subject property appears to be developed with four single family residential structures and associated private garages. | Residential and undeveloped land | Residential and undeveloped land. |
| 1931 | The subject property appears to be developed with five single family residential structures and associated private garages. | Residential. A gas station is depicted north adjoining property of Parcel -029. | Commercial and residential. |

| Year | Subject Property | Notable Adjoining Property Observations | Notable Observations of the Surrounding Area |
|------|---------------------------------|---|--|
| 1950 | The subject property appears to | Commercial and | Commercial and residential. |
| and | be developed with the existing | residential (residential | |
| 1970 | commercial structures. | structures are | |
| | | demolished and | |
| | | replaced with | |
| | | commercial structures | |
| | | or parking lots by | |
| | | 1970. A gas station is | |
| | | depicted north | |
| | | of Parcel -029. (the | |
| | | gas station is | |
| | | redeveloped with a | |
| | | commercial office by | |
| | | 1970) | |

- Sanborn maps indicated the following historical street addresses associated with the subject property:
 116 and 116 ½ Franklin Avenue, 101, 103, 111, 113, 113 ½, 123, and 123 ½ South Hudson Avenue,
 and 118 and 120 South Oak Knoll Avenue. These addresses were researched during the completion of this report.
- Sanborn maps depicted a gas station on the north adjoining site of *Parcel -029* in at least 1950. For more information refer to Section 5.2.

4.5 Historical Summary

4.5.1 Subject Property

According to EFI Global, Inc.'s interpretation of the historical research data, the west portion of the subject property (*Parcel -027*) was developed with a residential structure sometime prior to 1903. By 1910, the east portion of the subject property (*Parcel -029*) was also developed with three residential structures. The subject property remained in this configuration until at least 1949. In 1950, all residential structures on both parcels were demolished and in 1951, the existing commercial structures were constructed.

Historical tenants of 118 South Oak Knoll Avenue have included: residential (1937-1942), Community Service Center (1950-1961), Family Services of Pasadena (1961-1965), Volunteer Services Placement Office (1961-1965), Martha Steen (1971), Catholic Big Brothers (1976), Catholic Social Services (1976), Local Business Development Organization (1976), Pasadena Urban Coalition (1976), United Way (1976), and Foothill Family Service (1976-present). Historical tenants of 101 South Hudson Avenue was residential from at least 1932 through 1950. Historical tenants of 103 South Hudson Avenue was residential from at least 1921 through 1950. Historical tenants of 111 South Hudson Avenue included: Ed White (1951), State Board of Equalization (1951-1975), California Alcoholic Beverage Control Department (1951-1957), Vacant (1976), C.Clay (1977), Zach Gray & Sons (1977), Robert Baker Attorney's Office (1980-1986), CNA Insurance (1980), Connecticut Mutual life Insurance Co. (1980-1985), Lewin Ann Attorney's Office (1980-1981), Stephen Edwards Attorney's Office (1980), Warren Orfall Public Accountant Office (1980), Pasadena

Escrow Inc (1980), Bradley Douglas Insurance Services (1981), Creative Transportation (1985), Dorothy Hall Realtor (1985), Edgar Lauther Management Consultant (1985), Reichert & Associates Inc. (1985), Consumers Guide LTD (1985-1986), The Roth Group (1985), HA Finance (1986), Valentina Lert DC (1986), Michael Doyle (1990), Stone & Dolye (1990-1995), Baylon Design (1995), Dr. Clark Charles (1995), K Imports (1995), Martin Douglas Law Corporation (1995), Nell Recorders (1995), and Foothill Family Service (2003-present).

4.5.2 Adjoining and Immediately Surrounding Properties

According to EFI Global, Inc.'s interpretation of the historical research data, the adjoining and immediately surrounding properties were either developed for residential purposes or undeveloped land since prior to 1903. Over time residential development increased and by 1931, all undeveloped land was developed for residential purposes. By 1950, commercial development occurred and increased over time reflecting the present day configuration.

4.5.3 Surrounding Area

According to EFI Global, Inc.'s interpretation of the historical research data, the surrounding area was either developed for residential purposes or undeveloped land since prior to 1903. By 1931 residential development increased and commercial development began. Overtime residential and commercial developments increased reflecting the present day configuration.

4.6 Historical Data Gaps

The earliest historical resource obtained during this investigation was a Sanborn map from 1903 which indicated development of the subject property at *Parcel -027* for residential uses. The lack of historical data sources for the subject property dating back to first developed uses represents historical data source failure. However, it is assumed that prior to 1903, the subject property would have been developed for residential uses, if not undeveloped. Based on this notion, this limitation is not expected to significantly alter the findings of this investigation.

5.0 REGULATORY DATABASE REPORT

A radial database search was conducted in accordance with the specifications defined in ASTM E 1527-13 which sets the radial search distances for each regulatory database. The radial database search was conducted by EDR on March 22, 2017. A copy of the database report is presented in Appendix II of this report. The following table summarizes required databases reviewed, the approximate search distances, and indicates if the subject site, adjoining/immediately surrounding properties or surrounding sites are listed on the respective database.

Following the table are summaries of the information found in the relevant database listings and our opinion regarding the potential for the subject property to be impacted. Our opinion is based on the information found in the database listings, through other historical and regulatory resources, "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (ASTM E2600-15), and assumed groundwater flow direction. As discussed in Section 2.3, Groundwater is estimated to be in excess of 100-feet below ground surface in the area of the site and is assumed to flow towards the southeast.

| DATABASE | Search Distance (Miles) | Subject Site (Yes/ No) | Adjacent Site (Yes/ No) | Total Listings (#) |
|---|-------------------------------|------------------------------|-------------------------------|--------------------------|
| Federal National Priorities List (NPL) | 1.0 | No | No | 0 |
| Federal De-listed NPL | 1.0 | No | No | 0 |
| Federal CERCLIS | 0.5 | No | No | 0 |
| Federal CERCLIS NFRAP | 0.5 | No | No | 0 |
| Federal RCRA CORRACTS | 1.0 | No | No | 0 |
| Federal RCRA non-CORRACTS TSD | 0.5 | No | No | 0 |
| Federal RCRA Generators | 0.25 | No | No | 13 |
| Federal Institutional/Engineering Controls | 0.5 | No | No | 0 |
| Federal ERNS | Property | No | No | 0 |
| State/Tribal Equivalent NPL | 1.0 | No | No | 0 |
| State/Tribal Equivalent CERCLIS | 1.0 | No | No | 4 |
| State/Tribal Landfill | 0.5 | No | No | 0 |
| State/Tribal Underground Storage Tank (UST) | 0.25 | No | No | 5 |
| State/Tribal Leaking Underground Storage Tank (LUST/SLIC) | 0.5 | No | No | 3 |
| State/Tribal Institutional/Engineering Controls | 0.5 | No | No | 0 |
| State/Tribal Voluntary Clean-up Sites | 0.5 | No | No | 0 |
| State/Tribal Brownfield Sites | 0.5 | No | No | 0 |

5.1 Subject Property

The subject property is not listed on any of the regulatory databases researched.

5.2 Adjoining and Immediately Surrounding Properties

Penn Oil & Supply Co. / Kirks Texaco Service (790 East Green Street) – The north adjoining property (hydrologically cross/up-gradient) is listed on the EDR Historical Auto Station (EDR US Hist Auto Stat) database. According to the listing, gas stations Penn Oil & Supply Co. and Kirks Texaco Service operated on the property in at least 1932 through 1942, and in 1951, respectively. No further information was available. EFI Global, Inc. conducted a Vapor Intrusion Risk Assessment at this property on December 22, 2016. A total of seven soil vapor probes were advanced at a depth of 5-feet bgs throughout the site and all soil vapor samples were analyzed for volatile organic compounds (VOCs). No detectable concentrations of VOCs in soil vapor were present in the samples collected at the property. Based on the foregoing, this listing is not expected to represent a significant environmental concern for the subject property.

5.3 Surrounding Area

In our opinion, none of the other sites listed on the regulatory database report pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.

5.4 Orphan Sites

Orphan sites are unmappable sites which appear in a list form in the Radius Map Report rather than on the standard Radius Map. Two orphan sites were identified in the Radius Map Report prepared for this site. The sites were manually mapped to determine the location of the site relative to the subject property and groundwater gradient. The following conclusions were made:

In our opinion, none of the orphan sites listed pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.

6.0 AGENCY FILE REVIEWS

6.1 State Agencies

The regional offices of the Los Angeles Regional Water Quality Control Board (LARWQCB), Department of Toxic Substances Control (DTSC), and South Coast Air Quality Management District (SCAQMD) were contacted regarding permits and site investigation files for the subject property. Additionally, the State Water Resources Control Board (SWRCB) GeoTracker, DTSC Hazardous Waste Tracking System (HWTS) and EnviroStor, and SCAQMD Facility Information Detail (FIND) databases were reviewed for information pertaining to the subject property.

- According to responses to our requests from DTSC and SCAQMD and a review of the databases, there
 are no files for the subject property.
- The LARWQCB responded to our request indicating there were records for the subject property.
 However, the response was erroneous and the records were for 111 Hudson Avenue in the City of Industry. Therefore no records pertaining to the subject property were found by LARWQCB.

The Division of Oil, Gas, and Geothermal Resources (DOGGR) Online Mapping System was reviewed for information pertaining to oil and gas exploration on or nearby the subject property.

• No oil wells were identified within 500 feet of the subject property.

6.2 City/County Agencies

The Los Angeles County Department of Health Services Public Health Investigations (LACDHS PHI), Pasadena Fire Department (PFD), Los Angeles County Department of Public Works (LACDPW), and Los Angeles County Sanitation District (LACSD) were contacted regarding hazardous materials, underground storage tank, and industrial waste discharge records for the subject property.

 According to responses to our requests from the PFD, LACDPW, and LACSD, there are no files for the subject property.

6.3 Agency File Review Limitations

At the time this report was issued, no response has been received from LACDHS PHI. Should relevant information be obtained from this agency subsequent to issuing this report, an addendum will be prepared and provided to the Client.

7.0 NON-SCOPE ENVIRONMENTAL RISKS

ASTM Standard E1527-13 identifies additional conditions which, should they exist at the subject property, may create a human health risk to the occupants of the site. These risks may also create additional costs to the property owner in the form of identification, operations & maintenance, and cleanup or remediation.

7.1 Asbestos Containing Building Materials

Asbestos is a group of naturally occurring minerals used in many products, including building materials vehicle brakes, insulation and other products that require resistance to heat and corrosion. Asbestos includes: chrysotile, amosite, crocidolite, tremolite asbestos, anthophyllite asbestos, actinolite asbestos, and any of these materials that have been chemically treated and/or altered.

The inhalation of asbestos fibers by workers can cause cancer and other serious diseases of the lungs and other organs that may not appear until years after the exposure has occurred. For instance, asbestosis can cause a buildup of scar-like tissue in the lungs and result in loss of lung function. Asbestos fibers associated with these health risks are too small to be seen with the naked eye, and smokers are at higher risk of developing some asbestos-related diseases.

Asbestos-containing materials (ACM) do not always pose a hazard to occupants and workers in buildings that contain these materials. Intact, undisturbed ACMs generally do not pose a health risk. ACMs may become hazardous and pose an inhalation risk when they are damaged, disturbed in some manner, or deteriorate over time and asbestos fibers are released into building air.

ACM can be found in a multitude of building products which include decorative and acoustical plaster texture, fire-proofing (Monokote), joint compound, attic and wall insulation, resilient floor covering, mastic, recessed lighting fixtures, wiring, elevator brakes, fire doors, pipe insulation, pipe gaskets, duct insulation, duct tape, siding and roofing materials (tar/shingles), textured paint, stucco, concrete, asphalt underlayment (Petromat) and plaster.

Local jurisdictions have specific laws and regulations regarding asbestos and actions including building renovations and building demolition.

Based on the age of the onsite structures, there is a potential for asbestos containing building materials
at the site, however, no testing was completed as part of this report. Potential ACM observed during
the reconnaissance included drywall, carpet mastic, and 2' by 2' drop ceiling panels. However observed
potential ACM appeared to be in good condition.

7.2 Lead-Based Paint

Although the use of lead-based paint in residential structures has been prohibited since 1978, it may still be used in commercial and industrial buildings. It is approximated that 80 percent of buildings built prior to 1978 contain lead paint. Even at low levels, lead poisoning can cause IQ deficiencies, reading and learning disabilities, impaired hearing, reduced attention spans, hyperactivity and other behavior problems with children under 6 years old being most at risk.

Lead is a highly toxic metal that was used for many years in products found in and around our homes and commercial buildings. Lead can be found in dust from friction surfaces of windows and doors that are painted with lead-based paint and from building components coated with lead-based paint that has begun

peeling, flaking and chalking. There is also the potential for soil to have elevated lead levels due to leaching from lead based paint on nearby structures and deposition of airborne lead when leaded fuel was in use prior to the 1976 ban and phase out.

Since the 1980's, lead has been phased out in gasoline, reduced in drinking water, reduced in industrial air pollution, and banned or has been limited in use in consumer products.

Between the local, State and Federal agencies, including the Environmental Protection Agency (EPA), Department of Housing and Urban Development (HUD), Occupational Safety & Health Administration (OSHA) and the California Department of Public Health (CDPH), each state has various action limits that have been enacted with the intent to prevent human exposure and contamination of the surrounding environment.

• Based on the age of the onsite structures, there is a potential for lead based paint at the site. However all painted surfaces appeared to be in good condition.

7.3 Radon

Radon is a radioactive gas that has been found in structures all over the United States. Radon is produced from the natural breakdown of uranium in soil, rock, and water. Radon typically moves up through the ground and into structures through cracks and other holes in the foundation. Movement of radon through the earth is strongly influenced by moisture content and permeability of soil, porosity, and degree of fracturing in rocks, as well as surface meteorological conditions. High levels of radon have been discovered in every state.

Radon cannot be seen, smelled, or tasted. Breathing air-containing radon may increase the risk of getting lung cancer. The Surgeon General of the United States has warned that radon is the second leading cause of lung cancer in the United States today after smoking.

Testing for the presence of radon is fairly inexpensive, simple and is the only way to be certain of the on-site concentrations. Various types of sampling methods exist to determine the concentration. On-site radon sampling was not performed during the completion of this assessment.

Based on research by the United States Environmental Protection Agency (USEPA), the average radon
concentrations for Los Angeles County are between 2.0 picoCuries per liter (pCi/L) and 4.0 pCi/L,
below the 4.0 pCi/L action level set by the USEPA; however, site specific radon levels vary greatly
within the EPA radon zones and on-site radon measurements would need to be collected in order to
determine the radon levels at the subject property.

7.4 Wetlands

According to the Clean Water Act, a wetland is "those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions." Wetland areas have been identified as ecologically diverse and sensitive areas and are generally subject to more stringent development, re-development, and building regulations.

• The U.S. Fish and Wildlife Service National Wetlands Inventory was reviewed to determine if the subject property is situated within an identified wetland. According to the USFWS, the subject property is not located within a wetland area.

7.5 Mold

Mold and mildew are simple, microscopic organisms in the Fungi kingdom that can grow virtually anywhere if they have adequate moisture, nutrients, air and appropriate temperatures. Depending on the particular mold or fungus, growing colonies can be almost any color. Most household molds and fungi (mildews) are white, black, grey, or brown colored. Spores of dozens of kinds of mold and fungus (mildew) are present at all times in indoor and outdoor air. These spores can settle, germinate and grow wherever good growth conditions are found. They can grow on soil, plants, dead plant materials, foods, fabrics, paper, wood and many other materials found within buildings. Many molds are not harmful and actually have a beneficial role in the environment and in living systems. In soil, molds play a crucial part in decomposition of organic matter and in making nutrients available to plants.

When mold and fungi (mildews) growth occurs in buildings, it can be very destructive to the materials on which they grow and cause high levels of airborne mold spores and volatile organic compounds associated with the characteristic musty / moldy odor. They cause staining, decomposition (rotting of materials) and objectionable, musty odors. Where colonies are extensive they can also produce enough spores, and by-products to be harmful to health. Many of the by-products of mold and fungus (mildew) are irritating to skin, eyes and respiratory tracts. Some molds produce true allergic sensitization and allergic reactions in susceptible people. Some molds produce toxic by-products that could be harmful to skin, and poisonous if ingested or inhaled in quantity. Persons with compromised immune systems may even experience systemic fungal infections of the respiratory tract.

EFI Global, Inc. observed a limited amount of interior areas of the subject building(s) in order to identify the significant, visible presence of mold. This activity was not intended to discover all areas which may be affected by mold growth at the subject property. Potential areas of mold not observed as part of this limited assessment, include but are not limited to, pipe chases, HVAC systems and within enclosed wall and ceiling cavities that may be present in the subject property. A complete mold assessment, which may include various types of sampling, would be required to determine if mold levels within the subject building(s) are at levels acceptable by industry standards.

 EFI Global, Inc. did not observe visible or olfactory indications of the presence of mold, nor did EFI Global, Inc. observe obvious indications of significant water damage. No sampling was conducted as part of this assessment.

7.6 Methane Gas

In response to growing concern regarding methane intrusion into buildings and to the potential for methane build-up underneath buildings, certain municipalities have established methane requirements for structures based on the proximity to oil wells and landfills. If a subject property is located in the proximity of active or abandoned oil wells or landfills, methane mitigation devices installed prior to construction activities at a subject property may be necessary.

• The Los Angeles County Department of Public Works, Solid Waste Information System was reviewed to determine if the property is within 1,000 feet of a landfill or 300 feet of an oil well. According to the information reviewed, the subject property is not located within 1,000 feet of a landfill or 300 feet of an oil well. Therefore, the presence of methane beneath the property is considered low.

8.0 FINDINGS

EFI Global, Inc. has performed a Phase I Environmental Site Assessment (Phase I) for Stanford Pasadena, LLC (Client) for a commercial property located at 111 South Hudson Avenue and 118 South Oak Knoll Avenue, in Los Angeles County and the City of Pasadena, California, Assessor's Parcel Numbers: 5734-025-027 and 5734-025-029. The research conducted for this study and the report prepared are in conformance with the United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) standard and the American Society for Testing and Materials (ASTM) E 1527-13 scope of work.

8.1 CONCLUSIONS

EFI Global, Inc. has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice 1527-13, at 111 South Hudson Avenue and 118 South Oak Knoll Avenue, Pasadena, California, the subject property. Any exceptions to or deletions from this practice are described in the individual sections of this report. This assessment has revealed no evidence of recognized environmental conditions or *de minimis* conditions in connection with the subject property.

Recognized Environmental Condition (REC)

In our opinion, no RECs were identified during the course of this assessment.

Historical Recognized Environmental Condition (HREC)

In our opinion, no HRECs were identified during the course of this assessment.

Controlled Recognized Environmental Condition (CREC)

In our opinion, no CRECs were identified during the course of this assessment.

De Minimis Condition

In our opinion, no de minimis conditions were identified during the course of this assessment.

8.2 RECOMMENDATIONS

Based on the foregoing, no additional investigation is recommended at this time.

9.0 SIGNATURES

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Prepared By: Date: April 11, 2017

Min Kim

Project Manager

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2017 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in bold italics are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

| Equal/Higher Elevation | Address | Direction / Distance | Map ID | Page |
|------------------------|---------------------|-------------------------|--------|------|
| TARGET STORE T0883 | 777 E COLORADO BLVD | N 1/8 - 1/4 (0.167 mi.) | F34 | 32 |
| T0883 | 777 E COLORADO BLVD | N 1/8 - 1/4 (0.167 mi.) | F35 | 38 |

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 10 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

| Lower Elevation | Address | Direction / Distance | Map ID | Page |

| WALGREENS #11442 | 310 S LAKE AVE | SSE 1/8 - 1/4 (0.240 mi.) | 48 | 57 |

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/31/2016 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 3 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

SWRCY: A listing of recycling facilities in California.

A review of the SWRCY list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 SWRCY site within approximately 0.5 miles of the target property.

| Equal/Higher Elevation | Address | Direction / Distance | Map ID | Page |

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 22 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 6 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Additional Panels in search area: FEMA Source Type

06037C1400F FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

PASADENA YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION
MAP ID FROM TP GROUNDWATER FLOW
Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

Era: Cenozoic Category: Stratifed Sequence

System: Quaternary Series: Quaternary

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

| Soil Layer Information | | | | | | | |
|------------------------|-------------------------|----------|--------------------|--------------|--------------|------------------------------|------------------------|
| | Boundary Classification | | | | | | |
| Layer | Upper | Lower | Soil Texture Class | AASHTO Group | Unified Soil | Permeability Rate (in/hr) | Soil Reaction (pH) |
| 1 | 0 inches | 6 inches | variable | Not reported | Not reported | Max: 0.00 Min: 0.00 | Max: 0.00 Min: 0.00 |

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam

gravelly - sandy loam

silt loam clay fine sand gravelly - sand sand

fine sandy loam

Surficial Soil Types: sandy loam

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by EFI Global Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2013 by Environmental Data Resources, Inc., All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

INSTRUCTIONS FOR REQUESTING RECORDS

(California Public Records Act, Govt. Code Sections 6250-6276.48)

- 1. In order to expedite your request, please fill out the form completely. Requests may also be submitted by phone at (909) 396-3700, by facsimile to (909) 396-3330, or by email to PublicRecordsRequests@aqmd.gov.
- 2. Requests must be for records prepared, owned, used, or retained by the District (Gov. Code Sec. 6252(e)). Requests should be for clearly identifiable records. The District is not required to create a new record in response to a request. The District will assist the requestor in making a request that describes reasonably identifiable records (Gov. Code Sec. 6253.1). Documents will not be provided if disclosure would infringe upon a copyright, trade secret, or is otherwise exempt in accordance with state law.
- 3. A search for facility records can only be conducted by one or all of the following:
- -- a) Facility Name, Address, or Identification Number
- -- b) Facility Application Number, or Permit to Operate Number; or
- -- c) Facility Notice of Violation/Notice to Comply Number.
- 4. You will be notified within ten (10) days whether your request seeks copies of disclosable public records prepared, owned, used, or retained by this agency. In some cases, the District may need an additional 14 days to respond. If so, you will be notified in writing. You will also be provided an estimated date of when the records will be made available.
- 5. Communications regarding your request, and any records, will be provided by email, unless specified otherwise.
- 6. If the search for records finds the records voluminous, you will be notified of the approximate number of pages and/or length of time it will take to process your request.
- 7. If the records you requested have been marked confidential by the source of the record, you will be notified and given the option of continuing with the District's Trade Secret process.
- 8. If your request is to review records, rather than receive copies, the District will notify you once the records are gathered, and arrangements will be made for your review.
- 9. The charge for the direct cost of duplication is as follows: Paper Copies, \$0.15/page each over 10 pages (first 10 pages are free); Copied CD's or flash drives, no charge; and Copied Audio Tapes, \$5.00 each. After a preliminary estimate, advance payment may be required.
- 10. If the request is for information in an electronic format, the requestor shall bear the cost of producing a copy of the record, including the cost to construct the record and the cost of programming and computer services necessary to produce a copy of the record, when either of the following applies: (1) the District would be required to produce a copy of an electronic record and the record is one that is produced only at otherwise regularly scheduled intervals, or (2) the request would require data compilation, extraction, or programming to produce the record. (Gov. Code Sec. 6253.9(b)). The transfer of gathered electronic records onto CD, DVD or flash drive typically costs \$10.00 each. An invoice will accompany your records when completed.

Note: For further information, please refer to the District's Guidelines for Implementing the California Public Records Act. The Guidelines are available in the lobby of the District Headquarters or on the District's web site at www.aqmd.gov.

Note: If you have questions pertaining to the submittal of a Public Records Act request, you may contact the Public Records Unit, (909) 396-3700, Tuesday through Friday, 7:00 a.m. to 5:30 p.m. Our Fax number is (909) 396-3330. Our email address is PublicRecordsRequests@aqmd.gov.

PUBLIC RECORDS REQUEST FORM

ATTENTION REQUESTOR: To fulfill your request for records, please fill out this form completely, and identify specifically the type of records you are requesting. Requests must reasonably describe identifiable records prepared, owned, used, or retained by the Sanitation Districts.

REQUEST FOR PUBLIC RECORDS (City Request No.: PRA-7425)

REQUESTOR'S NAME & ADDRESS:

Min Kim

Min_Kim@efiglobal.com

We have received your request for public records. To assist us in timely processing your request, please note the following:

<u>COPYING</u>: Our per page charge for copying records is fifteen cents (0.15ϕ) . Payment must be made by check payable to *CITY OF PASADENA* (cash or credit cards cannot be accepted). Payment must be received no later than the time the copies are given to you.

| | The records you request are ready for inspection. Please call the phone numbe below for more information. |
|------|--|
| 7 | Our search revealed no records responsive to your request. |
| | Some or all of the records you request are exempt from disclosure (see reverse). |
| | We need additional time to search for the records you request pursuant to Government Code sections 6253(c)(1) and (2). Unless we notify you otherwise, the records will be available for your inspection on and after 4/3/17 |
| | Please give us your telephone, fax number and/or address so we may contact you. |
| | Your copying charge is \$ based on pages copied. |
| | Your mailing charge is \$ based on postage and envelope. |
| | Other: |
| | e: <u>4/3/17</u> |
| Pers | son to Contact: Elidia Gonzalez |
| Phor | ne: (626) 744-3815 |

| Preliminary drafts, notes, or interagency or intra-agency memoranda that are not retained by the public agency in the ordinary course of business, because the public interest in withholding those records clearly outweighs the public interest in disclosure. Government Code Section 6254(a). |
|--|
| Records pertaining to pending litigation to which the public agency is a party, or to claims made under the Governmental Claims Act because the pending litigation or claim has not been finally adjudicated or otherwise settled. Government Code Section 6254(b). |
| Personnel, medical, or similar files, because the disclosure of which would constitute an unwarranted invasion of personal privacy. Government Code Section 6254 (c) and Article I, Section I of the California Constitution. |
| Records of complaints to, or investigations conducted by, or records of intelligence information or security procedures of the Pasadena Police Department and/or the City of Pasadena. Government Code Section 6254(f). |
| Information required from any taxpayer in connection with the collection of local taxes that is received in confidence and the disclosure of the information to other persons would result in unfair competitive disadvantage to the person supplying the information. Government Code Section 6254(i). |
| Records, the disclosure of which is exempted or prohibited pursuant to federal or state law, including, but not limited to, provisions of the Evidence Code relating to privilege, including but not limited to the Attorney-Client privilege, Attorney-Work-Product Doctrine and the Official Information privilege. <i>Government Code Section 6254(k)</i> . |
| Statements of personal worth or personal financial data required by a licensing agency and filed by an applicant with the licensing agency to establish his or her personal qualification for the license, certificate, or permit applied for. Government Code Section 6254(n). |
| On the facts of this particular case, the public interest served by not disclosing the record clearly outweighs the public interest served by disclosure of the record. Government Code Section 6255. |

March 23, 2017

Mr. Min Kim EFI Global 5261 W. Imperial Hwy. Los Angeles, CA 90045

111 South Hudson Avenue, Pasadena, CA 91101 118 South Oak Knoll Avenue, Pasadena, CA 91101 (APNs: 5734-025-029, and 5734-025-027) PR3-032217-14

Dear Mr. Kim:

We have received your Public Records Act Request for records from the Department of Toxic Substances Control.

After a thorough review of our files we have found that no such records exist at this office pertaining to the sites/facilities referenced above.

We would also like to inform you about Envirostor, a database that provides information and documents on over 5,000 DTSC cleanup sites. Envirostor can be accessed at: http://www.envirostor.dtsc.ca.gov/public. Also, a computer is available in the Central Files of each DTSC Regional Office for use by community members to view Envirostor.

If you have any questions or would like further information regarding your request. please contact me at (818) 717-6522.

Sincerely

Glenh Castillo/aa

Regional Records Coordinator

OFFICE OF THE FIRE MARSHAL

March 29, 2017

EFI Global Kim Min 5261 West Imperial Highway Los Angeles, CA 90045

Subject: Hazardous Materials/Underground Storage Tank Site Record Search Results

Dear Ms. Min:

The Pasadena Fire Department has received and processed your request for information regarding hazardous materials and/or underground storage tank site records for the following site(s):

111 S. Hudson Ave. – No Records Found 118 S. Oak Knoll Ave. – No Records Found

The attached information is provided to you exclusively for your use; transfer of these records to third parties is not authorized. The underground storage tank information that is included, if any, is a compilation of records that were transferred to the Pasadena Fire Department from the Los Angeles County Department of Public Works and records from the files of the Pasadena Fire Department.

If you have any questions, please contact me at (626) 744-7177.

Sincerely,

April Herrera Office Assistant

Kim, Min

Min Sung Kim Senior Environmental Specialist

5261 West Imperial Highway, Los Angeles, CA 90045

310-854-6300 Min Kim@efiglobal.com

Professional Summary:

Min Sung Kim has been in the environmental industry since 2013 and has been a professional consultant since 2015. Mr. Kim started his career in the environmental industry researching human impacts on climate change using remote sensing technologies. Currently, Mr. Kim conducts historical research and works with regulatory bodies to investigate historical and current uses of properties as part of the Phase I Environmental Site Assessment.

Professional Summary:

Heather Nilson has been in the environmental business since 2006 and meets the definition of an Environmental Professional (EP) as defined in the EPA All Appropriate Inquiry (AAI) regulations. Ms. Nilson is an experienced environmental professional with experience working both for regulatory agencies and in the private sector. Ms. Nilson has worked directly with clients and regulatory bodies to assess environmental conditions and has assisted in the development of plans by which to resolve such conditions. Ms. Nilson's experience includes all stages of environmental projects including Phase I environmental site assessments, soil vapor surveys (Phase II), Property Condition Assessments, Seismic Risk Assessments, and project management of ALTA Surveys.

- Phase I Environment Site Assessment
- Property Condition Assessment
- Seismic Risk Assessment
- ALTA Surveys

Licenses and Certifications:

OSHA 40-Hour Hazardous Waste Operations Certified OSHA 8-Hour HAZWOPER Annual Refresher

Project Experience:

Firestone Boulevard - Southgate, California

Due diligence performed at a property which revealed a fill port during site inspection. In the 1940's and 1950's, the site had been identified as a historical "gas station" and "service station." Based on the observation of the fill port and historical data, a geophysical survey and soil sampling program was initiated at the site. As no contamination was encountered at the site after extensive testing, the bank loan was funded and a reserve account was establish to remove the UST post closing.

Affordable Housing Projects - California

Phase I Environmental Site Assessment Reports were conducted for various properties throughout the state of California for public agencies and private entities as potential sites for affordable housing projects. Special challenges involved with specific projects included soil sampling and pesticide testing for properties that were historically utilized for agricultural purposes.

Management of Phase I Process

Conducted numerous Phase I Environmental Site Assessments throughout California and in several states across the US. Managed local historical and regulatory research

through communications with local agencies by email and telephone. Additionally, communication is kept with sub consultants when the subject site is out of our locality in order to create smooth process for all involved.

Non-profit Housing and Education Center Assessment – Culver City, California

Due diligence performed at multiple properties of a non-profit group specializing in the
education of special need children and adults. Assessments were conducted of
residential and educational properties. Special concerns during inspections included the
privacy of those onsite.

Los Cerritos Wetlands – Long Beach, California

Metals analysis conducted of soils within the wetlands in order to create baseline study for future comparisons of further research conducted by CSU, Long Beach. Challenges included tidal influence and various soil conditions encountered during hand auguring. Testing was completed using EPA 6000/7000 in a lab on campus and analyzed through tables utilizing Microsoft Excel.

Area 3 San Gabriel Valley, Los Angeles County, California

Analysis and maintenance of records database for Los Angeles Regional Water Quality Control Board SLIC2 unit. Tasks included visitation of sites, visual observations, communication with tenants, and mailings to owners. Management of files was conducted in storage and for consultants review. Communication was maintained with consultants in order to provide information needed with respect to sites under investigation.

EXECUTIVE SUMMARY

FINDINGS

EFI Global, Inc. has performed a Desktop Environmental Review and Document Review for Stanford Pasadena, LLC (Client) for commercial properties located at 740, 750, 770, and 790 East Green Street and 104, 139, and 150 South Oak Knoll Avenue, in Los Angeles County and the City of Pasadena, California, Assessor's Parcel Numbers (APNs): 5734-023-022, 5734-025-005, 5734-025-014, 5734-025-024, 5734-025-026, and 5734-025-030.

Site Description

According to our research and information provided by the Client, the following addresses have been found to be associated with the subject property: 80, 90, 104, 106, 106 ½, 139, 150 South Oak Knoll Avenue, 740, 750, 762, 770, 766, 766 ½, 772, 774, 776, 780, 786, 786 ½, 790, 792, 796 East Green Street, 79, 95, and 103 ½ South Hudson Avenue, and 730 East Mira Monte Place, Pasadena, California. The subject property is primarily located on the south side of East Green Street between South Oak Knoll Avenue on the west and South Hudson Avenue on the east. Two non-contiguous parcels are also included to the south on the east and west sides of South Oak Knoll Avenue.

The main subject property development consists of several commercial structures on APNs 5374-025-014, -024, -026, and -030 associated with the addresses 740-796 East Green Street and 79, 95, and 103 ½ South Hudson Avenue that are approximately 27,700 square feet in total size. A parking lot on APN 5734-023-022 associated with addresses 139 South Oak Knoll Avenue and 730 East Mira Monte Place and is approximately 7,670 square feet in size. A Parking lot on APN 5734-025-005 associated with the addresses 80, 90, 104, 106, 106 ½, 150 South Oak Knoll Avenue is approximately 9,900 square feet in size. The surrounding area is used for commercial and residential purposes. Groundwater is estimated to be approximately 145-feet below ground surface in the area of the site and is estimated to flow towards the southeast.

Historical Land Use

According to EFI Global's interpretation of the historical research data, the subject property at APNs 5734-025-014, -024, -026, and -030 was developed with residential structures, APN 5734-025-005 was developed with a small storage shed on the southeast corner of the parcel, and APN 5734-023-022 was developed with a residential structure from at least 1903 through 1910. By 1931, APN -024 was developed with framing and paints store and parcel -026 was developed with a gas station and auto repair that conducted battery repair, vulcaning, and greasing. APN -005 was developed with a four unit apartment structure and associated garage and parcel -022 was developed with a residential structure. By 1952, the residential structures on APNs -014, -024, and -030 were demolished and replaced with commercial structures and the gas station and auto repair facility on APN -026 was demolished and improved with vacant land. By 1964, APNs -014, -024, -026, and -030 were developed with the existing commercial offices, the residential structure on APN -005 was developed and replaced with the existing parking lot, the residential structure on APN -022 was developed and replaced with the existing parking lot. Historical occupants of the subject property include commercial and residential occupants.

According to the historical research, a portion of the subject property located on APN 5734-025-026 was formerly utilized as a gasoline service station from sometime prior to 1931 until at least 1952. Car and battery repair and greasing also took place onsite. No documentation was readily available during this assessment to indicate whether the underground storage tanks (USTs) associated with the former gasoline service station and repair and greasing operations were ever

removed. Because the area of the site occupied by the gas station was improved with a new commercial building in 1964, it is our opinion that the tanks were likely removed during demolition and grading of the site. However, there has been no regulatory agency documentation of soil sampling and analysis following tank removal according to our review of a previous Phase I on the subject property, nor do we expect such information to be available given the time period in which the tanks were removed (pre-1980). Based on this, the historical presence of a gasoline service station for more than 20 years onsite is considered a *recognized environmental condition (REC)* for the subject property.

Environmental Data Search

- Penn Oil & Supply Co. / Kirks Texaco Service (790 East Green Street) The subject property is listed on the EDR Historical Auto Station (EDR US Hist Auto Stat) database. According to the listing, gas stations Penn Oil & Supply Co. and Kirks Texaco Service operated on the property in at least 1932 through 1942 and in 1951, respectively. No further information is available. For more information refer to the Historical Land Use section above.
- McCulloh HT / The Ford Shop / Lloyd Johnson (777 East Green Street) The historical address associated with a property located approximately 60-feet north of the subject property at APN 5734-025-026 (hydrologically up-gradient) is listed on the EDR US Hist Auto Stat database. According to the listing and historical research, the following auto repair and gasoline service stations occupied the adjoining property: The Ford Shop auto repair (1932), McCulloh HT gasoline service (1932), and Lloyd Johnson gasoline service station (1942). Historical research indicates that the gas station was present at this property to at least 1970. Based on the close proximity (within 100-feet), relative location (hydrologically up-gradient), and long term utilization of the property for gasoline service station and auto repair purposes, the north adjacent property is considered a potential vapor encroachment concern which is a recognized environmental condition (REC).
- Fremont & Purdons Garage / Pauls Garage / Olivers Chevy Shop / Moser Gardiner and Schultz (753, 755, and 791 East Green Street) The historical addresses associated with the north adjacent property of APNs: 5734-025-014, -024, and -026 (hydrologically up-gradient) is listed on the EDR US Hist Auto Stat database. According to the listing, the following auto repair shops and gasoline service station occupied the property: Moser Gardiner and Schultz (1932), Pauls Garage (1956), Olivers Chevy Shop (1956), and Fremont & Purdon Garage (1942-1976). Automobile repair stations represent a potential environmental concern due to the use of solvents and oils. Based on the close proximity (within 100-feet), relative location (hydrologically up-gradient), and long term utilization of the property for auto repair purposes, the north adjacent properties are considered a potential vapor encroachment concern which is a recognized environmental condition (REC).
- The Little Engine Shop / Chets Auto SVC / Fielder Auto Service / Valentine & Crow / Official Break Station 1651 / Gibson Harold Repair / Dicks Dyno Tune / Mitchs Auto / Sauls Auto Service (767 East Green Street) The north adjoining property of APN 5734-025-014 is listed on the Resource Conservation and Recovery Act Small Quantity Generator (RCRA-SQG), Facility Index System/Facility Registry System (FINDS), Enforcement & Compliance History Information (ECHO), and Facility and Manifest Data (HAZNET) databases. According to the RCRA-SQG listings, Chets Auto SVC was classified as a small quantity generator of hazardous waste in 1991 and The Little Engine Shop was registered a small quantity generator of hazardous materials in 1993. No violations were listed for either property. Furthermore, according to the HAZNET listing Chets Auto SVC generated approximately 0.23-tons of aqueous solution with total organic residues less than 10 percent disposed via transfer station in 1999. According to the HIST US Auto listing, the following auto repair

facilities occupied the property: Fielder Auto Service (1932), Valentine & Crow (1942-1971), Official Break Station No. 1651 (1956-1965), Gibson Harold Repair (1971), The Little Engine Shop (1976-1993), Dicks Dyno Tune (1976), Mitchs Auto (2002-2012), and Saul's Auto Service (2004-2010). Based on the close proximity (within 100-feet), relative location (hydrologically up-gradient), and long term utilization of the property for auto repair purposes, the north adjacent properties are considered a potential vapor encroachment concern which is a *recognized environmental condition (REC)*.

• In our opinion, none of the other sites listed on the regulatory database report pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.

CONCLUSIONS

EFI Global has performed a Desktop Review for 740, 750, 770, and 790 East Green Street and 104, 139, and 150 South Oak Knoll Avenue, Pasadena, California. This assessment does not comply with the Phase I Environmental Site Assessment AAI (All Appropriate Inquiry) Standard or as stipulated in ASTM E1527-13. Based on the limited historical and regulatory research, this assessment has revealed no evidence of recognized environmental conditions in connection with the subject property except for the following:

- The former gasoline service station on the subject property from at least 1931 through at least 1952 is considered a REC.
- The former gasoline service station and auto repair shops on the north adjoining properties from at least 1932 through the present is considered a REC.

Page 4 of 24

INTRODUCTION

EFI Global has performed a Desktop Review for the property located at 740, 750, 770, and 790 East Green Street and 104, 139, and 150 South Oak Knoll Avenue, in Los Angeles County and the City of Pasadena, California (Subject Property). This report has been prepared for the sole use of Stanford Pasadena, LLC (Client).

In order to identify environmental conditions at the site, the Desktop Review includes limited historical research into the past uses of the property, and Environmental Database Research with regard to the subject property, adjoining properties, and surrounding area.

Reviewing those documents that are "reasonably ascertainable" controls the completeness of this assessment. Documents that are reasonably ascertainable are publicly available, may be obtained within a reasonable time and cost constraints, and are practically reviewable to make an evaluation in a reasonable time frame in regard to property transaction activities.

Page 5 of 24

GENERAL SITE DESCRIPTION

SITE LOCATION

EFI Global, Inc. has performed a Desktop Review for commercial properties located at 740, 750, 770, and 790 East Green Street and 104, 139, and 150 South Oak Knoll Avenue, in Los Angeles County and the City of Pasadena, California. The subject property is primarily located on the south side of East Green Street between South Oak Knoll Avenue on the west and South Hudson Avenue on the east. Two non-contiguous parcels are also included to the south on the east and west sides of South Oak Knoll Avenue.

The main subject property development consists of several commercial structures on APNs 5374-025-014, -024, -026, and -030 associated with the addresses 740-796 East Green Street and 79, 95, and 103 ½ South Hudson Avenue that are approximately 27,700 square feet in total size. A parking lot on APN 5734-023-022 associated with addresses 139 South Oak Knoll Avenue and 730 East Mira Monte Place and is approximately 7,670 square feet in size. A Parking lot on APN 5734-025-005 associated with the addresses 80, 90, 104, 106, 106 ½, 150 South Oak Knoll Avenue is approximately 9,900 square feet in size. The surrounding area is used for commercial and residential purposes.

CURRENT AND HISTORICAL ADDRESSES

According to our research and information provided by the Client, the following addresses have been found to be associated with the subject property: 80, 90, 104, 106, 106 ½, 139, 150 South Oak Knoll Avenue, 740, 750, 762, 770, 766, 766 ½, 772, 774, 776, 780, 786, 786 ½, 790, 792, 796 East Green Street, 79, 95, and 103 ½ South Hudson Avenue, and 730 East Mira Monte Place, Pasadena, California.

LEGAL DESCRIPTION

According to the Los Angeles County Assessor's Office, the subject property is located in the City of Pasadena, and is described by the Assessor's Parcel Numbers: 5734-023-022, 5734-025-005, 5734-025-005, 5734-025-014, 5734-025-024, 5734-025-026, and 5734-025-030.

PHYSICAL SETTING

The elevation of the subject property is approximately 145-feet above sea level (USGS Pasadena, CA 7.5 minute topographic quadrangle). Based on our review of the GeoCheck Section of the EDR Radius report, the subject property is not situated within a 100-year FEMA Flood Zone. No wetlands were identified at the property or adjoining/immediately surrounding properties. Based on our review of groundwater data presented in the State Water Resources Control Board (SWRCB) Geotracker website, groundwater was detected at a leaking underground storage tank site (125 East California Boulevard) approximately 0.89 mile southwest of the subject property at approximately 145-feet below ground surface. However, perched and semi-perched aquifers may be present beneath the site. Based on regional ground water data, regional groundwater flow direction is estimated to be to the southeast; however local groundwater flow direction may vary.

USER PROVIDED DOCUMENTS

Phase I Environmental Assessment Report at 740-790 East Green Street, Pasadena, California 91101 – Robin Environmental Management (REM) dated February 5, 2016 – According to the report, the investigation was performed in compliance with the standards and practices of the ASTM E1527-13. The scope of the report included site reconnaissance, historical land use review, regulatory database review, and agency file reviews. According to the report, the subject property was developed with residential dwellings in the early 20th century. By the 1930s, the subject property consisted mainly of dwellings and a commercial picture framing and paint shop. By the 1950s, the subject property was occupied by an office building, residential dwelling, private garage, and a commercial picture framing and paints shop and restaurant. By 1960 the site was developed into its current setting.

The report fails to mention that the subject property at APN 5734-025-026 was developed with an auto repair facility and gas station since at least 1931 through at least 1952. Furthermore, according to the report, REM reviewed records from the City of Pasadena Fire Department (CPFD) and the Sanborn Fire Insurance Maps which indicated that two above ground storage tanks (ASTs) were located on the northeastern corner of the site from the early 1930s through 1957. The report did not specify whether or not the ASTs were removed property or if subsequent soil sampling was conducted. REM did not include the records from the CPFD. It is unlikely that the gasoline storage tanks associated with a gas station would have been above ground; therefore, the possibility that underground storage tanks were located on the subject property cannot be ruled out.

EFI Global disagrees with REM's conclusion that no recognized environmental conditions exist at the subject property. It is EFI Global's opinion that the Phase I prepared by REM was limited in scope and lacked crucial documentation utilized to justify their conclusion.

Page 7 of 24

HISTORICAL LAND USE

A review of historical data derived from standard historical resources is provided in this section. The objective of consulting historical sources is to develop a history of the previous uses of the property and surrounding area, in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the property. During our historical review, acute attention is paid to the subject property. Data relating to the adjoining and immediately surrounding properties (within 100-feet of the subject property boundary) and the surrounding area is reviewed to the extent that it is revealed in the course of researching the property itself.

AERIAL PHOTOGRAPHY REVIEW

Aerial Photography of many portions of the United States dates back to the 1920's. Items searched for in each photograph included, but were not limited to: evidence of tanks, gas stations, industrial site usage, water drainage pathways, areas which show evidence of drums or excessive debris, discolored or stained soils, areas of distressed vegetation, et cetera.

Aerial Photograph Coverage was available from Environmental Data Resources (EDR) for the years: 1928, 1938, 1949, 1952, 1964, 1972, 1981, 1989, 1994, 2005, 2009, 2010, and 2012. A summary of our observations is presented in the following table.

| 1928, 1938, and 1949 | | |
|---|--|---|
| Subject Property | Adjoining and Notable Immediately Surrounding Property Observations Observation | Notable Observations of the Surrounding Area |
| APNs 5734-025-014, -024, and -030: Appears to be developed for commercial and residential purposes. Parcel -026 appears to be developed as a gas station. | The adjoining and immediately surrounding properties appear to be developed for commercial and residential purposes. | The surrounding area appears to be developed for commercial and residential purposes. |
| APN 5734-025-005: Appears to be developed for residential purposes. APN 5734-023-022: Appears to be developed for | | |
| residential purposes. | | |

| Subject Property | Adjoining and Notable Immediately Surrounding Property Observations Observation | Notable Observations of the Surrounding Area | |
| APNs 5734-025-014, -024, -026, and -030: Appears to be developed with the existing commercial structures. APN 5734-025-005: Appears to be developed as the existing parking lot APN 5734-023-022: Appears to be developed as the existing parking lot | The adjoining and immediately surrounding properties appear to be developed for commercial and residential purposes. | The surrounding area appears to be developed for commercial and residential purposes. | |

CITY DIRECTORY REVIEW

City directories have been published since the 1800's and provide detailed occupant information for the property and its surrounding area at five-year intervals. The purpose of the City Directory research is to attempt to determine the businesses that historically occupied the subject property. Historical City Directories provided by EDR and reviewed by EFI Global are listed below.

740 East Green Street

SANBORN MAP REVIEW

Originally compiled by the Sanborn Map Company of Pelham, New York for fire insurance companies to assess fire risks related to building materials and hazardous materials storage, today Sanborn Maps are an invaluable tool for Environmental Professionals in determining historical site use and the potential for environmental conditions. Sanborn Map Coverage is available from as early as 1867 in some cities. Although Sanborn maps were created for approximately twelve thousand cities and towns in the United States, Canada, and Mexico, Sanborn Map Coverage is not available in newer and more rural communities. Sanborn Map Coverage was available from EDR for the years: 1903, 1910, 1931, 1950, and 1970. A summary of our observations is presented in the following table.

| 1903 and 1910 | | | | | |
|--|--|--|--|--|--|
| Subject Property | Adjoining and Notable Immediately Surrounding Property Observations Observation | Notable Observations of the Surrounding Area | | | |
| APNs 5734-025-014, -024, -026, and -030: Depicted as developed with residential structures and vacant land | North: Residential South: Residential and vacant land East: Commercial and residential West: Residential | The surrounding area appears to be developed for residential purposes. | | | |
| APN 5734-025-005: Depicted as developed with a small storage shed on the southeast corner and vacant land throughout the remainder | All directions: Residential | | | | |
| APN 5734-023-022: Depicted as developed with a residential structure | All directions: Residential | | | | |

- Sanborn maps indicated the following historical street addresses associated with the subject property: 80, 90, 104, 106, 106 ½, 139, 150 South Oak Knoll Avenue, 740, 750, 762, 770, 766, 766 ½, 772, 774, 776, 780, 786, 786 ½, 790, 792, 796 East Green Street, 79, 95, and 103 ½ South Hudson Avenue, and 730 East Mira Monte Place. These addresses were researched during the completion of this report.
- Sanborns maps indicated the north adjoining property was occupied by a gas station and auto repair facility in at least 1950 through at least 1970. For further discussion refer to the Environmental Data Search section below.
- Sanborn maps indicated that the subject property at APN 5734-025-026 was occupied by a gasoline station and auto repair shop from at least 1931 through sometime prior to 1970. For more information refer to the Historical Land Use section in the Executive Summary above.

ENVIRONMENTAL DATA SEARCH

REGULATORY DATABASE RESEARCH

A radial database search was conducted in accordance with the specifications defined in ASTM E 1527-13 which sets the radial search distances for each regulatory database. The radial database search was conducted by EDR on November 9, 2016. A copy of the database report is presented in Appendix II of this report. The following table summarizes required databases reviewed, the approximate search distances, and indicates if the subject site, adjoining/immediately surrounding properties or surrounding sites are listed on the respective database.

Following the table are summaries of the information found in the relevant database listings and our opinion regarding the potential for the subject property to be impacted. Our opinion is based on the information found in the database listings, through other historical and regulatory resources, "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (ASTM E2600-10), and assumed groundwater flow direction. Groundwater in the vicinity of the subject property is assumed to flow towards the southeast.

Subject Property

Penn Oil & Supply Co. / Kirks Texaco Service (790 East Green Street) – The subject property is listed on the EDR Historical Auto Station (EDR US Hist Auto Stat) database. According to the listing, gas stations Penn Oil & Supply Co. and Kirks Texaco Service operated on the property in at least 1932 through 1942 and in 1951, respectively. No further information is available. For more information refer to the Historical Land Use section in the Executive Summary above.

Adjoining and Immediately Surrounding Properties

McCulloh HT / The Ford Shop / Lloyd Johnson (777 East Green Street) – The historical address associated with a property located approximately 60-feet north of the subject property at APN 5734-025-026 (hydrologically up-gradient) is listed on the EDR US Hist Auto Stat database. According to the listing and historical research, the following auto repair and gasoline service stations occupied the adjoining property: The Ford Shop auto repair (1932), McCulloh HT gasoline service (1932), and Lloyd Johnson gasoline service station (1942). Historical research indicates that the gas station was present at this property to at least 1970. Based on the close proximity (within 100-feet), relative location (hydrologically upgradient), and long term utilization of the property for gasoline service station and auto repair purposes, the north adjacent property is considered a potential vapor encroachment concern which is a recognized environmental condition.

Fremont & Purdons Garage / Pauls Garage / Olivers Chevy Shop / Moser Gardiner and Schultz (753, 755, and 791 East Green Street) – The historical addresses associated with the north adjacent property of APNs: 5734-025-014, -024, and -026 (hydrologically up-gradient) is listed on the EDR US Hist Auto Stat database. According to the listing, the following auto repair shops and gasoline service station occupied the property: Moser Gardiner and Schultz (1932), Pauls Garage (1956), Olivers Chevy Shop (1956), and Fremont & Purdon Garage (1942-1976). Automobile repair stations represent a potential environmental concern due to the use of solvents and oils. Based on the close proximity (within 100-feet), relative location (hydrologically up-gradient), and long term utilization of the property for auto repair purposes, the north adjacent properties are considered a potential vapor encroachment concern which is a recognized environmental condition.

The Little Engine Shop / Chets Auto SVC / Fielder Auto Service / Valentine & Crow / Official Break Station 1651 / Gibson Harold Repair / Dicks Dyno Tune / Mitchs Auto / Sauls Auto Service (767 East Green Street) – The north adjoining property of APN 5734-025-014 is listed on the Resource Conservation and Recovery Act - Small Quantity Generator (RCRA-SQG), Facility Index System/Facility Registry System (FINDS), Enforcement & Compliance History Information (ECHO), and Facility and Manifest Data (HAZNET) databases. According to the RCRA-SQG listings, Chets Auto SVC was classified as a small quantity generator of hazardous waste in 1991 and The Little Engine Shop was registered a small quantity generator of hazardous materials in 1993. No violations were listed for either property. Furthermore, according to the HAZNET listing Chets Auto SVC generated approximately 0.23-tons of aqueous solution with total organic residues less than 10 percent disposed via transfer station in 1999. According to the HIST US Auto listing, the following auto repair facilities occupied the property: Fielder Auto Service (1932), Valentine & Crow (1942-1971), Official Break Station No. 1651 (1956-1965), Gibson Harold Repair (1971), The Little Engine Shop (1976-1993), Dicks Dyno Tune (1976), Mitchs Auto (2002-2012), and Saul's Auto Service (2004-2010). Based on the close proximity (within 100-feet), relative location (hydrologically up-gradient), and long term utilization of the property for auto repair purposes, the north adjacent properties are considered a potential vapor encroachment concern which is a recognized environmental condition.

Green Street Cleaners (726 East Green Street) – The west adjacent property of APN 5734-025-026 (hydrologically cross-gradient) is listed on the EDR Exclusive Historic Dry Cleaners (EDR HIST CLEANER) database. According to the listing and historical research, Green Street Cleaners has occupied the property since at least 2005 through the present. The Facility Information Detail database was reviewed to identify if the property had been permitted to use chlorinated solvents. According to our review of the database, there is no evidence to suggest that this facility utilized chlorinated solvents on site. Based on the lack of indication of a release, operations during a time of stringent regulatory oversight, and lack of

evidence of chlorinated solvent use, this property is not expected to represent a significant environmental concern for the subject property.

No other adjoining/immediately surrounding properties (within 100-feet) were listed on any of the regulatory databases researched or the listings were not associated with the storage or disposal of hazardous wastes including aboveground or underground storage tanks, did not indicate a known chemical release, and did not indicate a property use where the use of hazardous chemicals would be expected.

Surrounding Area

In our opinion, none of the other sites listed on the regulatory database report pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.

Orphan Sites

Orphan sites are unmappable sites which appear in a list form in the Radius Map Report rather than on the standard Radius Map. Two orphan sites were identified in the Radius Map Report prepared for this site. The sites were manually mapped to determine the location of the site relative to the subject property and groundwater gradient. The following conclusions were made:

In our opinion, none of the orphan sites listed pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.

FINDINGS

EFI Global, Inc. has performed a Desktop Environmental Review and Document Review for Stanford Pasadena, LLC (Client) for commercial properties located at 740, 750, 770, and 790 East Green Street and 104, 139, and 150 South Oak Knoll Avenue, in Los Angeles County and the City of Pasadena, California, Assessor's Parcel Numbers (APNs): 5734-023-022, 5734-025-005, 5734-025-014, 5734-025-024, 5734-025-026, and 5734-025-030.

Site Description

According to our research and information provided by the Client, the following addresses have been found to be associated with the subject property: 80, 90, 104, 106, 106 ½, 139, 150 South Oak Knoll Avenue, 740, 750, 762, 770, 766, 766 ½, 772, 774, 776, 780, 786, 786 ½, 790, 792, 796 East Green Street, 79, 95, and 103 ½ South Hudson Avenue, and 730 East Mira Monte Place, Pasadena, California. The subject property is primarily located on the south side of East Green Street between South Oak Knoll Avenue on the west and South Hudson Avenue on the east. Two non-contiguous parcels are also included to the south on the east and west sides of South Oak Knoll Avenue.

The main subject property development consists of several commercial structures on APNs 5374-025-014, -024, -026, and -030 associated with the addresses 740-796 East Green Street and 79, 95, and 103 ½ South Hudson Avenue that are approximately 27,700 square feet in total size. A parking lot on APN 5734-023-022 associated with addresses 139 South Oak Knoll Avenue and 730 East Mira Monte Place and is approximately 7,670 square feet in size. A Parking lot on APN 5734-025-005 associated with the addresses 80, 90, 104, 106, 106 ½, 150 South Oak Knoll Avenue is approximately 9,900 square feet in size. The surrounding area is used for commercial and residential purposes. Groundwater is estimated to be approximately 145-feet below ground surface in the area of the site and is estimated to flow towards the southeast.

Historical Land Use

According to EFI Global's interpretation of the historical research data, the subject property at APNs 5734-025-014, -024, -026, and -030 was developed with residential structures, APN 5734-025-005 was developed with a small storage shed on the southeast corner of the parcel, and APN 5734-023-022 was developed with a residential structure from at least 1903 through 1910. By 1931, APN -024 was developed with framing and paints store and parcel -026 was developed with a gas station and auto repair that conducted battery repair, vulcaning, and greasing. APN -005 was developed with a four unit apartment structure and associated garage and parcel -022 was developed with a residential structure. By 1952, the residential structures on APNs -014, -024, and -030 were demolished and replaced with commercial structures and the gas station and auto repair facility on APN -026 was demolished and improved with vacant land. By 1964, APNs -014, -024, -026, and -030 were developed with the existing commercial offices, the residential structure on APN -005 was developed and replaced with the existing parking lot, the residential structure on APN -022 was developed and replaced with the existing parking lot. Historical occupants of the subject property include commercial and residential occupants.

• According to the historical research, a portion of the subject property located on APN 5734-025-026 was formerly utilized as a gasoline service station from sometime prior to 1931 until at least 1952. Car and battery repair and greasing also took place onsite. No documentation was readily available during this assessment to indicate whether the underground storage tanks (USTs) associated with the former gasoline service station and repair and greasing operations were ever

removed. Because the area of the site occupied by the gas station was improved with a new commercial building in 1964, it is our opinion that the tanks were likely removed during demolition and grading of the site. However, there has been no regulatory agency documentation of soil sampling and analysis following tank removal according to our review of a previous Phase I on the subject property, nor do we expect such information to be available given the time period in which the tanks were removed (pre-1980). Based on this, the historical presence of a gasoline service station for more than 20 years onsite is considered a *recognized environmental condition (REC)* for the subject property.

Environmental Data Search

- Penn Oil & Supply Co. / Kirks Texaco Service (790 East Green Street) The subject property is listed on the EDR Historical Auto Station (EDR US Hist Auto Stat) database. According to the listing, gas stations Penn Oil & Supply Co. and Kirks Texaco Service operated on the property in at least 1932 through 1942 and in 1951, respectively. No further information is available. For more information refer to the Historical Land Use section above.
- McCulloh HT / The Ford Shop / Lloyd Johnson (777 East Green Street) The historical address associated with a property located approximately 60-feet north of the subject property at APN 5734-025-026 (hydrologically up-gradient) is listed on the EDR US Hist Auto Stat database. According to the listing and historical research, the following auto repair and gasoline service stations occupied the adjoining property: The Ford Shop auto repair (1932), McCulloh HT gasoline service (1932), and Lloyd Johnson gasoline service station (1942). Historical research indicates that the gas station was present at this property to at least 1970. Based on the close proximity (within 100-feet), relative location (hydrologically up-gradient), and long term utilization of the property for gasoline service station and auto repair purposes, the north adjacent property is considered a potential vapor encroachment concern which is a recognized environmental condition (REC).
- Fremont & Purdons Garage / Pauls Garage / Olivers Chevy Shop / Moser Gardiner and Schultz (753, 755, and 791 East Green Street) The historical addresses associated with the north adjacent property of APNs: 5734-025-014, -024, and -026 (hydrologically up-gradient) is listed on the EDR US Hist Auto Stat database. According to the listing, the following auto repair shops and gasoline service station occupied the property: Moser Gardiner and Schultz (1932), Pauls Garage (1956), Olivers Chevy Shop (1956), and Fremont & Purdon Garage (1942-1976). Automobile repair stations represent a potential environmental concern due to the use of solvents and oils. Based on the close proximity (within 100-feet), relative location (hydrologically up-gradient), and long term utilization of the property for auto repair purposes, the north adjacent properties are considered a potential vapor encroachment concern which is a recognized environmental condition (REC).
- The Little Engine Shop / Chets Auto SVC / Fielder Auto Service / Valentine & Crow / Official Break Station 1651 / Gibson Harold Repair / Dicks Dyno Tune / Mitchs Auto / Sauls Auto Service (767 East Green Street) The north adjoining property of APN 5734-025-014 is listed on the Resource Conservation and Recovery Act Small Quantity Generator (RCRA-SQG), Facility Index System/Facility Registry System (FINDS), Enforcement & Compliance History Information (ECHO), and Facility and Manifest Data (HAZNET) databases. According to the RCRA-SQG listings, Chets Auto SVC was classified as a small quantity generator of hazardous waste in 1991 and The Little Engine Shop was registered a small quantity generator of hazardous materials in 1993. No violations were listed for either property. Furthermore, according to the HAZNET listing Chets Auto SVC generated approximately 0.23-tons of aqueous solution with total organic residues less than 10 percent disposed via transfer station in 1999. According to the HIST US Auto listing, the following auto repair

facilities occupied the property: Fielder Auto Service (1932), Valentine & Crow (1942-1971), Official Break Station No. 1651 (1956-1965), Gibson Harold Repair (1971), The Little Engine Shop (1976-1993), Dicks Dyno Tune (1976), Mitchs Auto (2002-2012), and Saul's Auto Service (2004-2010). Based on the close proximity (within 100-feet), relative location (hydrologically up-gradient), and long term utilization of the property for auto repair purposes, the north adjacent properties are considered a potential vapor encroachment concern which is a *recognized environmental condition (REC)*.

• In our opinion, none of the other sites listed on the regulatory database report pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.

CONCLUSIONS

EFI Global has performed a Desktop Review for 740, 750, 770, and 790 East Green Street and 104, 139, and 150 South Oak Knoll Avenue, Pasadena, California. This assessment does not comply with the Phase I Environmental Site Assessment AAI (All Appropriate Inquiry) Standard or as stipulated in ASTM E1527-13. Based on the limited historical and regulatory research, this assessment has revealed no evidence of recognized environmental conditions in connection with the subject property except for the following:

- The former gasoline service station on the subject property from at least 1931 through at least 1952 is considered a REC.
- The former gasoline service station and auto repair shops on the north adjoining properties from at least 1932 through the present is considered a REC.

SIGNATURES

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in bold italics are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/21/2016 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 11 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/21/2016 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 08/01/2016 has revealed that there are 6 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/21/2016 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 32 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 15 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Northeast Map: 5636853 MOUNT WILSON, CA

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property FEMA Source Type

Additional Panels in search area: FEMA Source Type

06037C1400F FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

PASADENA YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION
MAP ID FROM TP GROUNDWATER FLOW
Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

Era: Cenozoic Category: Stratifed Sequence

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

| Soil Layer Information | | | | | | | | | |

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Andersen Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

THIS REPORT WAS PREPARED IN CONFORMANCE TO MEET OR EXCEED THE LIMITATIONS AS SET FORTH BY THE AMERICAN SOCIETY FOR TESTING & MATERIALS (ASTM) STANDARD PRACTICE E 1527-13. IT IS FOR THE EXPRESS USE OF THE CLIENT, AND ITS CONTENTS ARE CONSIDERED TO BE PREVILEGED AND CONFIDENTIAL. ACCEPTANCE OF THIS REPORT CONSTITUTES AN AGREEMENT BY THE CLIENT TO ASSUME FULL LIABILITY FOR INFORMATION CONTAINED HEREIN. THIS REPORT IS FOR THE SOLE USE AND INTERPRETATION OF THE CLIENT, AND IT IS NOT TO BE REPRODUCED OR DISTRIBUTED TO OUTSIDE PARTIES. THE INFORMATION IN THIS REPORT IS FURNISHED IN GOOD FAITH AND WAS OBTAINED FROM PUBLIC & PRIVATE SOURCES AND DATABASE CONSIDERED RELIABLE. REM MAKES NO REPRESENTATION OF WARRANTY REGARDING THE ACCURACY, OR RELIABILITY, QUALITY OR COMPLETENESS OF SUCH INFORMATION. IN NO EVENT, SHALL REM BE LIABLE TO ANY PARTY FOR SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXAMPLARY DAMAGES. THE CUSTOMER SHALL ASSUME FULL LIABILITY FOR USE OF THIS REPORT.

1. INTRODUCTION

1.1 Objective

This report summarizes the results of a Phase I Environmental Site Assessment of the subject property performed by Robin Environmental Management (REM) in January/ February 2016. The purpose of this Environmental Site Assessment is to evaluate the potential for environmental concerns or liabilities due to past and/or current land use practices at the subject site or from nearby properties. This assessment included in this report is solely targeted for CERCLA (Superfund) liability and the "innocent landowner defense", to permit user to satisfy one of the requirements to qualify for the innocent landowner defense to CERCLA liability, by conducting all appropriate inquiries to identify recognized environmental conditions (REC's).

1.2 Scope of Work

- Visual investigation of the property to obtain information regarding obvious visual signs of adverse environmental conditions, contamination, hazardous material usage, storage and handling on and in the adjoining sites (only up to one parcel next to the subject property) of the subject property
- Visual survey of the adjoining land uses (only up to one parcel next to the subject property) and determination of any current nearby operations which may potentially impact the subject site
- Government document search of records compiled by various government agencies for on site or nearby operations (past and present) to aid in the identification of any potential contamination sources
- Review of building permit records available at local agency and other pertinent documents to identify any potential past on-site operations which may have environmental implications.

2. PROPERTY DESCRIPTION

2.1 Geographical Description of Property

The subject site, 740-790 E. Green Street (APN 5374-025-014, 024, 026, & 030), is a roughly "L"-shaped lot located on the southern block of (the E-W trending) Green Street sandwiched between Oak Knoll Avenue to the west and Hudson Avenue to the east within an office/commercial zone in the city of Pasadena, California. See Figure 1 for Site Photos, Figure 2 for a Site Location Map, and Figure 3 for a Recent Aerial Photo Showing Site and Its Vicinity General Layout.

2.2 General Description of the Subject Property

The subject site, 740-790 E. Green Street (APN 5374-025-014, 024, 026, & 030), is a roughly "L"-shaped lot located on the southern block of (the E-W trending) Green Street sandwiched between Oak Knoll Avenue to the west and Hudson Avenue to the east in the city of Pasadena, California. The site comprises of mainly of following four buildings (lying along the north side of the site from west to east): a three story roughly N-S trending rectangular-shaped 740 E. Green Street fitness center building; a three story (with ground floor mainly non-enclosed as parking spaces) roughly E-W trending rectangular-shaped 750 E. Green Street office building; a two-story roughly "L"-shaped 770-784 E. Green Street commercial/office (with second floor of the building divided to multiple office units with overall 776 E Green Street address and ground floor of the building divided mainly into three commercial/medial office units: from west to east, 770-774, 780, and 784 E Green Street units) building; and a single-story roughly "L"-shaped 790 E. Green Street office building. The roughly "L"-shaped 790 E. Green Street office building engulfs a roughly rectangular-shaped short brick wall fenced asphalt-paved parking lot to its southeast. To the south of the 740 and the 750 E. Green Street buildings is also a roughly (E-W trending) rectangular-shaped short brick wall fenced asphalt-paved parking lot. Remaining portions of the site are non-fenced asphalt-paved driveways/parking.

Four on-site office/commercial structures are mainly constructed of brick, wood, stucco, glass veneers, concrete foundation, and composition roofing. Interior construction is quite uniform throughout all office/commercial units consisting mainly of carpets/floor tiles coverings on concrete foundation, ceiling tiles, and drywall partitions.

Overall speaking, almost the entire subject property consists of impermeable surfaces such as the building structures and asphalt-paved grounds. No pits, ponds, swamps, dry wells,

or lagoons were observed on the subject property. No apparently significant surface staining was observed on the paved/unpaved out-door areas and the building areas.

2.3 Present Tenants and Business Operation

At the time of site inspection on January 31 of 2016, occupancy conditions of each on-site building were as follow:

740 E. Green Street building – By Fit Annex fitness center

750 E. Green Street building – By various professional offices

770-784 E. Green Street building – Second floor (with 776 E Green Street overall address) by various professional offices; and ground floor divided to three units, from west to east, 770-774 E. Green Street (occupied by Holly Auctions), 780 E. Green Street (occupied by Orthodontics by Callender), and 784 E. Green St. unit (occupied by Tarantino's Pizzeria Restaurant)

790 E. Green Street building - By Russakow, Greene & Tan, LLP law office

All current on-site business operations generally do not involve employing/generating significant quantities of hazardous material/wastes.

2.4 Past Tenants and Business Operation

Methods of researching historic use of ownership of the subject property employed by REM are as follows.

- County Assessor's Office Records
- Historic Sanborn Fire Insurance Map Records
- Local Building Department & Zoning/Planning

2.4.1 Co. Assessor's Office Records

Los Angeles Co. Assessor's Office records summaries for site parcels included in Appendix B indicates that the site was generally developed into its current setting in the late 1950's and the early 1960's.

2.4.2 Historic Sanborn Fire Insurance Map Records

Available historic Sanborn Fire Insurance Map for the site area revealed that residential dwellings and a stable occupied the site in the early 20th Century. In the 1930's, frontage (north side where currently on-site buildings stand) of the site was mainly occupied by dwellings, private garages, and a commercial picture framing and paint shop. In the 1950's, frontage (north side where currently on-site buildings stand) of the site was mainly occupied by office building, residential dwelling, private garage, a commercial picture framing and paint shop, and a restaurant.

2.4.3 Local Building Permits Records

REM's field inspector visited the City of Pasadena Building Department (CPBD) to review building permits pertaining to subject site addresses. According to available building permit records, four on-site buildings were constructed around 1960. Mainly various professional/medical offices have been occupying site buildings since their developments around 1960. Fit Annex fitness center (current occupant of 740 E Green St building), Holly Auctions (current occupant of 770-774 E Green St unit), and Tarantino's Pizzeria Restaurant (current occupant of 784 E Green St unit) started their current occupancies respectively in 2011, 2013, and 2000.

2.4.4 Site Development/Occupancy History

Based on historic site occupancy data listed above, development/occupancy history of the subject site can be summarized below:

- The early 20th Century Residential dwellings and a stable occupied the site
- The 1930's Frontage (north side where currently on-site buildings stand) of the site was mainly occupied by dwellings, private garages, and a commercial picture framing and paint shop
- The 1950's Frontage (north side where currently on-site buildings stand) of the site was mainly occupied by office building, residential dwelling, private garage, a commercial picture framing and paint shop, and a restaurant
- Around 1960 The site was generally developed into its current setting
- 1960 on Mainly various professional/medical offices have been occupying site buildings since their developments around 1960. Fit Annex fitness center (current occupant of 740 E Green St building), Holly Auctions (current occupant of 770-774 E Green St unit), and Tarantino's Pizzeria Restaurant (current occupant of 784 E Green St unit) started their current occupancies respectively in 2011, 2013, and 2000.

2.5 Regional Physical Setting

The subject property's physical locations were researched employing a United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle (Quad) Map relevant to the subject property. The USGS 7.5 Minute Quad Map has an approximate scale of 1 inch to 2,000 feet, and shows physical features with environmental significance such as wetlands, water bodies, roadways, mines, and buildings. Please refer to Appendix A, Figure 2.

The physical and natural features illustrated on the Quad Map served as areas of visual emphasis when conducting the site inspection of the subject property. The USGS 7.5 Minute Quad Map was used as the only Standard Physical Setting Source, and is sufficient as a single reference. The surface elevation of the subject site is approximately 820 feet above Mean Sea Level with a gradual topographic down gradient toward southeast.

2.6 Hydrogeological Information

The subject site lies within the San Gabriel Valley – the northeastern one third of the Los Angeles Coastal Basin Plain. The Los Angeles Coastal Basin Plain is an alluviated, coastal lowland plain bordered on the north, northeast, east, and southeast by mountains and hills, and transected by numerous faults. Water well drilling logs show that the upper sediments that underlie the subject property are typified by gravel, sand, and silt. These sediments comprise Recent and Pleistocene Alluvium deposits which extend from the surface to a depth of approximately 480 feet. The groundwater zone occurs in Recent and Pleistocene Alluvium deposits at a depth of approximately 320 feet below ground surface (County of Los Angeles Department of Public Works, "San Gabriel Valley Groundwater Contours", 1997).

Hydrogeologically, the subject property is located within the northwestern portion of the San Gabriel Valley Groundwater Basin. In general, the groundwater zones of the Basin are unconfined, and hence are somewhat unprotected from downward migrating surface pollutants. The general direction of groundwater flow in the vicinity of the subject property is reported to be towards southeast (County of Los Angeles Department of Public Works, "San Gabriel Valley Groundwater Contours", 1997).

2.7 Historical Hazardous Substance Usage

2.7.1 Record search sources

REM's field engineer contacted the following public agencies to find any records of former

operation of gasoline Underground Storage Tank (UST) or any other hazardous substances on the subject site premise.

- City of Pasadena Building Department
- City of Pasadena Fire Department (CPFD)
- Regional Water Quality Control Board Los Angeles Region

Records available at the CPFD and available historic Sanborn Fire Insurance maps indicate that there were two aboveground storage tanks (AST's) holding gas & oil present near the northeastern corner of the site from the early 1930's to 1957. These two AGT's were on asphalt/concrete pavement with no records of spill or unauthorized release.

2.7.2 List and quantities of the hazardous materials

List and quantities of the hazardous materials previously or presently used, disposed, treated, stored, or generated at the subject property, including copies of MSDS, were searched and assessed. During the site inspection, the use, storage, and generation of any significant quantity of hazardous materials was not observed. Except two AST's mentioned in Section 2.7.1, no regulatory agency data was found regarding historic or present use of the subject property in regards to hazardous materials previously or presently used, stored, treated, disposed or generated at the subject property.

REM staff also searched the State Department of Toxic Substances Control-compiled records site for all documented hazardous wastes disposal activities throughout California in the past at http://hwts.dtsc.ca.gov/report_list.cfm for site addresses and did not find any records.

2.7.3 Permits, licenses, and registrations

REM staff searched the South Coast Air Quality Management District (SCAQMD)-compiled Facility INformation Detail (FIND) database at www.aqmd.gov/webappl/fim/defualt.htm for site addresses and found no SCAQMD permit records for the site.

2.7.4 Violation or non-compliance notice

No violation or notice of non-compliance was issued with the present environmental regulations, according to the findings of our environmental assessment on the subject property.

ROBIN ENVIRONMENTAL MANAGEMENT

2.7.5 Regulatory database record research

According to the conducted government records search (see Section 5.0), the subject property was not recognized being listed on the following environmental regulatory database record research (NETR search database): NPL, RCRA-TSD, CERCLIS, NFRAP, RCRA-G, ERNS, CORRACTS, CORTESE, CALSITES, LUST, UST and SWF.

2.7.6 Environmental lien records

Under current environment regulation, government agency may place an environmental lien on the property with known contamination and no cleanup/mitigation activities apparently intended being conducted by the site owner upon the agency issued the cleanup enforcement order. Based on historic site usage and government records search summary documented in this section, the subject property is not a known contamination site and no environmental liens are likely being imposed on the subject property.

Furthermore, the conducted government records search shows that there are no environmental liens placed by the federal environmental agency under CERCLA regulations for the subject site. REM staff searched the California State Department of Toxic Substances website EnviroStor data search and found no environmental liens were placed by the State environmental agency for the subject site. City of Pasadena records also show that there are no environmental liens placed by the local environmental agency for the subject site.

1015 VIA ROMALES, SAN DIMAS, CA 91773

3. PROPERTY RECONNAISSANCE

REM's environmental assessor/geologist performed the field survey of the subject site and adjacent properties on January 31, 2016. A site location map and a recent aerial photo showing site and its vicinity general layout are included as Figure 2 and Figure 3, respectively.

3.1 Air Quality - Indoor and Visible Emissions

No unusual smells, obnoxious odors, or visual emissions were observed during the inspection of the subject property. Neither air emission stacks nor paint booth were present, thus no pertinent permits were searched for the previous records of violation history.

3.2 Asbestos-Containing Material (ACM)

Asbestos-containing building materials are normally found in the following items. REM inspected such materials as to the visual conditions and locations; however the actual sampling analysis is beyond the contracted scope of work, thus not included in the report.

Potential asbestos-containing building materials in general:

- floor tile and associated mastic adhesive underneath the floor tile,
- carpet mastic,
- linoleum sheeting and associated backing material or leveling compound,
- drywall joint compound or mud product,
- plaster compound,
- acoustic ceiling texture,
- · ceiling tile and associated mastic adhesive,
- window putty or glazing,
- roofing material (shingle, cap-sheet, etc.),
- roofing penetration mastic,
- transite panel or flue pipe,
- fire-proofing material,
- pipe insulation or wrapping, etc.

As discussed in section 2.4, it can be concluded that the subject property was developed into its current shape around 1960. Based on such historical information of the site, the on-site buildings were constructed prior to the year that asbestos for commercial use was banned by

1015 VIA ROMALES, SAN DIMAS, CA 91773

federal government in 1978. However, a preliminary asbestos survey conducted by Project Resources, Inc. in October 2000 did not identify the presence of friable ACM's in on-site buildings.

3.3 Lead-Based Paint (LBP)

As discussed in section 2.4, it can be concluded that the subject property was developed into its current shape around 1960. Based on such historical information of the site, the on-site buildings were constructed before the year 1978 when lead-based paint in exterior and interior coating for commercial use was banned by federal government. Due to the dangers of lead poisoning, the Consumer Product Safety Commission banned the sale of lead-based paint (LBP), defined as containing more than 0.06% lead by weight, to consumers, and the use of LBP in residences and other areas where consumers have direct access to painted surfaces.

Effective June 3, 1993, the Lead in Construction Standard codified in 29 CFR (Code of Federal Regulations) 1926.62 applied to sources or potential sources of lead exposure in an "employment-related" context. The trigger mechanism for application of the standard is an activity that, by its inherent nature, may cause exposure to lead. Therefore, within the context of regulatory compliance for OSHA (Occupation Safety and Health Agency), the subject property did not appear to require further response to suspect lead-based paint as no currently on-site activity by its inherent nature would cause exposure to lead.

However, prior to renovation, demolition, or any activity that will cause a disturbance of any suspect lead-based paint, sampling to determine lead content is recommended. In 1978, the federal government banned the use of lead-based paint in residential applications; however, usage in general industry continued at a decreased rate to the present. Lead-based paint presents a hazard through inhalation or ingestion of paint chips or vapor fumes. The greatest cumulative health threat is to young children, and for this reason the Department of Housing and Urban Development (HUD) has promulgated lead standards and survey requirements for buildings affected by HUD funding. This HUD regulation represents the only federal requirement for lead-based paint, hazard management applicable to privately owned structures.

3.4 Polychlorinated Biphenyl (PCB's)

Prior to 1978, PCBs were commonly used in dielectric fluids in transformers, capacitors, and light ballasts due to their desirable thermal characteristics, and hydraulic fluid compactor. Due to their demonstrated toxicity and persistence in the environment, PCB manufacturing in

the United States was discontinued.

Pole-mounted transformers were found in the vicinity of the subject building, appearing in good condition without any sign of leakage. No PCB-containing hydraulic fluid trash compactors were identified present on the subject site premise. There is also no aboveground concrete pad-mounted transformer noticed present on the site. One exterior subterranean electrical transformer owned by City of Pasadena Water & Power is located on the subject property. The transformer appeared to be well maintained, secured, and with no visible evidence of leakage.

3.5 Underground Storage Tank (UST)

The visual inspection of the subject site revealed no evidence of surface or above ground features (e.g., fill pipe, vent pipes, fill connections, concrete pads, saw cuts, sumps, spill containment device, leak detection device, etc.) normally associated with underground storage tanks (UST's).

3.6 Aboveground Storage Tank

REM's field officer performed the visual inspection of the subject site to find no evidence of surface or above ground features (e.g., fill pipe, vent pipes, fill connections, concrete pads, saw cuts, concrete pad, drains in vicinity, etc.) normally associated with aboveground storage tanks (AST's). Visual observation also includes the inspection to identify any surface markings indicating the existence of aboveground product pipelines. No evidence for the present of on-site AST's was identified.

3.7 Fuel Islands

The visual inspection of the subject site revealed no evidence of fuel islands or dispensers either in operation or abandoned.

3.8 Hydraulic Hoist Unit

The visual inspection of the subject site revealed no evidence of hydraulic hoist unit either in operation or abandoned.

3.9 Hazardous Materials / Petroleum Products Storage & Handling

No containers storing automotive or industrial batteries, pesticides, paints or seemingly toxic hazards at the time of site inspection. No significant oil or chemical staining was

noticed.

3.10 Other Containers

No other containers indicating any sign of environmental concern were observed during the site inspection.

3.11 Hazardous Waste Treatment, Storage, Disposal (TSD)

No storage, treatment, or disposal of hazardous waste was found during the site investigation. No severely improper waste stream processing or disposal practices were observed on the subject property.

3.12 Distress Vegetation

Planters and vegetation in the vicinity of and within the subject site were found well maintained on bare soil or within separate planters in relatively good appearance with no sign of chemical stress or unnatural appearance.

3.13 Stockpiled Soils

REM's site inspection did not reveal any evidence of stockpiled soils on the ground of subject property.

3.14 Wastewater Treatment Unit /Clarifier

No underground industrial wastewater treatment facility, i.e., clarifier was observed on the subject property during the site visit. Storm water drainage system in the close proximity of the subject area did not identify any abnormal accumulation of petroleum or chemical runoff or foreign materials. No unusual blockage of the storm-water control system was observed during the site visual investigation on the outdoor parking lot, roof of subject building, or surface areas. REM recommends no additional investigation on described storm-water systems at the subject property.

3.15 Solid Waste Disposal

No improper activities of treatment or disposal of hazardous, medical, or toxic wastes are performed on the subject site. During the site inspection, one trash bin for containing regular municipal wastes was identified present at the southeastern corner of short brick

wall fenced asphalt-paved parking lot to the south of the 740 and the 750 E. Green Street buildings. No apparently significant staining was identified around this trash bin.

Concrete/asphalt pavement surfaces appeared to serve as impermeable structure where no major cracks or crevices were found in the areas of solid waste disposal and handling.

3.16 Wells

REM's site walk-through did not discover any irrigation wells, injection wells, abandoned wells, groundwater-monitoring wells, dry wells, septic wells, oil wells, gas wells, domestic water wells, other-monitoring wells on the subject premises.

3.17 Underground Pipelines

REM's site inspection did not reveal any evidence of underground pipelines beneath the ground of subject property, other than public utility lines such as sewer, power, and electric lines, for which public "dig-alert" service would easily identify upon 48-hour telephone notice in advance.

3.18 Boilers & HVAC Systems

The subject buildings' water heater and HVAC system is comprised of boiler and radiators, while the primary fuel source is utilized from natural gas, electricity. No UST fuel or petroleum product stored in tank is used for said heater and HVAC operation.

3.19 Visual Indication of Spills, Leakage, Staining

REM's site inspection did not reveal any evidence of on-site or off-site spills, leakages, or staining significant enough to pose immediate environmental concern onto the subject property. No significantly stained catch basins, drip pads, or sumps were observed. There were no major spills around surface drains, pipes, gutters, spouts, or tubes, if any, at the time of site investigation.

3.20 Soil Staining or Surface Staining on Unpaved/Natural Lands

No staining or surface staining on the bare soil or unpaved lands were identified during the site investigation.

3.21 Pits, Ponds, Lagoons

No visible evidence of wetlands such as pits, ponds, lagoons, or any other water bodies were observed within the subject property's boundary lines.

3.22 Herbicides/Pesticides

No evidence of herbicide or pesticide use on the subject property was observed during the inspection.

3.23 Radon

Radon sources can be found from earth and rock beneath building structures, well water, and building materials themselves. Though there is no immediate health effect, it is believed to account for approximately 10% of lung cancer deaths in the United States. Estimated national average is 1.5 picocuries per liter of air, however, levels as high as 200 picocuries per liter in some commercial buildings can be found. USEPA and California Department of Health Services' Radon Survey Interim Results report shows different U.S. regions according to general geological and climate information, where Region 9 includes Imperial, Los Angeles, Orange, Riverside, San Bernardino and San Diego Counties.

According to the California EPA, Los Angeles and Riverside County is classified as a "Zone 2" county having a predicted average screening level between 2-4 picocuries per liter of air. Orange and San Diego County is under Zone 3, having the level less than 2 picocuries/L, and Ventura County as Zone 1 has the level greater than 4 picocuries/L.

If a property region reportedly has radon concentration below 4 picocuries per liter of air in 99.5% of homes within the region, then, it is not likely impacted by the presence of radon gas, considering EPA action limit of 4 picocuries per liter of air volume. REM is not contracted to perform the testing of radon level on the subject property, thus the delineation of radon level is beyond the scope of the service and also not deemed essential based on the office/commercial setting of the subject site, and hence not included in this report.

4. **NEIGHBORING PROPERTIES**

4.1 Adjacent/Adjoining Businesses

For the scope of this assessment, properties are defined and categorized based upon their physical proximity to the subject property. An adjoining property is any real estate property whose border is contiguous or partially contiguous with the subject properties, or that would be if the properties were not separated by a roadway, street, public thoroughfare, river, or stream.

The subject site is bordered by following adjoining properties:

North: Immediately by Green Street, and then by (from west to east) four–story 747

E. Green Street office building, two-story 761 E. Green Street store/office building (and its associated parking lot) with a hair salon on ground floor and various professional offices on the second floor, Mitch's Auto Service (767 E Green Street), and a 5-story parking structure with certain portions of ground

floor divided to various retail stores

East: Immediately by Hudson Avenue, and then by four-story residential condo

building with subterranean level Prado Parking

South: By commercial/office building (111 S Hudson Avenue) and its associated

parking to the east; and Foothill Family Service (118 South Oak Knoll Avenue)

to the east

West: Immediately by Oak Knoll Avenue, and then by, from north to south, Green

Plaza shopping center housing restaurant, shoe repair, dry cleaner, travel

agency, etc.; a residence; and apartments (111 South Oak Knoll Avenue)

4.2 Historical Hazardous Substance Usage in Neighboring Properties

REM's field engineer contacted the following public agencies to find any records of former operation of gasoline UST or any other hazardous substances in the vicinity of the subject site premise.

- Regional Water Quality Control Board Los Angeles Region
- California Dept. of Toxic Substances Control

1015 VIA ROMALES, SAN DIMAS, CA 91773

| No locations in the immediate adjacency of the subject site were found to pose any environmental threat to the subject property, based upon the data obtained via NETR governmental records search database and the conducted agency records search. |

5. GOVERNMENT RECORDS SEARCH AND POTENTIAL OFF-SITE CONTAMINATION SOURCES

5.1 Historical Background and Scope of Coverage

Since the early 1970s, environmental agencies have been tracking the compliance of many facilities with the various laws that have been promulgated to halt the pollution of air, land and water. More recently, records have been maintained documenting spills of hazardous materials and the locations of known waste sites or regulated waste handling facilities. The following sections summarizes REM's review of database search of available records at the local, state and federal level and highlights the approximate location of such sites with respect to the subject property.

The conducted government record search was performed to aid:

- Identification of facilities, located within a one-mile radius of the subject property, which
 might pose a potential threat to the subsurface environment at the subject property; and
- 2) Identification of any environmental violation notices associated with activities conducted at the subject property itself. The following lists were reviewed for sites within one mile of the property:

5.2 Database Sources

A. Federal Sources

- United States Environmental Protection Agency (U.S. EPA),
 Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)
- U.S. EPA, National Priority List (NPL)
- Resource Conservation and Recovery Act (RCRA) Federal TSD Facilities
- Federal Emergency Response Notification System (ERNS)
- CERCLA Site Enforcement Tracking System
- RCRA Violators List (CORRACTS)
- U.S. EPA Federal Enforcement Docket
- Toxic Release Inventory System (TRIS)
- No Further Remedial Action Planned (NFRAP)

The CERCLIS is the EPA compilation of sites for which the EPA has evidence of, or is investigating, a release or threatened release, of hazardous substances which may be subject to review in accordance with the terms and conditions of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (Superfund Act). Sites to be included are identified primarily by the reporting requirements of hazardous substances including degreasing solvents, oily waste, acid solutions, alkaline solutions, and heavy metal solutions, Treatment, Storage and Disposal (TSD) facilities and releases larger than specific Reportable Quantities (RQ), established by EPA.

An NPL site is an uncontrolled or abandoned hazardous waste site identified for priority remedial action under Superfund Program. Such prioritized sites with significant risk to human health and the environment receive remedial funding under the Comprehensive Environmental Response Conservation and Liability Act (CERCLA). RCRA generator/TSD list is a compilation of hazardous waste generating facilities which have obtained an identification number from EPA.

ERNS database is a national computer database used to store information on unauthorized release of oil and hazardous substances. The program is a cooperative effort of the Environmental Protection Agency, the Department of Transportation Research and Special Program Administration's National Transportation System Center and the National Response Center. There are primarily five Federal statues that requires release reporting: CERCLA Section 103; the Superfund Amendments and Reauthorization Act (SARA) Title III Section 304; the Clean Water Act of 1972 (CWA) Section 311(b)(3); and the Hazardous Material Transportation Act of 1974 (HMTA) Section 1808 (b).

RCRA Violators List (CORRACTS): The Resource Conservation and Recovery Act of 1976 provides for "Cradle to Grave" regulation of hazardous wastes. RCRA requires regulation of hazardous waste generators, transporters, and TSD sites. Evaluation to potential violations, ranging from manifest requirements to hazardous waste discharges, is typically conducted by the US EPA. This database is also known as Corrective Action Report (CORRACTS).

Toxic Release Inventory System (TRIS): TRIS compiles database for a property having had a release of chemical compound, whose listing reflects permitted air releases rather than a release to soil or groundwater.

B. California State Sources

- State of California Office of Planning and Research (CORTESE), the State of California equivalent of CERCLIS
- Leaking Underground Storage Tanks (LUST)
- Solid Waste Information System (SWIS)
- Annual Work Plan (previously known as Bond Expenditure Plan), the State of California equivalent of NPL
- California Historical Abandoned Site Survey Program (CALSITES)

CALSITES: The Historical Abandoned Site Survey (HASS) Program, formerly the California Abandoned Sites Program Information System – ASPIS, identified certain potential hazardous waste sites. The identification of these sites was generally not made via sampling and site characterization, but as a result of file searches and

windshield surveys.

No Further Action sites are also on the CALSITE list which has been marked for no further action by the California Environmental Protection Agency, Department of Toxic Substance Control (DTSC) in accordance with California Health & Safety Code.

CORTESE: This database is a consolidation of information from various sources. It is maintained by the State Office of Planning and Research and lists potential and confirmed hazardous waste or substances sites.

LUST(s): The Leaking Underground Storage Tanks (LUST) Information System is maintained by the State Water Resource Board pursuant to California Health & Safety Code.

SWIS (Solid Waste Information System): As legislated under Solid Waste Management and Resource Recovery Act of 1972, the California Waste Management Board maintains list of certain facilities, i.e. Active solid waste disposal sites, Inactive or Closed solid waste disposal sites and Transfer facilities.

AW (Annual Work Plan previously known as Bond Expenditure Plan): The California Health & Safety code requires the California EPA to develop a site-specific expenditure plan as the basis for an appropriation of California Hazardous Substance Cleanup Bond Act of 1984 funds. The Agency is also required to update annually and report any significant adjustments to the Legislature on an ongoing basis. The plan identifies California hazardous waste sites targeted for cleanup by responsible parties, the California and the Federal Environmental Protection Agency over the next coming years.

C. Regional Sources

- LUST Regional
- Toxic Releases (NT)
- California Regional Water Resources Control Board, Solid Waste Assessment Test (SWAT)
- Well Investigation Program

NT (Toxic Releases): The California Regional Water Quality Control Boards or local Department of Health & Safety Services keeps track of toxic releases to the environment. These lists are known as Unauthorized Releases, Spill, Leaks, Investigation and Cleanups, Non-Tank Releases, Toxic List or similar, depending on the local agency

SWAT (Solid Waste Assessment Test): This program requires that disposal sites with more than 50,000 cubic yards of waste provide sufficient information to the regional water quality control board to determine whether or not the site has discharged hazardous substances which will impact the environment. Site operators are required to file Solid Waste Assessment Test reports on a staggered basis. Operators submit water quality tests to the Regional Water Quality Control Board, describing surface and groundwater quality and supply; and the geology within 1 mile of the site. Air quality tests are submitted to the local Air Quality Management District or Air Pollution Control District.

1015 VIA ROMALES, SAN DIMAS, CA 91773

D. Other Sources

- RCRA-Generator
- RCRA-TSD Facilities
- SWLF (Solid Waste Landfill)

RCRA-G: The EPA regulates generators of hazardous material through the Resource Conservation and Recovery Act (RCRA). All hazardous waste generators are required to notify EPA of their existence by submitting the Federal Notification of Regulated Waste Activity Form or a State equivalent form. The notification form provides basic identification information and specific waste activities.

RCRA-D: The EPA regulates the treatment, storage and disposal of hazardous material through the Resource Conservation and Recovery Act (RCRA). All hazardous waste TSD facilities are required to notify EPA of their existence by submitting the Federal Notification of Regulated Waste Activity Form or a State equivalent form.

SWLF: The California Waste Information system database consists of both open as well closed and inactive solid waste disposal facilities and transfer stations pursuant to the Solid Waste Management and Resource Recovery Act of 1972. Generally the California Integrated Waste Management Board learns of locations of disposal facilities through permit applications and from local enforcement agencies.

5.3 Case Study References

A. Case-Closure

If sites are listed on the California Leaking Underground Storage Tank (LUST) database with a "case closed (no further remedial actions required)" status, it shall be interpreted as follows. The identified contamination at such sites was mitigated to a degree that the governing agency believed that these sites do not pose apparent concern/threat to the subsurface environment of the neighboring area.

B. Lawrence Livermore National Laboratory Reports on LUFT's

According to Lawrence Livermore National Laboratory / University of California Reports on Leaking Underground Fuel Tanks (LUFT's), approximately ninety percent of dissolved petroleum products are found less than 280 feet in distance from the origination source, and most of these plumes are either stable or decreasing in distance. And seventy percent of the plume is in shallow groundwater less than 25 feet below the ground surface.

C. Groundwater Flow Gradient

Environmentally-concerned sites located not directly at the up-gradient from the subject site can be deleted from anticipated target sites, since contamination from identified sites is unlikely to migrate along the groundwater flow direction to affect the subsurface environment underneath the subject site (Section 2.6 – Hydrogeologic Setting).

5.4 Potential Source of Contamination

Sites identified on referenced agency listing within the one-mile radius from the subject property are tabulated in the Appendix C of this Report. As shown in Appendix C, there are no Leaking Underground Storage Tank (LUST)/Spills sites or other sites within the immediate vicinity (< 1/8 mile) of the subject site being identified as of potentially environmental concern.

5.5 UST, Disposal Sites, and Generators

As also summarized in Appendix C, there are four sites listed on RCRA small quantities hazardous waste generators list and no sites listed on permitted current/historic Underground Storage Tank (UST) database compiled by the State Water Resources Control Board located within 1/8-mile radius of the subject site. Upon reviewing the information regarding the said facilities obtained via computer search, the conclusion was drawn that the subsurface environment at the subject site is not likely to have been impacted by operations of the said facilities.

6. SUMMARY AND CONCLUSION

The subject site, 740-790 E. Green Street (APN 5374-025-014, 024, 026, & 030), is a roughly "L"-shaped lot located on the southern block of (the E-W trending) Green Street sandwiched between Oak Knoll Avenue to the west and Hudson Avenue to the east in the city of Pasadena, California. The site comprises of mainly of following four buildings (lying along the north side of the site from west to east): a three story roughly N-S trending rectangular-shaped 740 E. Green Street fitness center building; a three story (with ground floor mainly non-enclosed as parking spaces) roughly E-W trending rectangular-shaped 750 E. Green Street office building; a two-story roughly "L"-shaped 770-784 E. Green Street commercial/office (with second floor of the building divided to multiple office units with overall 776 E Green Street address and ground floor of the building divided mainly into three commercial/medial office units: from west to east, 770-774, 780, and 784 E Green Street units) building; and a single-story roughly "L"shaped 790 E. Green Street office building. The roughly "L"-shaped 790 E. Green Street office building engulfs a roughly rectangular-shaped short brick wall fenced asphalt-paved parking lot to its southeast. To the south of the 740 and the 750 E. Green Street buildings is also a roughly (E-W trending) rectangular-shaped short brick wall fenced asphalt-paved parking lot. Remaining portions of the site are non-fenced asphalt-paved driveways/parking.

Overall speaking, almost the entire subject property consists of impermeable surfaces such as the building structures and asphalt-paved grounds. No pits, ponds, swamps, dry wells, or lagoons were observed on the subject property. No apparently significant surface staining was observed on the paved/unpaved out-door areas and the building areas.

At the time of site inspection on January 31 of 2016, occupancy conditions of each onsite building were as follow:

740 E. Green Street building – By Fit Annex fitness center

750 E. Green Street building – By various professional offices

770-784 E. Green Street building – Second floor (with 776 E Green Street overall address) by various professional offices; and ground floor divided to three units, from west to east, 770-774 E. Green Street (occupied by Holly Auctions), 780 E. Green Street (occupied by Orthodontics by Callender), and 784 E. Green

Street unit (occupied by Tarantino's Pizzeria Restaurant)

790 E. Green Street building - By Russakow, Greene & Tan, LLP law office

All current on-site business operations generally do not involve employing/generating significant quantities of hazardous material/wastes.

 Various historic sources listed in Section 2.4 reveal the following development/ occupancy history for the subject site:

The early 20th Century - Residential dwellings and a stable occupied the site

- The 1930's Frontage (north side where currently on-site buildings stand) of the site was mainly occupied by dwellings, private garages, and a commercial picture framing and paint shop
- The 1950's Frontage (north side where currently on-site buildings stand) of the site was mainly occupied by office building, residential dwelling, private garage, a commercial picture framing and paint shop, and a restaurant

Around 1960 – The site was generally developed into its current setting

- 1960 on Mainly various professional/medical offices have been occupying site buildings since their developments around 1960. Fit Annex fitness center (current occupant of 740 E Green St building), Holly Auctions (current occupant of 770-774 E Green St unit), and Tarantino's Pizzeria Restaurant (current occupant of 784 E Green St unit) started their current occupancies respectively in 2011, 2013, and 2000.
- Records available at the City of Pasadena Fire Department (CPFD) and available historic Sanborn Fire Insurance maps indicate that there were two above ground storage tanks (AST's) holding gas & oil present near the northeastern corner of the site from the early 1930's to 1957. These two AGS's were on asphalt/concrete pavement with no records of spill or unauthorized release.
- As discussed above, it can be concluded that the subject property was developed into its current shape around 1960. Based on such historical information of the site, the on-site office buildings were constructed prior to the year that asbestos for commercial use was banned by federal government in 1978. However, a preliminary asbestos survey conducted by Project Resources, Inc. in October 2000 did not identify the presence of friable ACM's in on-site buildings.

- According to the conducted government records search (see Section 5.0), the subject property was not recognized being listed on the following environmental regulatory database record research (NETR search database): NPL, RCRA-TSD, CERCLIS, NFRAP, RCRA-G, ERNS, CORRACTS, CORTESE, CALSITES, LUST, UST and SWF.
- Based on the conducted government records search, there are no Leaking Underground Storage Tank (LUST)/Spills sites or other sites identified as exhibiting potentially environmental concerns within the immediate vicinity (< 1/8 mile) of the subject site.
- In conclusion, we have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E-1527-13 of 740-790 East Green Street, Pasadena, CA (the property). Based on findings of the conducted Phase I environmental assessment, no apparently significant environmental concern was identified being induced by current and historic operations of the subject property and its neighboring sites. No Phase II investigation is recommended for the subject property.

7. LIMITATIONS AND CERTIFICATION STAMP

The opinion expressed herein is based on the information collected during our study, our present understanding of the site conditions and our professional judgment in light of such information at the time of preparation of this opinion. The report is a professional opinion work, and no warranty is either expressed, implied or made as to the conclusions, advice and recommendations offered in this report.

Our investigation was performed using the degree of care and skill ordinarily exercised, under similar circumstances, by reputable Engineers and Geologists practicing in this or similar localities.

The findings, conclusions and recommendations in this report are considered valid as of the present date. However, changes in the conditions of the property can occur with the passage of time, due to natural process or the works of man on this or adjacent properties. In addition, changes in applicable or appropriate standard may occur. REM is not responsible for conditions found at or beneath the subject property or adjacent properties. Accordingly, portions of this report may be invalidated wholly or partially by the changes beyond our control.

This report is prepared for the exclusive use of the client, and opinions/recommendations contained in this report apply only to conditions existing when services were performed and are intended only for the client, purposes, locations, time frames, and project parameters indicated.

8. QUALIFICATION STATEMENT FOR PERSONNEL CONDUCTING THE PHASE I ASSESSMENT

Since Robin Chang, the personnel conducting the Phase I Environmental assessment is a California State Registered Professional Geologist, Robin Chang declares that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Sec. 312.10 of 40 CFR. I have the specific qualifications based on education, training, experience, and license to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

ROBIN ENVIRONMENTAL MANAGEMENT

Firestone Boulevard Southgate, California

Due diligence performed at a property which revealed a fill port during site inspection. In the 1940's and 1950's, the site had been identified as a historical "gas station" and "service station." Based on the observation of the fill port and historical data, a geophysical survey and soil sampling program was initiated at the site. As no contamination was encountered at the site after extensive testing, the bank loan was funded and a reserve account was establish to remove the UST post-closing.

Affordable Housing Projects California

Phase I Environmental Site Assessment Reports were conducted for various properties throughout the state of California for public agencies and private entities as potential sites for affordable housing projects. Special challenges involved with specific projects included soil sampling and pesticide testing for properties that were historically utilized for agricultural purposes.

Project Experience (Continued),

Management of Phase I Process

Conducted numerous Phase I Environmental Site Assessments throughout California and in several states across the US. Managed local historical and regulatory research through communications with local agencies by email and telephone. Additionally, communication is kept with sub consultants when the subject site is out of our locality in order to create smooth process for all involved.

Non-profit Housing and Education Center Assessment Culver City, California

Due diligence performed at multiple properties of a non-profit group specializing in the education of special need children and adults. Assessments were conducted of residential and educational properties. Special concerns during inspections included the privacy of those onsite.

Los Cerritos Wetlands Long Beach, California

Metals analysis conducted of soils within the wetlands in order to create baseline study for future comparisons of further research conducted by CSU, Long Beach. Challenges included tidal influence and various soil conditions encountered during hand auguring. Testing was completed using EPA 6000/7000 in a lab on campus and analyzed through tables utilizing Microsoft Excel.

Area 3 San Gabriel Valley Los Angeles County, California

Analysis and maintenance of records database for Los Angeles Regional Water Quality Control Board SLIC2 unit. Tasks included visitation of sites, visual observations, communication with tenants, and mailings to owners. Management of files was conducted in storage and for consultants review. Communication was maintained with consultants in order to provide information needed with respect to sites under investigation.

I

1.0 INTRODUCTION

EFI Global has performed a Vapor Intrusion Risk Assessment (VIRA) for the property located at 740, 750, 770, and 790 East Green Street and 104 South Oak Knoll Avenue, in Los Angeles County and the City of Pasadena, California (the Site). The assessment was based on the findings of EFI Global's Desktop Environmental Review and Document Review (dated November 17, 2016) performed at the Site and two additional non-contiguous parcels (139 and 150 South Oak Knoll Avenue), which identified recognized environmental conditions (RECs) associated with the property. Specifically, the Site has the following RECs were identified:

- The east portion of the Site was formerly utilized as a gasoline service station from sometime prior to 1931 until at least 1952. Car and battery repair and greasing also took place on-site. Documentation regarding the removal of underground storage tanks (USTs) associated with the former gasoline service station and repair and greasing operations was not identified. The area of the Site occupied by the gas station was improved with the existing commercial building in 1964. As such, the tanks were likely removed during demolition and grading of the Site. However, regulatory agency documentation of soil sampling and analysis following tank removal was not identified. The historical presence of a gasoline service station and auto repair operations is considered a recognized environmental condition (REC) for the Site.
- The adjacent properties to the north have been historically occupied for auto repair purposes since 1932. Based on the close proximity (within 100-feet) and long term utilization of the property for auto repair purposes, the north adjacent property poses potential vapor encroachment concern, which is considered a REC for the Site.

EFI Global conducted this VIRA to evaluate whether the former Site operations have significantly impacted soil vapor conditions in the subsurface of the Site. A total of seven soil vapor probes were advanced throughout the property and a soil vapor survey was conducted. Contaminants of potential concern included VOCs in soil vapor.

2.0 SITE INFORMATION

This section provides pertinent Site information, including location, description and geologic and hydrogeologic setting.

2.1 SITE LOCATION AND DESCRIPTION

The Site is located on the southeast corner of the intersection between South Oak Knoll Ave (Figure 1; Site Location Map). The Site consists of four adjoining parcels that are approximately 1.15 acres in size (Figure 2; Site Plan with Soil Vapor Sampling Locations). The Site is developed with several commercial structures that are occupied by Fit Annex Gym, Tarantino's Pizzeria, an orthodontics office, and Russakow/Greene & Tan LLP. The remaining portions of the Site consist of asphalt paved vehicle access ways and parking areas, and limited landscaping. The surrounding area is used for commercial and residential purposes.

2.2 REGIONAL GEOLOGIC AND HYDROGEOLOGIC SETTING

The Site is located in the northwest portion of the San Gabriel Valley, which is part of the Transverse Ranges Geologic Province. The Transverse Ranges are an east-west trending series of steep mountain ranges and valleys. The east-west structure of the Transverse Ranges is oblique to the normal northwest trend of coastal California. The province extends offshore to include San Miguel, Santa Rosa, and Santa Cruz islands. Its eastern extension, the San Bernardino Mountains, has been displaced to the south along

the San Andreas Fault (California Geomorphic Provinces Note 36, California Geological Survey, December 2002).

The Site is underlain with Quaternary-aged surficial sediment deposits of Holocene and Pleistocene age. These deposits are generally characterized as alluvial fan gravel and sand derived from the San Gabriel Mountains (*Geologic Map of the Pasadena Quadrangle*, Dibblee Geological Foundation, 1989).

The Site is located within the Raymond Groundwater Basin. The Raymond Basin is located in the northwest part of the San Gabriel Valley, in eastern Los Angeles County, and was considered a part of the San Gabriel Valley Groundwater Basin (4-13) in Bulletin 118-75 and Bulletin 118-80. The Raymond Basin includes the water-bearing sediments bounded by the contact with consolidated basement rocks of the San Gabriel Mountains on the north and the San Rafael Hills on the southwest. The west boundary is delineated by a drainage divide at Pickens Canyon Wash and the southeast boundary is the Raymond fault (*California's Groundwater Bulletin 118*, California Department of Water Resources, February 2004).

2.3 LOCAL GEOLOGIC AND HYDROGEOLOGIC SETTING

The elevation of the Site is approximately 807 feet above mean sea level (USGS Pasadena, California 7.5 minute topographic quadrangle; Figure 1). Based on a review of the GeoCheck Section of the EDR Radius report, the Site is not situated within a 100-year FEMA Flood Zone. No wetlands were identified at the property or adjoining/immediately surrounding properties.

Based on our review of groundwater data presented in the State Water Resources Control Board's (SWRCB) Geotracker website, a closed Cleanup Site for a nearby remediation case located approximately 0.89 mile to the southwest located at 125 East California Boulevard (Arco #0510; Global ID: T0603702026) reported groundwater at approximately 145 feet below ground surface (bgs) with flow direction to the southeast (*Atlantic Richfield Company Quarterly Report*, Secor International Incorporated, January, 2004). However, perched and semi-perched aquifers may be present beneath the site and local groundwater flow direction may vary.

3.0 FIELD ACTIVITIES

All field activities pertaining to the Phase II ESA were completed on December 6, 2016.

3.1 FIELD PREPARATION

Prior to conducting field activities, EFI Global personnel marked the work area clearly with white paint. Underground Services Alert (USA) was notified of the pending fieldwork a minimum of 48 hours before mobilization. Boring locations were subsequently checked for utility conflicts, access limitations and other hindrances or issues which may have been encountered during fieldwork. No conflicts with utilities were identified in the chosen boring locations.

3.2 SOIL VAPOR SAMPLING

On December 6, 2016, EFI Global directed Optimal Technology to conduct a soil vapor survey throughout the Site in an attempt to evaluate for the presence of VOCs in the subsurface. A total of seven soil vapor samples (B1-SV-5 through B7-SV-5; Figure 2) and a duplicate sample (B7-SV-5 Dup) were collected at a depth of approximately 5 feet bgs. The probes in locations B1 through B6 were advanced to the rear of the existing commercial structures to assess the former onsite auto repair and gas station operations. The probe in location B7 was advanced in the northeast corner of the Site to assess the potential vapor encroachment condition from the former gas station and auto repair operations operations in the north adjacent property across East Green Street.

3.2.1 SOIL VAPOR PROBE INSTALLATION

In each location, surficial concrete pavement was initially cored using a rotary hammer drill equipped with a 1.5-inch diameter percussion bit. Temporary soil vapor sampling probes were emplaced in each boring by advancing a decontaminated, steel vapor sampling rod to the target sampling depth (5-feet bgs) with a rotary hammer drill. Upon advancement to the target sampling depth, each probe was retracted slightly, revealing a 1-inch long permeable screen. Subsurface conditions were allowed to equilibrate for a minimum of 30 minutes prior to subsequent vapor sampling.

3.2.2 PURGE AND SAMPLE PROTOCOL

At each sampling location, an electric vacuum pump used to purge the probe approximately three probe volumes. The purge rate was set at 200 milliliters per minute (ml/min). Measurable vacuum in the purge and sample train did not exceed 100 inches of water column (in WC).

Vapor samples were collected using a Hamilton gas-tight syringe by puncturing tubing which connects the sampling probe and the vacuum pump. Vapor samples were immediately transferred to an on-site laboratory for chemical analysis.

3.2.3 SHUT-IN AND LEAK TESTING

Leakage during soil-gas sampling may dilute samples with ambient air and produce results that underestimate actual site concentrations or contaminate the sample with external contaminants.

Upon securing the purge and sample train to each vapor probe, a shut-in test was conducted to check for leaks in the above-ground sampling system. The above-ground valves, lines and fittings downstream from the top of the probe were assembled, and the system was evacuated to a minimum of 100 in water column (in WC). The vacuum gauge was calibrated and sensitive enough to indicate a vacuum change of at least in 0.5 WC.

In the event a loss in vacuum was observed, the sample train was re-adjusted and the test repeated. Upon verification of sample train integrity, efforts were made to minimize disturbance and alteration to the apparatus until completion of purging and vapor sample collection.

In addition to shut-in testing, a leak check compound (tracer gas) test was conducted. Isobutane was selected as the leak check compound. During purging and sampling at each location, the compound was applied to rags and placed near locations where ambient air could enter the sampling system or where cross-contamination may occur immediately before sampling (i.e. the location of vapor probe surface completion and along the sampling train). Isobutane was included in the analyte list at a reporting limit of $1.00 \text{ micrograms per liter } (\mu g/l)$.

4.0 CHEMICAL ANALYSIS

All soil vapor samples were immediately analyzed onsite for VOCs by Modified EPA Method 8021B. Laboratory reports are provided in Appendix A.

5.0 ANALYTICAL RESULTS

Detectable concentrations of VOCs in soil vapor were not present in any of the seven soil vapor samples collected at the Site.

Isobutane, the leak check compound utilized during soil vapor purging and sampling, was not detected in any samples above the reporting limit of $1.00 \mu g/l$.

Non-detections of Isobutane verify the integrity of the soil vapor purging and sampling protocol, and provide support that soil vapor samples collected and analyzed are representative of subsurface conditions.

A summary of VOC analytical results in soil vapor are provided in Table 1.

6.0 CONCLUSIONS AND RECOMMENDATIONS

EFI Global has performed a VIRA of the property located at 1822, 1824, 1826, 1830 Glendale Boulevard; 2158 & 2142 Clifford Street, Los Angeles, California. Specifically, EFI Global's scope of work was based on the information presented in EFI Global's Phase I ESA, which reports that the Site was historically occupied by a gasoline service station and auto repair operations. Furthermore, the north adjacent properties were historically occupied by gasoline and auto repair operations. The gasoline and auto repair operations at the Site and the north adjacent properties were considered RECs for the Site.

EFI Global conducted a soil vapor survey in an attempt to evaluate if historical operations have significantly impacted the subsurface of the Site:

- A total of seven soil vapor probes (B1 through B7) were advanced at a depth of 5 feet bgs throughout the Site.
- All soil vapor samples were analyzed for VOCs by Modified EPA Method 8021B immediately upon collection with a mobile laboratory.

The following are EFI Global's conclusions based on the results of the assessment activities detailed herein:

• Detectable concentrations of VOCs in soil vapor were not present in any of the seven soil vapor samples collected at the subject property.

The following are EFI Global's recommendations based on the results of the assessment activities detailed herein:

• Based on the results of this investigation, a threat to human health was not identified as a result of the former gasoline and auto repair operations at the Site and at the north adjacent property. Thus, it is EFI Global's opinion that further environmental investigation at the Site is not warranted at this time, assuming continued commercial use of the property.

7.0 SIGNIFICANT ASSUMPTIONS, LIMITATIONS AND RELIANCE

This report has been prepared in accordance with generally-accepted environmental methodologies and industry standards as they relate to the Data Quality Objectives of the assessment. No warranties, expressed or implied, are made as to the professional services provided under the terms of EFI Global's contract(s) or specified in this report. This assessment has been conducted, in part, based on information, data or reports provided or prepared by others. EFI Global reviews and interprets these documents in good faith and relies that the provided data and documents are true and accurate.

Environmental conditions at the site were assessed or interpreted within the context of EFI Global's contract(s) and existing environmental regulations of applicable jurisdiction(s) as of the date of the report. Regulatory requirements, regulations and guidance are subject to change subsequent to the date of the report. Unless otherwise stated in the report, evaluating compliance of past, present or future owners with applicable local, provincial and federal government laws and regulations was not included within the scope of the assessment.

The environmental assessment is limited by the availability of information at the time of the assessment. The conclusions and recommendations regarding environmental conditions presented in this report are based on a scope of work authorized by the Client. It is possible that unreported conditions impairing the environmental status of the site may have occurred which could not be identified. EFI Global's opinions cannot be extended to portions of the site that were unavailable for direct access and observation reasonably beyond the control of EFI Global or outside of the scope of the assessment. Environmental assessment activities, particularly the sampling of soil, vapor (air), groundwater and structure materials, represent those conditions which are present at the time of sampling within the immediate vicinity of the sample(s) collected. Although sampling plans are developed in an attempt to provide what is interpreted as sufficient coverage within the assessment area to achieve the investigative objectives, no extent of sampling can guarantee all environmental conditions, potential chemicals of concern (man-made or naturally occurring) and concentrations at which they occur have been identified and quantified absolutely. The assessment performed and outlined in this report was based, in part, upon visual observations of the site and attendant structures. It should be noted that compounds, materials or chemicals of potential concern other than those described could be present in the site environment, and the possibility remains that unexpected environmental conditions may be encountered at the site in locations not specifically investigated.

All components of this report, including but not limited to text, signatures, certifications, figures, tables, attachments, appendices, supporting documents and addenda are integral to the reporting of the assessment. This report may not be reproduced, except in full, without written approval of EFI Global.

This report has been prepared for the sole use of Stanford Pasadena, LLC. The contents should not be relied upon by any other parties without the express written consent of Stanford Pasadena, LLC and EFI Global.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

This assessment has been conducted with the standards and level of care and skill exercised in such types of investigations, by qualified geologists, engineers, environmental scientists or environmental professionals, in conformance with generally-accepted industry standards and practices.

APPENDIX A

LABORATORY REPORTS AND CHAIN-OF-CUSTODY DOCUMENTATION

December 7, 2016

Mr. Desi Salgado Andersen Environmental 5261 West Imperial Highway Los Angeles, CA 90045

Dear Mr. Salgado:

This letter presents the results of the soil vapor investigation conducted by Optimal Technology (Optimal), for Andersen Environmental on December 6, 2016. The study was performed at 150 S. Oak Knoll Ave., Pasadena, California.

Optimal was contracted to perform a soil vapor survey at this site to screen for possible chlorinated solvents and aromatic hydrocarbons. The primary objective of this soil vapor investigation was to determine if soil vapor contamination is present in the subsurface soil.

Gas Sampling Method

Gas sampling was performed by hydraulically pushing soil gas probes to a depth of 5.0 feet below ground surface (bgs). An electric rotary hammer drill was used to drill a 1.0-inch diameter hole through the overlying surface to allow probe placement when required. The same electric hammer drill was used to push probes in areas of resistance during placement.

At each sampling location an electric vacuum pump set to draw 0.2 liters per minute (L/min) of soil vapor was attached to the probe and purged prior to sample collection. Vapor samples were obtained in Hamilton gas-tight syringes by puncturing tubing which connects the sampling probe and the vacuum pump. New tubing was used at each sampling point to prevent cross contamination. Samples were immediately injected into the gas chromatograph after collection.

All analyses were performed on a laboratory grade Hewlett Packard model 5890 Series II gas chromatograph equipped with a Flame Ionization Detector (FID) and an Electron Capture Detector (ECD). Restec wide bore capillary columns using hydrogen as the carrier gases were used to perform all analysis. All results were collected on a personal computer utilizing Hewlett Packard's PC based chromatographic data collection and handling system.

Quality Assurance

5-Point Calibration

The initial five point calibration consisted of 20, 50, 100, 200 and 500 ul injections of the calibration standard. A calibration factor on each analyte was generated using a best fit line method using the HP data system. If the r² factor generated from this line was not greater than 0.990, an additional five point calibration would have been performed. Method reporting limits were calculated to be 0.01-1.0 micrograms per Liter (ug/L) for the individual compounds.

A daily calibration check and end of run calibration check was performed using a pre-mixed standard supplied by Scotty Analyzed Gases. The standard contained common halogenated solvents and aromatic hydrocarbons (see Table 1). The individual compound concentrations in the standards ranged between 0.025 nanograms per microliter (ng/ul) and 0.25 ng/ul.

TABLE 1

| Dichlorodifluoromethane | Carbon Tetrachloride | Chloroethane |
|--------------------------|---------------------------|----------------|
| Trichlorofluoromethane | 1,2-Dichloroethane | Benzene |
| 1,1-Dichloroethene | Trichloroethene | Toluene |
| Methylene Chloride | 1,1,2-Trichloroethane | Ethylbenzene |
| trans-1,2-Dichloroethene | Tetrachloroethene | m-/p-Xylene |
| 1,1-Dichloroethane | Chloroform | o-Xylene |
| cis-1,2-Dichloroethene | 1,1,1,2-Tetrachloroethane | Vinyl Chloride |
| 1,1,1-Trichloroethane | 1,1,2,2-Tetrachloroethane | Freon 113 |
| 4-Methyl-2-Pentanone | Cyclohexane | Acetone |
| Chlorobenzene | 2-Butanone | Isobutane |

Sample Replicates

A replicate analysis (duplicate) was run to evaluate the reproducibility of the sampling system and instrument. The difference between samples did not vary more than 20%.

Equipment Blanks

Blanks were run at the beginning of each workday and after calibrations. The blanks were collected using an ambient air sample. These blanks checked the septum, syringe, GC column, GC detector and the ambient air. Contamination was not found in any of the blanks analyzed during this investigation. Blank results are given along with the sample results.

Tracer Gas Leak Test

A tracer gas was applied to the soil gas probes at each point of connection in which ambient air could enter the sampling system. These points include the top of the sampling probe where the tubing meets the probe connection and the surface bentonite seals. Isobutane was used as the tracer gas. No Isobutane was found in any of the samples collected.

Purge Volume

The standard purge volume of three volumes was purged in accordance with the July 2015 DTSC/RWQCB Advisory for Active Soil Gas Investigations.

Shut-in Test

A shut-in test was conducted prior to purging or sampling each location to check for leaks in the above-ground sampling system. The system was evaluated to a minimum measured vacuum of 100 inches of water. The vacuum gauge was calibrated and sensitive enough to indicate a water pressure change of at least 0.5 inches.

Scope of Work

To achieve the objective of this investigation a total of 8 vapor samples were collected from 7 locations at the site. Sampling depths, vacuum readings, purge volume and sampling volumes are given on the analytical results page. All the collected vapor samples were analyzed on-site using Optimal's mobile laboratory.

Subsurface Conditions

Subsurface soil conditions at this site offered sampling flows at 0" water vacuum. Depth to groundwater was unknown at the time of the investigation.

Results

During this vapor investigation none of the compounds listed in Table 1 above were detected above the listed reporting limits. A complete table of analytical results is included with this report.

Disclaimer

All conclusions presented in this letter are based solely on the information collected by the soil vapor survey conducted by Optimal Technology. Soil vapor testing is only a subsurface screening tool and does not represent actual contaminant concentrations in either the soil and/or groundwater. We enjoyed working with you on this project and look forward to future projects. If you have any questions please contact me at (877) 764-5427.

Sincerely,

Attila Baly Project Manager
