M T Sabha,

I urge Pasadena City Council to put safety over surveillance and cut ties with Flock.

Flock ALPR cameras are being used for indiscriminate surveillance, tracking and targeting of countless individuals. While Flock, law enforcement and city government tout the benefits of automated license plate readers for public safety, in reality it endangers everyone - in particular immigrants and their families, people of color, people seeking sensitive healthcare, and the many exercising civil liberties like free speech.

Flock's indiscriminate surveillance is in conflict with constitutional protections and numerous civil liberties groups such as the ACLU and the Electronic Frontier Foundation arguing that the technology infringes on Americans' right to privacy under the Fourth Amendment. Despite repeated attempts from Flock to reform their system, it is apparent ALPR is problematic, insecure and can have devastating consequences for innocent individuals. Academics, researchers and experts overwhelmingly agree that there's a lack of evidence linking flock to crime reduction rates.

There is overwhelming evidence of abuse and misuse of ALPR systems across the country - and Pasadena's ALPR systems are no exception. Pasadena was notified that it was sharing ALPR information across the country, the city lacked ALPR data retention restrictions, and many residents have expressed privacy concerns over the years.

Reporting by NBC shows Pasadena Flock Camera data accessed by numerous law enforcement agencies across California and out-of-state including the FBI, ICE and NCRIC. In one instance, Pasadena's database was searched for "ICE Protest" in San Bernardino...the same day a rally was held outside a San Bernardino facility.

This is a repeated pattern of lack of oversight and adequate guardrails with PPD's ALPR. In years prior, Pasadena was notified that it was sharing ALPR information across the country, the city lacked ALPR data retention restrictions, and many residents have repeatedly expressed privacy concerns.

Despite this overwhelming evidence to the contrary, PPD continues to claim their internal audits found Flock ALPR "complies with state law and department policy".

Pasadena Police says Flock is a "useful tool" - yes, indeed, there's dozens of recent cases documented nationwide where police used Flock and other ALPR tools to illegally track ex-partners, current romantic interests, and coworkers.

I demand the Pasadena City Council:

1. Disable and remove all Flock cameras in Pasadena.
2. Commit to cancelling the Flock contract in September.
3. Do not replace Flock with another ALPR vendor.
4. Commit to funding community-based safety initiatives.

Pasadena, choose your constituents. Restore trust, restore accountability and uphold our constitutional rights.

End all ties with Flock now!

M T Sabha,

Good Morning,

I'm writing as an Altadena resident but one in the south eastern most section of Altadena that feels like a sort of hybrid. My mailing address for example is listed as Pasadena and I have to travel through Pasadena in order to go anywhere. My daughter is a PUSD student and most of our shopping, dining and entertainment happens in Pasadena.

Flock cameras represent a chilling overreach in our community. We're gaining a small amount of safety in exchange for an unthinkable amount of surveillance.

As a neighbor and someone who is in the city of Pasadena every single day I respectfully add my voice to the call that Pasadena City Council:

1. Disable and remove all Flock cameras in Pasadena.
2. Commit to cancelling the Flock contract in September.
3. Do not replace Flock with another ALPR vendor.
4. Commit to funding community-based safety initiatives.

Restore trust, restore accountability and uphold our constitutional rights.

End all ties with Flock now!

With thanks,

Peter Mooney

City Council Member,

To the Pasadena Mayor, Vice Mayor and Council Members;

I'm tired of the Pasadena Police Department insisting that Flock and other automated license plate readers keep us safe. PPD tells the community anecdotal "success" stories but ignores the risks and harm to community members. PPD tells us how great these cameras are but has provided zero statistical analysis of the actual impact.

Meanwhile, the federal government's sanctioned human trafficking happens under the watchful eye of ALPR surveillance cameras, yet our neighbors continue to be kidnapped from the streets of Pasadena. Surveillance cameras have not caught these kidnappers or brought them to justice. I don't think it's a coincidence that Flock cameras are concentrated in the same neighborhoods that have been terrorized the most by ICE raids and kidnappings. PPD has made our most vulnerable neighbors made them even MORE vulnerable by surrounding them with Flock cameras

Not only does PPD not take the community concerns about Flock and mass surveillance seriously, it is in the process of procuring even more automated license plate readers as part of their updated Mobile Audio Video (MAV) system and also wants to buy drones.

I ask that City Council stop simply nodding yes without asking any hard questions every time that PPD asks for surveillance technology and instead get rid of all ALPRs and all the other warrantless mass surveillance.

Stop surveilling everyone in Pasadena!

Cassandra Beale

M T Sabha,

I urge Pasadena City Council to put safety over surveillance and cut ties with Flock.

Flock ALPR cameras are being used for indiscriminate surveillance, tracking and targeting of countless individuals. While Flock, law enforcement and city government tout the benefits of automated license plate readers for public safety, in reality it endangers everyone - in particular immigrants and their families, people of color, people seeking sensitive healthcare, and the many exercising civil liberties like free speech.

Flock's indiscriminate surveillance is in conflict with constitutional protections and numerous civil liberties groups such as the ACLU and the Electronic Frontier Foundation arguing that the technology infringes on Americans' right to privacy under the Fourth Amendment. Despite repeated attempts from Flock to reform their system, it is apparent ALPR is problematic, insecure and can have devastating consequences for innocent individuals. Academics, researchers and experts overwhelmingly agree that there's a lack of evidence linking flock to crime reduction rates.

There is overwhelming evidence of abuse and misuse of ALPR systems across the country - and Pasadena's ALPR systems are no exception. Pasadena was notified that it was sharing ALPR information across the country, the city lacked ALPR data retention restrictions, and many residents have expressed privacy concerns over the years.

Reporting by NBC shows Pasadena Flock Camera data accessed by numerous law enforcement agencies across California and out-of-state including the FBI, ICE and NCRIC. In one instance, Pasadena's database was searched for "ICE Protest" in San Bernardino...the same day a rally was held outside a San Bernardino facility.

This is a repeated pattern of lack of oversight and adequate guardrails with PPD's ALPR. In years prior, Pasadena was notified that it was sharing ALPR information across the country, the city lacked ALPR data retention restrictions, and many residents have repeatedly expressed privacy concerns.

Despite this overwhelming evidence to the contrary, PPD continues to claim their internal audits found Flock ALPR "complies with state law and department policy".

Pasadena Police says Flock is a "useful tool" - yes, indeed, there's dozens of recent cases documented nationwide where police used Flock and other ALPR tools to illegally track ex-partners, current romantic interests, and coworkers.

I demand the Pasadena City Council:

1. Disable and remove all Flock cameras in Pasadena.
2. Commit to cancelling the Flock contract in September.
3. Do not replace Flock with another ALPR vendor.
4. Commit to funding community-based safety initiatives.

Pasadena, choose your constituents. Restore trust, restore accountability and uphold our constitutional rights.

End all ties with Flock now!

PPD has made our most vulnerable neighbors made them even MORE vulnerable by surrounding them with Flock cameras.

Not only does PPD not take the community concerns about Flock and mass surveillance seriously, it is in the process of procuring even more automated license plate readers as part of their updated Mobile Audio Video (MAV) system and wants to buy drones.
I ask that City Council stop simply nodding yes without asking any hard questions every time that PPD asks for surveillance technology and instead get rid of all ALPRs and all the other warrantless mass surveillance.

Stop surveilling me. Stop surveilling everyone in Pasadena!

City Council Member,

To the Pasadena Mayor, Vice Mayor and Council Members;

I am a high school aged student living in Pasadena and I'm getting worried. Frankly, I'm more than worried, I'm angry.
I'm tired of the Pasadena Police Department insisting that Flock and other automated license plate readers keep us safe. PPD tells the community anecdotal "success" stories but ignores the risks and harm to community members. PPD tells us how great these cameras are but has provided zero statistical analysis of the actual impact.

Meanwhile, the federal government's sanctioned human trafficking happens under the watchful eye of ALPR surveillance cameras, yet our neighbors continue to be kidnapped from the streets of Pasadena. Surveillance cameras have not caught these kidnappers or brought them to justice. I don't think it's a coincidence that Flock cameras are concentrated in the same neighborhoods that have been terrorized the most by ICE raids and kidnappings. PPD has made our most vulnerable neighbors made them even MORE vulnerable by surrounding them with Flock cameras.

Not only does PPD not take the community concerns about Flock and mass surveillance seriously, it is in the process of procuring even more automated license plate readers as part of their updated Mobile Audio Video (MAV) system and wants to buy drones.
I ask that City Council stop simply nodding yes without asking any hard questions every time that PPD asks for surveillance technology and instead get rid of all ALPRs and all the other warrantless mass surveillance.

Stop surveilling me. Stop surveilling everyone in Pasadena!

M T Sabha,

Councilmembers,

I'm writing to urge you to support ending the City's contract with Flock Safety and removing its automated license plate readers.

I understand that public safety and privacy sometimes require difficult tradeoffs. However, while law enforcement finds this technology useful, Flock crosses a line where the potential benefit no longer justifies the risk to our privacy and civil liberties.

These cameras track criminal but they also create a searchable record of the movements of tens of thousands of people who have done nothing wrong. We have already seen examples nationally of ALPR data being accessed or used in ways that communities did not authorize, that violated people rights, and caused real harm to innocent people. This problem is not hypothetical. Despite the reassurances of the corporations that created this technology, and leaders who wish to use it for good, vast amounts of data has been shown to be encrypted and stored for much longer than was agreed to. And as surveillance databases become larger, more interconnected, and increasingly capable of being analyzed by AI, the potential for abuse only grows.

This is particularly concerning at a moment when we're confronting broader questions about authoritarianism and the erosion of civil rights. Even if we believe in the good faith use of this technology by our fellow citizens today, laws can be changed far more quickly than surveillance infrastructure can be dismantled. Once we normalize collecting this information, we can't guarantee that future officials or organizations will use it according to today's good intentions.

Our city has a duty to protect its citizens from threats, yes, but Pasadena also has a duty to protect its citizens fundamental rights. The ability to move through our own city without our movements routinely recorded and made searchable should remain our priority.

The city's contract with Flock expires September 25th 2027. Please attend the meetings related to our concerns about this program. Be a force for change. End Pasadena's relationship with Flock and pursue public-safety strategies that don't require the mass surveillance of our community. There are other ways to keep us safe.

Thank you for your time and consideration.

Sincerely,
James Chan

M T Sabha,

I urge Pasadena City Council to put safety over surveillance and cut ties with Flock.

Flock ALPR cameras are being used for indiscriminate surveillance, tracking and targeting of countless individuals. While Flock, law enforcement and city government tout the benefits of automated license plate readers for public safety, in reality it endangers everyone - in particular immigrants and their families, people of color, people seeking sensitive healthcare, and the many exercising civil liberties like free speech.

Flock's indiscriminate surveillance is in conflict with constitutional protections and numerous civil liberties groups such as the ACLU and the Electronic Frontier Foundation arguing that the technology infringes on Americans' right to privacy under the Fourth Amendment. Despite repeated attempts from Flock to reform their system, it is apparent ALPR is problematic, insecure and can have devastating consequences for innocent individuals. Academics, researchers and experts overwhelmingly agree that there's a lack of evidence linking flock to crime reduction rates.

There is overwhelming evidence of abuse and misuse of ALPR systems across the country - and Pasadena's ALPR systems are no exception. Pasadena was notified that it was sharing ALPR information across the country, the city lacked ALPR data retention restrictions, and many residents have expressed privacy concerns over the years.

Reporting by NBC shows Pasadena Flock Camera data accessed by numerous law enforcement agencies across California and out-of-state including the FBI, ICE and NCRIC. In one instance, Pasadena's database was searched for "ICE Protest" in San Bernardino...the same day a rally was held outside a San Bernardino facility.

This is a repeated pattern of lack of oversight and adequate guardrails with PPD's ALPR. In years prior, Pasadena was notified that it was sharing ALPR information across the country, the city lacked ALPR data retention restrictions, and many residents have repeatedly expressed privacy concerns.

Despite this overwhelming evidence to the contrary, PPD continues to claim their internal audits found Flock ALPR "complies with state law and department policy".

Pasadena Police says Flock is a "useful tool" - yes, indeed, there's dozens of recent cases documented nationwide where police used Flock and other ALPR tools to illegally track ex-partners, current romantic interests, and coworkers.

I demand the Pasadena City Council:

1. Disable and remove all Flock cameras in Pasadena.
2. Commit to cancelling the Flock contract in September.
3. Do not replace Flock with another ALPR vendor.
4. Commit to funding community-based safety initiatives.

Pasadena, choose your constituents. Restore trust, restore accountability and uphold our constitutional rights.

End all ties with Flock now!

Council,

I am writing to share that recently US Senators Schiff and Wyden are now seeking answers from Flock Safety about its widely-reported allegations of abuse and failures to protect American's privacy. As I have advocated for in other correspondence, I want to see the City end its relationship with Flock and remove the surveillance devices from our city.

Letter published at https://www.schiff.senate.gov/news/press-releases/news-sens-schiff-wyden-press-flock-ceo-for-answers-on-troubling-abuse-of-technology-amid-surveillance-network-concerns-push-to-protect-americans-privacy/

United States Senate

WASHINGTON, DC 20510

September 16, 2026

Garrett Langley
Chief Executive Officer
Flock Group, Inc.
3284 Northside Parkway
Atlanta, GA 30327

Dear Mr. Langley:

We write seeking information regarding allegations of potential abuse of Flock's surveillance platforms and whether your existing protocols protect Americans' privacy. Despite a professed public commitment to responsible governance, Flock has repeatedly failed to implement the safeguards necessary to protect Americans' civil liberties.

In the last two years, there have been increasingly troubling, documented reports of law enforcement officials abusing Flock's nationwide license plate readers, camera network, and sensors to carry out extensive, unauthorized surveillance. In 2025, investigative reporting uncovered that a deputy in Johnson County, Texas accessed Flock cameras to track a woman by falsely claiming the case was about a "missing person," when in fact the woman's husband reported her to police for attempting to access reproductive health care.[1] Since then, multiple organizations have come forward to express concern that states restricting reproductive health care access are using Flock data to track down patients traveling to other states for care.[2]

Numerous reports also indicate Immigration and Customs Enforcement (ICE) officials are conducting immigration-related searches of Flock databases to pursue individuals without warrants.[3] While Flock claims to "not work with ICE,"[4] and blames local customers who share information voluntarily with federal authorities for these searches,[5] Flock has repeatedly failed to prevent ICE officials from accessing its data.[6] In one instance, Kansas police went so far as to

use Flock data to target a man who wrote an op-ed criticizing the department's role in a local ICE operation.[7] An analysis of police and court reports by the *Washington Post* revealed that at least 50 law enforcement officers have been charged or accused of misusing Flock's surveillance system for unauthorized purposes.[8]

Despite these alarming developments, Flock continues to expand its network and collaborations with other data-sharing entities. A leaked corporate presentation reveals that Flock plans to partner with Nexar, a dashcam producer, to collect data from roughly 350,000 devices installed in rideshare vehicles.[9] Nexar is currently in negotiations with AI company, Nauto, to create an "intelligence engine" of a scale "that no simulation and no single company's dataset can match."[10] Flock and Nexar's proposal to collect and disseminate data from hundreds of thousands of consumer and rideshare dashcams risks creating an expansive, pervasive surveillance network that lacks adequate consumer consent, transparency, or accountability.

We understand that, in response to the recent public outcry against its products, Flock published a series of updates to its privacy standards.[11] Unfortunately, these changes still leave many important questions unanswered. For example, although Flock shortened the default data retention timeline from 30 days to 7 days, it introduced a feature called, "Evidence Mode," which allows detectives to "preserve specific [Automated License Plate] ALR data as evidence for an active investigation in cold storage."[12] Flock failed to explain how it plans to prevent misuse of this feature or what constitutes an active investigation. Flock also purported to add another capability, titled "offense filtering for sharing," which would allow Flock users to limit searches of their data by outside agencies to certain types of offenses. However, a similar filtering requirement implemented in June 2025 failed to stop officers from querying restricted data using nonsensical, frivolous words to bypass the filtering system, including inputting the phrase "hehehe" to ostensibly circumvent prohibited search terms, instead of listing the actual terms they intended to search for.[13] Clearly, this attempted corrective action was insufficient. Flock also updated its features to require law enforcement customers to adopt a program that

automatically flags abnormal activity for administrator review. What qualifies as abnormal activity remains undefined. Furthermore, it is unclear whether Flock will also require those customers to adopt its "proactive lockout" feature, which would automatically suspend accounts exhibiting abnormal behavior.

Flock claims to have the tools to protect the American people from further abuses of its platform. It must use them. As part of our legislative oversight to protect and preserve Americans' privacy and civil liberties, we request responses to the following questions no later than September 25, 2026:

1. Flock is currently subject to a patchwork of ordinances from cities, counties, and states across the country, how is Flock operating in that type of patchwork environment?
    a. Does Flock track if and when its technology is not compliant with any local ordinances or state laws?
    b. Does Flock request data on whether its technology violates any local ordinances or state laws?

2. When will Flock mandate its "proactive lockout" feature for law enforcement partners?

3. What additional safeguards has Flock included in its "offense filtering for sharing" feature to protect against misuse?
    a. What additional safeguards has Flock implemented to prevent law enforcement officials from querying sensitive information using pretextual justifications?
    b. Why did Flock choose to restrict transparency by switching to a generic dropdown menu rather than implementing stricter auditing of free-text entries? Furthermore, how does a pre-populated list prevent an officer from simply clicking a false, pretextual category to bypass oversight?
    c. Does Flock plan to periodically review whether its law enforcement customers are compliant with its safeguards?

4. What specific safeguards has Flock deployed, placed in development, or evaluated to prevent system misuse of any kind? Please detail how each safeguard operates in practice, the rollout timeline for in-progress features, and the explicit reasons why any considered safeguards were rejected.

---

13 Chad Marlow & Jay Stanley, *Flock Safety Credibility Lost as it Repeatedly Lies to City Councils, Police Departments, and Public Across the Country*, ACLU (July 2, 2026), https://www.aclu.org/news/privacy-technology/tracking-alpr-cameras/flock-safety-credibility-lost-as-it-repeatedly-lies-to-city-councils-police-departments-and-public-across-the-country ("In September 2025 alone, a local Oregon police department was allowed to search Flock's ALPR system after entering "investigation" into the search reason field 111 times and "hehehe" into the field on 20 occasions. . . .").

a. Does Flock support or plan to support hardware authenticators, such as security keys or smart cards, to prevent sharing credentials and ensure every system action is tied to a single verified individual?
b. Does Flock support or plan to support restricting system access so that searches are blocked unless the user is actively on duty, within an authorized location, and within an authorized time window?
c. Does Flock support or plan to support mandatory two-person sign-off to approve searches?

5. What corrective action does Flock plan to take to ensure that women seeking reproductive health care in states that protect access to reproductive health care do not have their data tracked by Flock Automatic License Plate Readers (ALPRs)?

6. How is Flock ensuring that it is compliant with California's privacy laws?
   a. What are the error rates for Flock's data captures?
   b. What accountability and transparency policies does Flock have for error rates?
   c. Has Flock conducted a legal analysis of California's privacy law in relation to its product and its use by local law enforcement?

7. Although Flock's proposed partnership with Nexar may not be in effect at this time, a leaked presentation for the Georgia Attorney General's Office reveals that Flock actively pitched a plan to leverage approximately 350,000 rideshare and delivery vehicle dashcams as mobile license plate scanners.[14] Does Flock still plan to partner with Nexar to collect data from rideshare dashcams?
   a. If so, will rideshare drivers be made aware that their dashcams are collecting data and be allowed to provide consent for such data collection?
   b. Will rideshare drivers participating in the program be required to disclose to their passengers that their data may have been collected by Flock?
   c. What steps does Flock plan to take to protect the privacy of rideshare drivers and their passengers who will be recorded by this or any other similar program?

In addition to the information requests above, as part of our legislative oversight, please preserve all records and communications between you, your employees, consultants, contractors, agents, state and local law enforcement, Immigration and Customs Enforcement, and the Department of Homeland Security, regarding Flock cameras. M T Sabha,

These are your constituents' demands! Cut ties with Flock. End the mass surveillance and stop using ALPRs and forms of mass surveillance in Pasadena.

Flock flouts the Constitution for profit. Don't let them.

Flock's indiscriminate surveillance threatens to turn us more toward fascism and meanness than we are already experiencing in this culture.

I urge you and your staff to take a couple of hours for essential reading on this from a young Harvard Law civil liberties expert.

Alec Karakatsanis "Copaganda: How Police and the Media Manipulate the News."
Good weekend reading!!
There is overwhelming evidence of abuse and misuse of ALPR systems across the country - and Pasadena's ALPR systems are no exception. Pasadena was notified that it was sharing ALPR information across the country, the city lacked ALPR data retention restrictions, and many residents have expressed privacy concerns over the years.

Do the right thing, council members:

1. Disable and remove all Flock cameras in Pasadena.
2. Commit to cancelling the Flock contract in September.
3. Do not replace Flock with another ALPR vendor.
4. Commit to funding community-based safety measures.

M T Sabha,

City Council needs to put justice and safety over surveillance and cut ties with Flock. I urge City Council to end the mass surveillance and stop using ALPRs and forms of mass surveillance in Pasadena.

Flock ALPR cameras are being used for indiscriminate surveillance, tracking and targeting of countless individuals. While Flock, law enforcement and city government tout the benefits of automated license plate readers for public safety, in reality it endangers everyone - in particular immigrants and their families, people of color, people seeking sensitive healthcare, and the many exercising civil liberties like free speech.

Flock's indiscriminate surveillance is in conflict with constitutional protections and numerous civil liberties groups such as the ACLU and the Electronic Frontier Foundation arguing that the technology infringes on Americans' right to privacy under the Fourth Amendment. Despite repeated attempts from Flock to reform their system, it is apparent ALPR is problematic, insecure and can have devastating consequences for innocent individuals. Academics, researchers and experts overwhelmingly agree that there's a lack of evidence linking flock to crime reduction rates.

There is overwhelming evidence of abuse and misuse of ALPR systems across the country - and Pasadena's ALPR systems are no exception. Pasadena was notified that it was sharing ALPR information across the country, the city lacked ALPR data retention restrictions, and many residents have expressed privacy concerns over the years.

Reporting by NBC shows Pasadena Flock Camera data accessed by numerous law enforcement agencies across California and out-of-state including the FBI, ICE and NCRIC.

In one instance, Pasadena's database was searched for "ICE Protest" in San Bernardino...the same day a rally was held outside a San Bernardino facility.

This is a repeated pattern of lack of oversight and adequate guardrails with PPD's ALPR. In years prior, Pasadena was notified that it was sharing ALPR information across the country, the city lacked ALPR data retention restrictions, and many residents have repeatedly expressed privacy concerns.

Despite this overwhelming evidence to the contrary, PPD continues to claim their internal audits found Flock ALPR "complies with state law and department policy".

Pasadena Police says Flock is a "useful tool" - yes, indeed, there's dozens of recent cases documented nationwide where police used Flock and other ALPR tools to illegally track ex-partners, current romantic interests, and coworkers.

I demand the Pasadena City Council:

1. Disable and remove all Flock cameras in Pasadena.
2. Commit to cancelling the Flock contract in September.
3. Do not replace Flock with another ALPR vendor.
4. Commit to funding community-based safety initiatives.

Pasadena, choose your constituents. Restore trust, restore accountability and uphold our constitutional rights.

End all ties with Flock now!

City Council Member,

To the Pasadena Mayor, Vice Mayor and Council Members;

I'm tired of the Pasadena Police Department insisting that Flock and other automated license plate readers keep us safe. PPD tells the community anecdotal "success" stories but ignores the risks and harm to community members. PPD tells us how great these cameras are but has provided zero statistical analysis of the actual impact.

Meanwhile, the federal government's sanctioned human trafficking happens under the watchful eye of ALPR surveillance cameras and our neighbors continue to be kidnapped from the streets of Pasadena. Surveillance cameras have not caught these kidnappers or brought them to justice. I don't think it's a coincidence that Flock cameras are concentrated in the same neighborhoods that have been terrorized the most by ICE raids and kidnappings. PPD has made our most vulnerable neighbors made them even MORE vulnerable by surrounding them with Flock cameras.

Not only does PPD not take the community concerns about Flock and mass surveillance seriously, it is in the process of procuring even more automated license plate readers as part of their updated Mobile Audio Video (MAV) system and wants to buy drones.
I ask that City Council stop simply nodding yes without asking any hard questions every time that PPD asks for surveillance technology and instead get rid of all ALPRs and all the other warrantless mass surveillance.

Stop surveilling me. Stop surveilling everyone in Pasadena!

M Public Comment,

City Council needs to put justice and safety over surveillance and cut ties with Flock.

I urge City Council to end the mass surveillance and stop using ALPRs and forms of mass surveillance in Pasadena.

Flock ALPR cameras are being used for indiscriminate surveillance, tracking and targeting of countless individuals. While Flock, law enforcement and city government tout the benefits of automated license plate readers for public safety, in reality it endangers everyone - in particular immigrants and their families, people of color, people seeking sensitive healthcare, and the many exercising civil liberties like free speech.

Flock's indiscriminate surveillance is in conflict with constitutional protections and numerous civil liberties groups such as the ACLU and the Electronic Frontier Foundation arguing that the technology infringes on Americans' right to privacy under the Fourth Amendment. Despite repeated attempts from Flock to reform their system, it is apparent ALPR is problematic, insecure and can have devastating consequences for innocent individuals. Academics, researchers and experts overwhelmingly agree that there's a lack of evidence linking flock to crime reduction rates.

There is overwhelming evidence of abuse and misuse of ALPR systems across the country - and Pasadena's ALPR systems are no exception. Pasadena was notified that it was sharing ALPR information across the country, the city lacked ALPR data retention restrictions, and many residents have expressed privacy concerns over the years.

Reporting by NBC shows Pasadena Flock Camera data accessed by numerous law enforcement agencies across California and out-of-state including the FBI, ICE and NCRIC. In one instance, Pasadena's database was searched for "ICE Protest" in San Bernardino...the same day a rally was held outside a San Bernardino facility.

This is a repeated pattern of lack of oversight and adequate guardrails with PPD's ALPR. In years prior, Pasadena was notified that it was sharing ALPR information across the country, the city lacked ALPR data retention restrictions, and many residents have repeatedly expressed privacy concerns.

Despite this overwhelming evidence to the contrary, PPD continues to claim their internal audits found Flock ALPR "complies with state law and department policy".

Pasadena Police says Flock is a "useful tool" - yes, indeed, there's dozens of recent cases documented nationwide where police used Flock and other ALPR tools to illegally track ex-partners, current romantic interests, and coworkers.

I demand the Pasadena City Council:

1. Disable and remove all Flock cameras in Pasadena.
2. Commit to cancelling the Flock contract in September.
3. Do not replace Flock with another ALPR vendor.
4. Commit to funding community-based safety initiatives.

Pasadena, choose your constituents. Restore trust, restore accountability and uphold our constitutional rights.

End all ties with Flock now!

Hello all,

I'm a constituent (Marengo Avenue) writing to ask Councilmember Lyon and the whole council to oppose renewing any city contracts for automatic license plate readers and flock cameras in Pasadena. The ones already installed should be removed and no further contacts for this invasive surveillance should be considered in the future. Pasadena should not be a 1984-style surveillance state.

Thanks!

Hello -
Vice Mayor Rivas has shared that Flock and automated license plate readers (ALPRs) will be on the agenda at the 11/17 City Council meeting. Please ensure that all members of City Council receive the emails and any other written comment sent to the Public Safety Committee and that those materials are posted as part of the public record when the agenda for 11/17 comes out. The Public Safety Committee has received a substantial number of emails on the subject since at least April that are directly relevant to the the agenda item on that topic for 11/17.

Thank you!
Humaira Afzal

City Council Member,

The people have spoken, and keep speaking. Most everyone knows that these cameras and license plate readers have been used to harm people and that data on crime prevention is basically the company's message repeated by municipalities. Just no. There are way too many vulnerable people right now thanks to our alleged government. We don't need to add to the list.

And so I demand you end warrantless mass surveillance like dystopian Flock Safety cameras and not turn Pasadena into a nanny state. Automated license plate readers (ALPR) are dragnet surveillance tech that tracks everyone indiscriminately without a warrant and without suspicion of crime.

While Flock, some law enforcement, and government continue to defend mass surveillance for public safety, they are subjecting the general public to surveillance without consent that threatens our right to privacy and our civil liberties. This is not the kind of society we want to live in.

Rather than spending our tax dollars on dystopian and dangerous surveillance technology, Pasadena needs to restore trust, uphold our constitutional rights, and invest in resources that are proven to keep communities safe. End ties with Flock, don't replace them with another vendor, and commit to fund community-based safety programs.

I'm calling on you to join the dozens cities and towns across the country that have cut ties with Flock. Take a stand against Big Brother and keep dystopian surveillance out of Pasadena.

City Council Member,

Hello,

I'm aligned with the following community message—as a former renter and member of Justin Jones' district and now a homeowner in Steve Madison's district.

The presence of these cameras is upsetting, leaving my partner and I with the feeling that we are being watched and tracked as we love our lives.

This is not how we want our tens of thousands of tax dollars spent in Pasadena.

I urge you to end warrantless mass surveillance like dystopian Flock Safety cameras and not turn Pasadena into a nanny state.

Automated license plate readers (ALPR) are dragnet surveillance tech that tracks everyone indiscriminately without a warrant and without suspicion of crime.

I am a homeowner and 4th generation resident of Pasadena, and i do not feel safe and will leave this city, sharing my experience of not being heard if this contract continues. This would not only take away from the local community, but also as a marriage and family therapist working within Pasadena, it is my duty to speak on behalf of all of my clients who fear flock and ALPRs in this city. Disgrace on the council for taking this contract in the first place.

Dear Mayor Gordo and Members of the Pasadena City Council,

I am writing regarding the Flock automated license plate reader (ALPR) item scheduled for the full City Council meeting on Tuesday, November 17.

I am a Pasadena resident and strongly urge the Council to cancel the City's contract with Flock and not replace these cameras with any other ALPR vendor. The contract is set to expire in early February, giving the Council a clear opportunity to either terminate the agreement or simply decline to renew it.

These systems raise serious ongoing concerns about privacy, data retention, potential misuse, and the expansion of surveillance infrastructure in our community. I ask that the City choose a path that prioritizes residents' civil liberties rather than continuing or expanding this type of technology.

Thank you for your consideration of this important matter. I hope the Council will take decisive action to end the Flock program and refrain from bringing in a replacement ALPR system.

Sincerely,
Charles Barakat Pasadena, CA 91104

City Council Member,

As a homeowner in Pasadena, I urge you to end warrantless mass surveillance like dystopian Flock Safety cameras and not turn Pasadena into a nanny state. Automated license plate readers (ALPR) are dragnet surveillance tech that tracks everyone indiscriminately without a warrant and without suspicion of crime.

While Flock, some law enforcement, and government continue to defend mass surveillance for public safety, they are subjecting the general public to surveillance without consent that threatens our right to privacy and our civil liberties. This is not the kind of society we want to live in.

Rather than spending our tax dollars on dystopian and dangerous surveillance technology, Pasadena needs to restore trust, uphold our constitutional rights, and invest in resources that are proven to keep communities safe. End ties with Flock, don't replace them with another vendor, and commit to fund community-based safety programs.

I'm calling on you to join the dozens cities and towns across the country that have cut ties with Flock. Take a stand against Big Brother and keep dystopian surveillance out of Pasadena.

Thank you!

Judy Mak

Hi, my name is Miranda. I've lived in Pasadena for the last five years and have a strong sense of community here and have spoken with many people that live around me here in the city and the general consensus is that flock cameras are bad. We are already over surveillance as it is just by nature of being citizens in this country, it would pain me to know that there would be other organizations out there that are utilizing data about our driving habits.
Not only are they reading license plates, They're also recording our general whereabouts.
They're building a searchable database of every vehicles movement throughout the city, and that is a breach of our own personal information. Police can use this with no warrant and track our whereabouts. This is unacceptable and should not be allowed in this community.

City Council Member,

Dear Mayor Gordo and Members of the City Council,

I currently live in Pasadena and have lived in Los Angeles for the past five years. I love living here and want to continue to enjoy the beauty and privacy that this city has to offer. I implore you to end warrantless mass surveillance like dystopian Flock Safety cameras and not turn my home, Pasadena, into a nanny state. Automated license plate readers (ALPR) are dragnet surveillance tech that tracks everyone indiscriminately without a warrant and without suspicion of crime.

While Flock, some law enforcement, and government continue to defend mass surveillance for public safety, they are subjecting the general public to surveillance without consent that threatens our right to privacy and our civil liberties. This is not the kind of society we want to live in.

Rather than spending our tax dollars on dystopian and dangerous surveillance technology, Pasadena needs to restore trust, uphold our constitutional rights, and invest in resources that are proven to keep communities safe. End ties with Flock, don't replace them with another vendor, and commit to fund community-based safety programs.

I'm calling on you to join the dozens of cities and towns across the country that have cut ties with Flock. Take a stand against Big Brother and keep dystopian surveillance out of Pasadena.

Thank you for your consideration, I hope you make the choice to cut flock cameras and uplift your community.

Regards,
Samantha

City Council Member,

As a current resident of Pasadena, I'm angry and concerned about the presence of Flock cameras in this city.

Contrary to of the stated intention of Flock and the agencies and departments that use it, this technology is being used for means far more nefarious than those which it is advertised for. It is being used by ICE to enact an unlawful, unjust, and inhumane deportation policy. Police officers from states with abortion bans have used these cameras to track down women who have travelled to other states to get the healthcare that they need; officers have also stalked romantic partners using these cameras. None of the above uses do anything to improve public safety.

The presence of Flock cameras in Pasadena is a stain on the city and is in direct opposition to the safety and wellbeing of its residents. I strongly urge the city council to get rid of these cameras, and to not allow any more Flock (or other ALPR) cameras into the city.

Hello,

Please note my comment for the agenda item on Flock/ALPRs at the 11/17 City Council meeting
I am writing as it is critical that the City cancel its contract with Flock and not replace the cameras with another ALPR vendor. We have lived in the area for years and feel its critical we do not give in to this unessesary and dangerous surveilance.

While Flock, some law enforcement, and government continue to defend mass surveillance for public safety, they are subjecting the general public to surveillance without consent that threatens our right to privacy and our civil liberties. There have been many documented cases of law enforcement abusing their access to surveillance data from Flock cameras and other ALPR technology to stalk people, harass them, and violate their privacy. This is not the kind of society we want to live in.

Rather than spending our tax dollars on dystopian and dangerous surveillance technology, Pasadena needs to restore trust, uphold our constitutional rights, and invest in resources that are proven to keep communities safe. End ties with Flock, don't replace them with another vendor, and commit to fund community-based safety programs.

City Council Member,

My name is Sarah Hamid, and I am a proud resident of Pasadena. I've lived here for years and was extremely disheartened to learn of the city's use of Flock cameras and ALPRs within our community.

I urge you to end warrantless mass surveillance like dystopian Flock Safety cameras and not turn Pasadena into a nanny state. Automated license plate readers (ALPR) are dragnet surveillance tech that tracks everyone indiscriminately without a warrant and without suspicion of crime. They have been routinely used to criminalize people accessing essential healthcare and those leaving domestic violence relationships.

While Flock, some law enforcement, and government continue to defend mass surveillance for public safety, they are subjecting the general public to surveillance without consent that threatens our right to privacy and our civil liberties. This is not the kind of society we want to live in, and this technology has no place in Pasadena.

Rather than spending our tax dollars on dystopian and dangerous surveillance technology, Pasadena needs to restore trust, uphold our constitutional rights, and invest in resources that are proven to keep communities safe. End ties with Flock, don't replace them with another vendor, and commit to fund community-based safety programs.

I'm calling on you to join the dozens cities and towns across the country that have cut ties with Flock. Take a stand against mass surveillance and keep dystopian surveillance out of Pasadena.

Sincerely,
Sarah Hamid

My name is Dale Lord and I am a Pasadena resident. I won't be able to attend the council meeting on the 17th, but with regard to the Flock Cameras (and other automated license plate readers, I think they are a gross overstep of our privacy within the city and were a mistake to put into the hands of a police force that cannot be trusted not to shoot each other, let alone the citizens they are supposed to be protecting. I feel less safe in Pasadena with these pieces of technology in place, and Pasadena should cancel their Flock contract.

Thanks,
Dale Lord

City Council Member,

Although I currently live in Azusa, I've lived in Pasadena for a majority of my life. These cameras are completely unnecessary and will ultimately cause more harm than good to this community that I deeply care for. Automated license plate readers (ALPR) are dragnet surveillance tech that tracks everyone indiscriminately without a warrant and without suspicion of crime.

While Flock, some law enforcement, and government continue to defend mass surveillance for public safety, they are subjecting the general public to surveillance without consent that threatens our right to privacy and our civil liberties. This is not the Pasadena that I grew up with, nor is it one that I wish to come into fruition.

Rather than spending our tax dollars on dangerous surveillance technology, Pasadena needs to restore trust, uphold our constitutional rights, and invest in resources that are proven to keep communities safe. End ties with Flock, don't replace them with another vendor, and commit to fund community-based safety programs such as a citizen's watch or community hotlines.

I'm calling on you to join the many cities and towns across the US that have cut ties with Flock. Take a stand against this inhumane company and keep dystopian surveillance out of Pasadena.

Written public comment:

Flock cameras and ALL ALPRs are Primarily used for private corporations to surveil and strip mine the personal data of private citizens, including the individual members of this council, and sell it to other predatory entities for profit. If this is the world that members of this council want to live in, then please restrict the permission for these cameras to point at your own houses and restrict them from surveilling the rest of us who DO NOT WANT our private lives to be exploited for the profit of shareholders and venture capital firms. Any permission for these companies to operate in any public place violates even the civil liberties of the elected officials and their own family members who vote to allow it. It is a tragedy that our communities are being turned into surveillance states by these data mining parasites, under the fallacy that it increases their security. IT IS A LIE.

Any council member who votes to allow this invasion to continue in Pasadena or any community in the nation needs to ask themself the following question:

"Do I trust these companies to store all of mine and my spouse's and my children's daily movements in their notoriously insecure databases? To sell to anyone willing to pay or vulnerable to bad actors to hack, steal and sell that information for whatever purposes they like?" If that answer is no then you MUST GET FLOCK, AXON,MOTOROLA VIGILANT AS WELL AS LVT SURVEILLANCE.

Dear Pasadena City Council,

Thank you for your kind and dedicated service to the Pasadena community.

This email is to express my opposition to Flock cameras currently installed in our city and to request that this contract not be renewed, now or ever. Further, there should be no other ALPR systems installed in our city as a replacement, now or ever.

Nothing violates public trust more than the wonton, extra-judicial spying on American citizens and, as we work to reduce the malfeasance of technology companies' and executives' influence throughout our society, it begins with limiting these installations and additional humanity-embracing actions.

To wit, the proposal to purchase garbage trucks in Pasadena that can visually scan streets and houses for refuse "compliance" is another example of ludicrous over-reach and a further potential violation of public trust in city government.

Lastly, there is an illegal spy camera installed on the lamp-post at 415 Cherry Street, Pasadena, 91105 that needs to be removed immediately.

I look forward to your response toward our shared goal of reinstilling public trust and care in Pasadena and among its citizenry.

Thank you,
Dr. Edward J. Van Luinen
Pasadena, CA 91105
