To Whom It May Concern,

I am sending this in for submission as a written public comment for the upcoming Pasadena City Council Meeting. Specifically, I am writing as a Pasadena resident about the agenda item on Flock/ALPRs at the 11/17 City Council meeting.

In short, I am asking the City to **cancel** its contract with Flock, as well as with any other potential ALPR vendor. I am strongly against the surveillance it represents on our loved community.

As a professor of media studies and scholar of surveillance technologies, my research and that of others has affirmed, over and again, the harmful effects of these kinds of technologies on the communities they affect--harmful effects that historically outweigh any promised or marketed benefits. For instance, a 2022 ACLU memo on Flock details the accuracy problems this technology has where "even a low error rate can produce tragic consequences given the scale of Flock's operations." (ACLU Flock Memo). Additionally, the ACLU raises the concern that Flock will "want to access its customers' cloud data in order to improve its AI, as it says it is already doing with ALPR data." If and when the company moves into collecting live video and other increasingly sensitive data, the ACLU warns that "it will create a significant privacy issue as well" (ACLU Flock Memo).

Other scholars have noted that the Flock system "acts as a communicative network that exposes people to discriminatory police surveillance," "facilitates the application of far-right policing cultures across jurisdictions" and "allows for unlawful targeting of women seeking reproductive care, immigrants, and vulnerable others irrespective of state or city prohibitions against such profiling" (Monahan, "Grounding the Flock") Needless to say, Pasadena's financial investment in Flock facilitates these harmful effects across the nation.

It is not simply Flock that produces these problems but all ALPR vendors. Marketing around "accuracy" and "reliability" from these non-Flock companies do not solve the extant problems with this kind of mass, AI-driven surveillance system but simply disguise it under another name. For this reason, I ask that the Flock cameras not be replaced with another ALPR vendor.

Pasadena is my home, and my community. Surveillance technology like Flock has no place here.

Thank you,

Andrea

Subject: I Do Not Want Mass Surveillance in Our Community

[!] **CAUTION:** This email was delivered from the Internet. Do not click links or open attachments unless you ***know*** the content is safe. Report phish using the Phish Alert Button (PAB). For more information about the PAB view article "KB0011474" on the DoIT portal.

City Council Member,

I urge you to end warrantless mass surveillance like dystopian Flock Safety cameras and not turn Pasadena into a nanny state. Automated license plate readers (ALPR) are dragnet surveillance tech that tracks everyone indiscriminately without a warrant and without suspicion of crime.

While Flock, some law enforcement, and government continue to defend mass surveillance for public safety, they are subjecting the general public to surveillance without consent that threatens our right to privacy and our civil liberties. This is not the kind of society we want to live in.

Rather than spending our tax dollars on dystopian and dangerous surveillance technology, Pasadena needs to restore trust, uphold our constitutional rights, and invest in resources that are proven to keep communities safe. End ties with Flock, don't replace them with another vendor, and commit to fund community-based safety programs.

I'm calling on you to join the dozens cities and towns across the country that have cut ties with Flock. Take a stand against Big Brother and keep dystopian surveillance out of Pasadena.

City Council Member,

Hello. My name is Eden Paul, and I am a Pasadena resident.

I am urging you to cancel the City's contract with Flock Safety, remove all automated license plate readers from our streets, and commit to not replacing Flock with another surveillance vendor.
Operating one of the region's largest ALPR networks subjects every driver in Pasadena to warrantless mass surveillance. Investigations revealed Pasadena's Flock data was accessed by outside and federal agencies - including ICE, the FBI, and NCRIC.

Meanwhile, research shows no reliable link between Flock and crime reduction, while false hits lead to dangerous police stops.

I am a recent resident of Pasadena, a city in which I have always dreamed of living, as I saw it as a one of the safest places to live. The idea of having flock cameras in my city does not make me feel safe.

Please restore public trust, protect our Fourth Amendment rights, and redirect these funds into proven, community-based public safety programs. Thank you.

Eden Paul

Subject: Re: Agenda Item AR 9 – Policy Direction on the Pasadena Police Department Automated License Plate Reader (ALPR) Program Through 2028

[!] **CAUTION:** This email was delivered from the Internet. Do not click links or open attachments unless you ***know*** the content is safe. Report phish using the Phish Alert Button (PAB). For more information about the PAB view article "KB0011474" on the DoIT portal.

Dear Mayor Gordo and Members of the City Council:

I recommend that the Council continue the existing Flock ALPR program through the authorized extensions while directing staff to implement tighter, binding safeguards on retention, sharing, placement, and reporting. The measurable public-safety results are real; the privacy and equity concerns raised at the May 20 Public Safety Committee meeting—and in the 365 letters submitted (276 from Pasadena residents)—are also real. Pasadena can address both.

As I wrote in my August 31, 2026 guest essay in *Pasadena Now*, "Pasadena's Flock Cameras: Keep the Tool, Tighten the Screws," we do not have to choose between safety and accountability. Attachment A documents concrete results: in 2025 the system helped recover 27 of 89 stolen vehicles (more than 30 percent), returning roughly $700,000 in property to residents. All-offense clearance rates rose from 28.96 percent in 2023 to 35.26 percent in 2025. One recent example is the January 28, 2026 homicide in which ALPR helped identify and link vehicles to the scene, leading to the suspect's arrest within 12 hours. Independent Police Auditor Teresa Magula's review found the system used overwhelmingly for legitimate investigations, with no evidence of immigration-related searches or a pattern of misuse.

At the same time, the technology creates a searchable record of vehicle movements on public streets. Concerns about geographic concentration, residual data-sharing risks, and impacts on immigrant families must be addressed before any further commitment.

The May 20 Public Safety Committee discussion reflected these tensions. Vice Mayor Rivas supported terminating the contract. Councilmembers Hampton and Jones raised issues with Flock Safety and favored exploring a different vendor with stronger local data controls. Councilmember Madison supported continued use with lawful adjustments and correctly noted that the discussion has included relatively little direct input from crime victims. The stolen-vehicle recovery data and the clearance-rate improvement are proxies for that impact; they should not be dismissed.

My recommendation remains: keep the tool and tighten the screws. I urge the Council to provide clear policy direction that:

1. Continues the existing program through the authorized extensions (not to exceed $152,500 through approximately February 2028), using existing appropriations, conditioned on the following measures being

codified in policy or contract amendments.

2. Reduces the default data retention period from 30 days to 7 days (consistent with Flock Safety's recent recommendation). Any longer hold should require a documented, auditable exception tied to an active investigation.
3. Strengthens local-only sharing rules beyond the current California-only limitation, keeps nationwide and out-of-state sharing disabled, and maintains the existing prohibitions on immigration and reproductive-health uses.
4. Requires regular public reporting (at least quarterly) on searches, investigative outcomes, access requests from other agencies, and any audits or investigations of potential misuse. Reports should go to both the Public Safety Committee and the Community Police Oversight Commission.
5. Directs a fresh review of camera placement for geographic balance and equity, using crime data and community input.
6. Maintains and expands independent auditing and the transparency portal.
7. Explores, in parallel and without delaying the short-term continuation decision, whether an alternative vendor could deliver comparable investigative value with stronger local data control—addressing concerns raised by several Committee members on May 20.

These steps are consistent with the safeguards already described in the Agenda Report and Attachment A, with the approach I outlined in my August 31, 2026 *Pasadena Now* essay, and with the substance of the divided discussion at the Public Safety Committee. They also honor the purpose of the Committee I helped establish: professional policing paired with meaningful civilian oversight.

I am prepared to support continuation of the program on the condition that the safeguards above are made explicit and enforceable. Pasadena can retain a useful investigative tool without accepting open-ended data retention or opaque sharing. We can get this right.

Thank you for your consideration. I am available to discuss this further if it would be helpful.

Respectfully,

William Paparian
Former Mayor of Pasadena

Subject: Cancel Flock contract-- no more mass ALPR surveillance in Pasadena!

[!] **CAUTION:** This email was delivered from the Internet. Do not click links or open attachments unless you ***know*** the content is safe. Report phish using the Phish Alert Button (PAB). For more information about the PAB view article "KB0011474" on the DoIT portal.

This comment is for the agenda item on Flock & ALPR cameras at the 11/17 City Council meeting.

I am a Pasadena resident concerned about the quiet and insidious mass-installation of ALPR cameras used to surveil the people of Pasadena and surrounding areas.

We, the people of Pasadena, do not want to live in a dystopia where we are, indiscriminately surveilled 24/7. ALPR cameras like Flock are a non-consensual invasion of our right to privacy. This constant mass-surveillance actually has the opposite of its intended effect; as a woman, it makes me feel unsafe to walk around in public because I do not know who's watching me through the camera, and I have no control over how that footage will be used. This technology is downright creepy, and it's dangerous; these cameras are ripe for abuse by bad actors to stalk women and children, and by ICE to stalk and kidnap people from our community.

Is a panopticon really the environment we want to be fostering here in Pasadena? To me, that doesn't feel aligned with the beautiful, historic, vibrant city I know and love. I urge you to sever ties with Flock, tear down the cameras, and pledge not to replace them with another brand of ALPR camera. Rather than spending our tax dollars on dystopian and dangerous surveillance technology, Pasadena needs to restore trust, uphold our rights, and invest in resources that are actually proven to keep communities safe.

Thank you.

Sincerely,
Elizabeth Walcher

Hello,

I'm a Pasadena resident and I'm writing to express my concerns with the use of and funding of Flock surveillance cameras in my city.

Pasadena currently has a huge number of Flock cameras in place. I was shocked to see the number of them on the map, and I can only imagine how many tax dollars these are costing us. I believe mass surveillance is unethical, costly, and a poor strategy to address crime. Pasadena should instead be funding preventative programs and resources that protect vulnerable groups at the source.

I do not want to be surveilled as if I'm already under suspicion as I go about my daily life. Nor do I think it's helpful to indiscriminately collect all this data. What a waste. The collection and processing of the data alone takes up huge amounts of natural resources.

Consider this my vote to REMOVE Flock cameras in Pasadena entirely.

Thank you,
Mallory Kujanek

Jason,

As a resident and homeowner in Pasadena I want you to know that I ***strongly*** oppose any surveillance project within the city, including FLOCK ALPR cameras or turning garbage trucks into roaming surveillance vehicles.

This **does not belong** in Pasadena! Any elected member supporting these initiatives will not get my vote and I will work tirelessly to support any representative backing the removal of this invasive technology from our streets!

Heed your constituents!

Sabha, Tamer

[!] **CAUTION:** This email was delivered from the Internet. Do not click links or open attachments unless you ***know*** the content is safe. Report phish using the Phish Alert Button (PAB). For more information about the PAB view article "KB0011474" on the DoIT portal.

City Council Member,

I urge you to end warrantless mass surveillance like dystopian Flock Safety cameras and not turn Pasadena into a nanny state. Automated license plate readers (ALPR) are dragnet surveillance tech that tracks everyone indiscriminately without a warrant and without suspicion of crime.

While Flock, some law enforcement, and government continue to defend mass surveillance for public safety, they are subjecting the general public to surveillance without consent that threatens our right to privacy and our civil liberties. This is not the kind of society we want to live in.

Rather than spending our tax dollars on dystopian and dangerous surveillance technology, Pasadena needs to restore trust, uphold our constitutional rights, and invest in resources that are proven to keep communities safe. End ties with Flock, don't replace them with another vendor, and commit to fund community-based safety programs.

I'm calling on you to join the dozens cities and towns across the country that have cut ties with Flock. Take a stand against Big Brother and keep dystopian surveillance out of Pasadena.

Sarah Dempe

Subject: Pasadena Police License Plate Reader Program

[Some people who received this message don't often get email from Learn why this is important at https://aka.ms/LearnAboutSenderIdentification]

[!] CAUTION: This email was delivered from the Internet. Do not click links or open attachments unless you know the content is safe. Report phish using the Phish Alert Button (PAB). For more information about the PAB view article "KB0011474" on the DoIT portal.

Dear City Council,

I write to oppose continuation of the Pasadena Police License Plate Reader Program. Though arguments are advanced that it aids in the recovery of stolen vehicles, the deep and excessive intrusion into personal privacy and person liberty is not worth the trade. As has been widely documented in the news, Flock camera data and other license plate readers have been readily accessed by federal agencies, other law enforcement, current and former employees stalking partners, and nefarious hackers. Even with strict data retention periods, camera data persists on servers that can be accessed well beyond any retention period. Please end the unconstitutional surveillance of Pasadena residents and guests.

Sincerely,
John Callas

Subject: Urging You to Cancel the Flock Contract (Council Meeting 11/17 Agenda Item 9)

[!] **CAUTION:** This email was delivered from the Internet. Do not click links or open attachments unless you ***know*** the content is safe. Report phish using the Phish Alert Button (PAB). For more information about the PAB view article "KB0011474" on the DoIT portal.

City Council Member,

Dear Council and Mayor,

My name is Nicholas Rabb. I'm a resident of District 2. I would like to address agenda Item 9 for the upcoming Pasadena City Council meeting on 11/17.

I am writing to urge you to cancel the Flock contract that the City is currently in. Flock is an unaccountable ALPR company with a horrible track record, including being used for stalking, sharing data with ICE, and wrongful detentions. Even in our own city, the data was being shared with the NCRIC fusion center, which in turn shares data to Federal agencies, until June of this year when an NBC investigation revealed this fact and sharing with that specific entity was turned off.

I understand that you have had discussions with the Police Department about Flock's utility compared to its downsides. I attended several presentations given by PPD about Flock's usefulness in their eyes. In my view, the evidence is underwhelming. While PPD reports statistics about how many cases they've "solved" while using Flock, this does not report if Flock was *essential* in solving these cases. I know for a fact that it is actually exceedingly difficult to show that ALPR systems have positive effects on police closure rates or other measures of crime mitigation, and cannot be disentangled from conflations from other policing practices or community factors. I have spoken with several criminology instructors in higher education -- folks with PhDs actively doing research into ALPR efficacy -- who say PD's arguments for efficacy are completely off base.

Then on the other hand, the harms that Flock presents to our community are severe. ICE has repeatedly targeted neighborhoods in our city, and are again at our doorstep, ramping up their operations. We know for a fact that ICE is interested in getting their hands on ALPR data

to support their raids. There is a large amount of credible reporting on the matter. There has even been documented evidence by community organizations in our city that ICE raids geographically correlate with the spots that Flock cameras are positioned. Whether we can prove ICE is using our Flock cameras or not (either through fusion center sharing or by accessing through another city's access to our cameras), this is cause for alarm. It is a demonstration that these cameras do not keep our most vulnerable residents safe from the institution that threatens them the most: ICE and the Federal government's policing.

ALPRs in general are a highly problematic technology with unproven benefits as compared to community-based policing practices. As you reconsider Pasadena's relationship with Flock, I highly encourage you to not fall into the trap of just considering another vendor given the bad press Flock has received. Vendors such as Axon or Motorola provide ALPRs with the same flaws and some even worse. Axon's ALPR system is even more deeply integrated into a massive surveillance apparatus that the Federal government has built over years, and provides data to ICE and other problematic agencies.

Instead, Pasadena needs to restore trust, uphold our constitutional rights, and invest in resources that are proven to keep communities safe. I strongly urge you to work with community safety experts who are not just reliant on surveillance-based policing. There is a lot that our community could to to fund programs that keep us safe and do not sacrifice certain residents in the process.

I urge you to cancel the Flock contract and take your time working with experts before deciding to keep ALPRS under a different vendor. I look forward to the discussion on Tuesday.

Sincerely,
Nicholas Rabb, PhD
Pasadena Resident, District 2

To the city council,

I am a resident and business owner based in Pasadena and am writing with concern about the privacy violations and safety concerns surrounding Flock and similar surveillance equipment. I ask that the council cancel its contracts and relationships with Flock and that you do not replace it with any other similar monitoring company.

Pasadena is my home by choice. After growing up and spending much of my career in conservative Southern states, I discovered in California a stronger sense of community and a wider embrace of diversity that made me feel rooted. It has been horrifying over the past couple of years to watch this city be infiltrated by ICE and threatened with excessive use of force; this kind of violence only escalates when a city pours funds into surveilling its citizens, tracking them and treating them not like community members but like hostile combatants. Our comings and goings, our relationships to others, our habits and routines do not deserve to be monitored and recorded as if we are criminals. We deserve safety and privacy. We certainly deserve a local government that focuses on protecting us rather than further arming with information those departments not only designed to harass and kidnap our neighbors but which themselves are often run by criminals or those with criminal intent. It is no secret how police and ICE have used these cameras to create CSAM, to stalk and threaten women, and to retaliate against those who question them.

I implore the council to end this surveillance, removing Flock and all similar systems from our city.

With sincere regards,
Dr. Miranda Garno Rossa

To the Pasadena City Council Members,

I am writing with a public comment on agenda item 9 regarding the city's contract with Flock for ALPR technology. Given what we know about how Flock collects and stores data, I believe the city should cancel its contract with Flock and not enter into any new contract for ALPR technology. It is scary to have detailed data on the movement of Pasadena residents in the hands of a large tech corporation and we have seen that Flock and other surveillance and tech corporation have willingly or under legal force turned over their data to the federal government, particularly to ICE. We should not be aiding the federal government's fascist efforts to kidnap the people of our city. Please cancel the contract with Flock, as many cities around the country have done, and please do not enter into any new contracts for ALPR or other forms of surveillance technology.

Sincerely,
Margaret Starbuck
District 5 resident

Mayor Gordo, Vice Mayor Rivas and Council Members,

I am a 20-year resident of Pasadena residing in Council District 5.

I want to express my opposition to continuing any type of contract with Flock for their cameras and surveillance technology.

Over the past months it has become increasingly reported that this technology is being abused and used to create a culture of fear and intimidation that often strips basic civil rights from people living, working and some just passing through communities. The data collected by these cameras is used to target and intimidate - leading to abuses of power that support authoritarian efforts at the federal level and left unchecked create a police state.

The recent blue wave on election day demonstrates the electorate's unwillingness to allow these and other abuses to become business as usual. This is not a fringe issue.

Flock itself has shown not only indifference, but blatant disregard for privacy, the rights of individuals and in some cases the rule of law. AI technology has enhanced the capability of these cameras beyond the need to simply protect communities, empowering them to facilitate the targeting of individuals on a national level - an unprecedented scope that further empowers a corrupt federal administration that has ceased to follow the rule of law. Please do not allow Pasadena to be complicit in these efforts by supporting the continuation of the Flock contract.

Thank you for your consideration.

City Council Member,

I urge you to end warrantless mass surveillance like dystopian Flock Safety cameras and not turn Pasadena into a nanny state. Automated license plate readers (ALPR) are dragnet surveillance tech that tracks everyone indiscriminately without a warrant and without suspicion of crime.

While Flock, some law enforcement, and government continue to defend mass surveillance for public safety, they are subjecting the general public to surveillance without consent that threatens our right to privacy and our civil liberties. This is not the kind of society we want to live in.

Rather than spending our tax dollars on dystopian and dangerous surveillance technology, Pasadena needs to restore trust, uphold our constitutional rights, and invest in resources that are proven to keep communities safe. End ties with Flock, don't replace them with another vendor, and commit to fund community-based safety programs.

I'm calling on you to join the dozens cities and towns across the country that have cut ties with Flock. Take a stand against Big Brother and keep dystopian surveillance out of Pasadena.

Dear Councilmembers,

I would like to register my opinion that we end our contract with Flock and proceed to remove all of the ALPRs from Pasadena and not replace them. I don't believe the City of Pasadena should have as much data on its citizens as it has access to through these tools, and I do not consent to it. While ALPRs are marketed as increasing public safety, there are also both known and potential unsafe uses of our data. We are already aware that law enforcement personnel in other communities have inappropriately accessed these data to stalk women and share information on migrants with I.C.E., for instance.

In a world where people are surveilled more and more without our consent or knowledge, I urge you to reduce this form of surveillance in our city.

Sincerely,
Sarah Richart
Pasadena District 5 Resident

Dear Mayor Gordo, Vice Mayor Rivas, Councilmember Jones, and the rest of Council,

Contracts with Flock and all other suppliers of ALPR and tracking devices and systems must be cancelled in Pasadena immediately!

The freedom of public movement is central to the freedom of association, a cornerstone of the First Amendment. Sanctioning the indiscriminate tracking of residents is a breach of the constitution.

We also hold that Deflocking Pasadena is a matter of public safety. As multiple investigations have concluded, police officers in various jurisdictions have used Flock and similar systems to unreasonably and illegally stalk people whom they personally know, especially women. While there is no data yet to state this is occurring or has occurred in Pasadena, we also don't know for a fact that this hasn't or isn't taking place. Can you put stalking past a department that "horseplays" while aiming and discharging firearms at each other?

Deflocking Pasadena is also a public safety matter because stalking is a practice that the federal administration is using in its immigration operations. And it has been shown by an investigative report that the federal government has indeed accessed Pasadena's database.

Mayor Gordo, in 2025 you wrote an impassioned op-ed about your immigrant experience and your commitment to protecting Pasadena residents' civil rights. As you wrote, "I hope that Pasadena's leadership can be a model for how cities can respond to a government that is increasingly infringing upon our individual rights and sovereignty as a city and state. Because this overreach will not stop with us, and it will take all of us to defend the core principles of our democracy."

It is time we see Pasadena demonstrate leadership through concrete action: Stop Pasadena's overreach as well as its careless, even if indirect and unintended, cooperation with unconstitutional and inhumane immigration enforcement tactics.

The police department will argue that these tracking systems are essential to their work. The Pasadena Police Department has plenty of other tools at their disposal to do their job. The incessant unconstitutional tracking and stalking of residents through surveillance technology amounts to criminalization. Don't we have the freedom of due process?

We don't live in Pasadena to feel like we are driving mobile ankle monitoring devices as we move about the city.

Deflock Pasadena now!

Sincerely,
Gabriela Jiménez, PhD

Subject: Public Comment - Agenda Item 9 (Nov 17, 2026): OPPOSITION to Flock ALPR Renewal

Some people who received this message don't often get email from Learn why this is important

[!] **CAUTION:** This email was delivered from the Internet. Do not click links or open attachments unless you ***know*** the content is safe. Report phish using the Phish Alert Button (PAB). For more information about the PAB view article "KB0011474" on the DoIT portal.

Dear Councilmember Rivas,

I am a resident and voter in your district living near Los Robles Ave and Buckeye. I am writing to register my unequivocal opposition to Agenda Item 9 on the November 17, 2026 City Council agenda: the proposed continuation and contract extension for the Pasadena Police Department's Automated License Plate Reader (ALPR) program with Flock Safety.

I urge you to vote NO on authorizing any contract extension through 2028 and to direct staff to terminate Contract No. 32679 and remove these cameras from Pasadena.

My opposition is based on the following concerns:

- Warrantless Mass Surveillance of Innocent Residents: Flock cameras operate as an indiscriminate dragnet, capturing and cataloging the movements of hundreds of thousands of law-abiding drivers going about their daily lives—commuting, visiting places of worship, attending medical appointments, and participating in public gatherings. An automated tracking system that logs the movements of people suspected of no crime violates our community's basic privacy rights.
- Flock's "7-Day Retention" Does Not Fix the Problem: The staff report points to Flock's newly announced 7-day default retention option as a meaningful concession. It is not. Retaining mass surveillance data for seven days instead of thirty does not change the fact that this is warrantless mass surveillance. A shorter dragnet remains a dragnet.
- Audit Loopholes and Dropdown Menus Are Cosmetic: Replacing free-form text with standardized dropdown boxes for search justifications does not prevent misuse, bad-faith queries, or pretextual fishing expeditions. It simply provides bureaucratic cover while obscuring the lack of individualized reasonable suspicion required for law enforcement searches.
- Risks to Vulnerable Communities and State Law Protections: Regardless of local department policy, centralized cloud-based ALPR networks inherently pose severe risks of data leakage and sharing. Independent reporting and state audits have repeatedly revealed that out-of-state entities and federal agencies (including ICE) have accessed California ALPR systems in conflict with California laws (such as SB 54 and AB 1242, which protect immigrant communities and out-of-state reproductive healthcare seekers). Pasadena should not be outsourcing local surveillance infrastructure to a private company whose platform creates these vulnerabilities.

- Disproportionate Impact: Automated surveillance technology consistently concentrates in working-class neighborhoods and communities of color, reinforcing harmful profiling and eroding community trust in local government.
- Fiscal Waste: Spending an additional $152,500 of taxpayer money to extend this contract—bringing total spending to nearly $800,000—is an irresponsible use of city funds. Pasadena's public safety budget should be spent on proven, direct community services and infrastructure, not on subsidizing a private, for-profit surveillance vendor.

As my representative on the City Council, I ask you to represent your constituents by voting NO on Item 9, rejecting any further contract extensions with Flock Safety, and ending this program in Pasadena.

Sincerely,
Ricardo Chimal, Jr

City Council Member,

Dear Mayor Gordo and Pasadena City Council representatives,

I oppose the use of any ALPR cameras. Information gathering about people that used to be permitted only through warrants, is now purchasable. This is a loophole that will be closed through litigation. Pasadena could be sued as a result of using this kind of technology to surveil its citizens. It is an overreach, and it is only a matter of time before it is shut down by the federal courts. Let's be on the right side of history for a change. Let's take out any type of mass surveillance we have. We all know that mass surveillance is used by the corrupt immigration enforcement system in the United States right now. I live in Pasadena and I don't want a penny of any of my taxes to go towards this kind of surveillance.

I urge you to end warrantless mass surveillance.

Sincerely,
Cybele Garcia Kohel

I urge you to end warrantless mass surveillance like Flock Safety cameras. Automated license plate readers (ALPR) are dragnet surveillance tech that tracks everyone indiscriminately without a warrant and without suspicion of crime.

While Flock, some law enforcement, and government continue to defend mass surveillance for public safety, they are subjecting the general public to surveillance without consent that threatens our right to privacy and our civil liberties. **This is not the kind of society we want to live in.**

Rather than spending our tax dollars on dystopian and dangerous surveillance technology, **Pasadena needs to restore trust, uphold our constitutional rights, and invest in resources that are proven to keep communities safe**. End ties with Flock, don't replace them with another vendor, and commit to fund community-based safety programs.

I'm calling on you to join the dozens cities and towns across the country that have cut ties with Flock.

Councilmembers,

There are a lot of good reasons to take down Flock cameras and I'm sure people are writing to you about many of them, so I'm just going to point out one. In September, a group of hackers pulled down a Flock camera in an unknown city and gained access to its data, sharing it with journalists at Wired. This is a massive security vulnerability, and the next people to do this are not likely to share that information only with journalists. We no longer only have to worry about law enforcement officers and Immigration and Customs Enforcement abusing the information collected by Flock cameras, we also have to worry about random individuals accessing the locally stored data and using it for their own purposes.

Even setting aside philosophical and ethical concerns about mass surveillance (which are entirely valid concerns to have), it's just a bad idea to have that much sensitive information on people's movements in the first place because there is no perfect security system. Even assuming the information from those cameras will never be misappropriated by the people who are supposed to have it (which would be a naive assumption to make), collecting the information at all creates an opportunity for it to fall into the wrong hands.

Please cancel the city's contract with Flock immediately and do not replace it with another tool of mass surveillance.

Best,
Ash Riveire
District 2 resident

I have heard horror stories of how cops abuse their power and use Flock to stalk their ex-wives or ex-girlfriends. I've heard horror stories of Flock getting the wrong license plate and then the cops swarming in on the wrong vehicle with guns drawn. There was one horror story of thousands of cameras being used to track a woman that got an abortion. This is so dystopian, and we should not be supporting this. Flock loves to tout how supposedly this improves safety, but it's quite the opposite. It's troubling that we invest our money in this oppressive technology instead of investing in better public resources. Public safety means fostering community and looking out for one another -not fearing one another.

Subject: Public Comment to Pasadena City Council for Nov. 17 meeting Re: Item 9, Flock ALPRs

Some people who received this message don't often get email from · Learn why this is important

[!] **CAUTION:** This email was delivered from the Internet. Do not click links or open attachments unless you ***know*** the content is safe. Report phish using the Phish Alert Button (PAB). For more information about the PAB view article "KB0011474" on the DoIT portal.

Indivisible Alta-Pasadena is pleased to comment on Item 9 regarding the use of Flock ALPRs by the Pasadena Police Department.

Specifically, Indivisible Alta-Pasadena joins with DeFlock Pasadena in calling on the city to:

- Disable and remove all Flock Safety cameras around Pasadena;
- Commit to canceling the contract with Flock;
- Not replace Flock with another ALPR vendor; and to
- Use the money that has funded Flock for community-based safety initiatives.

We understand that since September of 2023, the Pasadena Police Department has purchased and installed 61 Flock cameras at a cost of about $1 million, and has obtained funds to install 11 additional cameras. These cameras capture an average of a million images each month of people driving around Pasadena.

Today, we applaud that the council has agreed to discuss whether or not to continue using the cameras and urge you to join the 149 cities in California and across the nation—including Los Angeles, Oxnard, Santa Cruz, South Pasadena, Denver, Austin, Lansing, MI, and Tempe, AZ, to name but a few—that have canceled their contracts with Flock based on concerns that the data has been repeatedly misused to violate people's civil liberties and privacy.

ICE has accessed Flock databases in California despite sanctuary state prohibitions. Police have used the Flock network to personally stalk people, to track down women traveling from states where abortions are banned, and to surveil No Kings protesters. Flock cameras have even been used to surveil children in public spaces in the Atlanta suburb of Dunwoody. Residents there were aghast to learn that Flock cameras are taking pictures of children at a park playground, a public pool, and a Jewish community center.

Indeed, throughout 2025 and 2026, Flock Safety was subject to several scandals in California specifically, calling into question the technology's utility. 404 Media, for instance, found that 71 California police agencies were sharing ALPR data with ICE even though state law SB 54 prohibits them from doing so. Escondido police used Flock to track people going to an anti-ICE protest. LAPD and Sheriff's departments in San Diego and Orange County searched Flock on behalf of ICE or CBP 100 times in June of 2025.

Based on the continued mis-use of the data produced by Flock and ALPR systems, we ask you to pull the plug on the technology's use, once and for all. We are tired of being tracked. We object to our tax money being used to help build a police state infrastructure for the likes of ICE and the Trump Administration. Simply put, it's time to terminate the use of ALPRs.

Submitted on Behalf of Indivisible Alta-Pasadena By

Bill Kelly
